Mr. MONRONEY. Is it not a fact that the statement by Governor Stevenson, proposing negotiations looking toward the banning of hydrogen bomb tests and the establishment of aerial inspection or the presently known means of detecting atomic explosions, was pooh-poohed and was called ridiculous nonsense by the spokesmen for the White House? So I think we observe an indication of a change of attitude on the part of the White House today, when it advocates the banning of thermonuclear bomb tests, such as have occurred in the Pacific area, and when it also furnishes leadership—as it has done during the past few weeks—about such banning, in connection with the discussions at London. I think that constitutes a shift from the position taken during the campaign, when the Democrats were said to be recklessly trying to turn over the H-bomb to Russia. However, at the present time, with the same detection devices available, and with no more ability to police than we had before, we find the White House moving in the same direction as that proposed by Mr. Stevenson.

Mr. NEUBERGER. Mr. President, I think the Senator from Oklahoma has brought up a most important point. During the 1956 campaign Gov. Adlai E. Stevenson and those who took the same position that he did were ridiculed, because of their warning with respect to the danger inherent in the fallout of

strontium-90 as a result of the hydrogen bomb tests. Yet in the past few months, the most eminent scientists of our Nation and of the world have been warning about the resultant dangers to the human race.

I noted with interest that the Senator from Kentucky [Mr. COOPER] joined in the discussion. I think he will recall that in his part of the country, near the Oak Ridge atomic plant, scientists found a muskrat with a highly cancerous hind leg which had a very large degree of radioactivity, and it was assumed in some way to be the result of nuclear production at Oak Ridge.

A few days ago Dr. Albert Schweitzer, the famous humanitarian in the African jungles, issued his declaration of conscience, and it referred to the Columbia River, in the area from which I come, and Dr. Schweitzer pointed out the high measure of radioactivity in plankton found in the Columbia River, near the Hanford atomic energy works. Of course, the plankton is eaten by fish, and the fish are eaten by waterfowl, and both the fish and the waterfowl are perhaps eaten by mankind. All these grave matters have come to light since Gov. Stevenson issued his warnings.

Those of us who serve in the Senate of the United States are responsible not only for the defense of our country, but in some degree for the health and safety of the people of the United States and of the entire human race. I believe that we must give attention to the warnings about these dangers, as those warnings have been issued by Dr. Muller and others whom I have been quoting here on the floor of the Senate. Certainly we cannot take this matter lightly at all.

Mr. COOPER. Mr. President, will the Senator from Oregon yield further to me?

Mr. NEUBERGER. I yield.

Mr. COOPER. I have noted that during the past several weeks the distinguished Senator from Oregon has referred again and again to this question. I think his efforts in that connection have been outstanding and notable.

However, I believe there have been changes from the position of last fall. Governor Stevenson made speeches in which he pointed out the dangers of the fallout. It is possible that perhaps my own party discounted some of those statements. On the other hand, a great many persons believed that at the outset Governor Stevenson was proposing or suggesting that the tests be discontinued, and was not stating whether there should be controls or reciprocal agreements on the part of Russia. A great many persons believed he was taking that position, and at first I thought he was taking that position. But that has passed.

I believe that what the Senator from Oregon has pointed out since that time is most important, in connection with the statements about the dangers of fallout, as those statements have been issued by a great body of scientists.

I agree with the Senator from Oregon that a consensus of opinion has developed on the subject. I also agree that the facts disclosed concerning fallout are most terrifying to the people of the United States and to the people of the rest of the world today, and therefore the Government of the United States, including the Congress of the United States, should urge those who are trying to find a means of arriving at disarmament to do everything possible to achieve an agreement in that field. Of course, such an agreement might involve some risk on the part of the United States; but we must balance against that the risk involved in a continuance of thermonuclear tests and, perhaps, the risk of eventual thermonuclear warfare.

Mr. NEUBERGER. Mr. President, I appreciate the statement the Senator from Kentucky has made.

Mr. COOPER. In connection with this matter, I should like to make a brief statement regarding another subject which soon will be before the Senate. I believe that one of the great instruments our Government has in the effort to bring its influence to bear on the question of disarmament is, curiously enough, its maintenance of adequate military strength and defense. If the Congress makes severe and serious cuts in the appropriations for defense and military security, and thereby gives Russia the impression that we are letting down or relaxing our defenses, I believe we shall be removing from our own hands one of the great instruments available to us in pushing toward disarmament.

Mr. NEUBERGER. Mr. President, I quite agree with the Senator from Kentucky. His remarks are characteristically candid. I agree with him that the United States must maintain its defenses; and of course I have supported a good many of the President's budget requests, even when many members of my own party have not agreed with me in that respect.

We have an obligation not only to provide for the defense needs of our country, but also to provide for our country's health needs; and we must couple our defense activities with an attempt to control the terrible menace to the health of the human race, which has been discussed by the scientists and physicists.

Certainly it is possible that we could defend ourselves successfully against the Russians, and yet might create within our country and over the entire world a menace ultimately even greater than that of military conquest. This is the menace of deadly and lethal fallout. We have opened up cosmic forces which certainly very few persons in the Senate understand. I admit I do not understand them. Perhaps the Senator from Kentucky understands them, yet I do not. But when persons who have won Nobel prizes in the field of science call the matter to our attention, I certainly think Members of the Senate ought to take it into consideration.

That is the reason why I have placed in the RECORD Dr. Albert Schweitzer's declaration of conscience. When a man of Dr. Schweitzer's spiritual as well as medical attainments makes such a declaration, I think we should take it into very serious consideration.

Mr. JAVITS. Mr. President, I should like to support my colleague the Senator from Kentucky, who has made, as has the Senator from Oregon, such a typically frank statement on this subject. I campaigned in New York on this very issue of A and H bomb tests. It was one of the very important issues between myself and my opponent. The people had the definite understanding, rightly or wrongly, that what was being advocated on the other side from me was a unilateral abandonment of nuclear tests by the United States. That was not advocated on my side, speaking from my personal standpoint, because I urged that there should be an insistence on inspection and control before there was an abandonment of the tests. I feel that men of wisdom and experience on both sides, without regard to politics, are deeply committed to the idea of inspection and control.

Mr. President, I know of the deep feelings of my colleagues who have spoken on the Senate floor on the health question. But this is the sort of subject which easily carries us away. We have to make hard decisions. When we vote "yea" on a resolution for war or for sending our troops to Korea, it is peaceful and quiet and not bloody on the floor of the Senate; but elsewhere I have seen it otherwise, and so have other Senators. It is very serious business. I think the Senator from Oregon is right when he says that we are guarding not only the national security, but the lives and the health of our people. At the same time, our people want us to keep our efforts for national security in the right direction. In the face of the testimony on radioactive fallout which has been given, we might easily be pushed into an abandonment of the tests while what we should try to arrive at is some real balance between security and the protection of the public health.

In short, I urge that we be not carried away in either direction. I urge that upon my colleagues, and upon the people of the country. I feel that this is a tense moment. It is the first time in a marked public discussion that we have come to grips with this problem of radioactive fallout. At the same time, it can blind us to the problems of maintaining peace in terms of military security. I think there are equally substantial and strong reasons why we need nuclear tests, in order to keep ourselves abreast of new developments.

So while I join both my colleagues in everything they have said, I feel a word of caution must also be addressed to all that we keep a proper balance, and that there should not be an outweighing on either side—because of national security wish or health wish—on the basis of what has been brought out in public testimony.

Mr. NEUBERGER. I thank the Senator. I point out to him that several months ago I introduced proposed legislation to create, within the United State Institutes of Health, a National Institute of Radiation Health, which would have the primary responsibility of measuring the effect on human health of fallout of radioactive materials, and reporting that information to the Government and to the people of the Nation. It seems to me that is the very least we can do, so that all possible information can be made available to the President, to the Congress, and to the

scientific and medical people in the country. After all, human life may be at stake.

It is my hope that the leadership of the side of the Senator from Kentucky, the Senator from New York, and the Senator from Wisconsin [Mr. WILEY], who has just come upon the floor, will be willing to lend their support to the establishment of an additional National Institute of Radiation Health, within the present framework of the National Institutes of Health, to measure the things we are talking about, so we may possess the necessary knowledge and information and basis on which to make these very difficult decisions.

Mr. JAVITS. I am sure I shall give the subject my most serious and prayerful attention, and shall try to support such a proposal.

EXTENSION OF TIME FOR MAKING OF LOANS BY EXPORT-IMPORT BANK

The Senate resumed the consideration of the bill (H. R. 4136) to extend the period within which the Export-Import Bank of Washington may make loans.

Mr. MONRONEY. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. MONRONEY. Is H. R. 4136 the unfinished business?

The PRESIDING OFFICER. It is, and it is now under consideration.

Mr. MONRONEY. Mr. President, H. R. 4136 would extend the life of the Export-Import Bank of Washington from its present expiration date of June 30, 1958, to June 30, 1963. It would make no change in the powers or authorities of the Export-Import Bank. This bill was passed by the House of Representatives on April 9, 1957, and was reported by the Committee on Banking and Currency on May 16, 1957. A similar 5-year extension bill was passed by the Senate last year, but died at the end of the 84th Congress.

The proposed extension was recommended by the Departments of State, Treasury, and Commerce. The President's Economic Report also recommended an extension of the bank's authority. No opposition to the extension has been made known to the committee.

The Export-Import Bank originally was incorporated in 1934, and it has been extended every few years up to the present time. It has continued under substantially its present authority since the enactment of the Export-Import Bank Act of 1945.

The bank has broad general powers to engage in banking, in order to aid in financing and to facilitate exports and imports and the exchange of commodities between the United States and foreign countries. It has a capital of $1 billion, and may also borrow up to $4 billion more from the Treasury. The outstanding amount of its loans, guaranties, and insurance may not exceed $5 billion.

This bank is the principal instrument for the preservation of our foreign trade on a solid, sound banking basis. Most of the loans are either made to the central banks of the countries or are guaranteed by those banks, or are made to our exporters here in exchange for their credit.

In the bank's regular semiannual report to the Congress for the period ending December 31, 1956, the history of the bank's operations from 1934 through 1956 is summarized. The following items are particularly noteworthy: It authorized loans totaling $8,362,000,000. It made disbursements of $5,277,000,000. It received repayments amounting to $2,641,000,000. Loans outstanding at the end of 1956 amounted to $2,636,000,000, and, in addition, $1,533,000,000 had been authorized but not yet disbursed. The gross earnings of the bank over the period from 1934 through 1956 amounted to $777 million. It paid $178 million to the Treasury as interest and $150 million as dividends. It built up a reserve of $435 million. Losses over this entire period have been just over $525,000, and the installments of principal in default at the end of 1956 amounted to only $9.3 million. This amount has not been charged off, because the bank still feels there is a good chance of collecting it.

The bank has conducted its affairs with careful attention to the needs of private business and has increasingly emphasized its policy of obtaining participations in its loans by private banking sources. Virtually all of the bank's transactions are to enable foreign countries to buy goods produced in the United States, or for the purpose of providing insurance to such exports.

I think it might be interesting to note some of the loans which have been made in the past 6 months of 1956. Nine credits were granted to Brazil for capital equipment, totaling $167 million. Credits of $100 million were granted to Argentina for transportation, industrial, and agricultural equipment. Four credits were granted to Japan for turbogenerating equipment, aircraft, and cotton in the amount of $92.7 million. Credits amounting to $500 million were granted to the United Kingdom, to meet dollar requirements for petroleum in the oil lift and other United States products. This loan was secured by marketable securities held by the United Kingdom in the United States. No withdrawals have yet been made by the United Kingdom under this credit.

In every case these vast loans or credits represented payments for United States goods and products to be shipped to the countries involved.

During the past 6 months the bank showed a net profit of $30.2 million. It is interesting to note that, borrowing money from the United States Treasury, it pays substantial interest. On December 31, 1956, the bank was paying 3½ percent interest, and interest rates charged by the bank on its loans have increased in proportion.

In spite of this, the applications for Export-Import Bank loans have increased.

In many cases where loans should have been and normally would have been handled by private financial institutions, the bank declined to take on new business which was offered, in order to comply with the directives of Congress not to interfere with private business, and in order not to assume obligations that they felt private banking could properly carry.

In addition to the highly desirable function of assisting United States exports, the bank's activities have played a large part in the development of friendly foreign nations on a sound commercial basis, thereby contributing substantially to the strength of the Free World.

In other words, these loans have helped to build up in foreign countries a sound economy, that could produce foreign trade and create new wealth, and thereby have aided in building up even a more substantial market for goods produced in the United States and needed by such countries.

I urge that the Senate act favorably on H. R. 4136.

Mr. COOPER. Mr. President, will the Senator yield?

Mr. MONRONEY. I am glad to yield.

Mr. COOPER. As the Senator knows, I am not a member of the committee which reported the bill. Was the bill reported unanimously?

Mr. MONRONEY. As I recall, the bill was reported unanimously. There was no objection from within the committee, or from anyone who communicated with the committee. The bill has been recommended by the President, and recommended by the State Department, the Treasury Department, and the Commerce Department.

One of the needs, I might say, for passing the bill at this time is to reestablish the bank for another 5 years, although the expiration does not occur until 1958. The extension would avoid any lack of continuity in operation. People who particularly wish to do business with the bank, if it has only 1 or 2 years of life to go, will find it very difficult, because they will not know whether or not it is going to be in existence beyond the interim financing.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill was ordered to a third reading, read the third time, and passed.

PRINTING OF COMPILATION OF STUDIES AND REPORTS ON FOREIGN-AID PROGRAM

Mr. MONRONEY. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 397, Senate Concurrent Resolution 30.

The PRESIDING OFFICER. The resolution will be stated by title, for the information of the Senate.

The LEGISLATIVE CLERK. A concurrent resolution (S. Con. Res. 30) to print a compilation of studies and reports on the foreign-aid program.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Oklahoma.

The motion was agreed to; and the Senate proceeded to consider the resolution.

Mr. MONRONEY. Mr. President, I should like to ask the Senator from Georgia [Mr. TALMADGE], who is on the floor, to explain the purpose of the resolution.

Mr. TALMADGE. Mr. President, this concurrent resolution calls for the printing as a Senate document of a compilation of studies and reports prepared under the direction of the Special Committee To Study the Foreign Aid Program. Eight thousand additional copies would be provided for the use of the special committee.

The total estimated cost of this printing is placed at $19,167.31. The Senator from Rhode Island [Mr. GREEN] is chairman of the special committee, and his letter of May 21, 1957, justifying the concurrent resolution, is reproduced in report No. 390, which accompanies the measure.

Mr. MONRONEY. Mr. President, I ask that the concurrent resolution be agreed to.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The concurrent resolution (S. Con. Res. 30) was agreed to, as follows:

Resolved by the Senate (the House of Representatives concurring), That there shall be printed as a Senate document a compilation of studies and reports prepared under the direction of the Special Committee To Study the Foreign Aid Program, created by Senate Resolution 285, agreed to July 11, 1956, as amended by Senate Resolution 35, agreed to January 30, 1957.

SEC. 2. There shall be printed 8,000 additional copies of such Senate document. Such additional copies shall be for the use of the Special Committee To Study the Foreign Aid Program.

PRINTING OF ADDITIONAL COPIES OF SENATE REPORT NO. 130

Mr. MONRONEY. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 399, Senate Resolution 140.

The PRESIDING OFFICER. The resolution will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A resolution (S. Res. 140) authorizing the printing of additional copies of Senate Report No. 130, 85th Congress, 1st session, entitled "Juvenile Delinquency."

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Oklahoma.

The motion was agreed to; and the Senate proceeded to consider the resolution.

Mr. MONRONEY. Mr. President, may I ask the distinguished junior Senator from Georgia [Mr. TALMADGE] to explain this resolution, for the benefit of the Senate.

Mr. TALMADGE. Mr. President, this resolution merely authorizes the printing of additional copies of Senate Report No. 130 of the 85th Congress, entitled "Juvenile Delinquency." The demand for this publication has been very great, and additional copies are needed to meet requests now pending or expected.

In the new printing, the Committee on the Judiciary wishes to incorporate certain footnotes, without altering the text, to give the report greater clarification and render it more useful to the Congress.

The total amount involved is $1,198.

Mr. MONRONEY. Mr. President, I do not believe there is any objection to the resolution, or any further discussion desired. I ask that the resolution be agreed to.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 140) was considered and agreed to, as follows:

Resolved, That there be printed for the use of the Committee on the Judiciary 3,000 additional copies of Senate Report No. 130, 85th Congress, 1st session, entitled "Juvenile Delinquency," with sundry footnotes.

OFFICIAL OFFICE EXPENSES OF MEMBERS OF CONGRESS

Mr. MONRONEY. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 400, H. R. 790.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (H. R. 790) to amend the Legislative Appropriation Act, 1955, with reference to official office expenses of Members of Congress.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Oklahoma.

The motion was agreed to; and the Senate proceeded to consider the bill.

Mr. MONRONEY. Mr. President, may I ask the distinguished junior Senator from Georgia [Mr. TALMADGE] to explain the bill to the Senate.

Mr. TALMADGE. Mr. President, this bill passed the House of Representatives on May 16, 1957. Under the existing law, Members of the House of Representatives may be reimbursed for official office expenditures incurred in their Congressional districts, in an amount not to exceed $150 quarterly. A number of Members coming from the same large metropolitan areas, however, often have offices in the same Federal buildings not actually situated in their respective Congressional districts. Technically, these Members are excluded from reimbursement. This bill, if enacted, would correct that situation.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the third reading and passage of the bill.

The bill was ordered to a third reading, read the third time, and passed.

RESPONSIBILITIES OF CERTIFYING OFFICERS AND DISBURSING OFFICER, LIBRARY OF CONGRESS

Mr. MONRONEY. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 401, H. R. 7234.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (H. R. 7234) to fix the responsibilities of certifying officers and disbursing officer of the Library of Congress.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Oklahoma.

The motion was agreed to; and the Senate proceeded to consider the bill.

Mr. MONRONEY. Mr. President, may I ask the distinguished junior Senator from Georgia [Mr. TALMADGE] to explain the purpose of the bill.

Mr. TALMADGE. Mr. President, this bill would fix the responsibilities of certifying officers and the disbursing officer of the Library of Congress. It passed the House of Representatives on May 21, 1957.

The measure has been introduced, in behalf of the Librarian of Congress and with the endorsement of the Comptroller General, in the interest of improved administration of the Library of Congress. It would establish clearer definitions of fault and liability for expenditures of appropriations and funds, and provide for adequate surety bonds for all certifying officers and employees.

Such employees or officers, however, could be relieved of liability by the Comptroller General under certain conditions. Also they would be entitled to obtain advanced decisions of the Comptroller General on any question of law involved in a payment.

The fixing of financial responsibility, the provision for adequate bonds, and the prerogative of obtaining relief and advance decisions from the Comptroller General are the three main provisions of H. R. 7234. The Librarian of Congress has advised that he is convinced the financial operations of the Library of Congress will be improved materially as the result of this proposed legislation.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the third reading and passage of the bill.

The bill was ordered to a third reading, read the third time, and passed.

CONSTRUCTION OF BRIDGE ACROSS CHINCOTEAGUE NATIONAL WILDLIFE REFUGE

Mr. MONRONEY. Mr. President, I ask unanimous consent for the present consideration of Calendar No. 379, House bill 2493.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (H. R. 2493) to authorize the Secretary of the Interior to permit the construction of a bridge and road across Chincoteague National Wildlife Refuge, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. MONRONEY. Mr. President, the bill would authorize the Secretary of the Interior to grant easements and rights-of-way for bridge and road construction, to a private authority for the establishment of a toll bridge and road across the Chincoteague National Wildlife Refuge

on Assateague Island, to open up 10 to 15 miles of ocean sandy beach area for public recreation.

A private toll bridge and road authority, known as the Assateague Bridge Corp., was authorized by the 1956 Virginia General Assembly, which, acting as a corporation, could issue $300,000 in revenue bonds to finance the project.

The bill and the project has the support and endorsement of the United States Fish and Wildlife Service. Senators HARRY F. BYRD and A. WILLIS ROBERTSON, of Virginia, support the bill and it has the backing and support of the citizens of the city of Chincoteague and surrounding area.

No expenditure by the United States is involved. Construction and maintenance of roads and bridge will be undertaken by an agency of the State of Virginia.

The staff has discussed the subject with the Senator from Oregon [Mr. MORSE], and has ascertained that the bill does not in any way violate the Morse formula.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the third reading and passage of the bill.

The bill was ordered to a third reading, read the third time, and passed.

AMENDMENT OF ALASKAN AIRPORTS ACT OF 1948

Mr. MONRONEY. Mr. President, I ask unanimous consent for the present consideration of Calendar No. 381, Senate bill 1366.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (S. 1366) to amend the act entitled "An act to authorize the construction, protection, operation, and maintenance of public airports in the Territory of Alaska," as amended.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Interstate and Foreign Commerce with an amendment, on page 2, line 6, after the word "years", to insert a comma and "and any such lease heretofore made may be renewed or renegotiated for any such period", so as to make the bill read:

Be it enacted, etc., That section 5 of the act entitled "An act to authorize the construction, protection, operation, and maintenance of public airports in the Territory of Alaska," approved May 28, 1948 (62 Stat. 277), as amended, is further amended to read as follows:

"SEC. 5. The Secretary of Commerce is empowered to lease under such conditions as he may deem proper and for such periods as may be desirable (not to exceed 10 years) space or property within or upon the airports for purposes essential or appropriate to the operation of the airports: *Provided*, That real property within or upon the airports may be leased for purposes of erecting structures necessary or incident to the operation of the airports, for periods not exceeding 55 years, and any such lease heretofore made may be renewed or renegotiated for any such period."

The amendment was agreed to.

Mr. DIRKSEN. Mr. President, may we have an explanation of the bill?

Mr. MONRONEY. Mr. President, this bill was introduced at the request of the Department of Commerce. The bill would amend section 5 of the act under which the Department operates airports at Anchorage and Fairbanks, Alaska—May 28, 1948; 62d Statutes at Large, page 277.

Section 5 empowers the Secretary of Commerce to lease real property on the airports for periods of not more than 20 years for the erection of structures necessary or incident to the operation of the airports, such as airline hangars, executive offices, and so forth. S. 1366 would extend the maximum period of leases from 20 to 55 years.

The 20-year-maximum term was originally considered adequate because, prior to the liquidation of the Reconstruction Finance Corporation, it was possible for national banks to make construction loans for commercial facilities on land held under lease for 20 years. Under present law, however, national banks are prohibited from lending money secured by mortgages on leaseholds having less than 50 years to run from the date of the loan—title 12, United States Code, section 381. Since national banks are the principal source for financing the type construction which should now be undertaken at these airports by private industry, the 20-year-maximum term limitation tends to prevent the necessary development of these airports.

This same problem as applied to leases made by the Alaska Railroad for industrial development along its right-of-way has already been dealt with in Public Law 232 of the 84th Congress, which also increased maximum leasehold terms from 20 to 55 years.

AGENCY COMMENTS

The General Accounting Office favors enactment of this legislation. The Civil Aeronautics Board has no objection to the bill, and the Departments of Interior and Justice have expressed no comment.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

RAPID TAX AMORTIZATION IN CONNECTION WITH PROPOSED HIGH DAM IN HELLS CANYON

Mr. GOLDWATER. Mr. President, I ask unanimous consent that there be printed in the body of the RECORD at this point a statement which I have prepared on the subject of rapid tax amortization in connection with the proposed high dam in Hells Canyon.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR GOLDWATER

The backers of the Federal Hells Canyon bill and other friends of public power have bandied about some astronomical figures concerning the benefits they claim Idaho Power Co. will receive as a result of ODM's rapid tax amortization certification of the Brownlee and Oxbow Dams.

In 1955, when another Hells Canyon bill—S. 1333—was pending in the Senate, they produced a benefit figure of $338 million. This year they have come up with a figure of $329 million. In any case, they have been so generous as to make them suspect of trying to kill Idaho Power's projects with kindness.

These figures are the product of mathematics done with mirrors. It is a part of a public power indignation campaign to whip up a fury against Idaho Power and thus win substitution of a half-billion-dollar Federal Hells Canyon Dam for the public utility's three-dam project now well underway on the Snake River.

It is worth examining the method used in achieving this figment of mathematical imagination on the part of the Hells Canyonites. This method is described in the testimony given by Mr. Charles A. Robinson, Jr., staff engineer of the National Rural Electric Cooperative Association before the Senate Irrigation and Reclamation Subcommittee on May 3, 1955. That's when S. 1333 was before the subcommittee. A reading of this testimony clearly exposes the kind of mathematical legerdemain which has been and is being used. It would be downright sad if it were not so ludicrous. It recalls that old math gimmick which involves figuring how many billions we would have now if we had had the foresight to invest 1 cent at 6 percent compound interest in the year 1.

I append for printing in the RECORD at this point excerpts from Mr. Robinson's testimony on May 3, 1955, before the Subcommittee on Irrigation and Reclamation of the Senate Interior and Insular Affairs, and I call particular attention to the observations of my esteemed colleague the Senator from New Mexico [Mr. ANDERSON].

EXCERPTS FROM THE TESTIMONY OF CHARLES A. ROBINSON, JR., STAFF ENGINEER, NATIONAL RURAL ELECTRIC COOPERATIVE ASSOCIATION, ON S. 1333, HELLS CANYON PROJECT, BEFORE THE SUBCOMMITTEE ON IRRIGATION AND RECLAMATION OF THE SENATE COMMITTEE ON INTERIOR AND INSULAR AFFAIRS, MAY 3, 1955

What is the proposal of the private utility company for financing this project? The cost of its plan has been estimated at between $129 million and $176 million, and it claims that it will all be financed by private investment. Nonetheless, the company had pending on April 25, 1955, before the Office of Defense Mobilization applications for rapid tax depreciation certificates which would allow them to write off $35.9 million of the cost of the Oxbow development and $67.1 million of the proposed cost of the Brownlee development.

Senator ANDERSON. Not writeoff, but accelerated depreciation over a 5-year period.

Mr. ROBINSON. Yes, sir. Depreciate whatever portion of the certificates were granted to them in a 5-year period.

Senator ANDERSON. What is the normal depreciation on a powerplant, around 35 or 40 years?

Mr. ROBINSON. I would say that would be reasonable; yes, sir.

Senator ANDERSON. On these dams it has been 50 or even more years.

Mr. ROBINSON. On Federal projects the cost of the dam is repaid over a period of 50 years, that is, the rate is designed to repay the power cost over a 50-year period. However, the benefit-to-cost ratio of many dams is figured on a 100-year period. So we can assume that under the Federal plan, probably the entire cost will be repaid in a 50-year period, and then the Government will get the revenue from the project for an additional 50-year period, during which there will be no repayment of initial capital cost.

I asked our economist, Dr. Cochran, who is here with us today, to determine what these rapid tax-depreciation certificates would mean to the company in the way of benefits. Invested over a 50-year period at 6 percent, we figure the company would earn a total benefit of over $338 million on these certificates, and that is almost twice the highest estimate of the entire construction cost of all 3 projects.

This is the way we arrived at that figure. Take the amount that the company is authorized to depreciate over a 5-year period. That enables them to accumulate each year during the first 5 years a great percentage or a high percentage of the amount they would ordinarily pay for taxes. That is, if they were allowed to write off $100,000 a year, we will say, the tax rate is 50 percent, roughly on a corporation, 52 percent, I believe. That means the company would save each year half that amount, or $50,000 in taxes. Our calculations assume that after this money was accrued by the company during the first 5 years it would be invested at 6 percent for the remaining 45-year period, and each year during the succeeding 45-year period the company would repay the taxes that were withheld during the first 5-year period, which we think is a reasonable assumption.

In summary, Mr. Chairman, our people in the Pacific Northwest and throughout the country are in wholehearted support of the project. We feel it will provide significantly more prime capability and more average annual energy than the company plan, both of which are badly needed in the Pacific Northwest.

We feel that the large reservoir storage capacity of the Federal project as contrasted with the company plan will spell security for the Government's existing $2 billion investment in downstream multiple-purpose projects, and would help to maintain the feasibility of the Columbia River development plan.

The argument is frequently made, Mr. Chairman, that commercial power-company development will mean more revenue to the Government because of the fact that the revenue from the company project would be subject to Federal income tax. From this premise the companies figure that private construction means increased taxes from the area.

We believe this to be a false conclusion because of the fact that the income tax coming to the Government from any particular area depends not only on the tax rate and the amount contributed by any given corporation, but also upon the entire tax base of the area. In areas where the Federal Government has undertaken large-scale development, major industrial, agricultural, and economic development has followed, which we feel has increased the tax base and made available more revenue than probably would have been made available had the Federal plan not been pursued.

I believe this is especially true in the TVA area.

We think that the obvious attempt of the Idaho Power Co. to secure Federal subsidization of its plan through the issuance of tax amortization certifications indicates that the company expects the taxpayers to lend it appreciable financial assistance and, by comparison, Federal construction will return to the taxpayers not only the benefits of area development, but the entire cost of the project within a 50-year period.

That is all, Mr. Chairman, except that I would like to submit for the record two resolutions in support of the Hells Canyon project which are attached to my statement, and which urge construction by the Federal Government. They were unanimously adopted by our 13th annual meeting of members in Atlantic City, N. J., on February 17, 1955.

I appreciate the opportunity of presenting my somewhat voluminous statement, and I am sorry I have taken so much time.

Senator ANDERSON. That is all right. I do think the figures on certificates, on page 14 of your statement, are subject to quite a bit of analysis.

Mr. ROBINSON. Would you like to go into that, sir?

Senator ANDERSON. I just want to give you my own reaction to it. If it is $103 million over a 5-year period, that is a writeoff of $20 million a year, a savings of $10,400,000 a year in taxes. For a 5-year period it would be a total saving of maybe $50 million. At the end of that period they are certainly not going to be able to invest that money at 6 percent or, if they can, they ought to go out of the utility business and go into the investment business.

Secondly, you want to remember that after that, for the next 45 years, they will pay higher taxes, because they will not be permitted to take the depreciation.

Understand me, I do not like this any better than I like the fact that Duquesne Power & Light Co. wrote off its plant up at Shippingport, Pa. I think it is wrong, and I do not believe in it at all. There is no defense connected with it. But I do not believe it figures out to a saving of $300 million.

Mr. ROBINSON. Let me comment on your question, and then I would like to introduce Dr. Clay Cochran, who prepared those figures.

You see, the thing is that after the first 5 years, assuming you invest at 6 percent or possibly at——

Senator ANDERSON. You start with an assumption. Can you tell me where to put money at 6 percent?

Mr. ROBINSON. The utility companies constantly claim that they need a 6-percent return to stay in business.

Senator ANDERSON. I am not arguing that. As a matter of fact, as you well know, I have had a few things to say about a certain Dixon-Yates contract which was built up on that basis. But I say you cannot figure that somebody is going to invest his money so it makes 6 percent.

COMPILATION OF FEDERAL LAWS RELATING TO REGULATION OF CARRIERS

Mr. MONRONEY. Mr. President, I ask unanimous consent for the present consideration of Calendar No. 391, Senate bill 695.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (S. 695) providing for the revision and printing of a compilation of Federal laws relating to the regulation of carriers subject to the Interstate Commerce Act.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. MONRONEY. Mr. President, this bill is identical with S. 4145 of the 84th Congress, which was reported favorably by the Committee on Interstate and Foreign Commerce and passed by the Senate. It died in the House.

The bill would allow the Interstate Commerce Commission to revise and bring up to date and prepare for printing an annotation of the acts administered by the Interstate Commerce Commission.

The present annotation consists of 16 volumes, the last of which was printed in 1953. Volumes 6 through 11 were printed as Senate documents, and during the last Congress the Commission suggested that volume 17 be so printed. This committee amended the bill so as to authorize appropriations and to direct the ICC to prepare the material itself.

In other words, we did not want the documents dealing with the Interstate Commerce Commission activities to be charged up to the printing bill of the Senate.

The present ICC budget contains a request for $67,650 for this work. The ICC advises that the next budget will contain the same request and the budget after that a request for $54,925.

The Commission plans to revise and condense the material in some 10 or 11 volumes so that it will be modernized and up to date. The budget requests are keyed for the preparation of 4 volumes per year for the first 2 years and 3 the following year.

It would appear that this annotation of the many cases and the laws which the Commission administers is badly needed by not only the Government but by the practitioners in the field.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, read the third time, and passed as follows:

Be it enacted, etc., That the Interstate Commerce Commission is authorized to revise, bring up to date, and prepare for printing in suitable form the complete set of volumes entitled "Compilation of Federal Laws Relating to the Regulation of Carriers Subject to the Interstate Commerce Act, With Digests of Pertinent Decisions of the Federal Courts and the Interstate Commerce Commission and Text of or References to General Rules and Regulations."

SEC. 2. There are hereby authorized to be appropriated such sums as may be necessary for the preparation and printing of such revised material.

SEALS FOR BUREAUS AND OFFICES, DEPARTMENT OF COMMERCE

Mr. MONRONEY. Mr. President, I ask unanimous consent for the present consideration of Calendar No. 392, Senate bill 1027.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (S. 1027) to authorize the Secretary of

Commerce to prescribe seals for bureaus and offices of the Department of Commerce, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. MONRONEY. Mr. President, the pending bill is identical with S. 2909 of the 84th Congress, which was reported favorably by the Committee on Interstate and Foreign Commerce, and passed by the Senate, but died in the House.

The Department of Commerce advises that in the performance of its activities it functions through 13 primary organizations, each responsible to the Secretary. In the conduct of its business the various bureaus and offices are called upon, or often required to verify various documents for court use or for recordation. Except for the Patent Office and the Bureau of Census, which have their own seals, all other papers must be processed in the Office of the Secretary of the Department of Commerce. The Secretary feels that if seals could be official for the units involved, and used in the field, much saving of time would result.

The Department of Justice interposes no objection. The Comptroller General has no comments.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the Secretary of Commerce is hereby authorized to prescribe or modify individual seals for the constituent organization units of the Department of Commerce. Each seal so prescribed shall contain such device as the Secretary of Commerce may select. Each seal shall remain in the custody of any officer or employee of the constituent unit whom the Secretary of Commerce may designate and, in accordance with regulations issued by the Secretary of Commerce, may be affixed in lieu of the seal of the Department of Commerce to any certificate or attestation that may be required from such organization unit. Judicial notice shall be taken of any seal prescribed in accordance with this authority, a facsimile of which has been published in the Federal Register together with the regulation prescribing such seal and the affixation thereof. Nothing herein contained shall be construed as affecting or modifying existing legislation authorizing seals for specific bureaus or offices of the Department of Commerce.

THE COST OF LIVING

Mr. CARROLL. Mr. President, I ask unanimous consent to have printed in the RECORD an article entitled "Report Kept Secret," written by Sylvia Porter, and published in the Washington Evening Star of June 3, 1957. The article deals with a so-called secret report which is supposed to be contained in the files of the Standard Oil Company of New Jersey. The report is alleged to be an exhaustive study of the reasons why the cost of living has been climbing almost without interruption since World War II.

One of the most significant paragraphs contained in the article reads as follows:

Standard Oil's unpublished report must reveal that despite the fact that labor is getting most of the blame for the postwar inflation, the pricing practices of some of our basic industries have been the more important reason for the cost-of-living spiral.

It is a most noteworthy article, and I hope the Members of the Senate will pay close attention to it.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

REPORT KEPT SECRET

(By Sylvia Porter)

In the files of Standard Oil Co. (New Jersey), the largest oil corporation in the world, there is a secret report. It is an exhaustive study of the reasons why the cost of living has been climbing almost without interruption since World War II.

The report, as I understand it, shows dramatically which has been most responsible for our creeping inflation—industry's price raises year after year, or labor's wage demands year after year.

The study is finished, ready for publication. But it hasn't been released by Standard Oil and the odds are it won't be.

"Why?" I bluntly asked Monroe J. Rathbone, Standard Oil's president, when he disclosed the existence of the study in a private talk. "Does it indict people you don't want to see indicted?"

He shrugged his shoulders expressively.

"It is an indictment," he said. And after a bit more prodding, he added, "Yes, it is an indictment of some in industry."

RETICENCE CITED

I didn't have to press Mr. Rathbone any further. Mr. Rathbone's reticence told the tale.

Standard Oil's unpublished report must reveal that despite the fact that labor is getting most of the blame for the postwar inflation, the pricing practices of some of our basic industries have been the more important reasons for the cost-of-living spiral.

The top brass of Standard Oil threw a party a few days ago in the city and I stopped by. It was billed as a "no-work" affair, but—well, if you had a chance to chat privately with the head of Jersey Standard, would you waste the time talking about the weather?

Here is how Mr. Rathbone answered my questions on matters of deep bread-and-butter interest to you.

Is there any possibility of a reduction in the prices of gasoline and fuel oil in the foreseeable future?

No. There will be price wars here and there. There will be seasonal dips and competitive clashes which will give buyers temporary bargains. "But assuming economic conditions remain as they are, I can't see general price cuts. Rising costs are eliminating this trend."

Is the future then one of higher and higher prices?

There won't be any more price increases this year. The oil firms are having trouble enough making the January raises stick.

"But over the longer term, prices of gas and oil are going up. Rising prices of materials we must buy, rising wages in our industry and others, the need for us to finance enormous expansion and research programs at increasing costs are putting constant pressure on prices. As the costs of doing business go up, gas and oil prices will go up too."

RECORD EARNINGS

In view of your record earnings ($808 million net in 1956, $237 million in the first quarter of 1957), isn't this price trend hard to justify?

As far as Mr. Rathbone is concerned, it isn't; he makes no apologies for price raises or peak profits. Instead, he insists Standard Oil must make the profits so it has the cash to finance its huge expansion—set at $1.2 billion for 1957 alone. He sees the demand for oil growing at a fantastic rate, doubling by 1975. "It's better to have higher prices and sufficient oil than lower prices and oil shortages that will stop the economic machine in its tracks."

But where will this price trend end?

"I don't know. That's what scares me more than anything else. I just don't know the answers."

And this admission of impotence—or at least failure on the part of a man of Rathbone's power to see how the spiral can be stopped—is the grimmest part of this grim report.

If neither giant business nor giant labor nor giant government will take positive action to curb it, where does it end?

LEGISLATIVE PROGRAM

Mr. JOHNSON of Texas. Mr. President, I have previously announced that on tomorrow the Senate will consider the sockeye salmon fisheries protocol. In addition, the Senate may consider Calendar No. 390, H. R. 7143, to continue in effect the provisions relating to the authorized personnel strengths of the Armed Forces.

I should also like now to give notice that the following bills, which have been cleared for floor action, may be considered tomorrow:

Calendar No. 403, S. 1535, to amend the Federal Property and Administrative Services Act of 1949 to authorize the Administrator of General Services to make contracts for cleaning and custodial services for periods not exceeding 5 years.

Calendar No. 404, S. 1799, to facilitate the payment of Government checks, and for other purposes.

Calendar No. 405, S. 1408, to provide allowances for transportation of house trailers to civilian employees of the United States who are transferred from one official station to another.

Calendar No. 406, S. 1141, to authorize and direct the Administrator of General Services to donate to the Philippine Republic certain records captured from insurrectors during 1899–1903.

Mr. President, I also express the hope that the Judiciary Committee will take early action on previously approved House bills of a private nature, and also report to the Senate any Senate bills of a similar nature at the earliest possible date.

TOBACCO AND CANCER

Mr. KEFAUVER. Mr. President, tobacco both as the basis for industry and an important segment of agriculture is of great importance.

It was the substance of the first international trade. It is of particular importance in the Middle South, where

most of the tobacco is grown and where much of the industry based on tobacco is located. My own State of Tennessee, which is a substantial producer of burley and other kinds of tobacco, which has been increasing in value and importance, has a vital stake in the tobacco business.

For some years charges have been made that the smoking o cigarettes had a relationship to the development of cancer of the lungs and heart disease. The American Cancer Society has now released the findings of a scientific committee, based on a long statistical study. The conclusions of the committee are that cigarette smoking increases the likelihood of lung cancer and heart disease. The effect of this report will be felt throughout the tobacco industry.

What has not been discovered is a causative agent in cigarette smoke. We do not know if the causative agent is in the tobacco itself, in the cigarette paper, or exactly what is it. We simply do not know.

The tobacco industry, of course, is cooperating in scientific efforts to find this cause. Once it is isolated and identified, steps can be taken to remove it or lessen its effect.

Since the interest of a great industry is involved, and since a thriving portion of our agriculture is at stake, it seems to me that the appropriate scientific resources of the Federal Government ought to be brought into the picture.

The tobacco industry is a basis for hundreds of millions of dollars in taxes paid both to the Federal Government and the State governments, and often to municipalities. In view of the billions of dollars which it has produced for the Treasury during its long history, it seems only fair and right that we should be willing to help the tobacco industry find the answer to the problem promptly.

Time and time again Congress has demonstrated its vital concern of the Nation's health. Here is a matter that concerns deeply the majority of our citizens who are smokers. It concerns our tax revenues. It affects an important industry. It affects the lives of many thousands of farmers and the communities in which they trade. The need for action is immediate, and time is of the essence.

AMENDMENT OF REORGANIZATION ACT OF 1949, AS AMENDED

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar 393, S. 1791.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (S. 1791) to amend the Reorganization Act of 1949, as amended, so that such act will apply to reorganization plans transmitted to the Congress at any time before June 1, 1959.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. JOHNSON of Texas. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the order for the call of the roll be rescinded.

The PRESIDING OFFICER (Mr. YARBOROUGH in the chair). Without objection, it is so ordered.

Mr. JOHNSON of Texas. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Texas will state it.

Mr. JOHNSON of Texas. Do I correctly understand that the pending business is Calendar No. 393, Senate bill 1791, amending the Reorganization Act of 1949, as amended?

The PRESIDING OFFICER. That is correct.

Mr. JOHNSON of Texas. The distinguished junior Senator from Minnesota [Mr. HUMPHREY] is in the Chamber, and is prepared to explain this measure. I ask that he be recognized for that purpose.

Mr. HUMPHREY. Mr. President——

The PRESIDING OFFICER. The Senator from Minnesota is recognized.

Mr. HUMPHREY. Mr. President, this bill proposes that the Reorganization Act of 1949 be continued from its present expiration date of June 1, 1957, to June 1, 1959. Inasmuch as we are now in the first week of June, it is obvious that this measure must be enacted promptly if the work involving reorganization of the Government under the terms of the Hoover Commission reports is to be continued.

The objective of the bill is to permit more effective reorganization of the executive branch of the Government, by authorizing the President to submit reorganization plans which will become law unless disapproved by a majority of the authorized membership of either House within 60 calendar days following the date of submission.

The President has recommended the enactment of this measure, as has the Director of the Bureau of the Budget. The bill has full administration support. Furthermore, the bill was unanimously reported by the Committee on Government Operations; and the bill was introduced by the chairman of the committee, the Senator from Arkansas [Mr. MCCLELLAN].

The PRESIDING OFFICER. The bill is open to amendment.

If there be no amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill (S. 1791) was ordered to be engrossed for a third reading, read the third time, and passed as follows:

Be it enacted, etc., That subsection (b) of section 5 of the Reorganization Act of 1949 (63 Stat. 205), as amended by the act of February 11, 1953 (67 Stat. 4) and the act of March 25, 1955 (69 Stat. 14), is hereby further amended by striking out "June 1, 1957" and inserting in lieu thereof "June 1, 1959."

PAYMENT OF TRANSPORTATION AND SUBSISTENCE COSTS TO TEMPORARY EMPLOYEES ON FEDERAL HIGHWAY PROJECTS

Mr. HUMPHREY. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 394, Senate bill 1941, to authorize the payment by the Bureau of Public Roads of transportation and subsistence costs to temporary employees on direct Federal highway projects.

The motion was agreed to; and the Senate proceeded to consider the bill (S. 1941) to authorize the payment by the Bureau of Public Roads of transportation and subsistence costs to temporary employees on direct Federal highway projects, which had been reported from the Committee on Government Operations with amendments on page 2, line 1, after "1949", to insert "and the Standardized Travel Regulations insofar as consistent with this act", and, in line 3, after the word "of", where it appears the first time, to strike out "temporary" and insert "seasonal", so as to make the bill read:

Be it enacted, etc., That funds authorized to be appropriated under the Federal-Aid Road Act approved July 11, 1916, as amended and supplemented, for direct Federal highway projects, and funds made available to the Bureau of Public Roads from other Federal agencies for such Federal projects shall be available, under regulations approved by the Secretary of Commerce, for payment of transportation expenses and per diem in lieu of subsistence expenses, in accordance with the Travel Expense Act of 1949, and the Standardized Travel Regulations insofar as consistent with this act, for travel of seasonal employees between points of hire and project locations and while performing duty at project locations.

The PRESIDING OFFICER. The question is on agreeing to the amendments of the Committee on Government Operations.

The amendments were agreed to.

Mr. ALLOTT. Mr. President, may we have a brief explanation of the bill?

Mr. HUMPHREY. Mr. President, the bill was introduced at the request of the Secretary of Commerce, who stated that enactment of the bill is necessary in view of a recent decision of the Comptroller General which precludes the payment of transportation and subsistence expenses in connection with the hiring of students and other available persons on a temporary or seasonal basis in carrying out direct Federal highway-construction programs.

The Secretary stressed the need for urgency, since the peak of the highway construction period is during the months of June, July, and August, and, without the authority requested, a serious staffing problem will be created. In other words, there would then be the problem of hiring permanent employees, instead of temporary employees.

The PRESIDING OFFICER. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill (S. 1941) was ordered to be engrossed for a third reading, read the third time, and passed.

AMENDMENT OF FEDERAL PROPERTY AND ADMINISTRATIVE SERVICES ACT OF 1949, AS AMENDED

Mr. HUMPHREY. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 395, Senate bill 1536, to amend subsection 507 (a) of the Federal Property and Administrative Services Act of 1949, as amended.

The motion was agreed to; and the Senate proceeded to consider the bill (S. 1536) to amend subsection 507 (a) of the Federal Property and Administrative Services Act of 1949, as amended.

The PRESIDING OFFICER. A companion (H. R. 5110) has been received from the House of Representatives.

Mr. HUMPHREY. Mr. President, is the House bill identical?

The PRESIDING OFFICER. The Chair so understands.

Mr. HUMPHREY. Then, Mr. President, in order to facilitate action on this measure, and if agreeable to the acting minority leader, I shall ask that Senate bill 1536 be temporarily laid aside, and that the Senate proceed to the consideration of House bill 5110, an identical bill.

The PRESIDING OFFICER. The Chair lays before the Senate a bill coming over from the House of Representatives.

The bill (H. R. 5110) to amend the Federal Property and Administrative Services Act of 1949, as amended, and for other purposes, was read twice by its title.

Mr. HUMPHREY. I move that the Senate proceed to the consideration of the House bill.

The motion was agreed to; and the Senate proceeded to the consideration of the bill (H. R. 5110) to amend the Federal Property and Administrative Services Act of 1949, as amended, and for other purposes.

Mr. HUMPHREY. Mr. President, the pending bill will amend section 507 of the Federal Property and Administrative Services Act of 1949, as amended, by authorizing the Administrator of General Services to direct and effect the transfer to the National Archives of any Federal records which have been in existence for more than 50 years. Under the provisions of the bill, the Archivist of the United States will determine whether the records have sufficient historical value to warrant their continued preservation. The authority would not apply in cases where the head of the agency certifies to the Administrator that the records must be retained in his possession for the conduct of current official business.

Mr. President, the real purpose of the bill is economy. Let me add that all the bills discussed in the past few minutes, which have been reported from the Committee on Government Operations, are directed toward substantial cash savings for the taxpayers. It is the belief of the committee, as well as those in the executive branch who, along with the Hoover Commission, have studied this situation, that by the elimination of some of the paperwork and the storage of the records, substantial savings in Federal expenditures will be made.

The PRESIDING OFFICER. The bill is open to amendment.

If there be no amendment to be proposed, the question is on the third reading of the bill.

The bill (H. R. 5110) was ordered to a third reading, read the third time, and passed.

The PRESIDING OFFICER. Without objection, Senate bill 1536 is indefinitely postponed.

QUITCLAIM OF INTEREST IN CERTAIN LANDS IN INDIANA

Mr. HUMPHREY. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 396, Senate bill 806, to authorize the Administrator of General Services to quitclaim all interest of the United States in and to certain lands located in Indiana to the State of Indiana and to the board of trustees for the Vincennes University, Vincennes, Ind.

The motion was agreed to; and the Senate proceeded to consider the bill (S. 806) to authorize the Administrator of General Services to quitclaim all interest of the United States in and to certain lands located in Indiana to the State of Indiana and to the board of trustees for the Vincennes University, Vincennes, Ind., which had been reported from the Committee on Government Operations with an amendment to strike out all after the enacting clause and insert:

That (a) the Administrator of General Services is authorized and directed to convey by quitclaim deed, without consideration, to the board of trustees for the Vincennes University, Vincennes, Ind., all right, title, and interest in and to that parcel of land located in the city of Vincennes, Ind., title to which was vested previously in the city of Vincennes, Ind., by section 2 of the act of March 3, 1881 (21 Stat. 505), and which was authorized to be conveyed with certain reservations to the board of trustees for the Vincennes University by the act of June 30, 1944 (58 Stat. 645). The Administrator shall except from such conveyance that area of land within such parcel bounded by Third and Fourth Streets and Indianapolis Avenue and Hickman Street (now College Avenue).

(b) The Administrator shall withhold execution of the conveyance provided for in subsection (a) until he determines that the city of Vincennes, Ind., has released and conveyed to the board of trustees for the Vincennes University any right, title, and interest that such city may have in and to the parcel of land defined in subsection (a). In the event the city of Vincennes fails to release and convey such right, title, and interest within 6 months from the date of enactment of this act, the authority contained herein shall terminate and be of no further force or effect.

Mr. HUMPHREY. The bill, known as S. 806, was introduced by the senior Senator from Indiana [Mr. CAPEHART], and was referred to the Committee on Government Operations.

The purpose of the bill, as amended, and as reported unanimously, I believe, by the committee, is to remove certain reversionary restrictions so that the Vincennes University in Indiana may erect much needed school facilities on land which is a part of the university campus.

The Government's interests in this property are nominal only, and the reversionary restrictions proposed to be removed are reported as having little or no monetary value. Furthermore, all the protections which are usually afforded the Government in this type of legislation are included.

Mr. President, I ask unanimous consent that there may be printed in the RECORD at this point an extract from the report on the bill, as marked. I do this because the bill involves a transfer of some property, and so that every Senator who is interested in the bill may be informed.

There being no objection, the extract from the report (No. 389) was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of the bill, as amended, is to remove certain reversionary restrictions so that the Vincennes University may erect much-needed school facilities on the land which is a part of the university campus. The Government's interests are nominal, and the reversionary restrictions proposed to be removed are reported as having little or no monetary value.

The bill, as amended, provides as follows:

"That (a) the Administrator of General Services is authorized and directed to convey by quitclaim deed, without consideration, to the board of trustees for the Vincennes University, Vincennes, Ind., all right, title, and interest in and to that parcel of land located in the city of Vincennes, Ind., title to which was vested previously in the city of Vincennes, Ind., by section 2 of the act of March 3, 1881 (21 Stat. 505), and which was authorized to be conveyed with certain reservations to the board of trustees for the Vincennes University by the act of June 30, 1944 (58 Stat. 645). The Administrator shall except from such conveyance that area of land within such parcel bounded by Third and Fourth Streets and Indianapolis Avenue and Hickman Street (now College Avenue).

"(b) The Administrator shall withhold execution of the conveyance provided for in subsection (a) until he determines that the city of Vincennes, Ind., has released and conveyed to the board of trustees for the Vincennes University any right, title, and interest that such city may have in and to the parcel of land defined in subsection (a). In the event the city of Vincennes fails to release and convey such right, title, and interest within 6 months from the date of enactment of this act, the authority contained herein shall terminate and be of no further force or effect."

BACKGROUND

Information furnished the committee by Vincennes University, under date of April 12, 1957, gives the chronological history of the real estate involved, and the need for the present legislation, as follows:

"1. By an act of Congress approved March 3, 1881 (21 U. S. Stat. 505), title to all of the real estate here involved was vested in the city of Vincennes, for use as a city park, with a reservation that if it ceased to be used as a park the title should revert to the United States.

"2. By an act of Congress approved June 30, 1944 (58 U. S. Stat. 645), the city of Vincennes was authorized to convey its interest in said real estate to the board of trustees

for the Vincennes University with the double reservation that if the university ceased to use the property for school purposes, it would revert to the city for park purposes, and that if the city ceased to use it for that purpose it would then revert to the United States.

"3. On April 9, 1946, the city of Vincennes conveyed all of its interest in said property to the board of trustees for the Vincennes University. This deed was approved by the Secretary of the Interior on May 7, 1946, and is recorded in Deed Record 113 at pages 50 to 56 in the recorder's office of Knox County. The city of Vincennes has not since claimed and does not now claim any interest in this property.

"4. On April 25, 1949, the trustees of the university conveyed two city blocks; bounded by Indianapolis Avenue, Second Street, Fourth Street, and Hickman Street (now College Avenue); off the east end of the above tract to the State of Indiana. This conveyance was made upon the understanding that the land conveyed would be used as a site for a National Guard Armory which might be used by the university when it was not needed for military purposes.

"5. On the following day, April 26, 1949, the city of Vincennes executed a similar deed to the State. This deed was not for the purpose of conveying title, since the city did not claim to have any title, but was merely in the nature of a quitclaim of all interest of the city in the property involved.

"6. Being unable to comply with its promise to Vincennes University, the State of Indiana, on the 7th day of February 1957, reconveyed to Vincennes University and the city of Vincennes that part of said real estate which is bounded by Hickman (now College Avenue), First and Second Streets, and Indianapolis Avenue. This deed is duly recorded in the recorder's office of Knox County, Ind.

"7. All of the land described in this legislation is actually used and occupied by Vincennes University as a college campus. The Federal Government has already parted with title to it, except on the contingencies that the university shall ceases to use it for school purposes, and, in which event, the city of Vincennes should then cease to use it for park purposes.

"8. The only purpose of this legislation is to release the land from these reversionary restrictions, so as to vest the fee simple title in the university. Before this can be done, the bill provides that the city shall again release its reversionary interest in favor of the university. The proposed act is necessary so that the university may obtain a self-liquidating loan from the Federal Housing Administration for the erection of much-needed school facilities on its campus.

"It should be pointed out that the Federal Government has no substantial interest in the property and that its remote reversionary interest has no monetary value."

The PRESIDING OFFICER. The question is on agreeing to the committee amendment in the nature of a substitute.

The amendment was agreed to.

The bill (S. 806) was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to authorize the Administrator of General Services to quitclaim all interest of the United States in and to a certain parcel of land in Indiana to the board of trustees for the Vincennes University, Vincennes, Ind."

Mr. JOHNSON of Texas. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. SCOTT in the chair). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AGRICULTURAL TRADE DEVELOPMENT ACT—NOTICE OF HEARINGS BEFORE COMMITTEE ON AGRICULTURE AND FORESTRY

Mr. HUMPHREY. Mr. President, on another matter, for the information of my colleagues in the Senate, I should like to announce, acting on behalf of the chairman of the Committee on Agriculture and Forestry, the Senator from Louisiana [Mr. ELLENDER], that starting on the morning of the 11th day of June, at 10 a. m., the full Committee on Agriculture and Forestry will begin hearings of a rather exhaustive and comprehensive nature relating to the administration of Public Law 480, which is known as the Agricultural Surplus Disposal Act, or, in more formal language, the Agricultural Trade Development Act.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. HUMPHREY. These hearings will be continued for several weeks in an effort to find out about this legislation, how it operates, how it is being administered, the relationship of the agricultural program to our foreign policy, and, finally, what, if any, improvements can be made not only in the administrative features, but in the substantive legislation itself.

I now yield to the Senator from Montana.

Mr. MANSFIELD. I should like to ask the distinguished Senator from Minnesota if he has any idea as to how much money has been spent under Public Law 480 up to this time.

Mr. HUMPHREY. I believe approximately $3 billion.

Mr. MANSFIELD. Does the Senator have any idea as to precisely what the United States Government has received in return?

Mr. HUMPHREY. Yes. I would say that the United States Government has received in return, under Public Law 480, first of all, an expansion of its export market, and the development of some new consumer habits in American food products. It has also received a substantial amount of foreign currency which, if properly used, can be of benefit to our country. Best of all, I would say we have received a lot of good will and a tremendous appreciation on the part of other peoples. I think it is an appreciation on the part of governments, but surely on the part of their people.

Mr. MANSFIELD. Where is the money which we received in return for Public Law 480 disbursements?

Mr. HUMPHREY. I wish to say to the Senator, that is going to be a part of our inquiry. I have been very much disturbed, as the Senator from Montana knows, by what I consider to be rather loose administrative control and operation of the funds generated or gained by the sale of our surplus commodities to other countries.

The Executive order—the number of which escapes my memory for the moment—relating to the administration of Public Law 480, is a prime example of confused bureaucracy.

Mr. MANSFIELD. Under whose authority is Public Law 480 administered?

Mr. HUMPHREY. That is one of the great mysteries and secrets of modern government. Allegedly and supposedly Public Law 480 is a Department of Agriculture program, but under the different titles of Public Law 480 various officers in the Department of Agriculture have some authority.

I believe title I, the sales part of the program, is under Assistant Secretary McLain. Title III, covering the barter provisions, is under Mr. Berger, head of the Commodity Stabilization Service. They do not really control the situation either, because under the executive order much of this program must be coordinated with the Administrator of the International Cooperation Administration, Mr. Hollister.

Mr. MANSFIELD. But the entire program deals with surplus commodities produced in this country.

Mr. HUMPHREY. Exactly.

Mr. MANSFIELD. In the final analysis, is not Mr. Benson, the Secretary of Agriculture, the man who is responsible?

Mr. HUMPHREY. He should be.

Mr. MANSFIELD. He does not know where the funds are, which have been returned for disbursement under the Surplus Products Act, Public Law 480.

Mr. HUMPHREY. There is evidence which would lead one to believe that no one in the Government of the United States is entirely sure as to exactly where the funds are. If anyone is sure, he has not told us where they are, or what has been done with them. I am very much upset over the situation.

Mr. MANSFIELD. Did not Mr. Benson announce to the press earlier in the week that his Department had suffered another $1 billion plus loss because of his having to buy up surplus food products?

Mr. HUMPHREY. The Senator is absolutely correct. As I recall, during the weekend—on Friday or Saturday—there were announcements in the press to the effect that the Secretary of Agriculture was telling the American people that the price-support operations for the past year had cost the taxpayers $1 billion, and that most of this loss was due, as he said, to the sale of our surplus commodities overseas under the terms of Public Law 480.

I have this observation to make: First, any department head who offers as his claim to fame, or to a headline, the fact that he lost $1 billion, that he cost the people $1 billion, ought to tender his resignation, or at least try to suggest some method for improvement of the administration so that such losses would not occur. In my judgment, the loss of $1 billion is not a qualification for

fame, or for outstanding administrative management.

But what is more important is that the $1 billion loss, so called, is not a loss at all, at least in terms of the $1 billion, because if these commodities are sold, they are sold for the currencies of other lands, and those currencies, such as lira in Italy, or drachmas in Greece, are available to the Government of the United States for the purpose of paying the costs of our Embassy missions and other governmental activities in the area. They are also available for economic development in the respective countries, on the basis of interest-bearing loans.

But what does Mr. Benson do? I want to be fair about this. Because of the way the program is set up, Mr. Benson says that when we sell $100 million worth of wheat to Greece, and we receive the equivalent of $100 million in Greek drachmas, we cannot call that money. It really is not money at all, until the Department of Defense or some other department of Government uses the money, and repays the Department of Agriculture in dollars, through a bookkeeping transaction. Until that point arrives, Mr. Benson says there is no money; we have lost it, despite the fact that we have in foreign banks the equivalent of millions of dollars in currency of foreign countries, owned by the Government of the United States. Despite that fact, the Secretary of Agriculture announces to the American people that we have lost $1 billion.

Those drachmas would buy something today in Greece. They would pay for the student exchange program. They would buy books. They could be used for economic development. As the Senator knows, during the past week we released some of those funds for purposes of economic development. On such loans the Greek Government will pay 4 percent interest, on a long-term basis.

With a little imagination and creativeness—which, by the way, is something for which this administration has no reputation, and justifiably so—that money could be loaned to American businessmen in any country at reasonable rates of interest, on the basis of a 10-, 15-, 20-, or 25-year loan, for the purpose of American business investment. A gentleman is waiting for me in my office at this moment to discuss that very question.

Mr. MANSFIELD. How could our officials do that when they do not even know how much they have?

Mr. HUMPHREY. We intend to find out about that; and no one has tried harder to find out than has the Senator from Montana. What we are trying to find out is how many dollars, in terms of foreign currencies, are available to the Government of the United States. The information seems to be a guarded secret. I think it is labeled "top secret," and that it will require something like an Atomic Energy clearance to find out about it.

Mr. MANSFIELD. Mr. President, will the Senator yield for one further question—and this will be the last?

Mr. HUMPHREY. I yield.

Mr. MANSFIELD. Is it not true that the disbursements under Public Law 480, in connection with the foreign-aid program, are in addition to the funds requested by the President?

Mr. HUMPHREY. Exactly. I think it ought to be made very clear that the funds generated by the sale of American surplus commodities are in addition to any funds appropriated for foreign aid or for military expenditures.

I should like to say, in behalf of the farm producers of America, that there is no single thing the Government of the United States is doing that is accomplishing more toward filling the reservoir of good will on the part of other peoples toward the United States than our food program.

This Senator will make it his work in the Senate to try to have a policy established under this Government for the use of the blessings of food and fiber as instrumentalities of American compassion and foreign policy.

I have come to the conclusion that some of the tanks which we send to people who do not know how to operate them—and every Senator knows I am telling the truth—should perhaps be loaded with powdered milk, wheat, or rice. Some of the tanks are sent to countries where the personnel is incapable of handling them. They end up as a sort of memorial to the folly of a military assistance program in areas where the people are not trained to operate them.

Mr. President, on April 13 I forwarded a letter to the Secretary of Agriculture requesting an analysis of the effect of Public Law 480 on sales, on price support levels, on farm prices, and on income of farmers. In response to that request a small task force of representatives of several agencies of the Department of Agriculture was appointed, and that group submitted to me a very fine report relating to the effect of title I of Public Law 480 on exports, on farm prices, on income, and on price support levels.

I am pleased to announce that the overall effect of this program on domestic farm income has been very good and helpful. For example, exports of cotton under title I of Public Law 480 will probably result in the support level—and hence the prices received by farmers for the 1957 cotton crop—being from three-quarters of a cent to a cent higher than would have been the case in absence of this legislation. This is a foreign sales program which has had a decidedly beneficial effect upon the domestic producers and the domestic crop.

I say to my friends from the cotton States that without Public Law 480 the American cotton export program could have been severely crippled. With it there has been a decided improvement in the export market of our cotton crop.

For example, let us take rice. It is estimated that the prices received a hundred pounds by rice farmers for the 1955 crop were 19 cents, and those for the 1957 crop will be at least 27 cents higher. They were 19 cents a hundred pounds higher in 1955, and will be 27 cents a hundred pounds higher in 1957. That is because of the use of Public Law 480.

This is also true, Mr. President, in terms of feed grains and corn. It is estimated that the increased price for corn will probably be about 1 cent a bushel, and for barley from 1 to 2 cents. That does not sound like very much in terms of 1 unit, or 1 bushel. However, when it is realized that we produce billions of bushels of a commodity, it does represent a substantial gross income.

For fats, oils, and oilseed, it is fair to say that Public Law 480 has had great beneficial effect.

The prices of lard and edible tallow were about 2 cents higher because of the effect of this law. Prices of cottonseed and soybeans rose from 1½ to 2 cents a pound in 1955, and 2 cents a pound in 1956.

I have had a tabulation made from which I find that, according to the Department of Agriculture, the farmers' cash receipts from the sale of farm products have been increased by about $165 million in 1955–56, and by about $275 million in 1956–57, as a result of exports until title I of Public Law 480. It is estimated that the amounts in 1957–58 may not be greatly different from those of 1956–57, although there are indications that they may go higher.

Mr. President, I shall not go through the entire report, because it is my hope that the Senate Committee on Agriculture and Forestry will print this analysis and study, made by the Department of Agriculture, as a committee study.

However, I should like to say to the Presiding Officer, the Senator from North Carolina [Mr. SCOTT], who represents one of the great agricultural States of the Union, and to the acting majority leader, the Senator from Oklahoma [Mr. MONRONEY], that this program of agricultural market development and the surplus disposal program, under Public Law 480, if properly understood by those who adminster it, if properly understood by the Members of Congress who have legislated it, if properly understood and applied by our foreign service officers abroad, particularly our embassy officials and our military officials, and if this development could take place, and if this understanding could be brought about, could have a tremendously important and constructive effect upon American foreign policy.

I wish to say again from the floor of the Senate that in the Middle East food is much more important than guns. I wish to say also that if the policy of America in that area of the world would have a little less regard for kings and oil and a little more regard for people and water, and if a little more emphasis were placed upon food, instead of merely upon power, we would have a much more effective policy for the long run.

Mr. President, this program is designed not only to sell commodities, but it is designed also to extend the warm hand of American humanitarianism through the voluntary agencies of our churches and our nonprofit, volunteer groups, to the needy peoples of the world.

A country such as ours, which has a very fine and modern and up-to-date agricultural economy, a country such as ours, with its productive soil, a country

such as ours, which has the God-given blessing of abundance instead of scarcity, ought to be using every means at its command to use this positive element, namely, food, and build strength with it.

Khrushchev, the new television star Secretary of the Communist Party in the U. S. S. R., laid down two challenges to the American people on Sunday afternoon in his television appearance. The first challenge he laid down was that the grandchildren of those in America who were listening to his words and viewing his television appearance would live under communism or socialism.

That was not merely an assertion by Khrushchev; that was a challenge. I suggest, Mr. President, that we accept the challenge and see who is right and who is wrong. If Khrushchev thinks communism or socialism will gain the ascendancy in this country, he has another "think" coming, provided that we will use the human and material resources we have and keep our economy of opportunity, and provided that we will use our material and human resources to give people a chance to live the good life.

I should like to see our country challenge the Soviet system in every area—military, political, economic, cultural, and social.

I am not one of those who feel that, merely because a leader of a country whose traditions and institutions are inimical to our own interests, says something is going to happen, we should permit it to happen.

We know that if we concentrate our attention and dedicate our resources and our strength, we can make not only America a continuing area of political and economic progress, with ever-broadening opportunity, but we can also extend the program.

That is the challenge we should throw right back to the Soviets and say, "If you want to compete with us economically, all right, let's go. If you want to compete with us politically, if you want to compete with us educationally, if you want to compete with us in science and technology, we join the issue right now. Let us start the race."

However, Mr. President, it will require us to concentrate our attention. I am optimistic about the future, provided that we realize that freedom is not free, and provided that we are willing to pay the price in sacrifices in order to attain the objectives of liberal democracy.

What was the second challenge? I want every Senator who has one or more farmers in his State to listen to this challenge. The second challenge was that in the years to come the Soviet Union will out-produce the United States of America in wheat, in beef cattle, in pork, in milk, and in agriculture in general.

He laid it right down on the line. Khrushchev, whose country only a few years ago saw its collective system of agriculture falling apart, Khrushchev, who sent his people to America to see the great farms of Iowa and Minnesota and Illinois and other States, the same Khrushchev now feels a sense of confidence. Why? It is because of the tilling of virgin soil and the opening up of some 20 million acres of land to wheat production, and because that land produces a large crop. The number of cattle in the Soviet Union is increasing for the first time since the revolution of 1917. The Soviet is making a determined effort to extend its agriculture. Why? Because Khrushchev, who knows that in food there is strength and power, and who lives by power in the Soviet Union, and who understands the meaning of power, is now preparing his country to develop the food and fiber resources of Russia, and to drive America out of Europe, Asia, and Africa. Yet we have a Government which toys around with the food program as though it were a liability and as though it were a problem.

I have said on the floor of the Senate, not once but 50 times, that if the Soviet Union had 800 million bushels of wheat in surplus, if the Soviet Union had a billion bushels of corn, if the Soviet Union had 5 million bales of cotton, if the Soviet Union had edible fats and vegetable oils, they would be going around the world like a Fuller brushman—forgive me for bringing the Fuller brushman into this debate—they would be going around the world like a salesman exchanging their resources for others. I saw them do it in Egypt, and they are doing it in other places.

But here we are with a surplus of food. Every time the United States Government sends some food abroad, I hear someone say or I read what some writer states in his column to the effect that the Government is subsidizing agriculture. But when we buy tanks from an American automobile company and send them overseas to people who do not even know how to operate them, we say that is military assistance. We say it is our foreign policy. That is the way we do things.

Every time the Government of the United States decides to send a little food to hungry people, or even to feed armies which we have armed—and, Mr. President, we have armed armies which were so weak physically that they had to be fed before they could carry the weapons—someone says, "That is surplus disposal; that is a subsidy; it is a loss to the Government."

Who says it? The man who runs the Department of Agriculture and his cohorts.

Mr. President, Napoleon knew something about fighting wars and winning them. Napoleon once said that an army travels on its stomach. He was the greatest tactician of his time in the use of artillery. But he spent less time talking about artillery and more time speaking about food.

I repeat: Khrushchev has challenged America in the field of agriculture. We had better place someone in control of the United States agricultural program who knows how to use food for the purposes of peace, progress, and strength. We are beginning to make an effort. We are beginning, I should say, to make some progress. The purpose of my remarks today is to serve warning on all officials in the Government of the United States that I shall be as relentless in my pursuit of this objective as Cato was about Carthage. Cato said every day in the Roman Senate:

> Delenda est Carthago.
> Carthage must be destroyed.

HUBERT HUMPHREY is going to say in the Senate, every day, "America needs a food policy—a food policy not only at home, but also abroad."

One thing I will say for this administration is that it has wrecked the farm program. It has done that. Its farm program is an utter shambles. I hope the farm policy at home can be rebuilt, and that our farm policy abroad can be supplemented by the use of food and fiber in a constructive manner.

If there are officials of the Government who do not know how to use Spanish currency in Spain, when Spain has bought soybean oil, or when it has bought wheat or cotton; if there are officials of the administration who are so unimaginative, so uncreative, and so abysmally unbusinesslike that they do not know how to spend money for constructive purposes, then I suggest that there be a change of personnel. The matter is that simple.

I suggest that if there are in the Government officials who do not know how to use the currencies of other lands for good, constructive purposes, besides those I have mentioned, we simply should change the personnel.

The time is at hand for the American Government to coordinate its foreign policy elements. The Senator from Montana [Mr. MANSFIELD] put his finger on the problem by his question not long ago, when he asked, "How much of that currency is available, and where is it?"

It is the old story of "Button, button, who's got the button?" as people used to say years ago. Now it is, "Currency, currency, who's got the currency?" Nobody quite knows. All I know is that there is plenty of it. My suggestion is that it be used for good purposes.

Mr. GORE. Mr. President, will the Senator yield?

Mr. HUMPHREY. I yield to my good friend, the great junior Senator from Tennessee.

Mr. GORE. I thank my colleague. I am enjoying immensely his very able address.

I saw recently in a national magazine and also in a large daily newspaper a photograph to which I wish to call the attention of the distinguished junior Senator from Minnesota. It was a picture of United States farm aid, or foreign aid, to agriculture in Vietnam. The picture was of a huge, 4-disk plow.

I have a farm background. I own and undertake to operate a small farm in Tennessee. I know it takes quite a plantation to justify a 4-disk plow. As I understand, the average-sized farm in Vietnam is quite small, many farms being so small that a 4-disk plow and a caterpillar tractor to pull a plow would have difficulty making a turnaround. It appears to me that that is not the kind of technical assistance which I support. It is not the kind of practical assistance usable by the people who need the assistance which I support.

While I was in southeastern Asia, I saw other examples of United States aid programs which are grandiose and impractical. We must try, it seems to me, to enable the people indigenous to the areas we desire to aid to improve their own conditions by their own efforts. I doubt if it is of much assistance to the farmers of Vietnam to give them huge, 4-disk plows and caterpillar tractors unless we want to encourage them to have communal farms.

Mr. HUMPHREY. I thank the Senator from Tennessee for his very wise and timely observation. This is the very sort of thing, as the Senator from Tennessee knows, that the Committee on Foreign Relations is attempting to go into, as we now have before us for consideration the authorization request for the new Mutual Security Act. It is much the same type of material—not in this specific detail relating to Vietnam, except in some other instances—which has been brought forth in the questioning of the Administrator of the ICA and his associates.

I think these questions are asked and the remarks are made in a constructive manner. What we seek to do is to get the most for the dollars we expend. That is the purpose of hearings and the purpose of inquiry by a committee.

Mr. GORE. Mr. President, will the Senator further yield?

Mr. HUMPHREY. I yield.

Mr. GORE. I know the Senator is aware that I speak not as a foe of technical assistance, not as a foe of the programs which have been in effect in past years, to bring about effective economic aid through the point 4 program. I speak as one who has supported those programs.

I see on the floor the distinguished junior Senator from Oklahoma [Mr. MONRONEY] and the distinguished senior Senator from Colorado [Mr. ALLOTT]. The three of us were present in a conference with the late President Magsaysay in the Philippines. I regarded President Magsaysay as the greatest democratic statesman in the entire Asiatic theater. I recall President Magsaysay discussing with us the kind of aid and assistance which the farmers in the Philippines needed. He said they wanted a caribou and a plow with a metal point on it. They want stock for a little fish pond. They do not want a huge caterpillar tractor, which perhaps 1 person out of 10,000 can drive. A huge, four-gang plow is worthless to those people.

I should like to see our program put on a more practical basis than the one it is on at the present time. When it is placed on a practical basis, I shall not only be pleased to endorse it, but I shall be its supporter.

Mr. HUMPHREY. Again I wish to thank the Senator from Tennessee. Every Member of this body knows—as, I am sure, do the President and those in charge of these programs—that the Senator from Tennessee has been, and continues to be, a fervent supporter of these programs, and seeks to improve them. These programs are of the utmost importance. That is why I have raised my voice loudly today in behalf of Public Law 480.

Mr. President, when the Congress makes a large appropriation for the assistance of troops in Turkey—and, by the way, I believe such an appropriation is wise and necessary; the Turks are our good allies, and there are no finer or braver soldiers in all the North Atlantic Alliance countries than the Turks—I have yet to hear compliants about the necessary expenditure of the money of our taxpayers for the military assistance program to Turkey, and I hope I shall not hear any complaint about it. But I observe that it takes much longer—2 or 3 times as long—for the Government of the United States to act upon requests that wheat or cotton or rice or powdered milk be given by us to one of our allies. Certainly the Turkish Army needs food, and the Turkish economy needs food, and the Turkish Government knows that the food is needed. But when requests for food come to us from Turkey, I hear some say, "We do not have any money for food." But, Mr. President, we already have the food; it has been paid for by the Government of the United States, and is in storage. The trouble is that the administration did not have sufficient foresight to request of Congress soon enough, or with enough determination, an authorization for the transfer of the food from the Commodity Credit Corporation into the hands of our allies.

Since the Senator from Wyoming [Mr. O'MAHONEY] is in the Chamber, I should like to call to his attention an observation which was made to me less than a month ago. I remember when the Senator from Wyoming stood on this floor some years ago after having processed in the Appropriations Committee a Defense Department appropriation bill amounting to almost $50 billion; and I remember the fatigue that showed on his face, as a result of the long hours of work he had done in the committee. I am sure the Senator from Wyoming remembers that.

Mr. President, Admiral Briscoe, chief in command of the southern NATO forces in Naples, Italy, the man who is responsible for the defense of the Mediterranean, a man who is responsible for the southern flank of NATO, told me that if war were to break out in Europe, if the Soviets were to attack, there was such an inadequate amount or such a deficit of food in the area he was committed to defend that the troops upon which he would have to rely and the countries upon which he would have to rely had less than a month's supply of food. I am being very generous in my comment, Mr. President, for security reasons. I would not even wish to say publicly how little food they have; I would not say it publicly because at the time we were in executive session or secret session. But let the RECORD read "less than a month's supply."

On the other hand, the Soviet Union has almost 450 submarines. At the beginning of World War II, Nazi Germany had less than 60 submarines; I believe the correct number is 57. Even so, numerous tankers were sunk by Nazi submarines close to the coastline of the United States. In fact, because of the effectiveness of the Nazi submarine warfare, the allies almost collapsed before it was possible to get the full weight of American power into the war. Therefore, Mr. President, 450 submarines, or even 300, in the hands of the Soviets would surely be as effective, if not more so, as the 57 Nazi submarines.

The United States is stockpiling weapons in Europe, and is stockpiling munitions in Europe, and is building a 485-mile-long pipeline across Spain, at a cost of millions of dollars, for fuel for airplanes; and the United States is establishing a great logistics system in France and Italy, for supplies, and is building pipelines for aviation gasoline. But someone has forgotten that people must eat. What about food? What about transferring, for example, some of our great resources of wheat, and putting them into storage facilities in such places as Great Britain, Spain, Greece, or Italy? What about making adequate preparations in the case of foodstuffs, in addition to adequate preparations for atomic weapons?

Many things could be done. I lay no claim to being an expert in this field, but I do lay claim to having an inquisitive mind in regard to these matters. So I am prepared to defend the thesis that everyone's business is no one's business, in the case of Public Law 480. In this case, everyone has his hand on it, but no one is directing its course. Everyone has something to say about it, but no one does much about it. Everyone in the Government has something to say about the money obtained from the sales, but no one seems to know quite what to do with the money.

I come from a section of America and from a family which has always had an idea of what might be done with money, whenever it was available. I hope our country has not become so rich and so fat that the people have lost their ability to act constructively in such a situation as this one, and to use in a constructive way the financial resources in our possession and under our guidance.

Mr. President, for a moment I thought I would read into the RECORD the report I hold in my hand. Instead, however, I should like to request permission that it be printed as a public document. I refer to the report entitled "Effects of Title I, Public Law 480, Exports on Farm Prices, Income, and Price Support Levels." It is a United States Department of Agriculture report.

This study was made, not by me, but by the administration itself. The study underscores what I have argued for, for months, namely, that such a program is not only good internationally, but also is good domestically. Instead of paying money for the storage of these commodities, let us use them; instead of complaining about the situation, let us apply them for good purposes.

Mr. MONRONEY. Mr. President, will the Senator from Minnesota yield to me?

Mr. HUMPHREY. I yield.

Mr. MONRONEY. I wish to express my appreciation of the excellent description the Senator from Minnesota has given of the work under Public Law 480 and its worldwide influence in win-

ning peace. I wonder whether the efforts of our Government to stabilize the economies of these countries, through lending back some of the domestic currencies over a period of time, have also played an important part in holding the remaining democracies away from the influence of the Iron Curtain.

Mr. HUMPHREY. I would say to the Senator he is absolutely right. The countries to which we sell the food first get the use of the food to alleviate some of their human problems at home, and, secondly, under the arrangements which are made, in connection with which there is a great amount of consultation, they get the use of the money as a 35- to 40-year loan, at 5 percent interest. What that has done has been miraculous. Rural electrification has been put into effect in Greece with some of this money. Great reservoirs and dams are being constructed in northwestern Spain to reclaim arid land there. I was in Israel and witnessed what the people there were able to do with Public Law 480 funds. If there ever was a country in which new building and progress are earnestly being undertaken, and in which planning and prudent investment are the theme of the day, it is Israel.

Mr. MONRONEY. In other words, we are not forced to lend dollars or hard currency, but in exporting our agricultural surpluses and taking the local currencies of the country, we resiphon the money, and they are able to use the local currency for which the food surpluses have been sold for the creation of rural electrification, public-health uses, and other worthwhile works. Is that correct?

Mr. HUMPHREY. And schools. The money is used for every good project conceivable.

I say to our farmers, to Mr. Farmer, Mrs. Farmer, and all their fine children, I know of no place where the wheat and the cotton, or the milk which was converted into powdered milk, have been used to buy arms. I know only that the money received has gone into health, education, libraries, electricity, irrigation, and into other works of man for peace.

That fact made me feel good. I have seen food from my own State of Minnesota feed hungry children. I felt better and cleaner as an American. I have seen the cotton which came from the State of the Senator from Oklahoma converted into clothing for the people who needed it. I have seen rice from Arkansas and Louisiana used to feed children in areas of the world such as Greece, where 1 out of every 3 children is an orphan. Think of it, Mr. President, 1 out of every 3 is an orphan. I have seen wheat converted into flour so that people could have a better diet, and then have seen the currencies which were generated from their sale, as the Senator from Oklahoma has said, immediately used to build schools or health centers or 50-bed hospitals. That has been done.

Mr. MONRONEY. The Senator from Minnesota has just returned from the Middle East. He is also familiar with the Far East. Does he not also believe that in buying agricultural surpluses under Public Law 480, those countries do not have a feeling of dependency, and that critics within those countries or outside the countries cannot charge them with being puppets of our Government and of being dominated by the United States Government? In other words, I feel, and I wonder if the distinguished and able Senator from Minnesota does not agree with me, that we must be wary of our good deeds in order that we do not undermine the very governments we are trying to help by furnishing them gratis, in grants, funds they need for public works and military assistance. Under the program the Senator is discussing, they shop for their needs with their own currencies, and they spend their own money.

My question is, Is it not a safer program, if we are trying to help the small and underdeveloped nations, to help them as much as we can in that way, instead of with dollar grants that would cause them to be suspicious of being dominated by the United States?

Mr. HUMPHREY. The Senator is correct. I would not say there are not places where we do not need to help some countries with dollar grants, or with dollar loans, as we come into this new program. We get a twofold effect out of the program. There is the immediate effect of good nutrition from good food, and the second effect is the long-range one of using interest-bearing loans for the good of the country.

Some persons may say, "You are never going to get the money back." That is no way for anyone to feel. The odds are that we will get it back. As a matter of fact, we have found that persons who could not get loans from private lending institutions, some of our own farm people who have gotten money from the Farm Credit Administration, were the best credit risks. They have paid the loans back. I suppose there will be some defaults on some of these loans in certain countries, because we cannot predict their political stability, but I am sure there will be a better degree of political and economic stability and new markets.

I have heard it said that Europeans would not eat cornmeal. I come from an area where there is produced most edible corn. It has been said that Europeans will not eat it. That is not true. They are using it.

I have heard it said that we could not export Cheddar cheese, that Europeans and Asians would not eat it. They do eat it, and love it. What is more, they are developing a taste for it. As they go into the private markets where they are able to purchase their own groceries, they ask to buy Cheddar cheese, which is a product we can export for dollars. This is good business, good foreign policy, and, I may say, a good humanitarian policy.

I hope that in the days to come more Senators will participate in debate on this question. I wish only to add that the total amount of authorizations since 1953 has been $3 billion, and of that amount more than $2,100,000,000 is the value of the currencies we have received. Another $225 million has been paid for ocean freight to deliver relief commodities—commodities for the needy, in places where we could not sell anything—such as the CARE program, the church relief program, the National Catholic Welfare program. I have seen those programs operate. I pay tribute to them. What a magnificent and honorable job they have done.

Mr. President, let someone tell me of any other program in the field of national security that has actually cost the taxpayers less in 3 years than $800 million. That is presuming that the worst happens, that we get nothing back. The amount is $800 million. It is less than that if we deduct ocean freight payments for relief commodities. We authorized $3 billion, which has been used, and we have been able to get back $2,100,000,000 in local currencies. The rest of it has been used because of the difference between the price the United States Government pays to domestic producers and the price at which we can sell on the world market. That money has been used to keep countries well fed. It has been used to keep Turkish soldiers and the Turkish people well fed. It has been used to prevent starvation and economic crises. It has been used to buttress our $350 million airbase program in Spain. General Kissner, whom I greatly admire and respect, and who negotiated the 1953 agreement in Spain, told me that without this food program the base program could not be successful. Yet the Government of the United States has not made up its mind whether it is going to sell food to Spain. The other day I was given the assurance that 70,000 tons of wheat would be made available, at long last. They need 400,000 tons.

I do not hesitate to say that the Spanish people are a fine people. The more contacts we can have with them the better it will be. That does not mean we have to approve a particular person who runs the government. I am talking about people to people. But I also say—and I repeat again and again—when the man who is entrusted with the expenditure of a third of a billion dollars, to build concrete runways for B–52's and B–47's, says, "These bases are not secure and these bases may very well not be of any help to us unless we can avert starvation in Spain," then I must ask, What is wrong with the Department of Agriculture and the Department of State? Why do they not hear that message? I ask, Why do we have an Ambassador there if we do not pay any attention to him? By the way, he is a good Ambassador. He is Mr. Lodge. If all we are going to have is somebody there to see whether the mail is picked up every morning, we can hire a Western Union boy.

I should like to respond to the requests of our Ambassadors who are on the spot. At least, their reactions should be given the most serious consideration, particularly when they are qualified, as is the gentleman to whom I referred.

Let us not talk about this program being wasteful. Let us not talk about it being expensive. As a matter of fact, in the light of what we spend in other areas I should say this is one of the more modest programs. This is one of the examples of frugality in modern times.

No doubt there are many other examples, but this is one we can point to.

Mr. President, I thank my colleagues for their participation in this discussion. I shall try to enlist their assistance later.

The PRESIDING OFFICER. Does the Senator desire that the matter be printed as a document?

Mr. HUMPHREY. No; not at this time.

Mr. O'MAHONEY. Mr. President, let me say to the Senator from Minnesota I am happy to have had the opportunity of listening to his analysis of the food program as it applies to foreign countries. If I understand the message, simply stated, it is that it is more effective and more Christian to serve the peoples of the world with bread and butter than with bombs and bullets.

Mr. HUMPHREY. I wish to thank the Senator, whose mind is always incisive, whose tongue is always articulate, and whose heart is always great and warm. He has stated exactly what needs to be said.

Mr. O'MAHONEY. The Senator is very kind. Mr. President, I desire to discuss another subject.

The PRESIDING OFFICER. The Senator from Wyoming has the floor.

THE SUPREME COURT DECISION AGAINST E. I. DU PONT DE NEMOURS

Mr. O'MAHONEY. Mr. President, I think the request I am about to make follows quite logically the speech which the Senator from Minnesota has made. I ask unanimous consent to have printed in the body of the RECORD at this point the decision rendered by the Supreme Court of the United States on Monday, June 3, in the case of the United States of America, appellant, against E. I. du Pont de Nemours & Co., and others, both the majority and dissenting opinions.

There being no objection, the majority and dissenting opinions were ordered to be printed in the RECORD, as follows:

SUPREME COURT OF THE UNITED STATES—No. 3, OCTOBER TERM, 1956—UNITED STATES OF AMERICA, APPELLANT, v. E. I. DU PONT DE NEMOURS AND COMPANY ET AL.—ON APPEAL FROM THE UNITED STATES DISTRICT COURT FOR THE NORTHERN DISTRICT OF ILLINOIS, JUNE 3, 1957

Mr. Justice Brennan delivered the opinion of the Court.

This is a direct appeal under section 2 of the Expediting Act[1] from a judgment of the district court for the northern district of Illinois,[2] dismissing the Government's action brought in 1949 under section 15 of the Clayton Act.[3] The complaint alleged a violation of section 7 of the act[4] resulting from the purchase by E. I. du Pont de Nemours and Co. in 1917–19 of a 23-percent stock interest in General Motors Corp. This appeal is from the dismissal of the action as to Du Pont, General Motors, and the corporate holders of large amounts of Du Pont stock, Christiana Securities Corp., and Delaware Realty & Investment Co.[5]

The primary issue is whether Du Pont's commanding position as General Motors' supplier of automotive finishes and fabrics was achieved on competitive merit alone, or because its acquisition of the General Motors' stock, and the consequent close intercompany relationship, led to the insulation of most of the General Motors' market from free competition, with the resultant likelihood, at the time of suit, of the creation of a monopoly of a line of commerce.

The first paragraph of section 7, pertinent here, provides:

"That no corporation engaged in commerce shall acquire, directly or indirectly, the whole or any part of the stock or other share capital of another corporation engaged also in commerce, where the effect of such acquisition may be to substantially lessen competition between the corporation whose stock is so acquired and the corporation making the acquisition, or to restrain such commerce in any section or community, or tend to create a monopoly of any line of commerce."[6]

Section 7 is designed to arrest in its incipiency not only the substantial lessening of competition from the acquisition by one corporation of the whole or any part of the stock of a competing corporation, but also to arrest in their incipiency restraints or monopolies in a relevant market which, as a reasonable probability, appear at the time of suit likely to result from the acquisition by one corporation of all or any part of the stock of any other corporation. The section is violated whether or not actual restraints or monopolies, or the substantial lessening of competition, have occurred or are intended. Acquisitions solely for investment are excepted, but only if, and so long as, the stock is not used by voting or otherwise to bring about, or in attempting to bring about, the substantial lessening of competition.

We are met at the threshold with the argument that section 7 before its amendment applied only to an acquisition of the stock of a competing corporation, and not to an acquisition by a supplier corporation of the stock of a customer corporation—in other words, that the statute applied only to horizontal and not to vertical acquisitions. This is the first case presenting the question in this Court. *International Shoe Co.* v. *Federal Trade Commission* (280 U. S. 291), and *Thatcher Mfg. Co.* v. *Federal Trade Commission* (272 U. S. 554), involved corporate acquisitions of stock of competitors.

During the 35 years before this action was brought, the Government did not invoke section 7 against vertical acquisitions. The Federal Trade Commission has said that the section did not apply to vertical acquisitions. See FTC, Report on Corporate Mergers and Acquisitions, 168 (1955). Also, the House committee considering the 1950 revision of section 7 stated that "it has been thought by some that this legislation [the 1914 act] applied only to the so-called horizontal mergers." (H. Rept. No. 1191, 81st Cong., 1st sess., 11.) The House Report adds, however, that the 1950 amendment was purposed "to make it clear that the bill applies to all types of mergers and acquisitions, vertical and conglomerate as well as horizontal."

This Court has the duty to reconcile administrative interpretations with the broad antitrust policies laid down by Congress. Cf. *Automatic Canteen Co.* v. *Federal Trade Commission* (346 U. S. 61, 74). The failure of the Commission to act is not a binding administrative interpretation that Congress did not intend vertical acquisitions to come within the purview of the act. Accord, *Baltimore & Ohio R. Co.* v. *Jackson* (353 U. S. 325, —).

The first paragraph of section 7, written in the disjunctive, plainly is framed to reach not only the corporate acquisition of stock of a competing corporation, where the effect may be substantially to lessen competition between them, but also the corporate acquisition of stock of any corporation, competitor or not, where the effect may be either (1) to restrain commerce in any section or community, or (2) tend to create a monopoly of any line of commerce. The amended complaint does not allege that the effect of Du Pont's acquisition may be to restrain commerce in any section or community but alleges that the effect was "* * *" to tend to create a monopoly in particular lines of commerce. * * *"

Section 7 contains a second paragraph dealing with a holding company's acquisition of stock in two or more corporations.[7] Much of the legislative history of the section deals with the alleged holding company evil.[8] This history does not aid in interpretation because our concern here is with the first paragraph of the section. There is, however, pertinent legislative history which does aid and support our construction.

Senator Chilton, one of the Senate managers of the bill, explained that the House conferees insisted that to prohibit just the acquisitions where the effect was substantially to lessen competition would not accomplish the designed aim of the statute, because "a corporation might acquire the stock of another corporation, and there would be no lessening of competition, but the tendency might be to create monopoly or to restrain trade or commerce." "Therefore," said Senator Chilton, "there was added * * * the following: 'Or to restrain such commerce in any section or community or tend to create a monopoly of any line of commerce.'"[9] This construction of the section, as embracing three separate and distinct effects of a stock acquisition, has also been recognized by a number of Federal courts.[10]

We hold that any acquisition by one corporation of all or any part of the stock of another corporation, competitor or not, is within the reach of the section whenever the reasonable likelihood appears that the ac-

[1] 32 Stat. 823, as amended, 15 U. S. C., sec. 29. The Court noted probable jurisdiction (350 U. S. 815).

[2] 126 F. Supp. 235.

[3] 38 Stat. 736, 15 U. S. C. (1946 edition), sec. 25.

[4] This action is governed by the Clayton Act as it was before the 1950 amendments, which by their terms are inapplicable to acquisitions prior to 1950. 64 Stat. 1125, 15 U. S. C., sec. 18.

[5] The amended complaint also alleged violations of secs. 1 and 2 of the Sherman Act, 26 Stat. 209, as amended, 50 Stat. 693, 15 U. S. C., secs. 1, 2. In view of our determination of the case, we are not deciding the Government's appeal from the dismissal of the action under the Sherman Act.

[6] 38 Stat. 731, 15 U. S. C. (1946 edition), sec. 18.

[7] This paragraph provides: "No corporation shall acquire, directly or indirectly, the whole or any part of the stock or other share capital of two or more corporations engaged in commerce where the effect of such acquisition, or the use of such stock by the voting or granting of proxies or otherwise, may be to substantially lessen competition between such corporations, or any of them, whose stock or other share capital is so acquired, or to restrain such commerce in any section or community, or tend to create a monopoly of any line of commerce" (38 Stat. 731, 15 U. S. C. (1946 edition)) section 18.

[8] See, e. g., S. Rept. No. 698, 63d Cong., 2d sess. 13; H. Rept. No. 627, 63d Cong., 2d sess. 17.

[9] CONGRESSIONAL RECORD 16002.

[10] *Aluminum Co. of America* v. *Federal Trade Comm'n.* (284 F. 401); *Ronald Fabrics Co.* v. *Verney Brunswick Mills, Inc.* (CCH 1946–1947 Trade Cases, paragraph 57, 514); *United States* v. *New England Fish Exchange* (258 F. 732); cf. *Transamerica Corp.* v. *Board of Governors* (206 F. 2d 163); *Sidney Morris & Co.* v. *National Assn. of Stationers* (40 F. 2d 620, 625).

quisition will result in a restraint of commerce or in the creation of a monopoly of any line of commerce. Thus, although du Pont and General Motors are not competitors, a violation of the section has occurred if, as a result of the acquisition, there was at the time of suit a reasonable likelihood of a monopoly of any line of commerce. Judge Maris correctly stated in *Transamerica Corp.* v. *Board of Governors* (206 F. 2d 163, 169):

"A monopoly involves the power to * * * exclude competition when the monopolist desires to do so. Obviously, under section 7 it was not necessary * * * to find that * * * [the defendant] has actually achieved monopoly power but merely that the stock acquisitions under attack have brought it measurably closer to that end. For it is the purpose of the Clayton Act to nip monopoly in the bud. Since by definition monopoly involves the power to eliminate competition a lessening of competition is clearly relevant in the determination of the existence of a tendency to monopolize. Accordingly in order to determine the existence of a tendency to monopoly in * * * any * * * line of business the area or areas of existing effective competition in which monopoly power might be exercised must first be determined * * *."

Appellees argue that there exists no basis for a finding of a probable restraint or monopoly within the meaning of section 7 because the total General Motors market for finishes and fabrics constituted only a negligible percentage of the total market for these materials for all uses, including automotive uses. It is stated in the General Motors brief that in 1947 du Pont's finish sales to General Motors constituted 3.5 percent of all sales of finishes to industrial users, and that its fabrics sales to General Motors comprised 1.6 percent of the total market for the type of fabric used by the automobile industry.

Determination of the relevant market is a necessary predicate to a finding of a violation of the Clayton Act because the threatened monopoly must be one which will substantially lessen competition "within the area of effective competition."[11] Substantiality can be determined only in terms of the market affected. The record shows that automobile finishes and fabrics have sufficient peculiar characteristics and uses to constitute them products sufficiently distinct from all other finishes and fabrics[12] to make them a "line of commerce" within the meaning of the Clayton Act. *Cf. Van Camp & Sons Co.* v. *American Can Co.* (278 U. S. 245).[13] Thus, the bounds of the relevant market for the purposes of this case are not coextensive with the total market for finishes and fabrics, but are coextensive with the automobile industry, the relevant market for automotive finishes and fabrics.[14]

The market affected must be substantial. *Standard Fashion Co.* v. *Magrane-Houston Co.* (258 U. S. 346, 357). Moreover, in order to establish a violation of section 7 the Government must prove a likelihood that competition may be "foreclosed in a substantial share of * * * [that market]."[15] Both requirements are satisfied in this case. The substantiality of a relevant market comprising the automobile industry is undisputed. The substantiality of General Motors' share of that market is fully established in the evidence.

General Motors is the colossus of the giant automobile industry. It accounts annually for upwards of two-fifths of the total sales of automotive vehicles in the Nation.[16]

In 1955 General Motors ranked first in sales and second in assets among all United States industrial corporations[17] and became the first corporation to earn over a billion dollars in annual net income.[18] In 1947 General Motors' total purchases of all products from Du Pont were $26,628,274, of which $18,938,229 (71 percent) represented purchases from Du Pont's finishes division. Of the latter amount purchases of "Duco"[19] and the thinner used to apply "Duco" totaled $12,224,798 (65 percent), and "Dulux"[20] purchases totaled $3,179,225. Purchases by General Motors of Du Pont fabrics in 1948 amounted to $3,700,000, making it the largest account of Du Pont's fabrics division. Expressed in percentages, Du Pont supplied 67 percent of General Motors' requirements for finishes in 1946 and 68 percent in 1947.[21] In fabrics Du Pont supplied 52.3 percent of requirements in 1946, and 38.5 percent in 1947.[22] Because General Motors accounts for almost one-half of the automobile industry's annual sales, its requirements for automotive finishes and fabrics must represent approximately one-half of the relevant market for these materials. Because the record clearly shows that quantitatively and percentagewise Du Pont supplies the largest part of General Motors' requirements, we must conclude that Du Pont has a substantial share of the relevant market.

The appellees argue that the Government could not maintain this action in 1949 because section 7 is applicable only to the acquisition of stock and not to the holding or subsequent use of the stock. This argument misconceives the objective toward which section 7 is directed. The Clayton Act was intended to supplement the Sherman Act.[23] Its aim was primarily to arrest apprehended consequences of intercorporate relationships before those relationships could work their evil, which may be at or any time after the acquisition, depending upon the circumstances of the particular case. The Senate declared the objective of the Clayton Act to be as follows:

"* * * Broadly stated, the bill, in its treatment of unlawful restraints and monopolies, seeks to prohibit and make unlawful certain trade practices which, as a rule, singly and in themselves, are not covered by the Act of July 2, 1890 [the Sherman Act], or other existing antitrust acts, and thus, by making these practices illegal, to arrest the creation of trusts, conspiracies, and monopolies in their incipiency and before consummation * * *" (S. Rept. No. 698, 63d Cong., 2d Sess. 1).

"Incipiency" in this context denotes not the time the stock was acquired, but any time when the acquisition threatens to ripen into a prohibited effect. See *Transamerica Corp* v. *Board of Governors* (206 F. 2d 163, 166). To accomplish the Congressional aim, the Government may proceed at any time that an acquisition may be said with reasonable probability to contain a threat that it may lead to a restrait of commerce or tend to create a monopoly of a line of commerce.[24] Even when the purchase is solely for investment, the plain language of section 7 contemplates an action at any time the stock

---

[11] *Standard Oil Company of California* v. *United States* (337 U. S. 293, 299, n. 5). Section 3 of the act, with which the Court was concerned in Standard Oil, makes unlawful certain agreements "* * * where the effect * * * may be to substantially lessen competition or tend to create a monopoly in any line of commerce" (38 Stat. 731, 15 U. S. C. (1946 edition) sec. 14).

[12] For example, the following is said as to finishes in the Du Pont brief:

"The largest single finish item which Du Pont sells to General Motors is a low-viscosity nitrocellulose lacquer, discovered and pattened by Du Pont and for which its trademark is 'Duco.'

* * * * *

"The invention and development of 'Duco' represented a truly significant advance in the art of paint making and in the production of automobiles; without 'Duco' mass production of automobiles would not have been possible.

"By the early 1920's the need for better finishing materials for automobiles had become urgent * * * The varnish method then used in finishing automobiles was described in detail at the trial by automobile pioneers * * * Finishing an automobile with varnish required an intolerably long time—up to 3 or 4 weeks—to apply the numerous coats needed. When the finish was complete, its longest life expectancy was less than a year, and often it began to peel off before the car was delivered. * * *"

Du Pont's Director of Sales since 1944, Nickowitz, testified as to fabrics sold to automobile manufacturers as follows:

"Question. Now, over the years, isn't it true that speaking generally Du Pont has followed the policy in selling its fabrics to the automobile field of undercutting its competitors in price? You don't try to sell it on a lower price than that quoted by any other competitor, do you?

"Answer. Well, we don't know. We go in and we bid based on our costs. Now, in the automotive industry, we have a different situation than you do in the furniture trade, for example, where you have an established price.

"You see, in the automobile industry, each manufacturer uses a different construction. They all have their own peculiar ideas of what they want about these fabrics. Some want dyed backs, and some want different finishes, so you don't have any standard prices in the automobile industry."

And see extended discussions in the opinion of the trial court, as to finishes (126 F. Supp., at 288–292), as to fabrics (id., at 296–300).

[13] "The phrase ['in any line of commerce'] is comprehensive and means that if the forbidden effect or tendency is produced in one out of all the various lines of commerce, the words 'in any line of commerce' literally are satisfied" (278 U. S. at 253).

[14] The General Motors' brief states:

"If the market for these products were solely or mainly the General Motors Corp., or the automobile industry as a whole, General Motors' volume and present share of the automobile industry might constitute a market large enough for the Government to rely on."

[15] *Standard Oil Company of California* v. *United States* (337 U. S. 293 at 314).

[16] Moody's Industrials lists General Motors' proportion of the industry:

	Percent
1938	42+
1939	42+
1940	45.6
1941	45.3
1942	World War II
1943	World War II
1944	World War II
1945	World War II
1946	36.3
1947	38.5
1948	38.8
1949	42.7
1950	45.6
1951	41.8
1952	40.3
1953	44.7
1954	49.9
1955	48.8

is used to bring about or in attempting to bring about the substantial lessening of competition.[25]

Prior cases under section 7 were brought at or near the time of acquisition. See, e. g., *International Shoe Co.* v. *Federal Trade Commission* (280 U. S. 291); *V. Vivaudou, Inc.* v. *Federal Trade Commission* (54 F. 2d 273; *Federal Trade Commission* v. *Thatcher Manufacturing Co.* (5 F. 2d 615), revised in part on other ground (272 U. S. 554); *United States* v. *Republic Steel Corp.* (11 F. Supp. 117); *Vanadium-Alloys Steel Co.* (18 F. T. C. 194). None of these cases holds, or even suggests, that the Government is foreclosed from bringing the action at any time when a threat of the prohibited effects is evident.

Related to this argument is the district court's conclusion that 30 years of nonrestraint negated "any reasonable probability of such a restraint" at the time of the suit.[26] While it is, of course, true that proof of a mere possibility of a prohibited restraint or tendency to monopoly will not establish the statutory requirement that the effect of an acquisition may be such restraint or tendency.[27] the basic facts found by the district court demonstrate the error of its conclusion.[28]

The Du Pont Co.'s commanding position as a General Motors supplier was not achieved until shortly after its purchase of a sizable block of General Motors stock in 1917.[29] At that time its production for the automobile industry and its sales to General Motors were relatively insignificant. General Motors then produced only about 11 percent of the total automobile production and its requirements, while relatively substantial, were far short of the proportions they assumed as it forged ahead to its present place in the industry.

At least 10 years before the stock acquisition, the Du Pont Co., for over a century the manufacturer of military and commercial explosives, had decided to expand its business into other fields. It foresaw the loss of its market for explosives after the United States Army and Navy decided in 1908 to construct and operate their own plants. Nitrocellulose, a nitrated cotton, was the principal raw material used in Du Pont's manufacture of smokeless powder. A search for outlets for this raw material uncovered requirements in the manufacture of lacquers, celluloid, artificial leather, and artificial silk. The first step taken was the Du Pont purchase in 1910 of the Fabrikoid Co., then the largest manufacturer of artificial leather, reconstituted as the Du Pont Fabrikoid Co. in 1913.

The expansion program was barely started, however, when World War I intervened. The Du Pont Co. suddenly found itself engulfed with orders for military explosives from foreign nations later to be allies of the United States in the war, and it had to increase its capacity and plant facilities from 700,000 to 31 million pounds per month at a cost exceeding $200 million. Profits accumulated and ultimately amounted to $232 million. The need to find postwar uses for its expanded facilities and organization now being greater than ever, Du Pont continued its expansion program during the war years, setting aside $90 million for the purpose. In September 1915, Du Pont bought the Arlington Works, one of the Nation's two largest celluloid companies. In June 1916, the Fairfield Rubber Co., producers of rubber-coated fabrics for automobile and carriage tops, was taken over by Du Pont Fabrikoid. In March 1917, purchase was made of Harrison Bros. & Co., manufacturers of paint, varnish, acids, and certain inorganic chemicals used in paint manufacture. Shortly afterwards, Harrison absorbed Beckton Chemical Co., a color manufacturer, and, also in 1917, the Bridgeport Wood Finishing Co., a varnish manufacturer.

Thus, before the first block of General Motors stock was acquired, Du Pont was seeking markets not only for its nitrocellulose, but also for the artificial leather, celluloid, rubber-coated goods, and paints and varnishes in demand by automobile companies. In that connection, the trial court expressly found that " * * * reports and other documents written at or near the time of the investment show that Du Pont's representatives were well aware that General Motors was a large consumer of products of the kind offered by Du Pont," and that John J. Raskob, Du Pont's treasurer and the principal promoter of the investment, "for one, thought that Du Pont would ultimately get all that business * * *"[30]

The company's interest in buying into General Motors was stimulated by Raskob and Pierre S. du Pont, then Du Pont's president, who acquired personal holdings of General Motors stock in 1914. General Motors was organized 6 years earlier by William C. Durant to acquire previously independent automobile manufacturing companies, Buick, Cadillac, Oakland, and Oldsmobile. Durant later brought in Chevrolet, organized by him when he was temporarily out of power, during 1910–15, and a bankers' group controlled General Motors. In 1915, when Durant and the bankers deadlocked on the choice of a board of directors, they resolved the deadlock by an agreement under which Pierre S. du Pont was named chairman of the General Motors board, and Pierre S. du Pont, Raskob, and two nominees of Mr. Du Pont were named neutral directors. By 1916, Durant settled his differences with the bankers and resumed the presidency and his controlling position in General Motors. He prevailed upon Pierre S. du Pont and Raskob to continue their interest in General Motors' affairs, which both did as members of the finance committee, working closely with Durant in matters of finances and operations and plans for future expansion. Durant persistently urged both men and the Wilmington people, as he called it,[31] to buy more stock in General Motors.

Finally, Raskob broached to Pierre S. du Pont the proposal that part of the fund earmarked for Du Pont expansion be used in the purchase of General Motors stock. At this time about $50 million of the $90 million fund was still in hand. Raskob foresaw the success of the automobile industry and the opportunity for great profit in a substantial purchase of General Motors stock. On December 19, 1917, Raskob submitted a treasurer's report to the Du Pont finance committee recommending a purchase of General Motors stock in the amount of $25 million. That report makes clear that more than just a profitable investment was contemplated. A major consideration was that an expanding General Motors would provide a substantial market needed by the burgeoning Du Pont organization. Raskob's summary of reasons in support of the purchase includes this statement: "Our interest in the General Motors Co. will undoubtedly secure for us the entire Fabrikoid, Pyralin (celluloid), paint and varnish business of those companies, which is a substantial factor."[32]

This thought, that the purchase would result in Du Pont's obtaining a new and substantial market, was echoed in the company's 1917 and 1918 annual reports to stockholders. In the 1917 report appears: "Though this is a new line of activity, it is one of great promise and one that seems to be well suited to the character of our organization. The motor companies are very large customers of our Fabrikoid and Pyralin as well as paints and varnishes." The 1918 report says: "The consumption of paints, varnishes, and fabrikoid in the manufacture of automobiles gives another common interest."

This background of the acquisition, particularly the plain implications of the contemporaneous documents, destroys any basis for a conclusion that the purchase was made solely for investment. Moreover, immediately after the acquisition, Du Pont's influence growing out of it was brought to bear within General Motors to achieve primacy for Du Pont as General Motors' supplier of automotive fabrics and finishes.

Two years were to pass before Du Pont's total purchases of General Motors stock brought its percentage to 23 percent of the outstanding stock and its aggregate outlay to $49 million. During that period, Du Pont and Durant worked under an arrangement giving Du Pont primary responsibility for finances and Durant the responsibility for operations. But J. A. Haskell, Du Pont's former sales manager and vice president, became the General Motors vice president in charge of the operations committee. The trial judge said that Haskell "* * * was willing to undertake the responsibility of keeping Du Pont informed of General Motors' affairs during Durant's regime. * * *"[33]

Haskell frankly and openly set about gaining the maximum share of the General Motors market for Du Pont. In a contemporaneous 1918 document, he reveals his intention to "pave the way for perhaps a more general adoption of our material," and that he was thinking "how best to get cooperation [from the several General Motors divisions] whereby makers of such of the low priced cars as it would seem possible and wise to get transferred will be put in the frame of mind necessary for its adoption Du Pont's artificial leather]."

Haskell set up lines of communication within General Motors to be in a position to know at all times what Du Pont products and what products of Du Pont competitors were being used. It is not pure imagination to suppose that such surveillance from that source made an impressive impact upon purchasing officials. It would be undeniably difficult for them not to interpret it as meaning that a preference was to be given to Du Pont products. Haskell also actively pushed the program to substitute Fabrikoid artificial leathers for genuine leather and sponsored use of Du Pont's Pyralin sheeting through a liaison arrangement set up between himself and the Du Pont sales organization.

Thus sprung from the barrier, Du Pont quickly swept into a commanding lead over its competitors, who were never afterward in serious contention. Indeed, General Motors then principal paint supplier, Flint Varnish and Chemical Works, early in 1918 saw the handwriting on the wall. The Flint president came to Durant asking to be bought out, telling Durant, as the trial judge found, that he "knew Du Pont had bought a substantial interest in General Motors and was interested in the paint industry; that * * * [he] felt he would lose

a valuable customer, General Motors."[34] The Du Pont Co. bought the Flint Works and later dissolved it.

In less than 4 years, by August 1921, Lammot du Pont, then a Du Pont vice president and later chairman of the board of General Motors, in response to a query from Pierre S. du Pont, then chairman of the board of both Du Pont and General Motors, "whether General Motors was taking its entire requirements of Du Pont products from Du Pont," was able to reply that 4 of General Motors 8 operating divisions bought from Du Pont their entire requirements of paints and varnishes, 5 their entire requirements of Fabrikoid, 4 their entire requirements of rubber cloth, and 7 their entire requirements of Pyralin and Celluloid. Lammot du Pont quoted Du Pont's sales department as feeling that "the condition is improving and that eventually satisfactory conditions will be established in every branch, but they wouldn't mind seeing things go faster." Pierre S. du Pont responded that "with the change of management at Cadillac, Oakland, and Olds [Cadillac was taking very little paints and varnishes, and Oakland but 50 percent; Olds was taking only part of its requirements for Fabrikoid], I believe that you should be able to sell substantially all of the paint, varnish, and Fabrikoid products needed." He also suggested that "a drive should be made for the Fisher Body business. Is there any reason why they have not dealt with us?"

Fisher Body was stubbornly resistant to Du Pont sales pressure. General Motors, in 1920, during Durant's time, acquired 60 percent stock control of Fisher Body Co. However, a voting trust was established giving the Fisher brothers broad powers of management. They insisted on running their own show and for years withstood efforts of high-ranking Du Pont and General Motors executives to get them to switch to Du Pont from their accustomed sources of supply. Even after General Motors obtained 100 percent stock control in 1926, the Fisher brothers retained sufficient power to hold out. By 1947 and 1948, however, Fisher resistance had collapsed, and the proportions of its requirements supplied by Du Pont compared favorably with the purchases by other General Motors divisions.

In 1926, the Du Pont officials felt that too much General Motors business was going to its competitors. When Pierre S. du Pont and Raskob expressed surprise, Lammot du Pont gave them a breakdown, by dollar amounts, of the purchases made from Du Pont's competitors. This breakdown showed, however, that only Fisher Body of the General Motors divisions was obtaining any substantial proportion of its requirements from Du Pont's competitors.

Competitors did obtain higher percentages of the General Motors business in later years, although never high enough at any time substantially to affect the dollar amount of Du Pont's sales. Indeed it appears likely that General Motors probably turned to outside sources of supply at least in part because its requirements outstripped Du Pont's production, when General Motors proportion of total automobile sales grew greater and the company took its place as the sales leader of the automobile industry. For example, an undisputed Government exhibit shows that General Motors took 93 percent of Du Pont's automobile Duco production in 1941 and 83 percent in 1947.

The fact that sticks out in this voluminous record is that the bulk of Du Pont's production has always supplied the largest part of the requirements of the one customer in the automobile industry connected to Du Pont by a stock interest. The inference is overwhelming that Du Pont's commanding position was promoted by its stock interest and was not gained solely on competitive merit.

[34] 126 F. Supp., at 267.

We agree with the trial court that considerations of price, quality and service were not overlooked by either Du Pont or General Motors. Pride in its products and its high financial stake in General Motors' success would naturally lead Du Pont to try to supply the best. But the wisdom of this business judgment cannot obscure the fact, plainly revealed by the record, that Du Pont purposely employed its stock to pry open the General Motors market to entrench itself as the primary supplier of General Motors' requirements for automotive finishes and fabrics.[35]

Similarly, the fact that all concerned in high executive posts in both companies acted honorably and fairly, each in the honest conviction that his actions were in the best interests of his own company and without any design to overreach anyone, including Du Pont's competitors, does not defeat the Government's right to relief. It is not requisite to the proof of a violation of section 7 to show that restraint or monopoly was intended.

The statutory policy of fostering free competition is obviously furthered when no supplier has an advantage over his competitors from an acquisition of his customer's stock likely to have the effects condemned by the statute. We repeat, that the test of a violation of section 7 is whether at the time of suit there is a reasonable probability that the acquisition is likely to result in the condemned restraints. The conclusion upon this record is inescapable that such likelihood was proved as to this acquisition. The fire that was kindled in 1917 continues to smolder. It burned briskly to forge the ties that bind the General Motors market to Du Pont, and if it has quieted down, it remains hot, and, from past performance, is likely at any time to blaze and make the fusion complete.[36]

The judgment must therefore be reversed and the cause remanded to the district court for a determination after further hearing of the equitable relief necessary and appropriate in the public interest to eliminate the effects of the acquisition offensive to the statute. The district courts, in the framing of equitable decrees, are clothed "with large discretion to model their judgments to fit the exigencies of the particular case." *International Salt Co.* v. *United States* (332 U. S. 392, 400–401).

The motion of the appellees Christiana Securities Co. and Delaware Realty & Investment Co. for dismissal of the appeal as to them is denied. It seems appropriate that they be retained as parties pending determination by the district court of the relief to be granted.

It is so ordered.

Mr. Justice Clark, Mr. Justice Harlan, and Mr. Justice Whittaker took no part in the consideration or decision of this case.

SUPREME COURT OF THE UNITED STATES—No. 3, OCTOBER TERM, 1956—UNITED STATES OF AMERICA, APPELLANT, v. E. I. DU PONT DE NEMOURS AND CO. ET AL.—ON APPEAL FROM THE UNITED STATES DISTRICT COURT FOR THE NORTHERN DISTRICT OF ILLINOIS, JUNE 3, 1957

Mr. Justice Burton, whom Mr. Justice Frankfurter joins, dissenting.

In June 1949, the United States brought this civil action in the United States District Court for the Northern District of Illinois under section 4 of the Sherman Act and section 15 of the Clayton Act to enjoin alleged violations of sections 1 and 2 of the Sherman Act, and section 7 of the Clayton Act. The amended complaint, insofar as pertinent to the issues here, alleged that Du Pont and General Motors have been engaged, since 1915, in a combination and conspiracy to restrain and monopolize interstate trade, and that Du Pont's acquisition of General Motors stock had the effect of restraining trade and tending to create a monopoly. In brief it was alleged that, by means of the relationship between Du Pont and General Motors, Du Pont intended to obtain, and did obtain, an illegal preference over its competitors in the sale to General Motors of its products, and a further illegal preference in the development of chemical discoveries made by General Motors. Appellees denied the charges.

The trial of these issues took nearly 7 months. The district court heard 52 witnesses, including most of the principal actors, and received over 2,000 exhibits. The evidence contained in the 8,283-page transcript of record covers in minute and intimate detail the facts bearing on the Government's charge that Du Pont, by coercion, agreement, control, or influence, had interfered unlawfully with General Motors' purchasing and manufacturing policies. On the basis of this evidence, the district court found that the Government had failed to prove its case and, specifically, that (a) Du Pont did not control General Motors, (b) there had been "no limitation or restraint upon General Motors' freedom to deal freely and fully with competitors of Du Pont" or upon its "freedom * * * to deal with its chemical discoveries," and (c) after 30 years in which no such restraint had resulted, there was no

[35] The Du Pont policy is well epitomized in a 1926 letter written by a former Du Pont employee, J. L. Pratt, when a General Motors vice president and member of the executive committee, to the general manager of a General Motors division:

"I am glad to know that your manufacturing, chemical and purchasing divisions feel they would be in better hands possibly by dealing with Du Pont than with local companies. From a business standpoint no doubt your organization would be influenced to give the business, under equal conditions, to the local concerns. However, I think when General Motors divisions recognize the sacrifice that the Du Pont Co. made in 1920 and 1921, to keep General Motors Corp. from being put in a very bad light publicly—the Du Pont Co. going to the extent of borrowing $35 million on its notes when the company was entirely free of debt, in order to prevent a large amount of General Motors stock being thrown on the open market—they should give weight to this which in my mind more than overbalances consideration of local conditions. In other words, I feel that where conditions are equal from the standpoint of quality, service and price, the Du Pont Co. should have the major share of General Motors divisions' business on those items that the Du Pont Co. can take on the basis of quality, service and price. If it is possible to use the product from more than one company I do not thing it advisable to give any one company all of the business, as I think it is desirable to always keep a competitive situation, otherwise any supplier is liable to grow slack in seeing that you have the best service and price possible.

"I have expressed my own personal sentiments in this letter to you in order that you might have my point of view, but I do not wish to influence your organization in any way that would be against your own good judgment, keeping in mind that above all the prime consideration is to do the best thing for Delco-Light Co., and that considerations in regard to the Du Pont Co. or other concerns are secondary, and I am sure that is your feeling."

[36] The potency of the influence of Du Pont's 23-percent stock interest is greater today because of the diffusion of the remaining shares which, in 1947, were held by 436,510 stockholders; 92 percent owned no more than 100 shares each, and 60 percent owned no more than 25 shares each (126 F. Supp., at 244).

"basis for a finding that there is or has been any reasonable probability of such a restraint within the meaning of the Clayton Act" [126 F. Supp. 235, 335].

The Government's basic contention in this Court is that Du Pont violated sections 1 and 2 of the Sherman Act in that, by means of its alleged control of General Motors, it obtained an unlawful preference with respect to General Motors' purchases of materials. In the closing pages of its brief, and for a few minutes in its oral argument, the Government added the assertion that Du Pont had violated section 7 of the Clayton Act in that its stock interest in General Motors "has been used to channel General Motors' purchases to Du Pont."

This Court, ignoring the Sherman Act issues which have been the focal point of 8 years of litigation, now holds that Du Pont's acquisition of a 23-percent stock interest in General Motors during the years 1917–19 violates section 7 of the Clayton Act because "at the time of suit [in 1949] there [was] a reasonable probability that the acquisition [was] likely to result in the condemned restraints." Ante, page 17. In reaching this conclusion, the Court holds (1) that section 7 of the Clayton Act applies to vertical as well as horizontal stock acquisition; (2) that in determining whether the effect of the stock acquisition is such as to constitute a restraint within section 7, the time chosen by the Government in bringing the action is controlling rather than the time of the acquisition itself; and (3) that section 7 is violated when, at the time of suit, there is a reasonable probability that the stock acquisition is likely to result in the foreclosure of competitors of the acquiring corporation from a substantial share of the relevant market.

In applying these principles to this case, the Court purports to accept the carefully documented findings of fact of the district court. Actually, it overturns numerous well-supported findings of the district court by now concluding that Du Pont did not purchase General Motors' stock solely for investment; that Du Pont's stock interest resulted in practical or working control of General Motors; that Du Pont has used or might use this "control" to secure preferences in supplying General Motors with automobile finishes and fabrics; that the relevant market includes only automobile finishes and fabrics; and that there was, even at the time of suit in 1949, a reasonable probability that Du Pont's competitors might be foreclosed from a substantial share of this relevant market.

The Court's decision is far reaching. Although section 7 of the Clayton Act was enacted in 1914—over 40 years ago—this is the first case in which the United States or the Federal Trade Commission has sought to apply it to a vertical integration.[1] Likewise, this appears to be the first case in which it ever has been argued that section 7 is applicable to a stock acquisition which took place many years before.[2] The Court, in accepting both of these contentions, disregards the language and purpose of the statute, 40 years of administrative practice, and all the precedents except one district court decision. The sweeping character of the Court's pronouncement is further evident from the fact that to make its case the Court requires no showing of any misuse of a stock interest—either at the time of acquisition or subsequently—to gain preferential treatment from the acquired corporation. All that is required, if this case is to be our guide, is that some court in some future year be persuaded that a reasonable probability then exists that an advantage over competitors in a narrowly construed market may be obtained as a result of the stock interest. Thus, over 40 years after the enactment of the Clayton Act, it now becomes apparent for the first time that section 7 has been a sleeping giant all along. Every corporation which has acquired a stock interest in another corporation after the enactment of the Clayton Act in 1914, and which has had business dealings with that corporation is exposed, retroactively, to the bite of the newly discovered teeth of section 7.

For the reasons given below, I believe that the Court has erred in (1) applying section 7 to a vertical acquisition; (2) holding that the time chosen by the Government in bringing the action is controlling rather than the time of the stock acquisition itself; and (3) concluding, in disregard of the findings of fact of the trial court, that the facts of this case fall within its theory of illegality.

I

Section 7 of the Clayton Act, quoted in full in the appendix, post, pages 48–49, does not make unlawful all intercorporate acquisitions and mergers.[3] It does not apply to acquisitions of physical assets.[4] It applies only to certain acquisitions of stock, and even then with important exceptions. The first paragraph of section 7, which is the statutory provision primarily involved in this case, provides—

"That no corporation engaged in commerce shall acquire, directly or indirectly, the whole or any part of the stock or other share capital of another corporation engaged also in commerce, where the effect of such acquisition may be to substantially lessen competition between the corporation whose stock is so acquired and the corporation making the acquisition, or to restrain such commerce in any section or community, or tend to create a monopoly of any line of commerce" (38 Stat. 731–732, 15 U. S. C. (1946 ed.), sec. 18).

This paragraph makes unlawful only those intercorporate stock acquisitions which may result in any of three effects: (1) substantially lessen competition between the acquiring and the acquired corporations; (2) restrain commerce in any section or community; or (3) tend to create a monopoly of any line of commerce. The Government concedes that General Motors and Du Pont have never been in competition with each other. Since the substantially lessen competition clause applies only to acquisitions involving competing corporations (generally referred to as horizontal acquisitions), that clause concededly is not applicable to this case. The questions before us are whether the other unlawful effects, namely, restraint of commerce in any section or community and tendency to create a monopoly of any line of commerce, are applicable to this case, and, if so, whether the 1917–19 acquisition of General Motors' stock by Du Pont resulted or may result in either of those unlawful effects.

Section 7 never has been authoritatively interpreted as prohibiting the acquisition of stock in a corporation that is not engaged in the same line of business as the acquiring corporation. Although the language of the act is ambiguous, the relevant legislative history, administrative practice, and judicial interpretation support the conclusion that section 7 does not apply to vertical acquisitions.

The report of the House Committee on the Judiciary, presented by Representative Clayton, stated emphatically that the provisions relating to stock acquisitions by corporations, which originally appeared as section 8 of the bill, were intended to eliminate the evils of holding companies (H. Rept. 627, 63d Cong., 2d sess., p. 17). Although a "holding company" was defined as "a company that holds the stock of another company or companies," the one "evil" referred to was that a holding company "is a means of holding under one control the competing companies whose stocks it has thus acquired." Ibid. Two minority statements appended to the House report evidence a similar understanding that the provisions of the bill were limited to competing corporations (Id., pt. 2, p. 6; pt. 3, p. 8). The substance of the House report was adopted by the Senate Committee on the Judiciary in its report on the bill (S. Rept. 698, 63d Cong., 2d sess., pp. 13, 43, 46).

The extensive debates on the bill in each House of Congress contain many detailed discussions of the provisions relating to intercorporate stock acquisitions. These discussions are devoid of any suggestion that the provisions were to apply to vertical acquisitions.[5] On the contrary, these provisions of the bill were repeatedly described as prohibiting the acquisition of stock of competing companies.[6] The one specific reference to a vertical acquisition during the entire debate on these provisions ended with a flat statement by Senator Reed to the effect that the bill as then written (containing the tendency toward monopoly clause but not the restraint of commerce clause) would not prevent a steel manufacturing corporation from acquiring stock in an ore-producing corporation, a classic type of vertical integration.[7] A reading of the legislative history of

---

[1] *Ronald Fabrics Co.* v. *Verney Brunswick Mills, Inc.*, CCH Trade Cases ¶57,514 (D. C. S. D. N. Y. 1946), discussed infra, n. 10, was a private action for treble damages.

[2] *Transamerica Corp.* v. *Board of Governors* (206 F. 2d 163 (C. A. 3d Cir. 1953)), involved a series of stock acquisitions over many years, some of which took place at about the time of suit.

[3] Sec. 7 of the Clayton Act, 38 Stat. 731, 15 U. S. C. (1946 edition), sec. 18, was amended in 1950 so as to broaden its application, 64 Stat. 1125, 15 U. S. C., sec. 18. The amendments, by their terms, were inapplicable to acquisitions made before 1950. Thus this case is governed by the original language of sec. 7 and not by sec. 7, as amended.

[4] One of the earliest ruling of the Federal Trade Commission was that sec. 7 did not prohibit asset acquisitions. 1 F. T. C. 541–542. The primary purpose of the 1950 amendments was to bring asset acquisitions within sec. 7. Proponents of the 1950 amendments asserted on several occasions that the omission of asset acquisitions in the original Clayton Act had been inadvertent. See, e. g., 96 CONGRESSIONAL RECORD 16443. However the legislative history of the Clayton Act demonstrates that the purpose of sec. 7 was to prevent the formation of holding companies and certain evils peculiar to stock acquisitions, particularly the secrecy of ownership. See 51 CONGRESSIONAL RECORD 9073, 14254, 14316, 14420, 14456; H. Rept. No. 627, 63d Cong., 2d sess., 17; S. Rept. No. 698, 63d Cong., 2d sess. 13.

[5] The remarks of Senator Chilton relied on by the majority, ante, p. 3, do not indicate that he thought that sec. 7 was applicable to vertical acquisitions. His statements indicate merely that he thought that the restraint and monopoly clauses of sec. 7 were not entirely synonymous with the substantially lessen competition clause.

[6] See e. g., 51 CONGRESSIONAL RECORD 9270-9271 (Representative Carlin); id., at 9554 (Representative Barkley); id., at 14254–14255 (Senator Cummins); id., at 14313 (Senator Reed); id., at 15856–15861 (Senator Walsh); id., at 15940 (Senator Nelson); id., at 16001 (Senator Chilton); id., at 16320 (Representative Floyd).

[7] 51 CONGRESSIONAL RECORD 14455. Senator Reed had offered an amendment to the first paragraph of sec. 7 which would have prevented a corporation from acquiring stock in another corporation engaged in the same line of business. This was an attempt to stiffen the bill in order to relieve the Government from proving that competition had been substantially lessened by the acquisi-

the bill leaves the distinct impression that intercorporate relationships between buyers and sellers which resulted in noncompetitive preferences were intended to be dealt with exclusively by the provision forbidding interlocking directorates (sec. 8 of the Clayton Act), if not covered by the specific prohibitions of certain price discriminations (sec. 2), and of certain exclusive selling or leasing contracts (sec. 3).[8]

Forty years of administrative practice provide additional support for this view. Neither the Department of Justice nor the Federal Trade Commission, the two principal enforcing agencies, has brought any action under old section 7 (other than the instant case) that has not involved a stock acquisition in allegedly competing corporations. The Federal Trade Commission repeatedly has declared its understanding that section 7, prior to its amendment in 1950, applied only to competing corporations.[9] In a recent report it stated without qualification:

"While the 1914 act applied solely to horizontal mergers, the 1950 act applies not only to horizontal acquisitions but to vertical and conglomerate acquisitions which might substantially lessen competition or tend to create a monopoly" (FTC, Report on Corporate Mergers and Acquisitions (May 955), 168 H. Doc. No. 169, 84th Cong., 1st sess.).

Beginning in 1927, the Federal Trade Commission included in its annual recommendations to Congress a request that section 7 be amended to remedy its inadequacies. This result was achieved in 1950 (64 Stat. 1125, 15 U. S. C. sec. 18). As the Court recognizes in its opinion, ante, page 3, note 6, one of the reasons for amending section 7 in 1950 was, in the words of the House report on the amendments, "to make it clear that the bill applies to all types of mergers and acquisitions, vertical and conglomerate as well as horizontal" (H. Rept. 1191, 81st Cong., 1st sess. 11). Forty years of established administrative practice, acquiesced in and recognized by Congress, is persuasive evidence of the proper scope of section 7. *Federal Trade Commission* v. *Bunte Bros., Inc.* (312 U. S. 349, 351–352).

The cases cited by the Court, with the one exception of *Ronald Fabrics Co.* v. *Verney Brunswick Mills, Inc.* (CCH Trade Cases, par. 57,514 (D. C. S. D. N. Y. 1946),[10] do not support the Court's conclusion that section 7 applies to a vertical acquisition. In *Aluminum Co. of America* v. *Federal Trade Commission* (284 F. 401 (C. A. 3d Cir. 1922)), the Aluminum Co., which previously had had a monopoly of all sheet aluminum produced in the United States, acquired control through an intermediary corporation of a competing sheet aluminum company established in 1916. A divestiture order of the Federal Trade Commission was upheld, the court holding that the stock acquisitions substantially lessened competition and tended to create a monopoly of the sheet aluminum business. In *United States* v. *New England Fish Exchange*, 258 F. 732 (D. C. Mass. 1919), two holding companies which had acquired the stock of virtually all the wholesale fish dealers trading on the New England Fish Exchange, which handled about 95 percent of all the ground fish sold in interstate commerce in the United States, were held to have violated the provisions of section 7. Each of these cases was concerned with the acquisition of directly competing corporations—not vertical acquisitions. Statements in the opinions, not essential to the decisions, merely stand for the proposition that the restraint and monopoly clauses of section 7 are not entirely synonymous with the substantially lessen competition clause.

Assuming that the three unlawful effects mentioned in section 7 are not entirely synonymous with each other,[11] such an assumption does not require the conclusion that section 7 was intended to apply to vertical acquisitions as well as to horizontal acquisitions. Corporations engaged in the same business activity in different areas do not necessarily "compete" with each other so that their combination would substantially lessen competition between them, even though their combination might result in a restraint of commerce or a tendency toward monopoly violative of section 7. Such a possibility was presented in *Transamerica Corp.* v. *Board of Governors* (206 F. 2d 163 (C. A. 3d Cir. 1953)), where a banking corporation through a series of transactions acquired stock in 48 local banking corporations, most of which were located in communities in which no other bank was acquired. A divestiture order of the Board was reversed on the ground that the Board had not proved that the acquisitions of these banks in five Western States either substantially lessened competition or tended to create a monopoly.

Finally, this Court has twice construed old section 7 as applying only to stock acquisitions involving competing corporations. In *International Shoe Co.* v. *Federal Trade Commission* (280 U. S. 291 (1930)), the Court held that the acquisition of the fifth largest shoe manufacturing company by the largest shoe manufacturer did not violate either the substantially lessen competition clause or the restraint of commerce clause of section 7, because the preexisting competition between the two corporations was insubstantial, and because the acquired corporation was in a precarious financial condition. Substantial preexisting competition was said to be a requisite for violation of either clause of section 7 (280 U. S. at pp. 298, 303). An even more direct holding is found in *Thatcher Manufacturing Co.* v. *Federal Trade Commission* (272 U. S. 554, (1926)), where this Court affirmed that portion of the lower court's decree which had allowed Thatcher, a milk bottle manufacturer, to retain the assets of Woodbury, a bottle manufacturer specializing in condiment and whisky bottles, on the ground that the acquisition did not violate any of the three clauses of section 7, since Thatcher was not in competition with Woodbury (272 U. S., at p. 560, affirming in part and reversing in part *Federal Trade Commission* v. *Thatcher Manufacturing Co.* (5 F. 2d 615 (C. A. 3d Cir. (1925)). These holdings apparently will be overruled sub silentio by today's decision.

The legislative history, administrative practice, and judicial interpretation of section 7 provide the perspective in which the Government's present assertion that section 7 applies to vertical acquisition, should be viewed. Seen as a whole, they offer convincing evidence that section 7, properly construed, has reference only to horizontal acquisitions. I would so hold. However, even if the opposite view be accepted, the foregoing views of the enforcing agencies and the courts are material to a proper consideration of the other issues which must then be reached.

II

In this case the Government is challenging, in 1949, a stock acquisition that took place in 1917–19. The Court, without advancing reasons to support its conclusion, holds that in determining whether the effect of the stock acquisition is such as to violate section 7, the time chosen by the Government in bringing its suit is controlling rather than the time of the acquisition of the stock. This seems to me to ignore the language and structure of section 7, the purpose of the Clayton Act, and all existing administrative and judicial precedents.

The first paragraph of section 7 provides that "no corporation * * * shall acquire * * * the stock * * * of another corporation * * * where the effect of such acquisition may be * * *." Yet the Court construes this provision as if it read "no corporation * * * shall acquire or continue to hold * * * the stock * * * of another corporation * * * whenever it shall appear that the effect of such acquisition or continued holding may be * * *." Continued

---

tion, an element of proof which he, Senator Cummins, and others thought would be quite difficult. See 51 CONGRESSIONAL RECORD 14254–14255, 14419–14420. Senator Chilton asked Senator Reed whether his amendment would prevent a corporation engaged in the manufacture of steel from acquiring stock in a corporation engaged in the production of iron ore. Senator Reed replied that his amendment would not bar such an acquisition, but that neither would the bill as written:

"But I call the Senator's attention to the fact that if the illustration he uses would not be covered by the language of my amendment it certainly would not be covered by the language I seek to amend. His argument would go as much against that, and even more than against my amendment. I do not claim that this will stop everything. I claim that it will be a long step in that direction." Id., at 14455.

No one disputed Senator Reed's interpretation of sec. 7.

[8] See e. g., the statement by Representative Carlin, one of the managers of the bill in the House, to the effect that the interlocking directorate provision contained in sec. 8 would prevent a director of a corporation which supplied railroads with materials from becoming a railroad director and, in effect, "buy[ing] supplies from himself." 51 CONGRESSIONAL RECORD 9272.

[9] See e. g., FTC Annual Report for Fiscal Year 1929, 6–7, 60, where the Commission stated that it could take no corrective action under the Clayton Act against large consolidations in the food industry "even though the consolidation was effected through the acquisition or exchange of capital stock," because "most of these consolidations and acquisitions were of corporations engaged in the distribution of allied but noncompetitive products." See also, FTC Annual Report for Fiscal Year 1927, 13–15; Statement by Chief Counsel Kelley in hearings before a subcommittee of the Senate Committee on the Judiciary on H. R. 2734, 81st Cong., 1st and 2d sess., 37; Report of the Federal Trade Commission on Interlocking Directorates, H. Doc. No. 652, 81st Cong., 2d sess., 1.

[10] In the *Ronald Fabrics* case, a rayon converter alleged that a competing corporation had restrained commerce by acquiring control of a source of supply of rayon. The district court held that this allegation stated a cause of action under sec. 7 of the Clayton Act.

[11] A minority in the Senate, led by Senators CUMMINS and WALSH, sought to strike out the "tend to create a monopoly" language of section 7. 51 CONGRESSIONAL RECORD 14314–14316, 14319, 14459–14461. They argued that this language was superfluous because the creation of a monopoly always substantially lessened competition, and because the Sherman Act contained similar language, and that there was a danger that the language would be considered as an implied repeal of the Sherman Act. The failure of these efforts to eliminate the tendency toward monopoly clause (the restraint of commerce clause had not been added to section 7 at this time) indicates that the tendency toward monopoly clause was not intended to be limited to situations already encompassed by the substantially lessen competition clause. Similarly, the remarks of Senator Chilton, quoted by the court from 51 CONGRESSIONAL RECORD 16002, ante, pp. 4–5, indicate that he thought the tendency toward monopoly and restraint of commerce clauses added something. But I find no evidence that what they did add included vertical acquisitions.

holding, to be sure, is a prerequisite to any action under section 7 because, if the stock is no longer held, the violation has been purged and there is nothing to divest.[12] But the fact of continued holding does not allow the Government to dispense with the necessity of proving that the stock was unlawfully acquired. The offense described by section 7 is the acquisition, not the holding or the use, of stock. When the acquisition has been made, the offense, if any, is complete. The statutory language is unequivocal. It makes the test the probable effect of the acquisition at the time of the actual acquisition, and not at some later date to be arbitrarily chosen by the Government in bringing suit.

The distinction carefully made in the several paragraphs of section 7 between an unlawful acquisition and an unlawful use of stock reinforces this conclusion. The first paragraph of section 7, which speaks only in terms of acquisition of stock, is concerned solely with the purchase of stock in another corporation. It is the only provision that is applicable in this case. The second paragraph, which expressly prohibits both acquisition and use, is concerned with stock purchases in two or more corporations. Concededly, it is not applicable here. When Congress chose to make unlawful the use of stock subsequent to its acquisition, it did so in specific terms. The omission of the phrase "or the use of such stock by the voting or granting of proxies or otherwise," contained in the second paragraph of section 7, from the first paragraph of the section was not inadvertent. The phrase therefore cannot be read into the first paragraph of section 7.[13]

The Clayton Act was not intended to replace the Sherman Act in remedying actual restraints and monopolies. Its purpose was to supplement the Sherman Act by checking anticompetitive tendencies in their incipiency, before they reached the point at which the Sherman Act comes into play. This purpose was well stated in the Senate report on the bill:

"Broadly stated, the bill, in its treatment of unlawful restraints and monopolies, seeks to prohibit and make unlawful certain trade practices which, as a rule, singly and in themselves, are not covered by the act of July 2, 1890, or other existing antitrust acts, and thus, by making these practices illegal, to arrest the creation of trusts, conspiracies, and monopolies in their incipiency and before consummation" (S. Rept. No. 698, 63d Cong., 2d sess. 1).

This purpose places emphasis on the probable anticompetitive effects of transactions or occurrences viewed as of the date of their occurrence. The determination required by the act is one of predicting the probable outcome of a particular transaction, here an acquisition of stock in another corporation. If, at the time of the stock acquisition, a potential threat to competition is apparent, the acquisition is unlawful under section 7. If, on the other hand, a potential threat to competition is not then apparent, an antitrust violation is not involved unless subsequent use of the stock constitutes a restraint of trade prohibited by the Sherman Act.[14]

The Court ignores the all-important lawfulness or unlawfulness of the stock acquisition at or about the time it occurred, and limits its attention to the probable anticompetitive effects of the continued holding of the stock at the time of suit, some 30 years later. The result is to subject a good-faith stock acquisition, lawful when made, to the hazard that the continued holding of the stock may make the acquisition illegal through unforeseen developments. Such a view is not supported by the statutory language and violates elementary principles of fairness. Suits brought under the Clayton Act are not subject to any statute of limitations, and it is doubtful whether the doctrine of laches applies as against the Government. The result is that unexpected and unforeseeable developments occurring long after a stock acquisition can be used to challenge the legality of continued holding of the stock. In such an action, the Government need only prove that probable rather than actual anticompetitive effects exist as of the time of the suit. The Government may thus set aside a transaction which was entirely lawful when made, merely by showing that it would have been unlawful had it occurred at the time of suit, many years later. The growth of the acquired corporation, a fortuitous decline in the number of its competitors, or the achievement of control by an accidental diffusion of other stock may result, under this test, in rendering the originally lawful acquisition unlawful ab initio. Strikingly enough, all of these factors are involved in this case.[15]

The Court's holding is unfair to the individuals who entered into transactions on the assumption, justified by the language of section 7, that their actions would be judged by the facts available to them at the time they made their decision.

"The prohibition [of sec. 7] is addressed to parties who contemplate engaging in merger transactions and is meant, in the first instance, to guide them in deciding upon a course of action. The only standard they are capable of applying is one addressed to the circumstances viewed as of the date of the proposed transaction. Since this is the standard which the parties must apply in deciding whether to undertake a transaction, it seems reasonable to conclude that it is the standard which enforcement agencies should apply in deciding whether the transaction violates the statute." (Neal, The Clayton Act and the Transamerica Case (5 Stan. L. Rev. 179, 220–221).)

The Court cites no authority in support of its new interpretation of this 40-year-old statute. On the other hand, examination of the dozen or more cases brought under section 7 reveals that in every case the inquiry heretofore has centered on the probable anticompetitive effects of the stock acquisition at or near the time it was made.[16] See, e. g., *International Shoe Co.* v. *Federal Trade Commission* (280 U. S. 291 (1930)); *Transamerica Corp.* v. *Board of Governors* (206 F. 2d 163 (C. A. 3d Cir. 1953)); *V. Vivaudou, Inc.* v. *Federal Trade Commission* (54 F. 2d 273 (C. A. 2d Cir. 1931)); *Federal Trade Commission* v. *Thatcher Mfg. Co.* (5 F. 2d 615 (C. A. 3d Cir. 1925), reversed in part on other grounds, 272 U. S. 554); *United States* v. *Republic Steel Corp.* (11 F. Supp. 117 (D. C. N. D. Ohio 1935)); *In re Vanadium-Alloys Steel Co.* (18 F. T. C. 194 (1934)). The conclusion thus seems inescapable that the unlawfulness of a stock acquisition under the first paragraph of section 7 properly turns on the potential threat to competition created by the acquisition of the stock at the time of its acquisition and not by its subsequent use.

That the time of acquisition is controlling does not mean that the Government is unable to bring an action if it fails to proceed within a few years of the stock acquisition. It means only that if the Government chooses to bring its action many years later, it must prove what section 7 plainly requires—that the acquisition threatened competition when made.

Nor does it mean that evidence of subsequent events is necessarily irrelevant. Evidence that anticompetitive effects have occurred since the acquisition, and that these effects are traceable to the original acquisition rather than to other factors, may support an inference that such effects were "reasonably probable" at the time of acquisition. The element of causation is the necessary link with the past. However, if events subsequent to the acquisition indicate that no anticompetitive effects have occurred, that evidence may support an inference that an unlawful potential did not exist at the time of acquisition. Evidence as to what happened after the acquisition is relevant to the extent that it bears on the central question whether at the time of the acquisition, there was a reasonable probability of a threat to competition.

I agree with the Court that section 7 does not require findings and conclusions of actual anticompetitive effects. Unlike the Sherman Act, section 7 merely requires proof of a reasonable probability of a substantial lessening of competition, restraint of commerce, or tendency toward monopoly. *International Shoe Co.* v. *Federal Trade Commission* (280 U. S. 291); *Transamerica Corp.* v. *Board of Governors* (206 F. 2d 163). When a vertical acquisition is involved, its legality thus turns on whether there is a reasonable probability that it will foreclose competition from a substantial share of the market, either by significantly restricting access to needed supplies or by significantly limiting the market for any product. See Report of the Attorney General's National Committee To Study the Antitrust Laws (1955), pages 122–127. The determination of such probable economic consequences re-

[12] *Federal Trade Commission* v. *Western Meat Co.* (272 U. S. 554, 561).

[13] It might be argued that the mention of subsequent misuse in the third paragraph of sec. 7, the investment proviso, enlarges the substantive content of the first paragraph of sec. 7. This paragraph provides that "This section shall not apply to corporations purchasing such stock solely for investment and not using the same by voting or otherwise to bring about, or in attempting to bring about, the substantial lessening of competition." But the mention of use in this paragraph has the effect of limiting the exception it contains, that is, the exception for stock purchased solely for investment. This exception is lost if the stock is subsequently misused. But the exception contained in this paragraph does not come into play unless the acquisition first comes within the substantive prohibition of the first two paragraphs of sec. 7. This limitation on the exception cannot expand the substantive prohibition to which the exception applies.

[14] It may be that sec. 7 is inapplicable when the Government fails to bring suit within a reasonable period after the consummation of the stock acquisition. If so, the 30 years here involved would exceed a reasonable period of incipiency. Even though sec. 7 of the Clayton Act, under this theory, would be inapplicable, any alleged restraint could be dealt with under the Sherman Act.

[15] The Court apparently concedes that Du Pont's stock acquisition in General Motors was lawful when made because "its sales to General Motors were relatively insignificant" at that time and because "General Motors then produced only about 11 percent of the total automobile production." Ante, p. 12. Throughout, the Court stresses the growth in size of General Motors. Ante, pp. 8–9, 12. The decline in the number of automobile manufacturers is not mentioned, but is well known. And the Court states that diffusion of General Motors' stock through the years has increased "the potency of the influence of Du Pont's 23-percent stock interest." Ante, p. 20, n. 36.

[16] Except in this case, the enforcing agencies appear never to have brought an action under sec. 7 more than 4 years after the date of the acquisition. Consequently, the precise problem raised here has not been directly adjudicated. Nevertheless, the cases cited in the text spell out the proof required for a violation of sec. 7, and thus have an important bearing on this problem.

quires study of the markets affected, of the companies involved in relation to those markets, and of the probable immediate and future effects on competition. A mere showing that a substantial dollar volume of sales is involved cannot suffice. As the Court says, "The market affected must be substantial," ante, page 8, and "substantiality can be determined only in terms of the market affected," ante, page 6. Section 7 thus requires a case-by-case analysis of the relevant economic factors.

However, when, as here, the Government brings a proceeding nearly 30 years after a stock purchase, it must prove that the acquisition was unlawful when made (i. e., that there was a reasonable probability at that time that Du Pont's competitors would be foreclosed from a substantial share of the relevant market), and also that the effect of the acquisition continue to be harmful to competition at the time suit was brought. Illegality at the time of acquisition is required by the first paragraph of section 7; continuing illegality is a prerequisite for obtaining equitable relief. See *United States* v. *W. T. Grant Co.* (345 U. S. 629); *United States* v. *Oregon Medical Society* (343 U. S. 326, 333); *United States* v. *South Buffalo R. Co.* (333 U. S. 771, 774). This is particularly true under section 7 since it is a prophylactic measure designed to prevent stock acquisitions which probably will have a deleterious effect on competition. Proof that competition has not in fact been harmed during a long period following a stock acquisition itself indicates that a restraint in the future is unlikely. In such a case, the actual effect of the acquisition largely supplants the conjecture as to its probable effects which otherwise must be relied upon.

In this case, the district court found that the challenged acquisition, which took place over 30 years ago, had not resulted in any restraint of trade "in those many intervening years." The district court properly concluded that, when there had been no restraint for 30 years, "there is not any basis for a finding that there is any reasonable probability of such a restraint within the meaning of the Clayton Act" (126 F. Supp., at 335). If the evidence supports the district court's conclusion that there has been no restraint for 30 years, the judgment below must be affirmed.

III

The remaining issues are factual: (1) Whether the record establishes the existence of a reasonable probability that Du Pont's competitors will be foreclosed from securing General Motors' trade, and (2) whether the record establishes that such foreclosure, if probable, involves a substantial share of the relevant market and significantly limits the competitive opportunities of others trading in that market. In discussing these factual issues, I meet the Court on its own ground, that is, I assume that the old section 7 applies to vertical acquisitions, and that the potential threat at the time of suit is controlling. Even on that basis the record does not support the Court's conclusion that section 7 was violated by this 1917–19 stock acquisition.

A. FORECLOSURE OF COMPETITORS

This is not a case where a supplier corporation has merged with its customer corporation with the result that the supplier's competitors are automatically and completely foreclosed from the customer's trade.[17] In this case, the only connection between Du Pont, the supplier, and General Motors, the customer, is Du Pont's 23-percent stock interest in General Motors. A conclusion that such a stock interest automatically forecloses Du Pont's competitors from selling to General Motors would be without justification. Whether a foreclosure has occurred in the past or is probable in the future is a question of fact turning on the evidence in the record.

The Court, at the outset of its opinion, states that the primary issue is whether Du Pont's position as a substantial supplier to General Motors "was achieved on competitive merit alone," or resulted from Du Pont's stock interest in General Motors, ante, page 2. In resolving this issue, the Court states that the "basic facts" are not in dispute and hence that it is unnecessary to set aside the findings of fact of the district court as clearly erroneous. See Federal Rules of Civil Procedure, volume 52 (a). The basic facts are said to be that Du Pont had no standing as a General Motors supplier before the stock purchases of 1917–19, that it gained a "commanding position" after the stock purchases, and that certain items of evidence in this gigantic record tend to indicate that Du Pont hoped to get and actually did get a preference in General Motors' trade. From these alleged facts the Court draws the conclusion that Du Pont has misused its 23-percent stock interest in General Motors "to entrench itself as the primary supplier of General Motors' requirements for automotive finishes and fabrics." Ante, page 19. "The inference is overwhelming," the Court concludes, "that Du Pont's commanding position was promoted by its stock interest and was not gained solely on competitive merit." Ante, pages 18–19. With these words, the Court overturns the district court's unequivocal findings to the effect that Du Pont was a principal supplier to General Motors prior to the 1917–19 stock purchases, that Du Pont maintained this position in the years following the stock purchases, and that for the entire 30-year period preceding the suit, General Motors' purchases of Du Pont's products were based solely on the competitive merits of those products. The evidence supporting these findings of the district court may be summarized as follows:

Du Pont is primarily a manufacturer of chemicals and chemical products. Thousands of its products could be used by General Motors in manufacturing automobiles, appliances and machinery. Despite Du Pont's sales efforts over a period of 40 years, General Motors buys many of the commodities produced by Du Pont from Du Pont's competitors.[18] The Court, ignoring the many products which General Motors declines to buy from Du Pont or which it buys only in small quantities, concentrates on the few products which Du Pont has sold in large volume to General Motors for many years—paints and fabrics. Before examining the history of those large-volume purchases, it is essential to understand where and by whom purchasing decisions within General Motors have been made.

For many years, General Motors has been organized into some 30 operating divisions, each of which has final authority to make, and does make, its own purchasing decisions. This decentralized management system places full responsibility for purchasing decisions on the officers of the respective divisions. To speak of "selling to General Motors" is, therefore, misleading. A prospective supplier, instead of selling to General Motors, sells to Chevrolet, or Frigidaire, or Ternstedt, or Delco Light, as divisions. Moreover, when there are several plants within a division, each plant frequently has its own purchasing agent and presents a separate selling job.

The record discloses that each division buys independently, that the pattern of buying varies greatly from one division to another, and that within each division purchases from Du Pont have fluctuated greatly in response to price, quality, service, and other competitive considerations. For example, Oldsmobile is the only division which buys antifreeze from Du Pont and 1 of the 2 car divisions which does not finish its cars with Duco. Buick alone buys Du Pont motor enamel, and Cadillac alone uses Du Pont's copper electroplating exclusively. Thus the alleged nefarious influence arising from Du Pont's stock interest apparently affects the Oldsmobile antifreeze buyer, but not the Oldsmobile paint buyer; the paint buyers at Chevrolet, Buick, and Pontiac, but not the antifreeze or electroplating buyers; and the electroplating buyer at Cadillac, but not the Cadillac paint buyer.

1. Paints: Du Pont, for many years, has had marked success in the manufacture and sale of paints, varnishes, lacquers, and related products.[19] In 1939, it produced 9.5

[17] Cf. *United States* v. *Columbia Steel Co.* (334 U. S. 495), holding that even the exclusion of competition resulting from complete vertical integration does not violate the Sherman Act unless competition in a substantial portion of a market is restrained.

[18] The following table compares General Motors' purchases, in 1947, of several products from Du Pont with its purchases of the same products from competitors of Du Pont:

Type of product	Purchases from Du Pont	Purchases from competitors of Du Pont	Total General Motors purchases	Percent of purchases from Du Pont
Finishes	$18,724,000	$8,635,000	$27,359,000	68.4
Fabrics (imitation leather and coated fabrics)	3,639,000	5,815,000	9,454,000	38.5
Adhesives	12,000	3,056,000	3,068,000	.4
Chemicals:				
Anodes	2,000	1,206,000	1,208,000	.2
Solvents	439,000	3,183,000	3,622,000	12.1
	22,816,000	21,895,000	44,711,000	51.0

[19] The following table compares Du Pont's total sales of industrial finishes in recent years with its sales of the same finishes to General Motors:

Year	Sales to General Motors			Total finish sales	Sales to General Motors as percent of total sales
	Duco	Other finishes	Total		
1938	$4,569,604	$1,625,625	$6,195,229	$31,357,134	19.8
1939	6,312,005	2,448,844	8,760,849	38,514,763	22.7
1940	8,876,970	2,850,091	11,727,061	44,974,778	26.1
1941	9,768,119	3,757,389	13,525,508	61,204,127	22.1
1946	6,911,596	3,518,256	10,429,852	75,117,079	13.9
1947	12,224,798	6,713,431	18,938,229	105,266,655	18.0

The years 1942 through 1945 are omitted from all tables because of the suspension of automobile production during the war.

percent of the total dollar value of all finishes produced in the United States and, in 1947, 8.1 percent. In recent years, approximately three-fourths of Du Pont's total sales to General Motors have consisted of industrial finishes.[20] Although Du Pont has been General Motors' principal supplier of paint for many years, General Motors continues to buy about 30 percent of its paint requirements from competitors of Du Pont.[21] Moreover, the sales of paint from Du Pont to General Motors do not bulk large in the respective total sales and purchases of either company. In 1948, Du Pont's finish sales to General Motors were only 3 percent of its total sales of all products; they were an infinitesimal percentage of General Motors' total purchases.

Two products account for a high proportion of these finish sales to General Motors: "Duco," a nitrocellulose lacquer invented and patented by Du Pont, and "Dulux," a synthetic resin enamel developed by Du Pont.[22] However, Duco and Dulux did not come into commercial use until 1924 and 1931, respectively, and Du Pont's position as a principal manufacturer of finishes was attained much earlier.

Du Pont first assumed a leading position in the automotive finish field with its acquisition, in 1918, of a majority of the stock of the Flint Varnish & Color Works at Flint, Mich. At that time, and for some years before, Flint supplied the finishes used on all General Motors cars except Cadillac, and also for many other automobile companies. Du Pont's acquisition of General Motors stock in 1917–19 did not influence the General Motors' divisions in purchasing from Flint. In 1921, Flint lost one-half of the Oakland business and, in 1923, a substantial portion of the business at Buick, Oakland and Oldsmobile (126 F. Supp., at 288).

The invention and development of Duco in the early 1920's represented a significant technological advance. Automobiles previously had been finished by applying numerous coats of varnish. The finishing process took from 12 to 33 days, and the storage space and working capital tied up in otherwise completed cars were immense. The life expectancy of varnish finishes was less than a year. In December 1921, General Motors created a Paint and Enamel Committee which contacted numerous paint manufacturers in an attempt to find a quicker drying and more durable finish.

Meanwhile, Du Pont had been doing pioneering work in nitrocellulose lacquers. In 1920, a Du Pont employee invented a quick drying and durable lacquer which contained a large amount of film-forming solids. This patented finish, named Duco, was submitted to the General Motors Paint and Enamel Committee in 1922 to be tested along with finishes of other manufacturers. After 2 years of testing and improvement, the Paint and Enamel Committee became satisfied that Duco was far superior to any other product or any other method of finishing automobiles then available.

The gradual adoption of Duco by some of the General Motors' car divisions, viewed in conjunction with its proved superiority as an auto finish, illustrates the independent buying of each division and demonstrates that Duco made its way on its own merits. Oakland (now Pontiac) first adopted Duco for use on its open cars in 1924. The new finish was an immense success and was used on all Oakland cars the following year. Buick and Chevrolet adopted Duco in 1925, but Cadillac, which had offered it as an optional finish in 1925, did not abandon varnish for Duco until 1926.[23]

From the beginning, General Motors continued to look for competitive materials. Letters were sent to other manufacturers urging them to submit samples of their pyroxylin paint for testing. Until 1927, none of the competing lacquers was comparable in quality to Duco. But the strenuous efforts by General Motors to develop competitive sources of lacquer eventually worked a substantial change in the Du Pont position. Oldsmobile and Cadillac switched to a competitor, Rinshed-Mason, in 1927, and have continued to buy almost exclusively from that company ever since. Chevrolet, Buick, and Pontiac continued to buy Duco, partly because of better service from nearby Du Pont plants, and partly because repeated testing failed to disclose any lacquer superior to Duco.

Finally, the success of Duco has never been confined to the General Motors' car divisions. In 1924 and 1925, nearly all car manufacturers abandoned varnish for Duco. By the end of 1925, all cars, except Ford and Cadillac, were using Duco. Nash, Hudson, Studebaker, Packard, and Willys have bought, and still buy, Duco in substantial amounts from Du Pont. Chrysler bought Duco in large volume until the early 1930's when, in pursuance of a policy to obtain suppliers to whom it would be the most important customer, it concentrated its purchases on one company, Pittsburgh Plate Glass. Ford has chosen to make a large part of its own requirements. During the 1920's, when Ford was losing its leadership in the low-priced field to Chevrolet, it continued to finish its cars in black japan. Mr. Ford is reported to have said, "Paint them any color, as long as they are black." Finally, in the 1930's, Ford was forced to shift to a synthetic enamel finish of its own manufacture. During this transition period, Du Pont sold Ford a substantial amount of finishes. In 1935, Ford was making half, and buying half from Du Pont; by 1937, Ford was making three-fourths and buying one-fourth from Du Pont. In 1938, Henry Ford "issued instructions that the Ford Motor Co. was not to purchase any more material from the Du Pont Co." From that time until Henry Ford II became active in Ford management, purchases from Du Pont practically ceased. Since then, Ford has purchased finishes from Du Pont in very substantial amounts.

General Motors has continued to test paints on thousands of cars annually. Du Pont has retained its position as primary lacquer supplier to several General Motors divisions because these divisions have felt that Duco best fits their needs. Kettering, who was a leader in General Motors research activities and who had been active in the testing and development of pyroxylin lacquers, testified that one of the reasons why General Motors cars had a higher resale value than comparable cars in a used car lot is the paint.

As the district court found, "In view of all the evidence of record, the only reasonable conclusion is that Du Pont has continued to sell Duco in substantial quantities to General Motors only because General Motors believes such purchases best fit its needs" (126 F. Supp., at 296).

The second largest item which General Motors buys from Du Pont is Dulux, a synthetic enamel finish used on refrigerators and other appliances. Prior to the development of Dulux, Duco was widely used as a finish for refrigerators. However, in 1927, Duco began to be replaced by porcelain, particularly at Frigidaire, a General Motors' appliance division. In 1930 and 1931, in collaboration with General Electric, Du Pont developed Dulux, a greatly superior and cheaper product. Since its development, Dulux has been used exclusively by all the major manufacturers of refrigerators and other appliances—General Electric, Westinghouse, Crosley, and many others—except Frigidaire, which continues to finish part of its refrigerators with porcelain. Disinterested witnesses testified as to the superior quality and service which has led them to continue to buy Dulux.[24] The district court did not err in concluding that Dulux—"is apparently an ideal refrigerator finish and is widely used by a number of major manufacturers other than General Motors. Several representatives of competitive refrigerator manufacturers testified that they purchased 100 percent of their requirements from Du Pont. There is no evidence that General Motors purchased from Du Pont for any reason other than those that prompted its competitors to buy Dulux from Du Pont—excellence of product, fair price and continuing quality of service" (126 F. Supp., at 296).

The Court fails to note that Du Pont's efforts to sell paints other than Duco and Dulux to General Motors have met with considerably less success. Du Pont does sell substantial amounts of automotive undercoats to Chevrolet and Buick but it has failed, despite continued sales efforts, to change the preference of Fisher Body, the largest purchaser of undercoats, for a competitor's undercoat. The successes and failures of other Du Pont finish products at various General Motors' divisions emphasize the independent buying of each division and negate the notion that influence or coercion is responsible for what purchases do occur. Frigidaire uses large quantities of black finishing and machine varnish, but has not

---

[20] In 1947, a typical year, General Motors' total purchases of all products from Du Pont were $26,628,274. Of this amount, $18,938,229, or 71 percent of the total, was finishes.

[21] In 1947, over 400 paint manufacturers other than Du Pont sold finishes to General Motors. The total amount they sold was $8,635,000, 31.6 percent of General Motors' requirements. Twenty-five companies, other than Du Pont, each sold amounts of finishes to General Motors in excess of $30,000 in that year; one company sold as much as $3,205,000.

[22] In 1947, General Motors' purchases of industrial finishes from Du Pont, by type of finish, were as follows:

		Percent
Duco	$12,224,798	65
Dulux	3,179,225	17
All others	3,534,206	18
Total	18,938,229	100

Thus, Duco and Dulux comprised 82 percent of Du Pont's finish sales to General Motors in that year.

[23] Du Pont initially sold more Duco to other auto manufacturers than it did to General Motors. In 1926, Du Pont's sales of colored Duco were distributed as follows: To General Motors, 19 percent; to other auto manufacturers, 33 percent; to all others, 48 percent. The primary market for clear Duco has always been the furniture industry.

[24] For example, Van Derau, a Westinghouse executive, testified that his company bought its entire requirements of refrigerator finishes from Du Pont because of Du Pont's quality and service:

"Now, another factor—and I think I can say this without it being harmful to any other suppliers—Du Pont has the finest trained technical group at their beck and call, at the beck and call of the users of the materials, of anybody in the business and we have had several times, when we have had a little problem, and I am thinking of one in particular where we were going to find it very difficult to keep in production until the trouble would be overcome, which I called from Pittsburgh to the Chicago, office, and the next morning one of the men of Du Pont was on the job, and within a very few hours they had materials coming in from their Toledo plant that kept us in production.

"You cannot laugh off that kind of service. They have been simply excellent, and I don't know how you could say, any better."

bought these products from Du Pont since 1926. At A–C Spark Plug division, located in Flint, Mich., where Du Pont has a finishing plant, Du Pont has been consistently successful in selling a substantial volume of the finishes used by that division. Delco-Remy Division, however, purchases most of its requirements of insulating varnish from Du Pont's competitors. The electromotive division prefers a competitive lacquer for the interior finish of its locomotives, but uses Duco on the exterior because the railroads, most of which use Duco for the exterior of the balance of the train, specify that finish. At Guide Lamp Division, Du Pont developed and still supplies a finish for the inside of headlight reflectors, but a competitor developed, and has kept, that division's substantial primer business. At the inland division, which produces steering wheels, Du Pont had some of the business at one time, but has been completely supplanted by a competitor offering better service.

The Du Pont experience at the Packard Electric Division, which uses large quantities of high and low tension cable lacquer, is illustrative. Until 1932, Packard Electric was a separate company wholly unrelated to General Motors, and Du Pont was a principal supplier of low tension lacquer and the sole supplier of black high tension lacquer. Now, as a division of General Motors, Packard Electric purchases its entire requirements of high tension lacquer from Du Pont competitors, and produces its own low tension lacquer from film scrap bought from Du Pont competitors.

The district court did not err in concluding, on the basis of this evidence, that Du Pont's success in selling General Motors a substantial portion of its paint requirements was due to the superior quality of Duco and Dulux and to Du Pont's continuing research and outstanding service, and that "Du Pont's position was at all times a matter of sales effort and keeping General Motors satisfied. There is no evidence that General Motors or any division of General Motors was ever prevented by Du Pont from using a finish manufactured by one of Du Pont's competitors; nor is there any evidence that General Motors has suffered competitively from its substantial use of Duco" (126 F. Supp., at 296).

2. Fabrics: The principal fabrics which Du Pont has sold to General Motors are imitation leather (Du Pont's Fabrikoid and Fabrilite) and top material for open cars and convertibles (Du Pont's Pontop, Everbright, and Teal).[25] Its sales of these materials to General Motors in 1947 totaled $3,369,000, or about 38.5 percent of General Motors' total purchases of such materials. In earlier years, before closed cars with all metal tops came to predominate, these materials constituted a larger proportion of the total fabrics used in an automobile than they do today. By 1946 they averaged, apart from the top material for convertibles, only about 1.6 yards, costing about $2.22 per car. They are used, principally for seat tops and backs, kick pad, rear shelves, et cetera. Du Pont does not manufacture the cotton and wool products of which most of the upholstery is composed.

Du Pont entered the manufacture of coated fabrics in 1910, when it purchased the Fabrikoid Company of Newburgh, N. Y. Artificial leather, as it was then known, was of poor quality and had very limited areas of acceptance. As Du Pont succeeded in improving both its quality and appearance, its use rapidly broadened. By mid-1913, Du Pont Fabrikoid, a pyroxylin-coated fabric, had been accepted by the automobile industry for upholstery and interior trim. Three years later, in 1916, almost every automobile company was a purchaser of Fabrikoid, and a contemporary Du Pont estimate in that year stated that 60 percent of all cars produced in the United States would be equipped with Fabrikoid. In that same year, Du Pont rounded out its line of fabrics by acquiring the Fairfield Rubber Co., a manufacturer of rubber-coated fabrics. Du Pont thus had achieved, before it purchased its General Motors stock, a leading position in the automotive fabric field. Before 1917, it was supplying substantially all of the coated fabrics requirements at Chevrolet and Oldsmobile, about half of the requirements at Buick, and about a third of the requirements at Oakland. At the Cadillac division, Du Pont supplied all of the coated fabrics for interior trim but none of the top material (126 F. Supp., at 296–297).

Although there have been variations from year to year and from one car division to another in response to competitive considerations, Du Pont generally has maintained its pre-1917 position as the principal supplier of coated and combined fabrics to General Motors. In 1926, General Motors purchased about 55.5 percent of these fabrics from Du Pont, largely because Chevrolet switched entirely to Du Pont after an unfortunate experience with competitive products during the preceding year. By 1930, the proportion had declined to about 31.5 percent, and Du Pont was selling more fabrics to Ford than to General Motors. At the time of suit, Du Pont's share had increased to 38.5 percent, the remainder being supplied by Du Pont's competitors.

In addition to the mass of evidence supporting the district court's finding that "such purchases of fabrics as the General Motors division have made from Du Pont from time to time were based upon each division's exercise of its business judgment and are not the result of Du Pont domination" (126 F. Supp., at 301), the record clearly indicates that Du Pont's fabrics can and have made their way in the automotive industry on their merits. Prior to the early 1920's, Du Pont was the principal supplier of coated fabrics to all three of the then major producers—Ford, Willys-Overland, and General Motors. After Ford and Willys began to produce their own coated fabrics they still turned to Du Pont for much of what they could not produce. Chrysler purchased substantial amounts from Du Pont until, in the early 1930's, it embarked on its policy of one principal supplier for each product and chose Textileather, a Du Pont competitor. Du Pont has continued to be Ford's largest supplier for the material which it does not manufacture for itself. Du Pont likewise has supplied, over the years, a considerable part of the coated and combined fabrics of most of the smaller automobile companies.

The district court did not err in concluding that "Du Pont, the record shows, has maintained its position as the principal fabrics supplier to General Motors through its early leadership in the field and by concentrating upon satisfactorily meeting General Motors' changing requirements as to quality, service, and delivery" (126 F. Supp., at 301).

3. Other products: The court concludes only that Du Pont has been given an unlawful preference with respect to paints and fabrics. By limiting the issue to these products, it eliminates from deserved consideration those products which General Motors does not buy in large quantities or proportions from Du Pont.[26] Yet the logic of the Court's argument—that the stock relationship between Du Pont and General Motors inevitably has or will result in a preference for Du Pont products—requires consideration of the total commercial relations between the two companies. Du Pont influence, if there were any, would be expected to apply to all products which Du Pont makes and which General Motors buys.

However, the evidence shows that Du Pont has attempted to sell to the various General Motors' divisions a wide range of products in addition to paint and fabrics, and that it has succeeded in doing so only when these divisions, exercising their own independent business judgment, have decided on the basis of quality, service and price that their economic interests would best be served by purchasing from Du Pont. Six such groups of products were considered in detail by the district court: plastics, brake fluid, case-hardening materials, electroplating materials, safety glass, and synthetic rubber and rubber chemicals (126 F. Supp., at 319–324). A few examples drawn from the findings will suffice.

Du Pont's sales to General Motors of celluloid (Du Pont's Pyralin), used as windows in the side curtains of early automobiles, initially declined in 1918 after the stock purchase, and only revived when an improved product was adopted by all the large auto manufacturers. Instead of purchasing brake fluid and safety glass from Du Pont, General Motors embarked, during the 1930's, on its own production of these substantial items. With respect to case hardening materials, General Motors has purchased less than half of its requirements from Du Pont, while other auto manufacturers have purchased amounts larger in proportion and quantity. Although Du Pont's new electroplating processes were widely adopted in the automobile and other industries in the 1930's only Cadillac has used Du Pont's processes exclusively, Oldsmobile and Pontiac have used it occasionally, and Chevrolet and Buick never have used it except for brief periods. Neoprene, a synthetic rubber developed by Du Pont, has been used to a much greater extent by Chrysler and Ford than by General Motors. Chrysler also uses, and helped develop, Du Pont's synthetic rubber adhesive for brake linings, but the General Motors divisions prefer a more expensive type of synthetic rubber.

[25] The following table compares Du Pont's total sales of industrial fabrics, primarily imitation leather and coated fabrics, in several recent years, with the sales of those same products to General Motors:

Year	Sales to GM	Sales to others	Total sales	GM sales as percent of total sales
1938	$446,357	$6,647,112	$7,093,469	6.6
1939	803,854	7,775,778	8,579,632	9.4
1940	1,285,280	7,780,105	9,065,385	14.2
1941	1,773,079	13,093,469	14,866,548	11.9
1946	2,083,166	14,170,639	16,253,805	12.8
1947	3,639,316	16,723,610	20,362,926	17.9

[26] The following table compares the dollar amount, in 1947, of Du Pont's total sales of the products of its various departments with the amount sold by it to General Motors:

Type of product	Du Pont sales to General Motors	Total Du Pont sales	Sales to General Motors, as percent of total sales
Finishes	$18,938,229	$105,266,655	18.0
Fabrics	3,639,316	20,362,926	17.9
Ammonia	1,742,416	50,320,207	3.5
Grasselli chemicals	1,024,320	74,212,311	1.4
Electrochemicals	1,019,272	47,687,843	2.1
Plastics	105,422	34,828,026	.3
Organic chemicals	83,254	94,632,256	.1
Rayon	45,616	250,467,514	(*)
Explosives	26,032	58,875,482	(*)
Pigments	3,530	31,496,024	(*)
Photo products	867	25,699,756	(*)
	26,628,274	793,849,000	3.4

*Less than 0.1 percent.

The record supports the conclusion of the district court: "All of the evidence bearing upon Du Pont's efforts to sell these various miscellaneous products to General Motors supports a finding that the latter bought or refused to buy solely in accordance with the dictates of its own purchasing judgment. There is no evidence that General Motors was constrained to favor, or buy, a product solely because it was offered by Du Pont. On the other hand, the record discloses numerous instances in which General Motors rejected Du Pont's products in favor of those of one of its competitors. The variety of situations and circumstances in which such rejections occurred satisfies the court that there was no limitation whatsoever upon General Motors' freedom to buy or to refuse to buy from Du Pont as it pleased" (126 F. Supp., at 324).

Evidence relied on by the Court: The Court, disregarding the mass of evidence supporting the district court's conclusion that General Motors purchased Du Pont paint and fabrics solely because of their competitive merit, relies for its contrary conclusion on passages drawn from several documents written during the years 1918–26, and on the logical fallacy that because Du Pont over a long period supplied a substantial portion of General Motors' requirements of paint and fabrics, its position must have been obtained by misuse of its stock interest rather than competitive considerations.

The isolated instances of alleged pressure or intent to obtain noncompetitive preferences are four: (1) The Raskob report of December 1917; (2) several letters of J. A. Haskell, written during 1918–20; (3) certain reports and letters of Pierre and Lammot Du Pont during 1921–24; and (4) a 1926 letter of John L. Pratt. Passages drawn from these 1918–26 documents do not justify the conclusion reached by the Court. Each of them is a matter of disputed significance which cannot be evaluated without passing on the motivation and intent of the author. Each failed to achieve its specific object. Read in the context of the situations to which they were addressed, each is entirely consistent with the finding of the district court that, although Du Pont was trying to get as much General Motors' business as it could, there was no restriction on General Motors' freedom to buy as it chose, and that General Motors' buyers did not regard themselves as in any way limited.[27]

Moreover, even if isolated paragraphs in these documents, taken from their context, are given some significance, and the other evidence relating to the period from 1918 to 1926 is entirely ignored, all of the evidence after 1926 affirmatively establishes without essential contradiction that Du Pont did not use its stock interest to receive any preferential treatment from General Motors.

Nor can present illegality be presumed from the bare fact that Du Pont has continued to make substantial sales of several products to General Motors.[28] In the first place, the record affirmatively shows that the new products which Du Pont has sold to General Motors since 1926 have made their way, at General Motors as elsewhere, on their merits. Sales of Duco, Dulux, Fabrilite, and Teal are not attributable in any way to dealings in the earlier period. Secondly, the Court's presumption is based on the fact that Du Pont does not sell to all other automobile manufacturers in the same proportion as it does to General Motors. But there is no reason why it should—the Government has not shown that sellers normally sell to all members of an industry in the same proportion. In any event, the record fully explains the disproportion. Since 1930, Du Pont's sales to others members of the industry have proportionately declined, largely because Ford has chosen to make the major share of its requirements of paint and fabrics, and because Chrysler has followed the policy of selecting a single supplier to whom it can be the most important customer. The fact is that Du Pont has continued to sell in substantial amounts to the smaller members of the automobile industry. The growth in the dominance of General Motors, Ford, and Chrysler—companies which together account for more than 85 percent of automobile production—when combined with the policies adopted by Ford and Chrysler, adequately explains why Du Pont sells a larger proportion of paint and fabrics to General Motors than it does to the industry as a whole.

It is true that section 7 of the Clayton Act does not require proof of actual anticompetitive effects or proof of an intent to restrain trade. But these matters become crucial when the Court rests its conclusion that Du Pont's stock interest violates the act on evidence relating solely to an alleged Du Pont intent to obtain a noncompetitive preference from General Motors, and on a finding that such a preference was actually secured through the unlawful use of Du Pont's stock interest. Preference and intent are also relevant because the Government has brought this case 30 years after the event. If no actual restraint has occurred during this long period, the probability of a restraint in the future is indeed slight. Especially is this so when the only change in recent years has been in the direction of diminishing Du Pont's participation in General Motors' affairs.

Rule 52 (a) governs this case.—The foregoing summary of the evidence relating to General Motors' purchases of paint and fabrics from Du Pont, comparatively brief as it is, reveals that a multitude of factual issues underlie this case. The occurrence of events, the reasons why these events took place, and the motives of the men who participated in them are drawn in question. The issue of credibility is of great importance. The district judge had the opportunity to observe the demeanor of the witnesses and to judge their credibility at first hand. Thus, this case is a proper one for the application of the principle embodied in rule 52 (a) of the Federal Rules of Civil Procedure: "Findings of fact shall not be set aside unless clearly erroneous, and due regard shall be given to the opportunity of the trial court to judge of the credibility of the witnesses." *United States* v. *Oregon Medical Society* (343 U. S. 326, 330–332, 339); *United States* v. *Yellow Cab Co.* (338 U. S. 338, 341–342).

This is not a situation in which oral testimony is contradicted by contemporaneous documents. See *United States* v. *United States Gypsum Co.* (333 U. S. 364). In this case, the findings of the district court are supported both by contemporaneous documents and by oral testimony. For example, General Motors' search for a better automotive finish, the superiority of the product developed by Du Pont and General Motors' continuous efforts to secure an equally good lacquer from other sources are all proved by letters and reports written in the early 1920's as well as by the oral testimony of many witnesses. Similarly, contemporaneous exhibits prove that General Motors purchased fabrics from Du Pont because of the superiority of Du Pont products, and that on other occasions it turned to competing suppliers even though Du Pont's products was just as good. Appellate review of detailed findings based on substantial oral testimony and corroborative documents must be limited to setting aside those that are clearly erroneous. The careful and detailed findings of fact of the district court in this case cannot be so labeled.[29]

---

[27] Because the Court quotes fully from, and apears to place special weight on, the 1926 letter of J. L. Pratt, a brief discussion of it is appropriate by way of illustration. Ante, pp. 19–20, n. 35.

The letter only purports to be an expression of Pratt's personal views—he makes it clear in the last paragraph that he is expressing his own opinions and not General Motors' policy. It has, therefore, comparatively little bearing on Du Pont's intent. Moreover, it is significant that Pratt's attitude toward Du Pont was based not on the stock relationship, but on the fact that Du Pont saved General Motors from financial disaster in 1920. His views, apparently, would have been the same whether or not Du Pont owned stock in General Motors. In any event, all that Pratt says is that, in making purchases, General Motors should "always keep a competitive situation," and "the prime consideration is to do the best thing for Delco-Light Co." (Pratt was writing to the general manager of Delco, a General Motors' division.)

An examination of the circumstances in which this letter was written disposes of any notion that it expressed a policy that General Motors should prefer Du Pont's products when they were equal in quality, service, and price. The circumstances were these: Delco Light was buying paint from a competitor of Du Pont. When the competitor failed to solve a paint problem which confronted Delco, it called on Du Pont for help. However, although Du Pont solved the problem and obtained one order for paint, Delco asked Du Pont to withhold delivery so that the competitor could be given another opportunity to retain the business. Understandingly, Elms of the Du Pont paint department was somewhat piqued by this, and he wrote a personal letter to his friend Pratt asking for his assistance. Pratt's letter to the general manager of Delco was the result.

Despite the fact that the Du Pont product was offered at a lower price and the fact that the technical staff at Delco thought the Du Pont product superior, Delco nevertheless continued to buy from the competitor. Du Pont never did receive the business to which the correspondence related. Judged by either its content or its result, the Pratt letter is a poor example of an alleged Du Pont policy of "purposely employ[ing] its stock to pry open the General Motors market." Ante, p. 19.

[28] The Court, without referring to any supporting evidence, ventures the conjecture that "General Motors probably turned to outside sources of supply at least in part because its requirements outstripped Du Pont's production." Ante, p. 18. As I read the record, Du Pont was actively soliciting more business from General Motors and others throughout the period covered in this suit. I find no hint that Du Pont was surfeited with business and unable to fill General Motors' orders.

[29] The Court also overturns the district court's express finding that Du Pont purchased General Motors' stock solely for investment. The Court does this on the basis of an alleged Du Pont purpose to secure a noncompetitive preference which the Court finds expressed in the Raskob letter and in certain statements in Du Pont's 1917 and 1918 reports to its stockholders. These documents, however, are not inconsistent with the district court's finding of an investment purpose. The district court said:

"Raskob's report, the testimony of Pierre S. and Irenee du Pont and all the circumstances leading up to Du Pont's acquisition of this substantial interest in General Motors, as shown by the record, establish that the acquisition was essentially an investment. Its motivation was the profitable employment of a large part of the surplus

B. RELEVANT MARKET

Finally, even assuming the correctness of the Court's conclusion that Du Pont's competitors have been or will be foreclosed from General Motors' paint and fabric trade, it is still necessary to resolve one more issue in favor of the Government in order to reverse the district court. It is necessary to hold that the Government proved that this foreclosure involves a substantial share of the relevant market and that it significantly limits the competitive opportunities of others trading in that market.[30]

The relevant market is the "area of effective competition" within which the defendants operate. *Standard Oil Co. of California* v. *United States* (337 U. S. 293, 299–300, n. 5). "[T]he problem of defining a market turns on discovering patterns of trade which are followed in practice." *United States* v. *United Shoe Machinery Corp.* (110 F. Supp. 295, 303, aff'd per curiam, 347 U. S. 521). "Determination of the competitive market for commodities depends on how different from one another are the offered commodities in character or use, how far buyers will go to substitute one commodity for another." *United States* v. *E. I. du Pont de Nemours & Co.*, 351 U. S. 377, 393. This determination is primarily one of fact.

The Court holds that the relevant market in this case is the automotive market for finishes and fabrics, and not the total industrial market for these products. The Court reaches that conclusion because in its view "automobile finishes and fabrics have sufficient peculiar characteristics and uses to constitute them products distinct from all other finishes and fabrics. * * *" (ante, pp. 6–7). We are not told what these peculiar characteristics are Nothing is said about finishes other than that Duco represented an important contribution to the process of manufacturing automobiles. Nothing is said about fabrics other than that sales to the automobile industry are made by means of bids rather than fixed price schedules. Dulux is included in the automobile market, even though it is used on refrigerators and other appliances, but not on automobiles. So are other finishes and fabrics used on diesel locomotives, engines, parts, appliances, and other products which General Motors manufactures. Arbitrary conclusions are not an adequate substitute for analysis of the pertinent facts contained in the record.

The record does not show that the fabrics and finishes used in the manufacture of automobiles have peculiar characteristics differentiating them from the finishes and fabrics used in other industries. What evidence there is in the record affirmatively indicates the contrary. The sales of the four products principally involved in this case—Duco, Dulux, imitation leather, and coated fabrics—support this conclusion.

Duco was first marketed not to General Motors, but to the auto-refinishing trade and to manufacturers of furniture, brush handles, and pencils. In 1927, 44 percent of Du Pont's sales of colored Duco, and 51.5 percent of its total sales were to purchasers other than auto manufacturers. Although the record does not disclose exact figures for all years, it does show that a substantial portion of Du Pont's sales of Duco have continued to be for nonautomotive uses.[31]

It is also significant that Duco was a patented product. Prior to the expiration of the patent in 1944, only 3 years before this suit was brought, Du Pont issued over 250 licenses—to all that applied—covering its patented process. If Duco is to be treated as a separate market solely because of its initial superiority, Du Pont is being penalized rather than rewarded for contributing to technological advance.

Dulux has never been used in the manufacture of automobiles. It replaced Duco and other lacquers as a finish on refrigerators, washers, dryers, and other appliances, and continues to have wide use on metallic objects requiring a durable finish. Yet the Court includes it as a finish having the unspecified but "peculiar characteristics" distinctive of "automobile finishes." (Ante, p. 6.)

In 1947, when Du Pont sales of Duco and Dulux to General Motors totaled about $15,400,000, the total national market for paints and finishes was $1,248,000,000, of which about $552 million was for varnishes, lacquers, enamels, japans, thinners, and dopes, the kinds of finishes sold primarily to industrial users.[32] There is no evidence in this record establishing that these industrial finishes are not competitive with Duco and Dulux. There is considerable evidence that many of them are. It is probable that Du Pont's total sales of finishes to General Motors in 1947 constituted less than 3.5 percent of all sales of industrial finishes.

The record also shows that the types of fabrics used for automobile trim and convertible tops—imitation leather and coated fabrics—are used in the manufacture of innumerable products, such as luggage, furniture, railroad upholstery, books, brief cases, baby carriages, hassocks, bicycle saddles, sporting goods, footwear, belts, and table mats. In 1947, General Motors purchased about $9,454,000 of imitation leather and coated fabrics. Of this amount, $3,639,000 was purchased from Du Pont (38.5 percent) and $5,815,000 from over 50 Du Pont competitors. Since Du Pont produced about 10 percent of the national market for these products in 1946, 1947, and 1948, and since only 20 percent of its sales were to the automobile industry, the Du Pont sales to the automobile industry constituted only about 2 percent of the total market. The Court ignores the record by treating this small fraction of the total market as a market of distinct products.

It will not do merely to stress the large size of these two corporations. The figures as to their total sales—$793 million for Du Pont and $3,815,000,000 for General Motors in 1947—do not fairly reflect the volume of commerce involved in this case. The commerce involved here is about $19 million of industrial finishes and about $3,700,000 of certain industrial fabrics—less than 3.5 percent of the national market for industrial finishes, and only about 1.6 percent of the national market for these fabrics. The Clayton act is not violated unless the stock acquisition substantially threatens the competitive opportunities available to others. *International Shoe Co.* v. *Federal Trade Commission*, (280 U. S. 291); *Transamerica Corp.* v. *Board of Governors* (206 F. 2d 163); *V. Vivaudou, Inc.* v. *Federal Trade Commission* (54 F. 2d 273). The effect on the market for the product, not that on the transactions of the acquired company, is

---

which Du Pont had available and uncommitted to expansion of its own business.

* * * * *

"Raskob's reports and other documents written at or near the time of the investment show that Du Pont's representatives were well aware that General Motors was a large consumer of products of the kind offered by Du Pont. Raskob, for one, thought that Du Pont would ultimately get all that business, but there is no evidence that Raskob expected to secure General Motors trade by imposing any limitation upon its freedom to buy from suppliers of its choice. Other documents also establish Du Pont's continued interest in selling to General Motors—even to the extent of the latter's entire requirements—but they similarly make no suggestion that the desired result was to be achieved by limiting General Motors purchasing freedom. On the contrary, a number of them explicitly recognized that General Motors trade could only be secured on a competitive basis" (126 F. Supp., at 242–243).

Whether any stock purchase is an investment turns largely on the intent of the purchaser. *Pennsylvania R. Co.* v. *Interstate Commerce Commission* (66 F. 2d 37), affirmed by an equally divided court (291 U. S. 651). In this case, since the district court's finding with reference to that intent is unequivocal and not clearly erroneous, the stock acquisition falls within the proviso, stated in the third paragraph of section 7, expressly excepting acquisitions made "solely for investment."

[30] The district court did not reach this question since it found that there was no reasonable probability of any foreclosure of Du Pont's competitors by reason of Du Pont's 23 percent stock interest in General Motors. Consequently, there are no findings of fact dealing with the relevant market. Also, the record appears deficient on such crucial questions as the characteristics of the products, the uses to which they are put, the extent to which they are interchangeable with competitors' products, and so on. For these reasons, I believe the Court in any event should remand the case to the district court to give the district judge, who is more familiar with the record than we can be, an opportunity to review the record, and entertain argument with respect to the substantiality of the share of the relevant market affected by the foreclosure which the Court finds to exist. By declining to remand, the Court necessitates a scrutiny here of this huge record for a determination of an essentially factual question not passed on by the district court, and not thoroughly briefed or argued by the parties.

[31] The Court states that General Motors took 93 percent of Du Pont's automobile Duco production in 1941 and 83 percent in 1947. (Ante, p. 18.) These figures are of little significance. Not only do they omit the crucial sales—those made outside the automobile industry—but they give a misleading impression with respect to Du Pont's sales to the automobile industry. As previously stated, Ford chose to make its own requirements after about 1935 and Chrysler desired to concentrate its purchases on one supplier. Under these figures, after eliminating Ford and Chrysler, and deducting Du Pont's sales to General Motors, Du Pont must have supplied nearly half of the entire requirements of all remaining auto manufacturers in 1941 and an even larger portion in 1947.

The record does not contain complete figures on the amount of Duco sold outside the automobile industry. However, there are figures for selected years. In 1927, for example, 51.5 percent of all Duco sales were to other than automobile manufacturers (1,166,220 gallons, out of a total of 2,263,000 gallons). In 1948, Du Pont's gross sales to purchasers other than General Motors of the same kinds of finishes bought by General Motors amounted to about $97 million; its sales to General Motors in the same year were $21 million, or 21.7 percent of the total. The record reveals that General Motors' purchases of finishes from Du Pont have ranged, in recent years, from 14 percent to 26 percent of Du Pont's sales of such finishes to all customers. The conclusion seems clear that Du Pont's finishes have found wide acceptance in innumerable industries and that Du Pont is not dependent on General Motors for a captive paint market.

[32] U. S. Department of Commerce, Bureau of the Census, II census of manufactures: 1947, statistics by industry, 414–415. There were 1,291 establishments manufacturing these products. Du Pont's total sales were 8.1 percent of the industry.

controling. *Fargo Glass & Paint Co.* v. *Globe American Corp.* (201 F. 2d 534).[22]

The Court might be justified in holding that products sold to the automotive industry constitute the relevant market in the case of products such as carburetors or tires which are sold primarily to automobile manufacturers. But the sale of Duco, Dulux, imitation leather, and coated fabrics is not so limited.

The burden was on the Government to prove that a substantial share of the relevant market would, in all probability be affected by Du Pont's 23 percent stock interest in General Motors. The Government proved only that Du Pont's sales of finishes and fabrics to General Motors were large in volume, and that General Motors was the leading manufacturer of automobiles during the later years covered by the record. The Government did not show that the identical products were not used on a large scale for many other purposes in many other industries. Nor did the Government show that the automobile industry in general, or General Motors in particular, comprised a large or substantial share of the total market. What evidence there is in the record affirmatively indicates that the products involved do have wide use in many industries, and that an insubstantial portion of this total market would be affected even if an unlawful preference existed or were probable.

For the reasons stated, I conclude that section 7 of the Clayton Act, prior to its amendment in 1950, did not apply to vertical acquisitions; that the Government failed to prove that there was a reasonable probability at the time of the stock acquisition (1917–19) of a restraint of commerce or a tendency toward monopoly; and that, in any event, the district court was not clearly in error in concluding that the Government failed to prove that Du Pont's competitors have been or may be foreclosed from a substantial share of the relevant market. Accordingly, I would affirm the judgment of the district court.

"SEC. 7. That no corporation engaged in commerce shall acquire, directly or indirectly, the whole or any part of the stock or other share capital of another corporation engaged also in commerce, where the effect of such acquisition may be to substantially lessen competition between the corporation whose stock is so acquired and the corporation making the acquisition, or to restrain such commerce in any section or community, or tend to create a monopoly of any line of commerce.

"No corporation shall acquire, directly or indirectly, the whole or any part of the stock or other share capital of two or more corporations engaged in commerce where the effect of such acquisition, or the use of such stock by the voting or granting of proxies or otherwise, may be to substantially lessen competition between such corporations, or any of them, whose stock or other share capital is so acquired, or to restrain such commerce in any section or community, or tend to create a monopoly of any line of commerce.

"This section shall not apply to corporations purchasing such stock solely for investment and not using the same by voting or otherwise to bring about, or in attempting to bring about, the substantial lessening of competition. Nor shall anything contained in this section prevent a corporation engaged in commerce from causing the formation of subsidiary corporations for the actual carrying on of their immediate lawful business, or the natural and legitimate branches or extensions thereof, or from owning and holding all or a part of the stock of such subsidiary corporations, when the effect of such formation is not to substantially lessen competition.

"Nor shall anything herein contained be construed to prohibit any common carrier subject to the laws to regulate commerce from aiding in the construction of branches or short lines so located as to become feeders to the main line of the company so aiding in such construction or from acquiring or owning all or any part of the stock of such branch lines, nor to prevent any such common carrier from acquiring and owning all or any part of the stock of a branch or short line constructed by an independent company where there is no substantial competition between the company owning the branch line so constructed and the company owning the main line acquiring the property or an interest therein, nor to prevent such common carrier from extending any of its lines through the medium of the acquisition of stock or otherwise of any other such common carrier where there is no substantial competition between the company extending its lines and the company whose stock, property, or an interest therein is so acquired.

"Nothing contained in this section shall be held to affect or impair any right heretofore legally acquired: *Provided*, That nothing in this section shall be held or construed to authorize or make lawful anything heretofore prohibited or made illegal by the antitrust laws, nor to exempt any person from the penal provisions thereof or the civil remedies therein provided" (38 stat. 731–732, 15 U. S. C. (1946 edition) sec. 18).

Mr. O'MAHONEY. This decision, Mr. President, will, I think, take record alongside of the memorable decision which was handed down by the Supreme Court back in 1911, when the Standard Oil Company of New Jersey was held by the Supreme Court to be in such violation of the antitrust laws that it should be dissolved into various segments. One of the most interesting things about the results of that decision was that the segments of the Standard Oil Company of New Jersey became more wealthy and powerful than the mother company was when it resisted the suit brought by the Department of Justice.

In other words, monopoly, or a narrow control of commerce and industry, is never so productive for those who own and manage industry and for the people as is the free-enterprise system, by which I mean not any system that binds or fences off or protects monopolistic organizations, but a system which keeps the door of opportunity open for every individual and every group which seeks to enter the field of commerce, trade, and industry.

It is worthy of note that this case was initiated 8 years ago. It was brought in 1949 under section 15 of the Clayton Act. The United States District Court for the Northern District of Illinois ruled against the Government. The case was taken up on appeal to the Supreme Court. The decision which was rendered on Monday was a 4-to-2 decision.

The opinion was rendered by one of the recent appointees of the President to the Supreme Court, Mr. Justice Brennan. Associated with him in the decision were the Chief Justice, Mr. Earl Warren, Mr. Justice Douglas, and Mr. Justice Black.

A dissenting opinion was filed by Justice Burton and Justice Frankfurter.

Justices Clark, Harlan, and Whittaker did not take part in the decision at all. I suppose that Justice Clark withheld because he was at one time the head of the Department of Justice. Justice Whittaker has only recently been appointed to the Court and probably had no opportunity to hear the argument. Whatever reason Justice Harlan may have had does not appear on the face of the record.

The striking thing about the decision is that it points out in very simple language that one of the greatest dangers to economic independence is the power of monopoly. The Sherman antitrust law was enacted to punish conspiracies in restraint of trade after they had happened. The Clayton Act was passed, and the Federal Trade Commission was established, for the purpose of establishing a system of regulation which would nip monopoly in the bud, before anything had happened.

In this case the facts showed that the Du Pont Co. had acquired a 23-percent stock interest in the General Motors Corp. This acquisition was made in 1917 and 1919, and at that time, according to the evidence, one of the prominent managers of Du Pont pointed out that by the purchase of the stock the Du Pont Co. would create an opportunity for itself to have a market for the materials it produced. So in one sense it was a purchase made for the purpose of supplying a market. There may be some question as to what extent this market existed and to what extent it was used, but there is no doubt that throughout the period since Du Pont became the owner of this amount of stock the products of Du Pont were purchased by General Motors, and those purchases were made apparently to the exclusion of other suppliers.

In other words, this decision points to the captive markets which have been established in our modern industry by some of the giant corporations having satellite companies which they advertise as independent companies, but which are in fact not independent at all but revolve around the giant corporation.

That reminds me to say that recent figures furnished by the Library of Con-

[22] In the Fargo case, Maytag, an appliance manufacturer, acquired a 40-percent stock interest in, and contracted to purchase the entire output of, Globe, a gas range manufacturer. A Globe dealer, who lost his source of supply as a result of the transaction, brought a treble damage action alleging, inter alia, that the stock acquisition violated section 7 of the Clayton act. The evidence showed that there were about 70 manufacturers of gas ranges, and that Globe was about 18th in size, selling a little less than 2 percent of the national market (about $5 million a year). The Court of Appeals for the Seventh Circuit held that the stock acquisition did not violate section 7 because the plaintiff had other readily available sources of supply.

The acquisition of an outlet is governed by similar principles. In either case, the question is whether competitors may be substantially limited in their competitive opportunities. Assuming that Du Pont had purchased General Motors outright, and thus commanded an outlet consuming about 4 percent of the national market for industrial finishes and about 2 percent of the national market for industrial fabrics, it seems unlikely that Du Pont's paint and fabric competitors would be substantially limited in selling their products, when 96 percent and 98 percent, respectively, of the national market would remain open to them.

gress, from the best fiscal sources available—Standard, Poor's Manual, Moody's Manual, and other publications which report upon the statistics of giant business—show that the five largest American corporations, namely General Motors, Standard Oil of New Jersey, American Telephone & Telegraph Co., Ford Motor Co., and the United States Steel Corp., in a single year—I believe it was 1956—had revenues which were 5½ times as great as the revenues of the five wealthiest States in the United States. The States of New York, Ohio, Pennsylvania, California, and Texas had a total income from taxes and other sources during that year amounting to $6,669 million. The income of the five giant companies I have named was $31,660 million.

This shows the great disparity in economic power which has been produced in this country because corporations are created by the States, which have no power to regulate commerce among the States or with foreign nations. The States create the corporations which carry on this sort of commerce.

The companies which I have mentioned, including Du Pont and General Motors, are engaged in interstate and foreign commerce, but the States which created them have no power to regulate such commerce in the public interest.

The result has been, as shown by this decision, that General Motors Corp., the greatest industrial corporation in the world—and I use the word "greatest" both in the sense of size and probably in the sense of ability and skill—is equipped with technological experts, engineers, and scientists of the most outstanding quality. They can and do render great service. But it remains as a fact that these giant corporations are managed by paid employees. The officers and directors of none of these corporations are the owners of the corporations. They own only fragmentary shares of stock in the corporations. On the stock market, the share ownership is distributed in minute quantities, so to speak, among millions of individuals who are the technical owners, but who have nothing to say about the management of the corporations.

I remember very well that when Mr. Harlow E. Curtice, president of General Motors, testified before the Antitrust and Antimonopoly Subcommittee of the Committee on the Judiciary a year ago, he pointed out that no individual stockholder of General Motors owned more than 2 percent of the stock. I think he said 1 percent, but I am doubling the figure in order to be quite sure that I am not exaggerating the situation.

The stock of Du Pont is also scattered in the hands of many small stockholders, who exercise no more managerial power than to send in a proxy for the annual meeting. Du Pont owns 23 percent of the stock of General Motors Corp.

Du Pont is represented by directors and officers on the managerial board of General Motors. This situation is not peculiar to General Motors and Du Pont alone. Similar situations exist throughout our economy.

Therefore, because this decision throws a bright light upon the organization of our giant corporations and upon the laws which Congress has passed in prior years to prevent monopolistic control, I have asked the privilege of having both the majority decision and the dissenting opinion printed in the body of the RECORD.

My point, in conclusion, is this: We know that the whole world is in a state of great turbulence. We know that the United States, through its executive, legislative, and judicial branches, believe that ours is a government of the people. We know that the Soviet Government is a government of dictators. As the Senator from Minnesota [Mr. HUMPHREY] pointed out a few minutes ago, when Mr. Khrushchev, Secretary General of the Communist Party, made his television broadcast to our people last Sunday, he asserted that by 1960 or 1961, I believe, Soviet Russia would be outproducing the United States agriculturally. It may be outproducing us now in military production.

These facts are well known. The Soviet Army consists of about 119 divisions. Our Army consists of not more than 20 divisions. The Soviet Government has the largest navy in the world, probably, next to ours. We may have the largest, but it is true that the submarine fleet of Soviet Russia is far greater than was that of Herr Hitler; and in World War II Hitler's submarines were able to prevent the transportation of large quantities of petroleum from South America to our Atlantic coast for the use of our refineries in making fuel for our military weapons, our tanks, our naval vessels, and our airplanes. We were handicapped in the use of fuel.

If there should be a third world war, the Communist submarine fleet would in all probability be able to bottle up in the eastern Mediterranean any attempt to ship Middle East oil to this country to supply our defense needs.

What I am pointing out is simply that, before the third world war begins—and we all pray that it never will begin—one of the principal objectives of American statesmanship and American Government should be the preservation of the capitalistic system. Soviet Russia believes that it is outmoded, that it cannot last. They believe that through the concentration of the economy in the hands of monopolists, too many of our people will be excluded from participating in the economy. Therefore they are hoping that the capitalistic system will fall.

By opening the door of equal opportunity to all businesses, all groups, and all individuals, and by the strict enforcement of all antitrust laws—the Sherman Act, the Clayton Act, and the other acts—in order to prevent monopolistic practices and discriminatory selling, we will be able to preserve the capitalistic system as a method of expanding the economy and raising the standard of living of all the people.

Mr. President, I believe that any person who reads this decision will be benefited thereby. I have placed in the RECORD both the majority and the minority opinions, because they are both worthy of study, and because I believe that these opinions from the highest court in the land will stimulate and encourage those of us who desire to make the antitrust laws of the United States more competent to preserve economic opportunity for the masses of the people.

Mr. President, I yield the floor.

WORK OF SENATOR KEFAUVER IN EXAMINING ACCELERATED TAX WRITEOFF POLICY

Mr. NEUBERGER. Mr. President, on May 17 the Senate Judiciary Subcommittee on Antitrust and Monopoly, under the chairmanship of the able and distinguished senior Senator from Tennessee [Mr. KEFAUVER], opened hearings on the circumstances which have made it possible for the Idaho Power Co. to enhance its monopoly position, and at the same time gain special benefits at the expense of the Federal Treasury.

Results of the Judiciary subcommittee's hearings have been disturbing and revealing. They have shown that not only has this administration handed to the Idaho Power Co. the unique natural resources of the middle Snake River for private profit; it has done so in such a way that the taxpayers of the United States will carry part of the load of helping this private utility company with its wasteful underdevelopment of an irreplaceable resource.

The price tag to the taxpayers for the quick tax writeoff given to Idaho Power has been set at over $83 million, showing conclusively the emptiness of the company claim that its dams would be built without cost to the taxpayers. The diligent Senator from Tennessee again has exposed the favoritism being enjoyed by monopoly interests under policies of this administration. He is performing a service of inestimable value to the Nation by revealing the facts behind the shocking maneuvers in connection with betrayal of the public interest at Hells Canyon. I commend him for his tireless and courageous work.

Mr. President, I ask unanimous consent to include in the RECORD with my remarks, an editorial from the Nashville Tennessean of Friday, May 31, 1957, and a column entitled "Washington Wire" by T. R. B. in the New Republic of June 10, 1957, both of which set forth some of the positive accomplishments of the recent hearings on the tax writeoff bonanza to the Idaho Power Co.

There being no objection, the editorial and article were ordered to be printed in the RECORD, as follows:

[From the Nashville Tennessean of May 31, 1957]

NO FAST FRIENDSHIPS FOR IKE DESPITE THE FAST WRITEOFFS

If President Eisenhower likes enigmas, he has one of his very own to play with these days: Why, in the midst of his budget woes, has he been forsaken by the powerful business interests which have occupied so privileged a place in his administration?

Mr. Eisenhower's romance with big business bloomed from the very first. His stag dinners brought guests whose names read like a roster of Who's Who in Business and Industry. Bankers, industrialists, statesmen were invited, but no ordinary citizen ever found his name on any invitation.

As a general, Mr. Eisenhower never mingled with the enlisted help, or even the lower

echelon brass. And as a President, he had a boyish awe of the big shots, particularly the big corporation big shots. Most of his golfing, bridge, dinner, or shooting companions are the boys with the big cigars, whose troubles, if any, were "these here taxes, Ike, ol' boy."

Having viewed the world through the aromatic haze of smoke from a-buck-a-piece cigar, Mr. Eisenhower was not likely to be overly concerned about how the peasants were faring. And special favors were not hard to find by the dinner guests of good ol' Ike.

One type of favoritism has been drawing a huge outcry in recent days, thanks to a Senate investigation and Senate speeches. That is the fast amortization through 5-year tax writeoffs of depreciation which is enjoyed by all sorts of industry still, though months and months ago administration officials admitted this defense measure—launched during the Korean war—was going to be curtailed.

But that was before Idaho Power Co., of Augusta, Maine, came forward with demands for relief in its plans to build two low dams on Hells Canyon under the administration partnership plan.

Idaho Power, crying loudly in the sacred name of defense, was given the writeoffs, allowing it to depreciate 65 percent of the cost of its Brownlee Dam and 60 percent of its Oxbow Dam over 5 years instead of the usual 50. It was thereby enabled to save itself $30,500,000 in taxes at the cost of the taxpayer.

The whole business was put over despite a recommendation by Secretary of the Interior Fred Seaton who had urged that Idaho Power needed no tax incentive, that its dams would not produce excess power and failed to meet a critical requirement of the act.

The Seaton letter was allowed to be "lost," and was later turned up by Senator ESTES KEFAUVER's judiciary subcommittee, which had been misled about the Interior Department's stand by Mr. Gordon Gray, director of the Office of Defense Mobilization.

The whole air of secrecy, evasion and suppression leads to the inevitable conclusion that this writeoff smells of some very special treatment indeed, not only at an amazing cost to the taxpayers now but later to the power consumers of the Pacific Northwest.

Then, there is the fast tax writeoff to Freeport Sulphur Co. which was to encourage the production of nickel, and which has cost the Government $10 million in a market price loss.

Another form of "favoritism" has been Admiral Strauss' offer of all kinds of special inducements to industry to get them into construction of atomic reactors for power production.

Also, there is the tax privilege of a 27½ percent depletion allowance for the oil industry. Some Senators tried to get it scaled down recently, but were thwarted. And Treasury Secretary Humphrey said he would study this tax device. Obviously, he never got around to it.

While American citizens are bending under their individual tax loads, and small business is in a bind, this superconsideration for private power and big business is a shameful thing. The Kefauver subcommittee and other Senate probers should be urged to all-out zeal in uncovering the whole "romance" of Mr. Eisenhower—a courtship now turned cool—which has been so costly to the taxpayers.

[From the New Republic of June 10, 1957]

WASHINGTON WIRE: ANOTHER DIXON-YATES?

Way back before you were born the United States came within an inch of selling Muscle Shoals to Henry Ford. Coolidge and Hoover advocated it; George Norris stopped it. If the deal had gone through, we wouldn't have had TVA.

But under Eisenhower, Hells Canyon—the last great natural power resource on the North American continent—was handed over to the Idaho Power Co. (incorporated in Augusta, Maine). Truman's Oscar Chapman held it off, but Eisenhower's Douglas McKay put it through as the first major action taken under the new power policy.

The great canyon demanded a dam as noble as the site—a single thrilling structure to express for all time the spirit of the people and the Nation that produced it. Instead, the private utility undertook to build three small dams—dams that would not really harness the river and that, year after year, for ever and ever, would lose perhaps 400,000 kilowatts of prime power. A sleazy Niagara.

The argument for the private utility—in addition to encouraging free enterprise—was expressed by the Federal Power Commission. It could be realized, it explained, "without expense to the United States." The Quixotic utility in its generosity, it explained, would take the magnificent resource right off our hands and exploit it without its costing the Treasury a cent.

And Congress agreed. But now we are beginning to find out what "no expense to the United States" means. We have given away a vast natural resource; we have created a situation where generations to come will look at an incompletely harnessed site and say, "Why did the men of those days lack vision?" And, on top of this, we now discover that the Idaho Power Co. is sending in a bill. Yes; and an embarrassed administration is trying to cover it up very much as it tried to cover up realities in the now-canceled Dixon-Yates contract.

The utility has applied for, and been granted by Eisenhower's administration, a rapid tax writeoff subsidy to aid its construction. It is now officially estimated that this will cost the Treasury $83.5 million. (Total cost of the utility's three small dams is estimated at about $130 million.) This isn't the whole story.

RETURN OF THE HOUND DOG

You may remember how the Eisenbower administration twisted and squirmed over the Dixon-Yates contract until the Kefauver committee finally revealed that one of the key figures was working not only for the Government but for the private companies (a fact the oblivious Eisenhower himself twice denied). Now KEFAUVER is at work again. He has uncovered the fact that Interior Secretary Fred Seaton two months ago strongly recommended against giving the Idaho company its big Federal fast tax writeoff subsidy. He has disclosed that Gordon Gray, head of the Office of Defense Mobilization, although knowing of the adverse Seaton recommendaiton kept it secret and granted the tax write-off. (Such a conservative as Senator HARRY BYRD, Democrat, of Virginia, called the grant "utterly indefensible.") Gray left the impression in public testimony that he was following Interior Department policy, neglecting to mention that McKay policy had been superseded by Seaton policy (just as Eisenhower power policy seems to have altered slightly after 1956 election returns) from the angry power-minded Pacific States. Gray, it turns out, took his troubles to Sherman Adams, just as officials did in the Dixon-Yates row, and he now refuses (just as they did) to testify on the subject. Only when KEFAUVER got hold of the Seaton letter from an independent source did Gray suddenly decide that it was not "privileged" after all.

Ploddingly, implacably, like a hound dog on a hot scent, KEFAUVER is turning up hidden bodies. The Senate has one more chance to reverse its decision and take Hells Canyon away from the "no cost"—$83.5 million subsidy—Idaho Power Co. Another vote in Congress has been arranged. While the chances of reversal look rather slim, a lot of voters are going to mark this one down for keeps.

Mr. President, I now turn to another subject.

The PRESIDING OFFICER. The Senator from Oregon has the floor.

RADIOACTIVE FALLOUT

Mr. NEUBERGER. Earlier today I engaged in a discussion on the floor of the Senate with the Senator from Minnesota [Mr. HUMPHREY], the Senator from Kentucky [Mr. COOPER], the Senator from Oklahoma [Mr. MONRONEY], and the Senator from New York [Mr. JAVITS], on the subject of atomic fallout. We discussed this great peril in varying terms.

I should now like to read two paragraphs from an article published in this morning's Washington Post and Times Herald, which, it seems to me, the Senate cannot ignore:

H. Bentley Glass of Johns Hopkins University said an "unbalance" existed in the AEC "between emphasis on the physical aspects of atomic energy and on the biological counterpart." He proposed that a geneticist or biologist be appointed to the Commission itself, or at least be represented on the AEC's General Advisory Committee.

Glass is himself a member of an advisory committee for the AEC's division of biology and medicine. He indicated later that his group's report on strontium 90 effects, requested by the Commission more than two years ago, has yet to be issued in its final form because of AEC reluctance.

Mr. President, it seems to me that this report, prepared by medical advisers to the Atomic Energy Commission on the impact of strontium-90 on the human race, should be released to the American public. The report should not be suppressed. I fail to understand how a report such as this can possibly have any direct bearing on strategic or military material which would be useful to the enemy.

However, I do believe that the facts in the report are of the utmost importance to the American people, who are concerned about their own health and that of their children.

When a member of the AEC Advisory Committee on Biology and Medicine says publicly that the report of his group has been suppressed, and when that report deals with such a vital matter as the impact of strontium-90 on human life, the Senate should take an interest in the situation.

I believe that the Atomic Energy Commission should release the report to the rest of the Government, to Congress, to the President, and certainly to the public. The very least the Atomic Energy Commission should do is to give some concrete reasons why the report has not been released, if it is to continue with its reluctance to disclose material that is of such vital importance to us all.

SUSPENSION OF TROOP CEILINGS IN THE ARMED FORCES

Mr. MONRONEY. Mr. President, so that the Senate will have unfinished business when it adjourns for the day, I ask unanimous consent that the Sen-

ate proceed to the consideration of Calendar No. 390, H. R. 7143.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (H. R. 7143) to amend the act of August 3, 1950, as amended, to continue in effect the provisions relating to the authorized personnel strengths of the Armed Forces.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Oklahoma?

There being no objection, the Senate proceeded to consider the bill.

Mr. MONRONEY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection it is so ordered.

EXECUTIVE AND LEGISLATIVE PROGRAM

Mr. JOHNSON of Texas. Mr. President, I wish to announce again, for the information of the Senate, that on tomorrow there will be a yea-and-nay vote on Executive C, 85th Congress, 1st session, a protocol between the Government of the United States of America and the Government of Canada to the Convention for the Protection, Preservation, and Extension of the Sockeye Salmon Fisheries in the Fraser River system, signed at Washington on the 26th day of May 1930, which protocol was signed at Ottawa on December 28, 1956.

I desire all Senators to be on notice that there will be a yea-and-nay vote on the protocol, in accordance with the previously established procedure on treaties.

The leadership is hopeful that next week it may be possible for the Senate to consider H. R. 6070, the independent offices appropriation bill, the subcommittee, under the chairmanship of the distinguished senior Senator from Washington [Mr. MAGNUSON] having completed hearings on that bill.

Also, it is hoped that the Senate may consider next week H. R. 6287, the Labor and Health, Education, and Welfare appropriation bill, which is being considered by a subcommittee under the chairmanship of the distinguished senior Senator from Alabama [Mr. HILL].

It is hoped that the Senate may also consider then H. R. 6500, the District of Columbia appropriation bill, which is being considered by a subcommittee headed by the distinguished junior Senator from Rhode Island [Mr. PASTORE].

It is also hoped that the Senate may consider next week the Department of Agriculture appropriation bill, H. R. 7441, which is being handled by a subcommittee headed by the distinguished senior Senator from Georgia [Mr. RUSSELL].

The subcommittee handling the Department of the Interior Appropriation bill hopes to be able to report that bill, H. R. 5189, to the full committee next week. Hearings are now being held on House bill 7665, the Defense Department appropriation bill, under the chairmanship of the distinguished senior Senator from New Mexico [Mr. CHAVEZ].

It is my information that the public works appropriation bill is ready for consideration by the House of Representatives. The Senate committee has been holding hearings on the bill, under the chairmanship of the distinguished senior Senator from Louisiana [Mr. ELLENDER]. The bill should be ready to be reported to the Senate soon after the House acts on it.

Mr. President, I want the RECORD to show that we intend to have first priority given to these appropriation bills. I hope it will be possible for the Senate to dispose of some 5 or 6 of them during the next 10 days.

In addition, the atomic energy treaty is before the Foreign Relations Committee. I had expected that it would be reported this week, but there has been some delay because of the request for a report from the Secretary of State and because of the possibility that some reservations will be made to the treaty.

Furthermore, the mutual security bill is being marked up by the Foreign Relations Committee. I hope the committee will order the bill reported this week.

I should like to have all my colleagues on both sides the aisle know that the weeks ahead will be very busy ones; we will have several appropriation bills to consider in the next week or 10 days, in addition to the mutual aid authorization bill, and at least 2 treaties.

EQUIPMENT FOR THE WASHINGTON HOSPITAL CENTER

Mr. MORSE. Mr. President——

Mr. JOHNSON of Texas. I yield to the Senator from Oregon.

Mr. MORSE. Mr. President, I wish to make several insertions in the RECORD; but, first, I wish to make a statement on another matter.

Mr. JOHNSON of Texas. Mr. President, I had been informed by one of the Senate aids that the Senator from Oregon wished to make an insertion in the RECORD. However, inasmuch as he wishes to make a statement, I now yield the floor to him. I ask that when he finishes his statement, he move that the Senate adjourn.

Mr. MORSE. Very well.

Mr. President, I wish to make a preliminary report on behalf of the Subcommittee on Public Welfare, of the Committee on the District of Columbia. Today, we had in the subcommittee what, to me, was a very thrilling experience in connection with the testimony of a group of distinguished doctors and hospital representatives in this community, including former Representative Dewey, now the president of the District of Columbia Hospital Association. We were confronted with the serious problem of a proposal by the General Services Administration and the Bureau of the Budget to cut from $1,710,000 to $500,000, a budget request, for hospital equipment which the testimony of witness after witness showed is essential. The testimony clearly showed that if the equipment is not obtained, it will be impossible to supply the medical services needed in these hospitals. That would be the result of following the recommendation of the General Services Administration and the Bureau of the Budget.

Mr. President, I raise the question of whether that is an example of being conservative in economic affairs and being liberal in human affairs, on the part of this administration.

Mr. President, the position taken by the Bureau of the Budget was so untenable that our subcommittee followed an extraordinary course of action. Following consideration of the bill, although the subcommittee had other bills to consider, it took a recess, insofar as the public hearing was concerned, and went into executive session, at which time it unanimously recommended the full amount of $1,710,000, on the ground that neither the Bureau of the Budget nor the General Services Administration had submitted a scintilla of evidence which would justify the cut they proposed in the budget item.

I wish to compliment the great surgeons and doctors of the District of Columbia who took their time this afternoon to come before the District of Columbia subcommittee and protest against that proposed cut. The members of subcommittee thought that time was so much of the essence, that they took the course of action I have just described, and then excused a member of the subcommittee, I refer to the Senator from Pennsylvania [Mr. CLARK], to have him go directly to the Senate Appropriations Subcommittee, to present to it our point of view.

As we said in the statement we released to the press, so far as we are concerned, we are not going to be a party to economizing in the District of Columbia at the expense of human suffering, on the part of hospital patients who, as was testified to, today, by doctor after doctor, would not be able to obtain the medical services they would need, if such a budget cut were authorized.

Mr. President, I wish to mention that situation, while speaking today on the floor of the Senate, because I am very proud of the dedicated work of my colleagues on the District of Columbia Committee. It is a rather thankless job; and I am very proud of the work of the committee and of what the committee is attempting to do, in an effort to see to it that justice is done for thousands of voteless people in the District of Columbia.

Mr. MAGNUSON. Mr. President, will the Senator from Oregon yield to me?

The PRESIDING OFFICER (Mr. MCNAMARA in the chair). Does the Senator from Oregon yield to the Senator from Washington?

Mr. MORSE. I yield.

Mr. MAGNUSON. I just finished holding the appropriations subcommittee hearing which heard the testimony of the same group which appeared before the Senator's subcommittee prior to coming before our group. I think we have all the facts well in mind.

After making such large expenditures for the hospital, it would seem obvious that the necessary equipment should be provided. Of course, we shall have to wait for the authorization. I hope the House Committee on the District of Columbia acts as promptly as the Senator from Oregon and the other members of the subcommittee of the Senate Committee on the District of Columbia acted this afternoon.

Mr. MORSE. Let me say to the chairman of the appropriations subcommittee having jurisdiction over this matter that one of the witnesses testified that if the necessary equipment is not provided, certain parts of the hospital cannot be used; and in that connection the interest charge alone for the unused facilities would equal a considerable part of the cost of the equipment.

One of the doctors testified that one of the cuts proposed by the Bureau of the Budget would prevent the installation of air conditioning in the nurses' home. He pointed out that the nurses will work during the day in the hospital, which is air-conditioned, but then will be required to return to what he described as cubicles, by way of dormitory facilities, in Washington, D. C., in the summertime; and the proposal was that there be eliminated from the budget the amount for air conditioning the nurses' home.

The Senator from Washington knows the problem we have in obtaining an adequate number of nurses, anyway.

Mr. MAGNUSON. This is the only nurses' training school in the United States, I believe, in conjunction with a large hospital unit.

Mr. MORSE. At least, it is one of the few. All the doctors testified that there is great need for it in the District of Columbia.

I suggested to the doctors present that if we really felt there would be very much difficulty over that item, I would do the best I could to see to it that the air conditioning in the Capitol Building was shut off on the day when the vote on this item was taken; I thought it might be helpful to have that done.

Mr. MAGNUSON. There are some Government installations that do not have air conditioning—for instance, the veterans' hospitals throughout the country. There is a problem in that connection, of course. In addition, certain of the Government office buildings in the city of Washington do not have air conditioning. The Appropriations Committee is moving as quickly as possible to take care of that situation.

Certainly it might be false economy not to install air conditioning in the new hospital building.

Mr. MORSE. As was intimated in this case, it is also a problem of health for the nurses themselves, and there is a question whether we have a right to send them from an air-conditioned hospital to a hot cubicle in a dormitory.

Mr. MAGNUSON. I hope the Senator will use his good offices to have the authorization approved as quickly as possible, so we may be able to discuss and consider the amount of money needed.

Mr. MORSE. I pledge to the chairman of the Subcommittee on Appropriations that I shall do everything in my power.

ENROLLED BILLS PRESENTED

The Secretary of the Senate reported that on today, June 5, 1957, he presented to the President of the United States the following enrolled bills:

S. 895. An act for the relief of Josefa Kusiak; and

S. 1203. An act for the relief of Lydia Anne Foote.

THE NATIONAL FOREST WILDERNESS SYSTEM

Mr. MORSE. Mr. President, I desire to put in the RECORD an address by the Chief of the Forest Service on the National Forest Wilderness System as a complement to a recent speech by Mr. Brewer, of the Sierra Club.

For a long time I have had a high regard for the Forest Service. Every member—from the men manning the fire towers and in the ranger stations right through to the chief of the Forest Service—has helped make the wonderful record in conservation of natural resources that this Agency has. This does not mean that I think that the Forest Service is perfect, but they have done a good job. When we think of the difficulties that have beset their path and view accomplishments in this perspective, the job done has been even better.

In his speech Mr. McArdle has attempted to explain a decision made on the reduction of the Three Sisters Wilderness Area in my State.

In my judgment, the major errors in this decision should not occur again. Here is what happened. The Department reduced the Three Sisters Wilderness Area by 53,000 acres. At the same time they created new wilderness area elsewhere. Thus they claim a net increase of 32,000 acres.

The Three Sisters decision was mixed with another, and the claim emerges with a net wilderness increase of 32,000 acres in my State.

I think that if the Department was going to create the new wilderness areas, this should have been done in one order, while the Three Sisters reduction should have been made in another.

One of the significant oversights in Three Sisters is that the Department did not present the conservationists with their plan of operation for the 53,000 acres that was put into commercial use. Thus the conservationists had no way of assessing how the timber operations planned against the boundary of the wilderness area will affect it.

It is my considered judgment that we need two things. First, we need State or regional wilderness reviews to establish the total area that should be committed to wilderness. Second, we need more public information on how lands to be eliminated from wilderness will be managed, especially when the lands are next to a remaining wilderness area. Sound public policy calls for giving the people all of the facts so that they may appreciate the situation. This did not occur in Three Sisters.

The wilderness system of our national forest is not large. As the chief of the Forest Service points out, we need more public understanding on the problem the Forest Service has in maintaining an area as wilderness.

Certainly the Forest Service has responsibilities here as the custodian of the national forests. I hope they will exercise this responsibility by keeping the public fully informed. I hope that never again will a wilderness area be reduced until the plan for commercially operating the area has been presented to the public and their comments have been reviewed. I also hope the Forest Service will support and help implement plans which will provide for regional or State reviews of our wilderness needs.

The preservation of primeval America is a necessary part of preserving and promoting the traditions that stand for this great Nation. I am confident that as we move forward in conservation, the Forest Service will be motivated by the nobleness of purpose that guided Theodore Roosevelt, Gifford Pinchot, and the great conservationists of the turn of the century who recognized that the future of America's resources must be protected. Our moral strength as a nation will be determined in large measure by the national outlook we develop toward our resources. In this troubled world we must maintain this strength to protect our Nation from the godless materialism of communism and the police state.

Therefore, as a part of my remarks, I ask unanimous consent that the speech delivered by Richard E. McArdle, Chief of the Forest Service, be printed in the RECORD as a part of my remarks.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

THE NATIONAL FOREST WILDERNESS SYSTEM

(By Richard E. McArdle, Chief, Forest Service, U. S. Department of Agriculture, at Wilderness Conference, San Francisco, March 16, 1957)

(NOTE.—It seemed to me that various concepts of wilderness had been expressed at this meeting. To avoid possible misunderstanding of my prepared statement, I thought it desirable to preface my remarks with an off-the-cuff comment that as I would use the term "wilderness" does not refer to developed areas such as city or State parks open to mechanized means of travel, campgrounds and picnic areas, or even to backcountry areas if accessible by roads. I also commented that although I could join other speakers in arguing the need for preserving wilderness conditions, I would use the time available to me to concentrate on some of the practical problems the Forest Service is trying to solve in order to preserve and protect wilderness.—R. E. McA.)

The Department of Agriculture has recognized the desirability of protecting and preserving wilderness for a long time. We will continue to do so. I know from my own association with five Secretaries of Agriculture that each of them has given personal support to sound wilderness policy.

The guiding principles of national-forest management are multiple use and sustained yield of products and services for the greatest

good of the greatest number in the long run. This means that all resources, all uses, all users must be considered. Within that framework the Forest Service will protect, preserve, and maintain as wilderness those areas on the national forests which are predominantly valuable for that purpose. We will continue our study of the existing primitive areas and classify as wilderness or wild areas those portions which are predominantly valuable for wilderness. We will establish new areas under regulation U–1 or U–2 when such action is justified by public need and by careful analysis of the total resource situation in each potential or proposed wilderness area.

The Superior airspace reservation and the Superior roadless area are examples of actions under our wilderness policy. The Superior airspace reservation, which prohibits the operation of aircraft at elevations under 4,000 feet on the Superior roadless area, is the only airspace reservation of its kind. We have had some tough fights to maintain the airspace reservation. So far we have won them all. The Superior Roadless Area Act (of June 22, 1948, amended June 22, 1956) is a clear recognition by Congress that purchase of private property inside the Superior roadless area is essential to protect the unique qualities and natural features of this superlative canoe country. The Secretary of Agriculture recommended this legislation in 1948 and again last year strongly supported its amendment to substantially increase the amount authorized for expenditure.

I know that most of you agree with our principles for managing public properties, but I think some of you sometimes wonder whether the Forest Service will always use the right yardstick or give proper weight to intangible values in determining when wilderness is the highest public use of an area. Let's take a look at the record.

Back in the 1920's the Forest Service gave formal recognition to wilderness as a significant national-forest use. A large part of what is now the Gila Wilderness was administratively set up as a special area for the preservation of wilderness in 1924. In 1926 parts of the Superior roadless area were given special protection.

In 1929 the Forest Service recommended regulation L–20, the first secretarial regulation on wilderness use. This regulation authorized the establishment of primitive areas for the purpose of protecting wilderness conditions. The first primitive area under regulation L–20 was established in 1930. By 1939 we had established 73 primitive areas and 2 roadless areas, totaling 14,235,000 acres.

As we gained experience we found ways to strengthen the implementation of our wilderness policy, and in 1939 the Secretary of Agriculture, on Forest Service recommendation, established still more restrictive regulations. These are regulation U–1 for the establishment of wilderness areas (over 100,000 acres) and regulation U–2 for wild areas (5,000 acres to 100,000 acres). I think most of you are familiar with these regulations.

When regulations U–1 and U–2 were established, we announced that in accordance with these regulations the 73 primitive areas would be systematically restudied, and that all portions predominantly valuable for wilderness would be reclassified as wilderness or wild areas under regulations U–1 and U–2. We also announced that we would not wait for reclassification but would immediately begin to manage all primitive areas in accordance with the more restrictive provisions of the new regulations.

We now have 12 wilderness areas, a total of 3,969,000 acres; 23 wild areas, totaling 815,000 acres; 3 roadless areas with 814,000 acres; and 43 remaining primitive areas with 8,252,000 acres.

Here is what has happened since regulation U–1 was established in 1939: 29 primitive areas, totaling 4,375,228 acres, have been reclassified under regulation U–1 or U–2; 8 new wild areas, totaling 289,362 acres, and 1 new roadless area of 37,889 acres have been established. In 1941, 432,167 acres of the High Sierra primitive area in California were transferred by act of Congress to the Kings Canyon National Park and are still managed as wilderness. (Another 206,000 acres had been transferred in 1938 by act of Congress from the Olympic primitive area to the Olympic National Park and continue to be managed as wilderness.) The 32,784-acre remnants of the Olympic primitive area were not suitable for wilderness classification, and we dropped them from further consideration. We were obliged to discontinue one primitive area—the Mt. Shavano in Colorado—because the wilderness character of this 30,729-acre area was destroyed by mining activity and mining roads during World War II.

The reclassification of 29 primitive areas has involved, in total, rather sizable boundary adjustments—additions as well as deletions. If you want to evaluate what has happened in total acreage since regulations U–1 and U–2 were established in 1939, I think it would be necessary to allow for the more than 400,000 acres removed by act of Congress from Forest Service administration but still managed as wilderness. Allowing for this action, the balance sheet on March 1, 1957, shows a net increase in wilderness administered by the Forest Service of 65,376 acres.

Three new wilderness areas are now being proposed. The Tracy Arm-Fords Terror area in Alaska has been advertised and a public hearing is scheduled for April. Public notice has been given on the Jarbidge area in Nevada, and preliminary proposals on the Glacier Peak area in Washington have been sent to interested groups for discussion. These 3 proposals comprise a total area of more than 780,000 acres.

Since 1939 there has been only one change in a wilderness or wild area after it was formally established under Regulations U–1 or U–2. That was a relatively minor change in the Superstition Wilderness area, in Arizona. The owner of private land inside the wilderness area built a road to his land in accordance with his statutory right of ingress and egress. We therefore eliminated the 7,680 acres affected by this road, as prescribed in Regulation U–1.

I think the Forest Service has a right to be proud of this whole record. It covers 33 years of protection and preservation of lands for wilderness use. It covers the administration of six Chiefs of the Forest Service and demonstrates a strong continuity of policy and purpose. May I add, parenthetically, that since I became Chief, 13 of these primitive areas have been reclassified as wilderness or wild, 2 new wild areas have been established, and 3 proposals for new areas totaling some 780,000 acres are in the mill. I intend to continue to protect and preserve the wilderness resources of the national forests, and I have every confidence that future Chiefs of the Forest Service will continue to do so on lands which are predominantly valuable for that use.

Under our present policy and procedure, there have been very few serious disagreements with wilderness advocates. Our discussions with interested groups and individuals usually have resulted in agreement on mutually satisfactory boundaries. This kind of cooperation has led to mutual understanding of interests and viewpoints. We realize that there may sometimes be differences of viewpoint which cannot be resolved easily. In those instances public hearings are held. This was done for three areas—the San Gorgonio, Gila, and Three Sisters. We learned a lot from those hearings, and they helped us to better understand the many aspects of wilderness and the viewpoints of wilderness people. I will make an additional comment on the Three Sisters area a little farther on.

So much for the policy and the past record. Now I want to talk about some of the problems of managing wilderness areas. From now on when I say "wilderness" I'm using the term in its generic sense to mean any area being managed for the protection and preservation of primitive conditions, including wilderness areas, wild areas, roadless areas, and primitive areas.

I have said many times and I repeat: Use for wilderness purposes of large areas of national forest is an important use, a desirable use. But you all know that it is only one of many important and desirable uses of the national forests. The need for full use of the resources of the national forests will become even greater as our population grows. There is not enough national forest to satisfy all the needs of our growing population. Large as the national forests are, 181 million acres is not enough to provide each and every group of users with exclusive use of all the areas each group wants and with the particular areas they want.

That is why we stress multiple use and sustained yield of resources and services as overall objectives of national forest management. We want the national forests to satisfy as many public needs as possible and thereby yield maximum public benefits. Wilderness is a special problem because use for this purpose does not lend itself to sharing an area with many other uses. In some respects it is a rather restrictive use. Wilderness areas can, of course, yield water (except for large reservoirs), forage, wildlife (in limited quantities), and scientific values in addition to wilderness enjoyment; but timber utilization, mass recreational use, big water-storage projects, scenic highways, and other commercial uses must be excluded if the wilderness character of the area is to be preserved.

You can't just set aside 14 million acres of wilderness and forget it. Wilderness areas must be managed and protected in order to remain useful as wilderness. That is a difficult and often rather costly job. Although legislation might be helpful in resolving some difficulties, many of them are administrative problems which can't be solved by legislation.

Formal establishment—however it may be done—as a wilderness area does not guarantee preservation of resource values. Fire, insects, disease, and windthrow are constant threats not only to forests in the wilderness area, but there is also everpresent danger that big fires or disease or insect epidemics may spread to adjoining lands outside the wilderness.

I've seen big burns in many of our wilderness areas, and they are not attractive. The inaccessibility of wilderness areas makes fire control difficult, dangerous, and expensive. One night last fall a group of us were discussing this problem. We were in the heart of one of the largest wilderness areas, so perhaps our physical location at the time made our discussion even more realistic. The map we were examining was literally peppered with small dots, each dot representing a fire—for the most part fires started by lightning. Almost any one of those fires, had it not been controlled, might have swept over thousands, and perhaps hundreds of thousands of acres of fine wilderness country. It might have spread to lands outside the wilderness. As many of you of course know, we have developed an elite corps of

firefighters—our smokejumpers—to help us meet this difficult situation.

I think that sometimes in our enthusiasm for wilderness preservation we are inclined to ignore some of the costs. Maybe this is a carryover from pioneer days, when land was to be had for the taking. Maybe it's because many people think of wilderness as idle land, doing nothing. You don't get wilderness for free; it costs something and those costs are increasing. Part of the cost is measured in terms of what you can't have if you do have wilderness—less timber, less forage, less water, less opportunity for people to enjoy the best scenery, and so on. Some of it is measurable in dollars; some isn't.

But let's get back to my fire-occurrence map. Every dot on that map represents not only a fire; it also represents two or more smoke jumpers—two or more men who risked their lives to preserve wilderness values. Without roads it's expensive as well as terribly time consuming to get these smoke jumpers back into circulation when they've finished their job. I wish I could assure you that smoke jumping is the whole answer to fire control in large, back-country areas. It isn't. I wish I could tell you that we aren't worried about the possibility of having an enormous conflagration that will be tremendously difficult to control under wilderness conditions. The certain destruction by such a conflagration of water values, of scenic values, of other resource values worries us even more than the cost of fire control. Loss of water, loss of other values may not have been so critical 50 years ago, 25 years ago, or even 10 years ago. It would be today. It will be much more critical in the future. Quick access is the key to fire control, but quick access is what you don't have if you want wilderness. These aren't theoretical considerations. They are hard facts and they're right on us.

Insect epidemics also are grim reapers of forests—including forests inside wilderness areas. When they build up to epidemic proportions they spread over large areas and do great damage. Much of the Flat Tops primitive area in Colorado has been ruined by insects that got away from us. Aerial spraying can be done effectively in wilderness areas against some insects and diseases, but cannot be used to combat others.

Every big blowdown of timber in a wilderness poses a problem and a threat of big damage from fire and insects. Some of the worst forest insect epidemics in this country gained rapid headway because of the ideal breeding conditions created by large blowdowns. We can and do have blowdowns inside wilderness areas.

There are other problems connected with wilderness—overgrazing by pack stock, clean-up and sanitation at heavily used camp sites, overgrazing by big game which can't be harvested because of inaccessibility, a number of others. I won't discuss these—you all recognize them.

Practically every wilderness area contains timber, minerals, water, and vast opportunities for mass recreation which in time may be needed by our growing population. If the need for those resources becomes critical, there will be public demand to modify the wilderness so that these resources may be used. The time may come when there will be a showdown between fully appraised wilderness values versus other values.

The best way to avoid that pressure on wilderness is to provide an adequate supply of other resources by good multiple land use on nonwilderness areas. For example, the best way to reduce the demand for the timber in wilderness areas is to see to it that all commercial forest lands are managed so well that they can supply all the timber the Nation needs.

The same comment could be made for mass recreational use. For every person who has the strength, the time, and the money to enjoy national-forest wilderness areas, there are 100 who don't enjoy them because they can't get into them. I am not taking sides in what could someday develop into a real controversy among recreationists. I am simply pointing to a hard fact that can't be ignored: 99 percent of the people who hunt, fish, camp, picnic, or just ride around enjoying the scenery on the national forests don't use our wilderness areas. There is a steadily growing demand—unorganized as yet, although your proposed scenic-resources review may do so—to make more recreational areas accessible to motor transportation. Sportsmen know that some of the best hunting and fishing are in wilderness areas, but many of them don't have the time or money to get there. They may want better access to these areas. In 1955 recreation use of the national forests was 45½ million visits and probably will climb to 66 million in 1962 and 100 million by 1975. Space for forest recreation use is being narrowed down as the Nation's population grows.

Here again the best wilderness protection is going to be the best job of using, developing, and protecting all of the mass recreation opportunities that are available on all land ownerships. "Operation Outdoors" is a plan and a program to do just that on the national forests. But regardless of how well we develop the recreation resources of the national forests, there is still going to be increased demand for better access to certain special recreation resources in wilderness areas. You have been discussing the scenic resources of the United States at this meeting. Most of the best scenic resources of the national forests are in wilderness areas, but they are not available to the average tourist. How are we to come up with the right answer to that?

These are some of the problems of keeping and managing our wilderness areas. I am sure they are not new to many here today. The point I want to make is that these things need to be considered when we plan wilderness. In the final analysis, preservation of our wilderness heritage does not rest in my hands nor in yours. It rests with the American people as a whole. We can harm our cause if we oversimplify or ignore these practical problems as we reach for objectives that we feel strongly about.

Before I close, I want to make at least mention of the Three Sisters area and the wilderness bills now before Congress.

Some of you are unhappy with my recommendation on the Three Sisters area. I've been accused of ignoring advice, of yielding to political pressures, of domination by lumber interests, of making a recommendation while sitting in an ivory tower. Parenthetically, I might comment that much of this came from people who I doubt ever saw the area.

When I lived in Oregon the Three Sisters country was one of my favorite places. I thought I knew it pretty well, but I delayed making any recommendation even in my own mind until I could refresh my memory by again visiting the area. I spent hours and hours reading letters from completely sincere people. I read all of the Eugene hearing record. I think I saw everything that was written to any unit of the Forest Service or to the Secretary of Agriculture. I studied maps and aerial photographs. I asked my top staff people to study the situation and give me their independent comments. The task was not made easier by the obvious fact that the Three Sisters area cannot be considered by itself, in a vacuum. There were other areas in the central Oregon Cascades that many of us felt should be added to the wilderness system of that broad area. These were areas of far higher wilderness value than the 53,000 disputed acres west of Horse Creek. At the same time I did have to consider entirely separate and apart from all other areas the specific values of these 53,000 acres.

There have been claims that there was strong pressure from wood-using industries to eliminate the area west of Horse Creek. There was not. There was no pressure from the Secretary's office for me to recommend for or against anything. I had a free hand in coming to the conclusion that the 53,000 acres west of Horse Creek had much greater values for other purposes than for wilderness, and I made my recommendation accordingly. The Department did not make the final decision until after Assistant Secretary Peterson checked my recommendation on the ground.

When we had completed our study of wilderness in the Oregon Cascades, we wound up with a net increase of about 32,000 acres. This is more than 5 percent of the national-forest land in that area. The total size of established wilderness areas in Oregon national forests is approximately the same area as the State of Rhode Island.

Now about the many wilderness bills which have been introduced in Congress. I am in sympathy with the general objectives of these proposals and believe that it would be helpful if Congress were to enunciate a policy on wilderness so that administrators of public lands would have some direct guidance from Congress as to the protection and preservation of wilderness and the objectives of wilderness management. This statement should not be construed as specific approval by me or by the Forest Service of these specific legislative proposals. The Department has been asked for a report stating its position and recommendations on several of the wilderness bills, and we are studying them carefully. The Department has not yet made its report, and I am not at liberty to discuss the bills except in very general terms.

Essentially, the same comment applies to current legislative proposals to establish a National Outdoor Recreation Resources Review Commission. Many people believe that a survey of the Nation's recreation resources is desirable so that we will know what we have in the way of recreation resources and what will be needed to accommodate present and future needs. The Department has been asked for reports on these bills, but until these reports are released I cannot with propriety discuss their merits.

I want you to know that our interest in wilderness is strong and that it will stay that way. The Forest Service believes that wilderness is a valuable use of national-forest resources. We are going to do our best to manage the national forests so that they can supply the Nation with water, with timber, with opportunities for mass recreational use, with minerals, with forage, and with wilderness. We are going to try to protect these lands and manage them so that there will be a sustained yield of all services and all resources needed by this Nation's rapidly growing economy.

FAST TAX WRITEOFF FOR IDAHO POWER CO.

Mr. MORSE. Mr. President, I ask unanimous consent to have printed in the body of the RECORD, as a part of my remarks, an editorial from the Capital Times, of Madison, Wis., for May 24, 1957, supporting the position I have taken in opposition to the fast tax write-off for the benefit of the Idaho Power Co.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

WHAT'S THE DIFFERENCE?

Republican Members of the United States Senate apparently resent any outside in-

trusion on what they consider an exclusive right to criticize President Eisenhower—a right they have been exercising with increasing frequency lately.

They are in a high fury at Senator WAYNE MORSE, Democrat, of Oregon, for saying that he sees little difference from a moral standpoint between Dave Beck taking interest-free loans from the teamster funds and the Eisenhower administration using the people's money to give the Idaho Power Co. an interest-free loan.

There was a time when Republicans would not have minded a comparison of the President to Beck. That was when Beck, a Republican labor leader, was supporting the President for reelection and was paying visits to the White House where he and the President were snapped in friendly poses by photographers.

It was during this time that Philip Kuehn, head of the Wisconsin Republican Party, publicly cited Beck as his idea of a good labor leader.

Attacking Senator MORSE for his criticism of the President, Senator BRIDGES, of New Hampshire, said he was shocked at the comparison of the President "with a man who has taken the fifth amendment over 200 times."

It is strange that BRIDGES should mention this aspect of Beck's record, for it is here that the parallel is quite noteworthy.

In the Dixon-Yates scandal, for example, members of the executive agencies, on orders of the President, used the constitutional grounds of separation of powers to justify their refusal to testify before Congressional committees seeking the facts about Dixon-Yates. The Bureau of the Budget, the Securities and Exchange Commission, Presidential Assistant Sherman Adams, and other executive agencies refused to testify about facts in the Dixon-Yates case.

As a consequence, the public has still not learned the truth about Dixon-Yates.

What's the difference between pleading the constitutional separation of powers to avoid testifying and the constitutional privilege against self-incrimination?

Mr. MORSE. Mr. President, I also ask unanimous consent to have printed in the RECORD as a part of my remarks another editorial from the Coos Bay Times, of Coos Bay, Oreg., entitled "No Saints in White House," dealing also with the fast tax writeoff issue.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

NO SAINTS IN WHITE HOUSE

Senator WAYNE MORSE caused quite a flurry on the Republican side of the Senate aisle the other day when he was quoted as saying that President Eisenhower and Dave Beck were "the same kind of immoralists." He said he could see no difference in Beck's helping himself to union funds and the administration's action in giving Idaho Power Co. a big tax writeoff on its Hells Canyon pigmy dams, thus allowing Idaho Power Co. to take money from the taxpayer's pockets.

The explosion was not long in coming. Senators CAPEHART, of Indiana, and HICKENLOOPER, of Iowa—both strongly anti-Eisenhower within their own party—cried "Foul." They suggested that MORSE be censured by the Senate if he should utter those horrible words on the floor. MORSE promptly took the floor and reiterated his beliefs, and challenged the Senate to censure him. The gentlemen from Indiana and Iowa backed down.

They had made a mistake, it seems.

Not only had they threatened something they couldn't deliver—a vote of censure—but they had once more called attention to the odious action of the Eisenhower administration of robbing—yes, that's the word, "robbing"—the taxpayers to benefit the Maine-owned power company, which the GOP had already enriched at the taxpayers' expense with a gift of the people's dam site.

If memory serves, Senators CAPEHART and HICKENLOOPER were in the forefront of bitter, personal attacks on former occupants of the White House. But it seems that the President is sainted, above criticism of ordinary mortals. He's an institution, like the Lincoln Memorial—above reproach.

Apparently Senator MORSE does not think so. Neither do we. And history has never yet found a subject immune from critical review.

HELLS CANYON AND TAXES

Mr. MORSE. Mr. President, I also ask unanimous consent to have printed in the body of the RECORD, as a part of my remarks, an editorial entitled "Hells Canyon and Taxes," from the La Grande (Oreg.) Evening Observer.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

HELLS CANYON AND TAXES

An old controversy is going to get a new twist when a new Hells Canyon Dam authorization bill comes up for debate in the Senate. Senator WAYNE MORSE, Democrat, of Oregon, who introduced the measure—with 25 Democratic and 2 Republican cosponsors—served notice on May 6 that the issue was going to be carried directly to the President, and that one of the lines of approach will be an attack on tax concessions to private power companies.

The President ought to read the mail I am getting in regard to this unconscionable act of recent days for which he has to take the responsibility when his own ODM has granted to the Idaho Power Co. something which will cost the American taxpayers millions of dollars.

The Office of Defense Mobilization announced on April 29 that two certificates of necessity for rapid tax writeoffs had been issued to the Idaho Power Co. for its power developments on the Snake River. One project was certified for 65 percent of its $67,138,240 cost and the other for 60 percent of its $35,943,730 cost.

Sec. 216 of the Revenue Act of 1950 allows certain corporations to write off depreciation on new plants for tax purposes in 5 years rather than the customary 20 years. The ODM grants certificates of necessity to these corporations, vouching for the potential defense need for the new facilities. The Idaho Power Co. applied for necessity certificates for the Snake River projects in August 1953.

The Federal Power Commission in August 1955 granted Idaho Power licenses to construct the projects. The Department of the Interior 2 months later recommended the granting of necessity certificates.

Construction actually began in 1955, but issuance of the ODM certificates was held up pending settlement of litigation aimed at overthrowing the FPC approval of the Snake River projects. The Supreme Court on last April 1 let the FPC order stand, refusing to review the decision of a lower Federal court.

Senator HARRY F. BYRD, Democrat, of Virginia, chairman of the Senate Finance Committee, on April 4 introduced a bill which would amend the law to "restrict the issuance of certificates for rapid amortization." Actually, BYRD's measure would extend the concessions only to "certain carefully restricted military equipment."

BYRD termed the section a "tax loophole," and referred to a staff report of the Joint Committee on Internal Revenue Taxation. This study defines "rapid amortization" as: "a form of special Government assistance to private manufacturers, or, bluntly, a subsidy. As does any subsidy, it involves favoring one firm, that gets a subsidy, over another."

Industry leaders contend that the revenue loss to the Government through rapid amortization is only a temporary one. Secretary of the Treasury George M. Humphrey, in backing the Byrd bill for the Senate Finance Committee on May 7, admitted that the more than $5 billion lost to the Treasury in the early years of rapid amortization "will be recovered in the years after 1960."

But, said Humphrey, "The interest cost to the Government, over the entire period of lag in tax collections, will be roughly $3 billion." Senator PAUL H. DOUGLAS, Democrat, of Illinois, a member of the Congressional Joint Economic Committee, on March 4 had put the rapid tax writeoff "subsidy" to private utilities alone at $4.7 billion.

Mr. ALLOTT. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. MCNAMARA in the chair). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ALLOTT. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADJOURNMENT

Mr. MORSE. Mr. President, pursuant to the order previously entered, I move that the Senate stand adjourned until 12 o'clock noon tomorrow.

The motion was agreed to; and (at 4 o'clock and 22 minutes p. m.) the Senate adjourned, the adjournment being, under the order previously entered, until tomorrow, Thursday, June 6, 1957, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate June 5, 1957:

RAILROAD RETIREMENT BOARD

Howard William Habermeyer, of Illinois, to be a member of the Railroad Retirement Board for the term of 5 years from August 29, 1957 (reappointment).

UNITED STATES CIRCUIT JUDGE

Jean Sala Breitenstein, of Colorado, to be United States circuit judge, 10th circuit, vice Walter A. Huxman, retired.

UNITED STATES ATTORNEY

Leonard G. Hagner, of Delaware, to be United States attorney for the district of Delaware for a term of 4 years. He is now serving in this office under an appointment which expires June 9, 1957.

Charles P. Moriarty, of Washington, to be United States attorney for the western district of Washington for a term of 4 years. He is now serving in this office under an appointment which expires August 5, 1957.

UNITED STATES MARSHAL

Pervie Lee Dodd, of Alabama, to be United States marshal for the northern district of Alabama for a term of 4 years. He is now serving in this office under an appointment which expires August 5, 1957.

Howard Call, of Utah, to be United States marshal for the district of Utah for a term of 4 years. He is now serving in this office under an appointment which expired May 21, 1957.

HOUSE OF REPRESENTATIVES

WEDNESDAY, JUNE 5, 1957

The House met at 12 o'clock noon.

Rev. John D. Davey, St. Mark's Methodist Church, Houston, Tex., offered the following prayer:

Our Father, we bow in Thy holy presence on this day. We thank Thee for moments of high service. We ask this day, O God, for Thy guidance, Thy wisdom in place of our folly, Thy light in place of our darkness, Thyself in place of ourselves.

O Father, we would commit ourselves this day to Thee and to Thy care and to Thy keeping. By Thy hand of guidance, by Thy hand of mercy, by Thy hand of love, guide these who represent us each day. May Thy wisdom, O God, lead them. May Thy love replace our hate, Thy faith our distrust. And may we, O God, clasp hands with Thee and follow Thee and Thy guidance wherever Thou wouldst lead us.

We ask these things in Thy name and for Thy Son's sake. Amen.

The Journal of the proceedings of yesterday was read and approved.

DEFENSE CUTS MADE BY THE DEPARTMENT OF DEFENSE

Mr. SIKES. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. SIKES. Mr. Speaker, a week ago we were told that Congress would force reductions in military personnel, in planes, and in guided missiles by the cuts carried in the defense appropriations bill. Actually, these are the programs the committee had made it a point not to cut. The Congress knows they are the key parts of our defense.

Now we see a totally different story. The Secretary of Defense has ordered cuts in the Defense Establishment. These cuts can very well bring about reductions in the exact areas which a week ago were charged to the committee. Now the cat is out of the bag. Mr. Wilson's Department of Defense, not Congress, is responsible for what may be dangerous cuts in America's defense. Make no mistake about it, these cuts when made cannot be charged to the Congress.

DANGER OF FURTHER A-BOMB TESTS

Mr. VANIK. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. VANIK. Mr. Speaker, the testimony of leading scientists before the Joint Committee on Atomic Energy relating to the harmful and disastrous effects of fallout confirms the bold and forthright position against further A-bomb tests expressed last year by Democratic nominee Adlai Stevenson.

As a matter of fact, there are strong indications that there was a deliberate suppression of available scientific data on the subject during last year's presidential campaign. We cannot be proud of such suppression, either the persons who ordered it or the informed persons who lent themselves to it for the purposes of political expediency.

KEEPING THE DODGERS IN BROOKLYN

Mr. DORN of New York. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. DORN of New York. Mr. Speaker, there have been many statements made about the Brooklyn Dodgers leaving Brooklyn. The ones I have heard here in the House of Representatives do not entirely reflect the point of view of all the people in Brooklyn. Certainly they do not reflect my point of view.

We Brooklynites love the Dodgers. We do not want them to leave Brooklyn. They were born in Brooklyn. They became great in Brooklyn. All true Brooklynites have always rooted for and supported them.

The Dodgers are Brooklyn as much as the Brooklyn Bridge and Prospect Park. Everything must be done to keep them in Brooklyn. It is not a matter of business, though it might be to some people. It is sentiment, it is emotion, it is love. Brooklyn would not be Brooklyn without the Dodgers, and baseball would not be baseball without the Dodgers in Brooklyn. Walter O'Malley cannot permit the team to leave Brooklyn. He is a Brooklynite and as a Brooklynite has this same love, this same emotion, this same sentiment and it will prevent him from permitting this ill-conceived move.

I, for one, am doing everything possible to keep the Dodgers for Brooklyn and Brooklyn for the Dodgers. But it is not up to our businessmen, our legislators, or our public officials; it is up to the people themselves. I would like to know from the people of Brooklyn if this is how they feel.

CALL OF THE HOUSE

Mr. GROSS. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Mr. McCORMACK. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 95]

Bailey	Curtis, Mass.	Holland
Beamer	Dawson, Ill.	Holtzman
Blitch	Diggs	James
Bolton	Engle	Kearney
Bowler	Feighan	McGovern
Broyhill	Gubser	Machrowicz
Christopher	Harrison, Nebr.	Miller, Md.
O'Konski	Sieminski	Utt
Powell	Siler	Withrow
Scherer	Steed	Wolverton

The SPEAKER. On this rollcall 401 Members answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

CIVIL RIGHTS ACT OF 1957

Mr. COLMER. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 259 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 6127) to provide means of further securing and protecting the civil rights of persons within the jurisdiction of the United States. After general debate, which shall be confined to the bill and continue not to exceed 4 days to be equally divided and controlled by the chairman and ranking minority member of the Committee on the Judiciary, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. COLMER. Mr. Speaker, I yield the usual 30 minutes to the gentleman from Pennsylvania [Mr. SCOTT] on the minority side, and pending the use of that, Mr. Speaker, I yield 5 minutes to the gentleman from Indiana [Mr. MADDEN], who favors this legislation.

Mr. MADDEN. Mr. Speaker, the chairman and members of the Judiciary Committee are to be commended for reporting favorably on H. R. 6127, a bill for the further securing and protecting the civil rights of persons within the jurisdiction of the United States.

The Rules Committee has provided 4 days for general debate on the floor in the Committee of the Whole after which, under an open rule, amendments can be offered under the 5-minute rule of the House. This bill is divided in four main parts; the first of which establishes a six-member bipartisan Commission on Civil Rights to be appointed by the President with the consent of the Senate. This Commission would be authorized to subpena witnesses, documents, and hold hearings under similar rules governing House committees. It would be empowered to investigate allegations and affidavits in writing under oath that certain citizens are being deprived of their right to vote by reason of their color, race, religion, or national origin. The members of this Commission would receive the sum of $50 per day for each day actually spent in the work of the Commission, besides being reimbursed for actual and necessary travel expenses. The Commission is authorized to appoint a full-time staff director and other personnel which it deems advisable in conformity with the civil-service and classification laws. The limitation of 15 per-

sons is placed upon this authorization of a competent staff selected by the Commission. This Commission may confer with governors, attorneys general, and other representatives of State and local governments and private organizations if it deems so advisable. Under this bill, subpenas for attendance and testimony of witnesses and the production of documents and other matters may be demanded according to the rules of the Commission.

Under part 2 of the bill there shall be established in the Department of Justice, one additional Assistant Attorney General who shall be appointed by the President with the advice and consent of the Senate. This Department will be given complete control and jurisdiction over all complaints and problems involving the violation of the civil rights of any citizens of the United States.

Part 3 of the bill provides that whenever any persons have engaged, or there are any reasonable grounds to believe that any persons are about to engage, in any acts or practices that would jeopardize or violate the civil rights of American citizens, the Attorney General may institute for the United States, or in the name of the United States, a civil action or other proper proceedings for preventative relief, including an application for a permanent or temporary injunction for a restraining order or other order. The United States, under actions of this kind, shall be liable for all court and other costs, the same as a private person. The district courts of the United States shall have jurisdiction of proceedings instituted pursuant to this section.

Part 4 of the bill provides for measures to protect voting rights of persons eligible to cast ballots for candidates for Federal office, which includes President, Vice President, presidential electors, Members of the United States Senate or Members of the House of Representatives, Delegates or Commissioners from the Territories or possessions at any general, special, or primary election held solely or in part for the purpose of selecting or electing such candidates. This section gives the Federal courts jurisdiction, regardless as to whether a complainant has exhausted all other remedies in other courts. Provisions are also made to recover damages or to secure equitable or other relief under any act of Congress providing for the protection of civil rights, including the right to vote. The Attorney General would be empowered to institute in the name of the United States a civil action or other proper proceedings for preventative relief, including an application for a permanent or temporary injunction in case of sufficient evidence that a citizen's constitutional civil rights are being jeopardized.

No doubt, during the debate and consideration of this bill on the floor of the House, opponents of this legislation will exert every effort to amend and attach provisions which would nullify and render ineffective the purposes for which this legislation is so much needed. No doubt, considerable effort will be made to amend this bill on the theory that it denies citizens the constitutional right to trial by jury.

The proposal to broaden jury-trial guaranties under this legislation would not promote, but would defeat, the true intent and purposes of this bill. The constitutional right to equal protection of the laws and the protection of the right to vote are fundamental. The proper use of injunctions in contempt proceedings to protect these rights is in accordance with due process of the Constitution. The aim of this bill is to prevent violations or deprivations of constitutional rights, not punishment. These are not criminal proceedings in any sense, but precautionary measures to protect rights of citizens; therefore, the proper use of injunctions and contempt proceedings to protect these rights is in accord with due process of law under the Constitution. There is no constitutional guaranty of jury trial in contempt proceedings. Prevention of wrongdoing, not punishment, is the object of the injunction authorized in the pending civil-rights legislation. Injunctions and restraining orders merely preserve the status quo until a full hearing can be had on the issuance of a permanent injunction. In each of these temporary remedies, Federal law carefully safeguards the rights of the litigants.

Both national political parties, Democratic and Republican, enacted planks in their platforms endorsing effective civil-rights legislation. This bill reflects in the main the general intent of both political parties.

I do hope this long-delayed legislation to protect the civil rights of all American citizens under the jurisdiction of the United States will be enacted into law this session.

Mr. SCOTT of Pennsylvania. Mr. Speaker, I yield myself 10 minutes.

Mr. Speaker, the Committee on the Judiciary, in reporting this bill, states:

> The need for legislation such as proposed by the bill H. R. 6127 has, in the opinion of the majority of the members of the committee, been clearly established. In support of such a contention are the report of the President's Committee on Civil Rights in 1947, the message of President Truman in 1948, and the messages of President Eisenhower in 1956 and on January 19, 1957, and corroborating those recommendations is that of the Attorney General of the United States as contained in an executive communication of April 9, 1956, which was repeated again during the course of his testimony before the committee in 1957. The provisions of the bill H. R. 6127 are designed to achieve a more effective enforcement of the rights already guaranteed by the Constitution and laws of the United States. This is particularly true with regard to the right of franchise in Federal matters. Moreover, the bill reflects what the committee believes to be the desire of the American people to continue to expand our American concept of freedom. That is done by the creation of a Commission on Civil Rights for the purpose of investigation and study of a denial of a right to vote because of race, creed, color, or racial origin, and to analyze the legal developments in Federal policies and laws involving the constitutional right of equal protection under the laws.

Mr. Speaker, as I am sure everyone here recognizes, the main issue arising from this bill and exciting the greatest amount of interest has been the controversy over the so-called right of trial by jury. I think that requires some elucidation here because it is a fact that with a single exception trial by jury has never been required in contempt cases to which the United States Government was a party. The exception was the Norris-La Guardia Act of 1932, which required jury trials in criminal contempt proceedings arising from labor disputes. The provision was in effect repealed, and repealed with the enthusiastic support of many of those who now assert that such a right should exist, by the Labor-Management Relations Act of 1947.

I call your attention to the fact that the only exception where trial by jury was permitted by act of Congress at all was in a criminal contempt proceeding. The right of trial by jury arising in the Federal Government in these instances has never in any instance been conferred in instances of civil contempt, which is what we are dealing with in this bill, and there is in fact very grave doubt, raised by the Supreme Court in the Michaelson case, as to the constitutionality of any attempt to limit the jurisdiction and the right effectively to enforce the decrees of the Federal Government in a civil contempt proceeding. Therefore, the so-called trial by jury amendment under Supreme Court decisions is itself in all probability unconstitutional.

Mr. Speaker, the opponents of civil rights, in my judgment, are not fighting for jury trial but for the right to violate the law. Their entire argument is based on the expectation that civil-rights decrees of the Federal courts will be violated and disregarded. They are fighting for the right of defiance to the law of the land without fear of punishment or restraint. There can be no warrant whatever for accepting the easy arguments of the opposition because never in its history, as I have said, has Congress accorded jury trials as of right in civil contempt proceedings.

What the opponents of this measure propose here is an entirely new development. It is not an affirmation of the original Anglo-Saxon right of trial by jury at all. It is not an affirmation of our Constitution or Bill of Rights, because the only right to trial by jury guaranteed there is in criminal cases and in civil cases over $20. Trial in contempt cases was clearly not even contemplated. This proposed amendment is an attempt to change the entire concept of Federal judicial proceedings by bringing in a new feature which the whole tenor of our history has indicated is of doubtful constitutionality. The opposition to the pending civil-rights bill claim that it is an attempt to punish citizens without a jury trial. But, the pending civil-rights legislation is not a bill to punish for crime, but rather to prevent the commission of crime. Prevention and not punishment is the purpose of this bill. If prevention succeeds either by obedience to law without court order or by obedience to court order, no action arises for any contempt action and the fears of all those who express opposition to this bill are, therefore, groundless so long as the law and the decisions of the Federal court are obeyed. All that the pending legislation contemplates is judicial process to restrain violations of the civil rights of citizens.

Trials of violators of Federal decrees are not part of the process contemplated by the pending bill unless those who are enjoined defy judicial orders and thereby choose to subject themselves to civil or criminal contempt proceedings. Insofar as any penalties are imposed by the Federal courts, such disciplinary action would be for disobedience of a specific court order directed to a specified defendant and not for violation of the criminal law.

The pending bill accuses no one of crime. It does not seek to punish, but it seeks to make punishment unnecessary and the likelihood of trial and punishment arises only because opponents of civil rights by stripping the courts of power to make civil-rights injunctions effective would invite disobedience and defiance. The civil-rights bill is intended to secure compliance. It is the opponents of civil rights who anticipate and who would encourage defiance, which, in turn, would require the substitution of punishment for prevention. Assistant Attorney General Warren Olney, on the 5th of April, referring to the so-called trial by jury amendment describes it as "a clever device to nullify" the civil-rights proposals. He says if this amendment were enacted, the civil-rights program "would be no more effective than present laws in protecting the constitutional right to vote." He said there was no constitutional right to a jury trial in either civil or criminal contempt cases. He said he knew of no State law that provided jury trial in civil contempt cases and the Supreme Court has said the courts should have such power of vindicating their dignity without calling upon a jury to assist them. Civil contempt adjudications after disobedience of final orders and decrees are in any event fully reviewable in the appellate courts and there are many Supreme Court decisions to that effect. No jury is provided for as a matter of right to a defendent in civil contempt proceedings, where the United States is a party. Only Congress can confer such a right in the Federal courts. There is, of course, full judicial authority to employ an advisory jury, and this authority would exist in proceedings arising from the pending bill. A court of equity always has authority to submit questions of fact to an advisory jury. It was so held by the Supreme Court in Federal Reserve Bank against the Idaho Seed Growers Association. Rule 39 (c) of the Federal Rules of Civil Procedure specifically provides that—

> In all actions not triable of right by a jury, the court upon motion or of its own initiative may try any issue with an advisory jury.

Mr. Speaker, I am somewhat regretful of the fact that since we are most concerned here with a matter which is basically a legal matter, perhaps, some of the things I say may sound a little dull. But, there is nothing dull in the right to be free. There is nothing dull in the right to have the privileges guaranteed by our Constitution protected by our laws and there is nothing dull in the fight which lawyers have made before and since the John Peter Zenger case to secure those rights to all American citizens, without fear or favor. Therefore, if I bore you I apologize, but I assure you that all I seek to do is to bring one point of view before you, a point of view which I believe sustains the fact that there is no constitutional right to trial by jury. In fact, an attempt to invoke the right of trial by jury in a civil-contempt proceeding is probably unconstitutional.

The SPEAKER. The time of the gentleman from Pennsylvania [Mr. SCOTT] has expired.

Mr. SCOTT of Pennsylvania. Mr. Speaker, I yield myself 5 additional minutes.

Mr. CELLER. Mr. Speaker, will the gentleman yield?

Mr. SCOTT of Pennsylvania. I yield.

Mr. CELLER. Is it not true that in most of the States of the Union, with very, very few exceptions, I believe only 4 or 5 exceptions, in the case of contempt, the contemner is not entitled to a trial by jury?

Mr. SCOTT of Pennsylvania. The gentleman is right. I have quoted the statement of the Assistant Attorney General to the effect that he knows of no State where there is a constitutional right of jury trial in civil or criminal contempt proceedings.

Mr. ABERNETHY. Mr. Speaker, will the gentleman yield?

Mr. SCOTT of Pennsylvania. I yield.

Mr. ABERNETHY. I notice the Commission is authorized to investigate the violation of the civil rights being denied them because of religion. Would the gentleman tell us what religion they are talking about?

Mr. SCOTT of Pennsylvania. If I were in a position to indicate a religion, I would not be in a position to justify this bill, because the protection in the case of religion is obviously protection of all religions and all faiths and all creeds. Therefore I would reject any implication that any particular religion could be involved.

Mr. ABERNETHY. I assumed there was a complaint somewhere by someone because of their religious faith. I think the House wants to be advised of the faith that is complaining.

Mr. SCOTT of Pennsylvania. I know of no such motivation for this bill.

Mr. ABERNETHY. Then you would not be in favor of this remaining in the bill?

Mr. SCOTT of Pennsylvania. I am in favor of it remaining in the bill as a guaranty of a civil right, but I do not know of any motivation which occurs by reason of anyone's religious faith.

Mr. ABERNETHY. You do not have, then, any foundation for this particular inference in this bill?

Mr. SCOTT of Pennsylvania. I do not accept the gentleman's interpretation of it. I have asserted that the right is in the bill because there is reason for it. I have rejected the gentleman's inference that some person, by reason of his particular religion, is seeking to secure an advantage over any other person by reason of his particular religion. I want to be generous with the gentleman, but I have very limited time.

Mr. CELLER. Mr. Speaker, will the gentleman yield further?

Mr. SCOTT of Pennsylvania. I yield.

Mr. CELLER. Attorney General Brownell testified that he had received complaints of discrimination concerning voting, based upon religion. The Attorney General did so testify.

Mr. SCOTT of Pennsylvania. I thank the gentleman.

I now return to the fact that in other State courts, the States have uniformly held, so far as I am aware, that there is no right to trial by jury in civil contempt proceedings. Therefore, in all of the States from which we come, the right which some seek here is denied in the home States of the Members of Congress, and is obviously not regarded as essential in keeping clean the waters of justice. An interesting opinion is one from the State of Mississippi:

> The power to fine and imprison for contempt, from the earliest history of jurisprudence, has been regarded as a necessary incident and attribute of a court, without which it could no more exist than without a judge.
>
> It is a power inherent in all courts of record, and coexisting with them by the wise provisions of the common law. A court without the power effectively to protect itself against the assaults of the lawless, or to enforce its orders, judgments or decrees against the recusant parties before it, would be a disgrace to the legislation and a stigma upon the age which had invented it. (*Watson* v. *Williams* (36 Miss. 331, 341).)

Mr. HERLONG. Mr. Speaker, will the gentleman yield?

Mr. SCOTT of Pennsylvania. I yield.

Mr. HERLONG. May I say that the quotation the gentleman has cited, of course, is for contempt committed in the presence of the court, but what I was asking the gentleman about was the gentleman's statement that the State courts have no precedent for trial by jury in contempt proceedings. Why, then, does the gentleman object to bypassing the State courts and going straight to the Federal courts in these proceedings? Why does the gentleman advocate that method?

Mr. SCOTT of Pennsylvania. I simply advocate that the Federal courts and the Federal Government should have the right to enactment of those laws which are consistent with the Constitution and its amendments which protect the rights of American citizens, and that the Federal courts ought not to be hampered in the exercise of their jurisdiction by the entry of a new concept of law which does not now exist, an entry of a concept of law which is perhaps unconstitutional, an entry of a concept of law which has never before been adopted by our courts, because the United States Government by the actions of this Congress has never at any time conferred or attempted to confer the right of jury trial in civil contempt proceedings. I think it should not do so now. I, therefore, support the rule and hope it will be adopted.

Mr. HYDE. Mr. Speaker, will the gentleman yield further?

Mr. SCOTT of Pennsylvania. I yield.

Mr. HYDE. An amendment will be offered to preserve the right of jury trial

in cases of criminal contempt. How does the gentleman feel about that?

Mr. SCOTT of Pennsylvania. I would rather see the amendment when it is offered. But since there is no provision of which I am aware in this particular legislation which applies to criminal contempt proceedings I could not adequately answer the gentleman until I know what he had in mind.

Mr. HYDE. But the gentleman will admit that under this bill as it is now a man can be tried for criminal contempt.

Mr. SCOTT of Pennsylvania. That is under any Federal legislation which imposes an obligation upon an individual.

Mr. HYDE. And under this bill a man can be tried for criminal contempt.

Mr. SCOTT of Pennsylvania. Under that particular interpretation, yes. Of course a criminal contempt proceeding could arise for the violation of any Federal court order, where such order is based upon the commission of a crime.

Mr. HYDE. So the gentleman is not prepared to say how he would stand on an amendment which preserves the right of trial by jury in a case of criminal contempt.

Mr. SCOTT of Pennsylvania. I would be glad to tell the gentleman that I will retain an open mind on it until I see what the gentleman has in mind, when he presents his amendment.

The SPEAKER. The gentleman from Pennsylvania has consumed 17 minutes.

Mr. COLMER. Will the gentleman from Pennsylvania use some more of his time?

Mr. SCOTT of Pennsylvania. Not at this time; I have only one further speaker.

Mr. COLMER. That is my situation likewise.

Mr. SCOTT of Pennsylvania. Does the gentleman have only one speaker? I would prefer that he yielded to him.

Mr. COLMER. That is my temporary situation, Mr. Speaker.

Mr. SCOTT of Pennsylvania. I would prefer that the gentleman continue.

Mr. COLMER. So would I. Ordinarily I certainly would follow that procedure. Just to be perfectly frank with the gentleman so he will understand, it was my purpose to close the debate on this rule and at present I have no other applicants for time.

I was trying to be generous with my colleague that in the event one of them did want to speak I would not tie myself down to that. That is what I wanted to say.

Mr. SCOTT of Pennsylvania. I appreciate what the gentleman has to say. The gentleman has no requests for time?

The SPEAKER. The gentleman from Mississippi is entitled to close the debate.

Mr. COLMER. Mr. Speaker, I do have a request for time. It was just made to me during the progress of this colloquy.

Mr. Speaker, I yield 5 minutes to the gentleman from Texas [Mr. DIES].

Mr. DIES. Mr. Speaker, no committee should propose legislation, and especially far-reaching legislation such as this, unless there is a necessity for it, unless there is a need. The apparent purpose of this bill is to protect the right of people to vote. There are 435 Members of this House and each Member knows and understands his district better any anyone else.

I ask you, frankly, from every section of the country, do you know of anyone who is being deprived of the right to vote? Let us be perfectly frank. In the State of Texas there is not a citizen who is deprived of the right of vote. As a matter of fact, we have campaigns every year urging all of our people to pay their poll tax so that they can vote. It only costs $1.75 to pay their poll tax and anyone who does not have enough appreciation of the privilege of citizenship to pay $1.75 should not complain about it. They all vote. All those who want to vote do vote. As a matter of fact, on election day there is a stream of Negroes who vote in every election box. Of course, this bill is designed primarily to appeal to the Negro vote.

Mr. Speaker, this bill is built upon distrust. The gentleman from Pennsylvania expressed that distrust. It is a shocking thing that anyone would stand in the well of this House and say that there is a section of the United States whose people you cannot trust to enforce the law. That is what he said, you cannot trust the southern people to enforce the law through the jury system and, therefore, you must give that right to a Federal judge. It is that distrust which causes so much of the resentment in certain sections of our country. As a matter of fact, our juries are selected in the Federal court from responsible, qualified citizens. They are perfectly capable of discharging their responsibilities to this Nation and since there is no violation of the right of people to vote, why the legislation?

I pause to afford any Member of this House the opportunity to stand up here on the floor and say that he personally has either seen or that he has been informed reliably of, one instance of anyone in his district who has been deprived of the right to vote. Is there ayone here who will stand up and say that is true, in any section of the country, or have you ever visited any section of the country where there is a violation of that right? Do you know of any Baptist, Catholic, Methodist, or anyone else who cannot vote in any section of the United States because of his religion?

Mr. Speaker, what is back of this? You have the Negro vote and unfortunately, like certain other votes, it has become a bloc vote in many sections of our country.

Mr. Speaker, there is something that is just as dangerous as religious bigotry and, certainly, there is not anything worse in a free country than anyone who preaches hatred against his fellow man because of race or creed. There is something else equally dangerous and that is the promotion of race consciousness. Promoting race consciousness, appealing constantly to people because of their race, in order to benefit economically or politically is extremely dangerous. This bill is designed for political purposes so that those who want to run for office can go back to the Negro and say, "Look what I did." This is not going to protect any rights that are not protected now. You have ample statutes to safeguard the rights of every citizen. The Constitution does that. You must depend on the patriotism of the people of every State. When the time comes that you cannot depend upon the people of Texas or South Carolina or Virginia to promote the best interests of our country and to defend it, then your Republic is in grave jeopardy.

Mr. ABERNETHY. Mr. Speaker, will the gentleman yield?

Mr. DIES. I yield to the gentleman from Mississippi.

Mr. ABERNETHY. I concur in what the gentleman says. There is another thing. It seems to me that the bill is designed also to curry favor with those of some religious faith, and I think that is one of the most dangerous things to be brought before this House.

Mr. DIES. Let me tell the gentleman the answer. No one believes in this legislation at all. The plain truth is that political expediency is back of it, and that is the reason it has never passed. There is one great virtue in this Congress. We often face a situation where political necessity requires us to vote, but underneath, there is sound judgment and patriotism in the Congress, and that patriotism has, through the years, kept this sort of legislation from going on the statute books.

Now, I realize that many of you feel that you have to vote for this bill. But, let us do something to show some confidence in our Southern States. Let us give them the right of trial by jury. If you fail to do it and bypass all their State courts you simply say to a great section of the United States, "We have no faith in you as our fellow Americans; though you fought side by side with us, belong to the same political party, and work with us, yet we cannot trust you, and, therefore, we will deny you the right to have a trial by jury." It seems to me that the least you can do is to adopt an amendment to guarantee the right of trial by jury.

Mr. SCOTT of Pennsylvania. Mr. Speaker, I yield 5 minutes to the gentleman from New York [Mr. KEATING].

Mr. KEATING. Mr. Speaker, I shall be very brief, because it appears to me that a discussion of the details of this legislation might better wait until we get into the Committee.

We are facing today and in the next few days, in a rather unprecedented length of debate, an issue that is charged, we all admit, with great emotionalism on both sides. I hope during the debate to keep my own emotions completely under control and to accord to the opponents of the measure every consideration. I know that there are sincere Members of this body who feel that this is unwise legislation. I hope that they will attribute to those of us who favor the legislation the same depth of sincerity which we accord to them.

The bill before us is a very moderate proposal. It imposes no harsh penalties whatever. There were proposals before our committee which went very much farther than this bill. They were rejected. This bill creates no new rights. It simply affords new remedies designed

to strengthen and protect existing rights.

As a matter of fact, this bill is in essence, you might say, a watered-down version of the civil rights bill which this House passed in the last Congress. The only respects in which it is changed from that are that additional protective provisions have been written into it, such as, for instance, the provision that the same rules will apply to the hearings of the Commission on Civil Rights as apply to our own congressional committees; the fact that the subpena power to bring people before this Commission to testify is limited to the judicial circuit in which the witness is found; and that the complaints filed with the Commission must be sworn complaints in order to set in motion the procedure for hearing by the Commission.

In other words, in all respects, after lengthy hearings held by our committee, and with an ample opportunity to all sides to be heard, there have been some additional provisions written into the bill which were the subject of objection the last time we discussed it.

Mr. Speaker, I want to talk a minute about this issue of a jury trial because that is probably the principal issue which we will face in this discussion. There are 28 Federal statutes where similar rights are given to enforce the laws and in no one of those is there any right to a trial by jury. Let me enumerate some of these. The Department of Labor uses a similar injunctive process to enforce the Fair Labor Standards Act. The Atomic Energy Commission, the Interstate Commerce Commission, the Civil Aeronautics Board, the Securities and Exchange Commission, the National Labor Relations Board, and other Government agencies employ precisely the same procedure. All of these bodies and others have the right to bring an action to enjoin certain actions and if the resulting order of the court is flouted there is no right to a jury trial. It would be injecting something entirely new and foreign into our jurisprudence to put into this bill a provision for a jury trial.

Why pick out this particular bill to make an exception in our law? We have heard talk about a jury trial being taken away by this bill. This bill does not remove in any respect any existing right to a jury trial. The effort of those who seek to tack on this amendment is an attempt to put something new into this law which will make it more difficult of enforcement, entirely contrary to all of the precedents in all of our Federal statutes today.

So that I hope when the Members come to that point they will not feel that in this particular legislation we should reach out and inject into this statute something entirely novel and foreign to all of our other jurisprudence, both Federal and State.

Just one more word. This bill is not in any way any revolutionary proposal. Not only, as the gentleman from Indiana [Mr. MADDEN] said, was civil rights legislation specifically written into the platform planks of both of the great political parties, but I call the attention of my Republican colleagues to the fact that this specific bill was mentioned and written into the Republican platform as one which should be supported. It has the wholehearted and enthusiastic support of the President of the United States who just today dealt with this jury trial issue in as emphatic a way as he possibly could by referring to the words of President Taft, later Chief Justice Taft, when he was faced with a similar situation to this jury trial amendment, when he said:

> The administration of justice lies at the foundation of government. The maintenance of authority of the courts is essential unless we are prepared to embrace anarchy. Never in the history of the country has there been such an insidious attack upon the judicial system as the proposal to interject a jury trial between all orders of the court made after full hearing and the enforcement of such orders.

I am confident that the Members of this body do not want to make an attack upon our entire judicial system; that when they understand the full ramifications of this effort to write into this bill a jury trial amendment they will reject that proposal.

Mr. SCOTT of Pennsylvania. Mr. Speaker, will the gentleman yield?

Mr. KEATING. I yield.

Mr. SCOTT of Pennsylvania. The gentleman has referred to the proceedings in the adoption of the platform at the Republican National Convention in San Francisco. I was there during those lengthy proceedings into the night that were presided over by Messrs. BUSH, of Connecticut, and DIRKSEN, of Illinois. That platform, which puts the party formally on record in support of this bill, was arrived at after the most careful consideration and after hearing the views of representatives of the Republican Party from every State and geographical section of the Union. I am glad the gentleman brought that out.

Mr. KEATING. There are places in this country in both the North and the South, and this is not a sectional bill, where some of our citizens have not been accorded the equal treatment of the laws and where attempts have been made by one means or another to deprive them of the right to vote. This is to correct that situation. It is simply fundamental Americanism backed by the platforms of both political parties and endorsed and urged upon us by the Chief Executive of our Nation today.

Mr. FULTON. Mr. Speaker, will the gentleman yield?

Mr. KEATING. I yield to the gentleman from Pennsylvania.

Mr. FULTON. I am glad the gentleman has pointed out that the situation is not just a sectional one. It exists both North and South. There are many reasons why people are denied the right to vote when they want to.

One problem we have here, of course, is: How do we provide that the citizens of the United States of America, who bear the burden of taxes and military service, when they want to vote shall be able to vote, because so many now are denied that right. I believe the burden is on the opponents to come up with some method to show us they can vote. I am simply one of those who want the citizens to vote.

Mr. SCOTT of Pennsylvania. Mr. Speaker, I have no further requests for time. I therefore yield back the balance of my time.

Mr. COLMER. Mr. Speaker, I yield such time as he may desire to the gentleman from Massachusetts [Mr. LANE].

Mr. LANE. Mr. Speaker—

> We hold these truths to be self-evident, that all men are created equal, that they are endowed, by their Creator, with certain unalienable rights, that among these are life, liberty, and the pursuit of happiness.

Certain unalienable rights, including civil rights. Of these, none is more important than the right to vote—in principle and in fact.

From time to time in this country, and not necessarily limited to any one section of this country, citizens have been denied the exercise of this right under one pretext or another.

Those who oppose the Civil Rights Act of 1957 will deny this—and vehemently. They will advance all kinds of technical obstructions to divert our attention away from the incontrovertible fact that those rights have been denied. As long as any American citizens, no matter how small in number, are walled off from the exercise of that right, and thereby reduced to second-class status, we are not living up to the Declaration of Independence, or the Constitution of the United States which, in amendment 15, clearly states that—

> SECTION 1. The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of race, color, or previous condition of servitude.
>
> SEC. 2. The Congress shall have power to enforce this article by appropriate legislation.

The language is plain and specific. But we have failed in the 87 years since that mandate was written to apply it in all cases.

Schoolchildren, reading this amendment and then comparing it with certain contradictory facts that cannot be hidden, are puzzled.

"Does the Constitution mean what it says?"

How can we answer them as long as this contradiction persists?

Grownups experience a similar frustration.

When a visitor from another country points out the discrepancy between preachment and practice, how can we possibly defend it?

For 87 years we have waited for the several States to honor this obligation.

With increasing education and understanding, we had hoped for more progress. But abuses continue.

As the majority report of the House Committee on the Judiciary emphasized:

> In the field of civil rights, the Federal Government must assume the ultimate responsibility for the protection of individuals when State and local enforcement and protection of such rights fail.
>
> The need for legislation such as proposed by the bill H. R. 6127 has, in the opinion of the majority of the members of the committee, been clearly established. In support of such a contention are the report of the President's Committee on Civil Rights in 1947, the message of President Truman in 1948, and the messages of President Eisen-

hower in 1956, and on January 19, 1957, and corroborating those recommendations is that of the Attorney General of the United States as contained in an executive communication of April 9, 1956, which was repeated again during the course of his testimony before the committee in 1957.

It is obvious, therefore, that support for such legislation is nonpartisan and is broad in scope.

The majority report continues:

The provisions of the bill H. R. 6217 are designed to achieve a more effective enforcement of the rights already guaranteed by the Constitution and laws of the United States. This is particularly true with regard to the right of franchise in Federal matters. Moreover, the bill reflects what the committee believes to be the desire of the American people to continue to expand our American concept of freedom. * * * The hearings before the committee indicated the need for what has been termed a necessary minimum. Moreover, it has been demonstrated to the committee that the problem is not a provincial one but a national problem. * * * While there may or may not be a need for additional legislation, there can be no denial of the fact that there is an existing need for an immediate strengthening of the enforcement of existing rights. * * * The proposal does not extend nor increase the area of civil rights jurisdiction in which the Federal Government is entitled to act. Those rights are presently protected by constitutional amendment and when violations occur they are subject to Federal prosecution. The provisions of the legislation, in fact, merely substitute civil proceedings for criminal proceedings in the already established field.

The right to vote is basic to our form of government. It is a right that must be exercised on a given day. Harsh criminal action to punish those who deprive others of that right, or recoveries for deprivation of the right to vote, are not enough. The harm should be prevented before it occurs. That is why this bill provides that State administrative remedies do not have to be exhausted in civil-rights cases before Federal injunctive relief is sought. So that action may be taken to prevent deprivation of rights, rather than wait until an injury has occurred. To bypass the artificial roadblock of contrived delays that have been employed to deny a person's right to vote.

The four major proposals of this bill are:

First. The creation of a Commission on Civil Rights that shall have a life of 2 years, unless extended at a later date. This Commission shall be authorized to investigate allegations in writing under oath of affirmation that certain citizens of the United States are being deprived of their right to vote by reason of color, race, religion, or national origin. It shall study and collect information concerning legal developments constituting a denial of equal protection of the laws under the Constitution. It shall appraise the laws and policies of the Federal Government with respect to equal protection of the laws under the Constitution.

Second. The establishment of a Civil Rights Division in the Department of Justice.

Third. Provide civil remedies against conspiracies depriving a person of civil rights.

Fourth. Provision for a civil remedy by the Attorney General to strengthen and protect the right to vote. Through injunctive relief.

In our day, the concept of civil rights covers a wide field.

The bill that we are debating is temperate in its approach, limiting itself to one fundamental right that is beyond question. Suppression of other rights, through social or economic force, is not an issue here. The burden is on those States where certain United States citizens are deprived of the right to vote, to honor the spirit and the intent of the Constitution. The present legislation is to provide a remedy in such cases where the State or the community fails in its sworn duty to uphold the Constitution of the United States.

The rights and privileges of all Americans are the responsibility of the Federal Government because those rights and privileges are anchored in the Constitution and laws of the United States; they are attributes of national citizenship which recognize the dignity of the human being as the true basic reason for the very existence of government itself. Under our American concept of government, the consent of the governed is the sole source of political authority.

In these words, the majority report brings out into the open, an issue that has been hidden for too long. We cannot sidestep it, or deliberately confuse it in a maze of irrelevant technicalities. Neither fear nor prejudice will serve as an excuse for further delaying actions.

The national conscience is deeply disturbed by the evasions and the subtleties that are continuously resorted to, in order to deprive some American citizens of their right to vote.

The conspirators, the victims, the vast number of Americans, as well as many people in foreign countries, know that intolerance and discrimination mock our pious assertions that all Americans enjoy equality under the law.

The spin-drift arguments advanced by opponents of this bill vanish before the fact that the States and the localities still retain the initiative, the sovereignty, and the responsibility, to make certain that no citizen is deprived of the right to vote by reason of color, race, religion, or national origin.

It is only when there are reasons to believe that the States and the localities are failing their sworn duty to uphold the Constitution of the United States in such instances, through complaints in writing and verified, that the Federal Government shall be empowered to initiate civil action for preventive relief.

We believe that this legislation will encourage those areas where abuses persist to clean up their own houses. It will stir them out of the apathy and prejudice that combine to deny a fundamental right of their fellow citizens.

"As human beings subject to the frailties of our nature," we do not thereby condone the continuation of conditions that are, in effect, a defiance and a repudiation of the Constitution.

As President Eisenhower observed in his state of the Union message of last year:

We must strive to have every person judged and measured by what he is, rather than by his color, race, or religion. There will soon be recommended to the Congress a program further to advance the efforts of Government, within the area of Federal responsibility, to accomplish these objectives.

Can anyone deny that some Americans are unjustly deprived of their right to vote?

Or can anyone maintain that these conditions should not be remedied?

No. For both positions would be untenable, on facts germane to the issue.

When any State or community fails to secure and protect the citizen's right to vote, there is but one recourse: civil action by the Federal Government to prevent deprivation of that right.

This Congress has an outstanding opportunity to strengthen our democratic processes by enacting the Civil Rights Act of 1957.

Mr. COLMER. Mr. Speaker, I yield such time as he may desire to the gentleman from Pennsylvania [Mr. BARRETT].

Mr. BARRETT. Mr. Speaker, today the House of Representatives begins 4 days of general debate on H. R. 6172, the Civil Rights Act of 1957. Because of the importance of this bill to all Negro Americans throughout the United States, I rise to announce to this body that I intend to fight for its speedy enactment into law because our civil rights are the distinguishing characteristic of our American society. They are the fruit of the sacrifices of all Americans, and they are the heritage of all Americans.

It is, however, regrettable that not all Americans are permitted the full exercise of these rights.

The Negro people, who, in the face of overwhelming odds, have made tremendous progress, are deprived of the full enjoyment of these rights in many parts of the United States. American Negroes have made substantial contributions to their country. Their love of America, their patriotism, and their devotion to American principles have been demonstrated over and over again.

But the stubborn fact remains that all the blessings of American freedom, which the Negroes understand so well, are not as yet theirs to enjoy.

Civil rights in America are expressed in the basic law of the land—in the Bill of Rights of our Constitution. But all of our laws, including our Constitution, are only a reflection of even more fundamental values which we cherish.

One of the most profound of these values, one upon which our conception of civil rights is based, is the importance of the individual. If history teaches us only one great lesson, it is this: free government simply cannot exist unless the freedom of every individual citizen is guaranteed and protected.

To the extent that each citizen is free, the government is one of freedom. To the extent that the rights of the citizens are curtailed, the government itself suffers from the evils which most of us in the United States find so distasteful.

It is, therefore, true that when the Negroes or any other group of Americans find their rights limited, it is not that group alone which loses. All of America loses. Every American citizen is made poorer when any American citizen is not

granted the full benefits of his civil rights.

Our civil rights are not just a series of high-sounding theories. They are very real. They are indispensable to the full development of our separate personalities as well as to the health of our Government and to the shaping of the character of our Nation.

To me civil rights means a number of concrete things. It means the right to be treated equally before the law. It means the right to equal opportunity for education, employment and decent living conditions. It means that none of these rights shall be denied because of race, color or creed.

The Negro people have given the world much beauty and wisdom and have proved false the groundless myths that some races are inferior to others. All races produce great men and mediocre men. No race has a monopoly on brains or virtue or anything else. All people are pretty much the same and we should judge each man solely on the basis of what he himself is and what he himself does.

The Negro people have made great strides toward obtaining the full equality that they deserve. They have worked hard and struggled courageously in their efforts to get what is no more than justly theirs. Often in the face of severe provocation they have shown great restraint. In situations that would try the patience of Job, they have shown magnificent patience.

In their efforts to obtain the full realization of their civil rights, the Negro people have the full support of the law. I deeply regret that the Congress has not yet passed an adequate civil rights law, but I am proud of my own efforts and those of many of my colleagues to enact such legislation. We have, at least, dramatized this issue before the country and I feel certain we will now achieve our goal.

I believe that the conscience of America will demand in simple justice that all Americans receive the blessings that our country has to offer. America can afford to do no less. The civil rights of all citizens will never be any stronger than our determination to maintain and extend them.

The SPEAKER pro tempore. The gentleman from Mississippi [Mr. COLMER] is recognized for 18 minutes to close debate.

Mr. COLMER. Mr. Speaker, I would not be presumptuous enough to assume that on a measure with all of the political appeal, shall I say, that this has, that I could influence any votes, yet I feel it a solemn duty on my part to speak my little piece here as a representative of the people of a sovereign State in this aggregation of States comprising the United States in opposition to this iniquitous piece of legislation. For, it is contrary to the very foundation upon which this Government of freemen was founded.

Make no mistake about this to begin with. This is not the innocuous bill the gentleman from New York [Mr. KEATING] and others would have you believe it to be. This is a bill which would further extend the already extended arm of the powerful Federal Government and put it into your State as well as into my State and concentrate power here in the city of Washington at the expense of the sovereign States and at the expense of all the people. The thing that is the hardest for me to understand in all of this new philosophy, new deal, fair deal, new Republican philosophy is how can liberals, the true liberals, justify this type of legislation? I admit that my section of the country is the one that the gun is pointed at in this bill. I admit that my friends on the left—Republicans—who have not much to gain politically anyway because we do not give them any support down in my section can sponsor legislation objectionable to the entire South which has a problem peculiar to itself. It is a little difficult to understand however how my friends on the right —Democrats—who, when election times comes around and these political issues are involved, look to my section to get their vote—and that is where they get them. I ask the gentleman—well, I am not going to be personal—I ask any of you over here, you who call yourselves liberal Democrats, Where did you get your votes 5 years ago, and where did you get them last year? You got them down there in the section that you have pointed the gun at with this legislation. Frankly, I wish a different situation prevailed in my native Southland. In fact, the Democratic Party carried only one border State outside of the solid South in 1952 and again only one border State in 1956. I have said it at home and I say it here—I wish we had a two-party system in my section of the country. I am tired of my section just being taken for granted. But, I did not intend to go into that when I started. I said that this is not an innocuous piece of legislation.

You liberals on both sides of the aisle, you modern liberals, you who subscribe to the Jeffersonian theory of democracy, certainly, those of you on this side who are acting as you do, should go over to the Hamiltonian side as it was originally because you are following the Hamiltonian philosophy of concentrating all of the power in the hands of the Federal Government at the expense of the States, municipalities, the counties, and the individuals—and you know I am telling the truth. Because under this bill, a veritable Gestapo could be set up. Yes, it is an improvement over what the bill was last year. And the bill last year was an improvement over what the one was the year before. And the bill next year—the next Congress—will be an improvement over this one. For, I am convinced that the more study, thought, and consideration that is given this type of proposal, the more convinced fair-minded people are that it is inequitous, that it is contrary to the American concept of government as conceived by the Founding Fathers. Therefore, as the years go on and this rich political plum is offered the minority year after year, the more educated the public generally becomes and the more opposition will exhibit itself not only from the South, but from people all over the country opposed to centralization of government in Washington and the further whittling away of the rights of all of the people. But it still sets up a veritable Gestapo. And the powerful arm of the Federal Government—you liberal Democrats who give lip service at the Jackson-Jefferson Day dinners, listen to this—you would set up a Gestapo here that would permit the strong Hamiltonian theory of government to reach out and grab your people and take them across State lines under a veritable Spanish inquisition, under this so-called Commission.

Yes, I am a Democrat. I am a Jeffersonian Democrat, and I have no apologies for that either. I still subscribe to the Jeffersonian theory of government that that people is best governed who is least governed. That is good philosophy for my friends on the left as well.

Now you liberals, you people who pride yourselves on being great liberals, what are you doing? You are destroying the liberty of the man on the street. Talk about injunctions, talk about jury trials, fine arguments are made and will be made and have been made by my friends from New York, Mr. KEATING and Mr. CELLER, about jury trials; that you do not have to have them in this kind of cases; it will be a departure. I make the flat statement now, and I challenge them when they make their presentation on the floor to answer it, that this bill is designed purposely to avoid the right of trial by jury. The gimmick in this thing is that your attorney general—where? in Illinois? in New York? in California? Oh, no. The Attorney General of the great, powerful Federal Government is the man who is party complainant. Therefore you have no jury trial. That is the gimmick. The gentleman from Indiana [Mr. MADDEN] who opened this debate and the gentleman from New York [Mr. KEATING] say in the debate that you have these laws already. Of course you have them already. There is nothing new in this bill not already covered by existing law. All of the guaranties of civil rights in this bill are on the statute books today, but the gimmick is that the Government is made the party complainant, so that the right of trial by jury will be denied.

Now let me say to you people who are not lawyers, you will listen to a lot of fine oratory around here the next few days about the niceties and distinctions of the law—why this should apply here and not apply there. You go home, let me say to my liberal friends, and try to explain that to the man in overalls, who works on the job. I am not talking about the big, high-paid labor leader. But you try to talk about it to the man who earns his wages by the sweat of his brow. Try to explain to him why he is denied a right of trial by jury. See where you will get.

Now, while we are on that matter, an amendment is going to be offered to guarantee the right of trial by jury, a constitutional right of trial by jury, the same right that Congress gave to labor.

Prior to 1932 when we had strikes, yellow dog contracts, and all that kind of thing, you will recall that the right of

trial by jury was denied to those men in overalls who had violated an injunction. What happened? The great liberals of this country, the true liberals of that day, arose in this body and in the body at the other end of the Capitol, and pleaded to do away with that thing, to prevent these Federal judges from dragging these people up and sending them to jail without giving them a trial by a jury of their peers. The result was the Norris-LaGuardia Act.

That was in 1932. And may I say again to my friends on the right that when that bill was passed that gave to those labor people the right of trial by jury when they were charged with violating one of these broadcast injunctions, that the Members from the so-called South at which the cannon is pointed here, voted to give labor that right. You liberals go back and look at it. Every one of them with the exception of one man from the entire South voted for that bill.

Do you know who one of the chief proponents of that bill was? My good friend the gentleman from New York [Mr CELLER] whose name this bill bears. He was the gentleman who came down into the well of this House and argued oh, so eloquently, and how he pled and bled to give the right of trial by jury to these people charged with violating labor injunctions. I have the records here.

Mr. TELLER. Mr Speaker, will the gentleman yield?

Mr. COLMER. I am sorry, I just do not have the time. Of course I would have to yield to some people but I am sorry—nothing personal in that, excuse me; I am sorry, I just cannot yield.

Mr. FULTON. Will the gentleman yield for a correction?

The SPEAKER. The gentleman declines to yield.

Mr. COLMER. I am rather limited for time. I do not like to be discourteous.

As I say, the Norris-LaGuardia Act was passed.

Mr. CELLER. Mr. Speaker, will the gentleman yield to me? He mentioned my name.

Mr. COLMER. Of course I yield to the chairman. I invited the gentleman's request; but I hope he will be brief.

Mr. CELLER. I only want to say that I did not stop growing up in 1932.

Mr. COLMER. I do not know whether the gentleman stopped growing or what he did, but I know that liberty and the right of trial by jury, the inherent rights of free people, do not change from year to year; they do not change from youth to adulthood; they are as immutable as the stars; they are the same today as yesterday.

Mr. FULTON. Mr. Speaker, will the gentleman yield for a correction?

Mr. COLMER. I am sorry, please.

Mr. FULTON. Not for a correction of your record?

Mr. COLMER. I am sorry, please.

The SPEAKER. The gentleman declines to yield.

Mr. COLMER. I do not want to be discourteous. I hope the gentleman will not press me.

Since we have gone into that, let me read to you what the gentleman from New York said when that bill was up:

I have read injunctions so fantastic, so arbitrary, that they were practically but one step from a threat of jail to a striker if he coughed, spat, or chewed. Some injunctions read very much like orders of an army of occupation bent upon vicious revenge. Many injunctions are not used to protect property from irreparable loss, but issued to disorganize unions and to terrorize and intimidate those on strike.

Then the gentleman from New York [Mr. CELLER] plead most earnestly and eloquently for the right of trial by jury for those charged with violating the Federal court injunctions.

What assurance does the gentleman from New York or anybody else have that we will not have a recurrence of that?

Then, again, when the Taft-Hartley bill was up for consideration, the gentleman from New York [Mr. CELLER] said:

I am old enough to remember, and many of you here are old enough to remember the tragedy of the Danbury Hatters case, involving the so-called ex parte injunction. We would bring back the days of the Danbury Hatters. In those days the judges, without hearing, issued injunctions based upon affidavits of stooges and stool pigeons and agents provocateur.

The same type of provision for the issuance of injunctions based upon affidavits of stooges and stool pigeons and agents provocateur are all provided for in this bill and subject to the same abuse.

The abuses in the granting of these injunctions so aroused the Nation that we in 1932 passed the Norris-LaGuardia Act which outlawed the granting of ex parte injunctions against labor.

Provisions for ex parte injunctions are in this bill.

This bill would reinstate those ex parte injunctions against labor and would turn the clock back and return us to the robber baron days and the days of the industrial buccaneers.

That is not half of the case. Do you know that there is a bill reposing up there in the Rules Committee now—it does not have the political appeal that this one has because it was up there before this one got there, and from the same Committee on the Judiciary, and by the same author, although I am not sure about that—that would do what? That would streamline these fifth amendments boys who are in contempt of Congress and more speedily get them before the court for trial. When it was brought out in the Rules Committee that those fifth amendment boys, those boys who were in contempt of Congress, would be denied the right of trial by jury, the whole thing lost its interest and the bill has never been reported. It is still up there in the Rules Committee.

Mr. Speaker, what I am saying is simply this. That the proponents of this streamlining bill were most diligent in getting this miscalled civil rights bill out of the Rules Committee and to the floor of the House. But, when I brought out in the hearings before the Rules Committee on the bill which would change existing law with reference to the fifth amendment pleaders would be denying the right of trial by jury, they lost interest in the bill. The net result is that the proponents of this civil rights legislation apparently are perfectly willing that other privileged classes, including the Beck's and others in contempt of Congress, should have the right of trial by jury, denying to governors, members of the legislatures, registrars, election officials and the common citizens generally, who might be charged with the violation of this bill the inherent right of trial by jury.

Mr. Speaker, on July 16, last year, when this political appeal was before the Congress, I also handled that rule. On that occasion I addressed the House as follows:

Mr. Speaker, it is with the greatest reluctance that I have called up this rule making in order the consideration of H. R. 627, the erroneously labeled "civil rights bill." With complete frankness, I reported this rule to the House some weeks ago for the simple reason that I desired to control its consideration and delay the proposed legislation as long as possible.

While I realize that this proposal is aimed at my section of our common country for the purpose of incurring favoritism among certain minority groups in other sections, may I be permitted in the outset to state my own philosophy on the racial question, which philosophy, I believe, is shared by a great majority of all good citizens of my Southland?

First, I harbor no hatred for my colored brother. On the contrary, my desire is to see him improve his condition in life. There is no difference between good citizens of either the South or the so-called North in this. The trouble apparently lies in the manner of achieving that objective. The so-called race problem is relative. The problem exists in proportion to the relative degree of the residence of the two races. The trouble I find with the do-gooders and the political approach is that they overlook, on the one hand, or willfully ignore on the other, that the lot of this minority group cannot be improved by legislative statute or judicial decree. The desired goal cannot be accomplished through legislative or judicial action any more than temperance could be achieved by an act of national prohibition. No race of people has ever made greater progress in a similar period of time than has the Negro in the United States. This progress has been accomplished under the leadership of his white friends, chiefly his southern white brother. We in the South are proud of this progress and we hope for its orderly continuation. But it must be realized that it is impossible by legislative enactment or judicial decree to place overnight a race of people, who until a few generations ago were unenlightened human beings, running wild in the jungles of Africa, on an equal plane with another race of people who for thousands of years have enjoyed the benefits of civilization, education, culture, and Christianity. As much as this might be desired, if it can be done, we can only conclude that the white man back some thousands of years ago was done an injustice. There was no legislative statute or judicial decree hastening his advancement. His progress from the caveman period has been a hard and slow one. Possibly the greatest tragedy of this whole proposal is that continued progress of our Negro friend and the harmonious relations and good will existing between him and his white brother is not only being disturbed, but neighborly good will is being displaced by racial hatred. Therefore, the consideration of this legislation can only result in grievous harm and

injustice to the very people whom the proponents profess to assist.

Because of the attack it makes upon the sovereignty of all the States and the real civil rights of all the people of this Republic of all races, creeds, and points of origin including the people of the white race, I keenly deplore that it be considered at all.

In this connection, considering the fact that the Congress is scheduled to adjourn within the next few days, can it be considered improper to propound the very realistic question of why it is necessary to waste the time of the Congress and the taxpayers' money to spend the next several days debating a bill, which all Members are agreed has absolutely no chance of becoming a law at this session of the Congress? Does the answer to that question lie in the political implications of the bill? Is it true that the existing flames of discord, lighted by the Court's school decision, must be fanned to new heights for political purposes in this election year? Is it the purpose of the Democrats, on the one hand, to furnish campaign fodder for the reelection of a Democratic Congress by lip-service appeal to a minority group? Or, on the other hand, is it the aim of the Republican high command to drive a further wedge of discord between northern and southern Democrats?

If the answer to any of these proposals is in the affirmative, such action is unworthy of this great legislative body.

WOULD SET UP A GESTAPO

But, Mr. Speaker, I have an abiding faith and confidence in the Members of this body that once the rank and file of patriotic Americans, who make up this House, understand the far-reaching provisions and implications of this proposal, they will refute it by their vote. The trouble lies in the fact that in these closing weeks of the Congress, with the multitudinous duties of the Members incident to the hurried consideration of dozens of other bills, the Members simply have not had the opportunity to study and ascertain the far-reaching provisions of the proposed legislation.

As one who has had an opportunity to make such study, I say to you in all truth and without reservation that this bill would set up a veritable Gestapo to harass all of our citizens regardless of race or color.

While it is impossible in the limited time to blueprint and spell out the detailed assault contained in this iniquitous proposal on the liberties of the people of this Republic, I should like to point out some of the evils and the far-reaching powers to be concentrated under this legislation in an already powerful Federal Government, all at the expense of the sovereignty of the States and the liberties of the people of the Union.

POWERS OF THE COMMISSION

The bill proposes still another unnecessary Federal commission. This Commission would have powers far in excess of the numerous other commissions centered here in Washington. For instance, it would be given the unprecedented power of subpena, a power not heretofore granted to any other Federal bureau. Under this power the strong arm of the Federal Government could and would reach out and summons your constituents from New York and California, as well as mine from Mississippi, to the seat of the Central Government here at Washington. The Commission would have the power, and, of course, would utilize it, to not only hail the private citizens to Washington, but force them to bring and open their books for public inspection on a mere suspicion of discrimination against an employee or a neighbor. This Commission would not only further interfere with the liberties of all of the people, but its powers to regiment our people is almost unlimited.

Those of you who are concerned about the ever-increasing concentration of power in Federal bureaucracies had better stop, look, listen, as well as reason before authorizing this most far-reaching proposal.

THE NEW ASSISTANT ATTORNEY GENERAL

Moreover, the proposed legislation would provide for an Assistant Attorney General in the Department of Justice under the guise of protecting the rights of minorities. Again, the powers and implications, not to mention the cost to the taxpayers, of this proposal are unlimited. The testimony before the Judiciary Committee was to the effect that a minimum of 50 additional lawyers would be employed in this new Department. But even worse is a provision providing for the employment, without limits, of private citizens or informers. Then, of course, there is a provision for filing of private lawsuits with or without the consent of the plaintiff at the expense of the Federal Government by the Attorney General. And, this could be done on the simple charge that the defendant is about to engage in an attempt to do something which this division of the Attorney General's Office conceived to be objectionable. And, bear in mind, that the bill further provides for the trial of these cases in the Federal courts, without the benefit of trial by jury.

It does not require much imagination to see what would happen if an unscrupulous and politically minded person became head of this Department.

There is little that such an Attorney General, armed with 50 to 100 assistants, with thousands of snoopers, many of whom would be prejudiced, could do under this provision that is not today being done in Russia and other totalitarian countries.

Mr. Speaker, this is not only the old FEPC bill, it is an omnibus bill, which strikes at the very basic foundation of our Government. If enacted into law, it would destroy the liberties of the people guaranteed under the Bill of Rights. Regardless of whether it has a chance of passage in the other body is immaterial. As guardians of the liberties of all of the people, it is our solemn and sworn duty to prevent its passage here.

The SPEAKER. The time of the gentleman from Mississippi has expired.

Mr. COLMER. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

Mr. COLMER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 291, nays 117, not voting 25, as follows:

[Roll No. 96]

NOT VOTING—25

Bailey	Harrison, Nebr.	O'Konski
Beamer	Holtzman	Powell
Bowler	James	Scherer
Buckley	Kearney	Simpson, Pa.
Christopher	Kilday	Utt
Curtis, Mass.	McGovern	Withrow
Dawson, Ill.	Miller, Calif.	Wolverton
Engle	Miller, Md.	
Feighan	Montoya	

So the resolution was agreed to.

The Clerk announced the following pairs:

On this vote:

Mr. Dawson of Illinois for, with Mr. Utt against.

Mr. Wolverton for, with Mr. Kilday against.

Until further notice:

Mr. Buckley with Mr. Simpson of Pennsylvania.

Mr. Holtzman with Mr. Curtis of Massachusetts.

Mr. Miller of California with Mr. James.

Mr. Engel with Mr. Beamer.

Mr. Feighan with Mr. Withrow.

Mr. Christopher with Mr. Scherer.

Mr. Powell with Mr. O'Konski.

Mr. Bailey with Mr. Harrison of Nebraska.

Mr. McGovern with Mr. Miller of Maryland.

Mr. Bowler with Mr. Kearney.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

CIVIL RIGHTS

Mr. ROOSEVELT. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. ROOSEVELT. Mr. Speaker, in view of the fact that a letter which I addressed on May 20, 1957, to the Attorney General of the United States, the Honorable Herbert Brownell, Jr., received some discussion, it would seem fair and proper to acknowledge the receipt of the Attorney General's reply and enclosures.

The Attorney General's forthright opinion and his flat statement that the civil rights program should be passed in its present form without amendments should have determining weight with Republicans and Democrats alike, who are convinced that the Federal Government should not surrender its own democratic foundation by tolerating wholesale denial of the right to vote in any part of the land.

I regret that as this historic debate is about to begin in the House that the President of the United States has not seen fit to back up his Attorney General by a nationwide direct television and radio appeal to all the citizens of the country whom it is our privilege to represent.

I print below for the information of interested Members the reply of the Attorney General and his enclosed letter to the Honorable CLIFFORD P. CASE:

JUNE 1, 1957.

Hon. JAMES ROOSEVELT,
House of Representatives,
Washington, D. C.

DEAR MR. ROOSEVELT: Thank you very much for your letter of May 20. I will answer your questions in the order in which you asked them.

1. The position of the Department of Justice on this question is fully set forth in a letter addressed to Senators CASE of New Jersey and KUCHEL of California. I am enclosing a copy of that letter and call your attention particularly to the last two long paragraphs.

2. Federal jury panels are chosen in accordance with the provisions of title 28, United States Code, sections 1861 and 1871. These statutes apply equally to all sections of the country. They do, however, give relatively broad discretion to the district courts in selecting jury panels. As a result variations in local practices exist.

3. The Department of Justice has no authority with respect to the selection of jury panels. Under the statutes cited above control over the selection of jury panels is given to the Federal district courts.

4. The power of the Federal courts in selecting jury panels is set forth in the statutes cited above. I suggest that you examine these statutes directly.

5. The Department would not favor granting the courts of appeal the power to determine whether or not jury trials may be had in contempt cases. We urge instead that the administration civil-rights program be passed in its present form for the reasons set forth in detail in the letter referred to above.

Sincerely,

——— ———,
Attorney General.

MAY 31, 1957.

Hon. CLIFFORD P. CASE,
United States Senate,
Washington, D. C.

DEAR SENATOR CASE: Thank you for the letter of May 15 signed by you and Senator KUCHEL requesting the comments of the Department of Justice relative to the minority report filed by Senators ERVIN and JOHNSTON in opposition to S. 83 (the administration's civil-rights program) and particularly to their discussion of their jury trial amendment. In addition to the comments which follow may I particularly call to your attention the statement of the American Civil Liberties Union opposing an amendment to require jury trial in contempt proceedings arising under the proposed civil-rights legislation. This statement was reprinted in the CONGRESSIONAL RECORD for May 22, 1957, at pages 7369–7370.

The proposed legislation seeks merely to apply long-established civil procedures for enforcing Federal laws to civil-rights cases where experience has shown the need for civil remedies. In urging Congress to authorize the Government to institute civil suits for preventive relief in civil-rights cases we are requesting the right to use procedures long available to the Government as a means of enforcing other types of Federal laws. Ever since the adoption of the Sherman Act in 1890 the Department of Justice has been empowered to institute proceedings in equity to prevent and restrain civil violations of the antitrust laws as well as to bring criminal prosecutions. The Department of Labor uses the injunctive process as a means of enforcing the Fair Labor Standards Act. The Interstate Commerce Commission, the Civil Aeronautics Board, the Securities and Exchange Commission, the National Labor Relations Board, the Atomic Energy Commission, and other Government agencies have similar authority to use civil remedies in addition to criminal prosecutions. In none of these fields are jury trials required in contempt cases.

There are valid reasons for the ever-increasing use of civil suits for preventive relief as a means of enforcing Federal law. Judicial determination of the validity of a course of conduct in advance aids the Government in its primary purpose of preventing violation of law. It also aids the defendant since he can litigate the legality of his proposed conduct without the necessity of taking action at the risk of a criminal conviction if he guesses incorrectly.

All of these reasons exist in the civil-rights field, particularly in connection with the protection of the right to vote. The primary interest of the Government is in making it possible for all citizens to vote without discrimination based upon race, creed, or color, not in punishing local officials for denying such rights. Often it is not clear whether the particular conduct of a registrar of voters, for example, does constitute a violation of Federal law. Under present law the Government can only wait until the harm has been done—the rights to vote denied—and then proceed with a criminal prosecution as a means of testing the validity of the registrar's action. The registrar himself is often caught between community pressures to discriminate and the fear of Federal criminal prosecution with no way to resolve the issue in advance. With civil remedies authorized, the Government will often be able to obtain a judicial ruling in advance of the election which will determine the legality of the proposed conduct of the registrar, removing from him the necessity of risking criminal prosecution and effectively protecting the constitutionally guaranteed right of citizens to vote without discrimination based on race, creed, or color.

Suits for preventive relief under the proposed legislation will be governed by the traditional rules of procedure which have always applied to such suits. The Government seeks no new or radical procedures to govern injunction suits in civil-rights cases. Under the proposed legislation the rules of procedure which have traditionally governed equitable suits in the Federal courts would apply in the same manner and to the same extent that they now apply to other suits by the Government for preventive relief. The defendant in an injunction suit in a civil-rights case will have the same rights that the defendant now enjoys in a similar suit under the antitrust laws, the Fair Labor Standards Act, or any other one of the Federal laws mentioned above.

These procedural protections are ample to protect all legitimate rights of the defendant. He gets a full hearing before the court on the question of whether his conduct violates Federal law and hence should be enjoined. If he disagrees with the determination of the court, he may appeal the ruling for full consideration by the appellate courts. In most cases this is the end of the matter. The defendant obeys the court order and the public interest in the enforcement of the Federal law has been vindicated. But if the defendant chooses to ignore or defy the court order he may be subjected to punishment for contempt of court. Again he is entitled to a full hearing before the court. He is presumed to be innocent, his guilt must be established beyond a reasonable doubt, and he cannot be compelled to testify against himself. If he is found guilty, he again may appeal. And an examination of the cases in recent years demonstrates that the appellate courts are alert to protect defendants against any possible unfairness in contempt proceedings.

It is true that wherever the Government is authorized to sue for preventive relief the defendant is not entitled to a jury trial in contempt proceedings. The Constitution of the United States recognizes the traditional differences between the procedures of courts of law and courts of equity and does not require jury trial in equitable proceedings. As long ago as 1890 the Supreme Court of the United States said: "It has always been one of the attributes—one of the powers necessarily incident to a court of justice—that it should have this power [the contempt power] of vindicating its dignity, of enforcing its orders, of protecting itself from insult, without the necessity of calling upon a jury to assist it in the exercise of this power." In 1914 Congress passed a statute (now 18 U. S. C. 3691) extending the right to jury trial in criminal contempt cases where the acts constituting the contempt also constitute criminal offenses under Federal or local law. This statute expressly excepted contempts arising out of disobedience to court orders entered in suits brought in the name of the United States. Since criminal contempt proceedings are not often sought in private litigation (the Clinton, Tenn., case is one of the few instances of its use), this statute has had little impact upon the enforcement of Federal court orders. In 1932 in the Norris-La Guardia Act Congress, after removing almost all of the jurisdiction of the Federal courts to issue injunctions in labor dispute cases, provided for jury trial in contempt proceedings arising under the act. It was only with the enactment of the Taft-Hartley Act in 1947 that the Government was given jurisdiction to seek injunctions in any substantial number of labor dispute cases and that act expressly provided that the jury trial requirement of the Norris-La Guardia Act should not apply to it. Hence it is probable that the statute which appears to grant jury trial in contempt proceedings for violation of injunctions issued in labor dispute cases (18 U. S. C. 3692) has no application to injunction suits brought by the Government under Taft-Hartley, which are, for all practical purposes, the only type of injunction suits (private or governmental) in labor dispute cases over which the Federal courts have jurisdiction. (See *United States* v. *United Mine Workers of America* (330 U. S. 258).) For a detailed discussion of the history of jury trial in injunction suits, I refer you to the statement placed in the CONGRESSIONAL RECORD for April 18 of this year (pp. 5982–5988) by Senator DOUGLAS.

With reference to jury trial, then, the procedure under the proposed legislation would be the same as that which has always governed suits by the Government for preventive relief. This procedure appears at the present time to be effective and satisfactory. I am aware neither of abuse nor of serious complaint of abuse by the Federal courts in contempt proceeding instituted for the purpose of enforcing injunctions issued in governmental litigation. I foresee no reason why this procedure should not be equally satisfactory in civil-rights cases.

Enactment of legislation providing for jury trial in contempt cases arising out of governmental litigation would undermine the authority of the Federal courts by seriously weakening their power to enforce their lawful orders. The effect of adopting current proposals for jury trial would be to weaken and undermine the authority of the Federal courts by making their every order, even when issued after due hearing and affirmed on appeal, reviewable by a local jury. Referring to proposals similar to those now advanced President (and later Chief Justice) Taft said in 1908: "The administration of justice lies at the foundation of Government. The maintenance of the authority of the courts is essential unless we are prepared to embrace anarchy. Never in the history of the country has there been such an insidious attack upon the judicial system as the proposal to interject a jury trial between all orders of the court made after full hearing and the enforcement of such orders."

Furthermore the proposed amendment to existing procedures that is being advocated under the innocuous slogan of jury trial would permit practical nullification of the effectiveness of the proposed civil-rights legislation. The enforcement of any court order may require prompt and vigorous action if it is to be effective. Prompt action will often be vital in civil-rights cases, especially election cases where the registration period or the election may pass while enforcement is delayed. The injection of a jury trial between an order of a court determining, for example, that a registrar of voters is discriminating against Negroes in administering a literacy test and enjoining the continuance of the practice, and the enforcement of that order would provide numerous opportunities for delay beyond the time when the order could have practical effect.

I hope that the foregoing statement provides the information requested by you. If I can be of further assistance, do not hesitate to call upon me.

Sincerely,

———,
Attorney General.

THE KHRUSHCHEV INTERVIEW

Mr. ANFUSO. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. ANFUSO. Mr. Speaker, I take this time to touch on a very important subject upon the solution of which all questions, including that of civil rights, are dependent.

Last Sunday many of us watched the television debut of the Russian dictator Nikita Khrushchev, in which he told us that our grandchildren in America will live under socialism. To Khrushchev, of course, that means communism. The moderator of the program, which afforded to Khrushchev a wide forum to reach the American people, was the well-known American newspaperman Stuart Novins.

This coming Saturday, June 8, at 2:30 p. m., I am scheduled to appear on a television program in New York known as Congressional Closeup. Two other colleagues from this Chamber, the Honorable GORDON CANFIELD, of New Jersey, and the Honorable J. ERNEST WHARTON, of New York, and I will form the panel, and our moderator will be Stuart Novins—the same Mr. Novins who conducted the interview with Khrushchev. May I caution all my colleagues in the House not to draw any inferences or parallels from this coincidence, because I have the greatest admiration for Stuart Novins and a very high respect for the Columbia Broadcasting System.

My purpose in bringing this matter to your attention at this time is that I expect to turn the tables around. Instead of having the panel answer all the questions, I should like to ask a few questions of Mr. Novins, and I am giving him advance notice so that he will not be surprised about the questions I am going to ask him. I hope to proceed somewhat in this fashion:

Mr. Novins, let us turn the tables around a little bit. Let us put you on the witness chair for a while. You know, sometimes I have the feeling that you reporters overstep certain limits and you "get away with murder." Of course, it is all done under the license of freedom of the press. I am not criticizing you. I am merely pointing it out now, because what I have to say involves such important questions as foreign policy and national security. I would like to have you answer some questions. Are you willing to do that?

I am referring to the interview which you and several of your press colleagues had with Mr. Khrushchev. Here are my questions:

First. With whom did you clear the interview? Did you submit in advance to the State Department, the United States Information Agency or the Central Intelligence Agency the questions you were going to ask of Mr. Khrushchev? And did you have any idea, before the interview, as to what the answers to your questions would be?

Second. Did you prepare certain other questions for Mr. Khrushchev, but which he told you in advance of the interview that he would not answer? If so, I would be interested to know what these questions were.

Third. What did you expect to accomplish by this interview? Did you expect to get a confession from the leader of world communism that the Communist system is bad? Or that the American people, who are 99.9 percent opposed to communism, should obtain a better understanding of it in order to help bring the two peoples closer together?

Fourth. What Government officials, if any, assisted you in the preparation of your questions?

Fifth. What, if anything, do you think was accomplished by the interview?

Sixth. Why was there no answer by some responsible United States Government spokesman, immediately following the interview with Mr. Khrushchev, to point out certain flaws and inaccuracies in his remarks? Since the Russians thought so well of the program that they broadcast it to their own people, it seems to me that we would want to bring evidence to show that some day their grandchildren, or perhaps even their children, would be living under a free form of government.

Seventh. At the end of your interview, Mr. Novins, you thanked Mr. Khrushchev and his associates for their cooperation in granting you permission to have Mr. Khrushchev expound his Communist philosophy upon the American people. Do you believe that you could get Mr. Khrushchev to allow an American public official—and I, for one, would be willing to undertake such a task—to be interviewed by Russian newspapermen under similar conditions, and then have the interview broadcast over the air behind the Iron Curtain so that the people of Russia and the satellite countries could listen to it?

Eighth. Mr. Khrushchev said that the Russian Government had the right to

jam or interfere with our radio broadcasts beamed to Russia because of the great love for music which the Russian people are supposed to have. How could they tell in advance that what we had to say would not be music to their ears, unless they first heard it? In other words, why shouldn't they give us the same right we accord them of saying what we please even though they may or may not agree with us?

Ninth. Finally, Mr. Novins, what I have said here is not intended as criticism of you nor of the Columbia Broadcasting System. You have followed true and basic American principles that we are ready and willing at all times to listen to the opinions of others. Who was it that said: "I disapprove of what you say, but I will defend to the death your right to say it." The question I would like to have you answer is this: "Will the Soviet officials permit our citizens the same right to express their opinions to the Russian people?"

Mr. Speaker, these are the questions which I intend to ask Mr. Novins on our television program this coming Saturday at 2:30 p. m. I shall be very interested to know how Mr. Novins will answer these questions, and I am sure all of my colleagues here will be interested in the answers. At any rate, I invite all of you who will be in the New York metropolitan area on Saturday to listen in.

LIBERALIZING OUR SOCIAL SECURITY SYSTEM

Mr. FINO. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. FINO. Mr. Speaker, in this Congress, as on previous occasions, I have introduced and fought for a series of bills to humanize and liberalize our social security system. I have called attention to the hardship in millions of American homes caused by the arbitrary and unrealistic provisions in our law.

In the past 5 years, as a Member of Congress, I have risen on the floor of this House on numerous occasions to urge lowering the retirement age to 60 for men and 55 for women; eliminating the age limit for total and permanent disability benefits; striking out the work clause for persons over 65; increasing the minimum monthly benefits; providing a 10-percent increase in all monthly benefits and other corrective and necessary measures.

Mr. Speaker, today I want to talk about my bill H. R. 2865, which would lower the eligibility age to 60 for men and to 55 for women. Congress last year recognized that the retirement age of 65 is outmoded. In the social security amendments of 1956, we made benefits available to totally disabled persons at age 50, and we reduced the age for widows' eligibility for full benefits to 62 years. Also, we made benefits available at age 62 for working women who retire and for the wives of workingmen who retire, but in these instances the amendments exact a penalty in the form of reduced payments, from those working women and wives who begin drawing benefits before age 65. I am proposing in another bill to eliminate that penalty.

I supported the amendments of 1956, because, in spite of their inadequacies, they were a step in the right direction. Now we should take the next logical step. We should lower the retirement age for both men and women.

Simple as this change may appear, it represents in reality a broad-scale approach to a variety of problems which have arisen largely as a result of the magnificent expansion of our productive power. Americans today can produce goods and services far more abundantly than they could a few decades ago and with far fewer work hours.

We have recognized this change in productivity by reducing sharply the number of hours of work in each day and by shortening the workweek. But in our old-age, survivors, and disability insurance system we have thus far given only the scantiest token recognition that the principle which brings about the shorter workday and the shorter workweek applies also to reduce the length of the work life required of most of us.

Studies of average work life in this country have shown that in 1890 more than two-thirds of all men over 65 were still working. Sixty-five years later, in 1955, the proportion had dropped to 38 percent. There is every indication that this downward trend will continue. If it does continue, even without acceleration, a man who is 20 years old in 1975 can look forward, on the average, to at least 1 year of retirement for every 6 years of working life. Even today, the average is more than 1 year of retirement for about 7 years of work.

Mr. Speaker, my bill accepts the opportunity and the challenge presented by these developments. By an appropriate reduction in the work-life standard embodied in the social security law, this legislation would make it possible for millions of our older citizens to enjoy the earlier retirement which economic progress has made feasible.

Because it will permit people to leave the labor force earlier, this measure should help to create job openings for younger persons. At present, the low birth rates of the 1930's are reflected in the relatively limited number of young people who are entering the labor market to compete for jobs. But within a very few years the baby boom of World War II will be adding millions of new young workers to the labor force, and the number will increase sharply during the 1960's. By 1965 there will be nearly 9 million more people in the age group 15 to 24 than there are now. This is far in excess of the rate of increase of the total population. These young people will need employment—and the Nation should have the full benefit of their vigorous productivity. By permitting earlier retirement under social security, we shall open more opportunities for these young people.

This legislation would alleviate the hardships of unemployment which now plague many middle-aged older workers who are not yet 65. Men and women who lose their jobs after age 35 or 40 encounter almost insurmountable obstacles in finding new employment. Most employers are reluctant to hire older workers, particularly women, and the barriers rise higher with each additional year of the applicant's age. The suffering which unemployment causes these people is a tragic, cruel, and, in my opinion, an avoidable byproduct of our splendid economic system. All too few of these displaced people have any substantial savings to tide them over the interval until retirement benefits become available. Moreover, older workers generally have lagged behind the younger ones in sharing in the national prosperity, though their needs for income are often as pressing and the rise in the cost of living is greatest for goods and services for which they have proportionately greater needs—for example, medicines and medical care. By permitting earlier receipt of retirement income, we can make the transition a great deal easier.

Mr. Speaker, we need have no fear that earlier eligibility for benefits will of itself compel great numbers of workers to leave the labor force if they do not otherwise choose to stop working and if employers are willing to retain them. This is not a proposal for compulsory retirement. Even with the present higher age limit on eligibility for social security, millions of people continue working beyond the time when they have qualified for retirement income. Most people who are physically able to work prefer to carry on until they are forced out by employers' policies or by physical infirmity, and I am sure this will continue to be true for most people. Employment practices are influenced to some extent by the retirement age specified in the Social Security Act, but this is only one among many considerations. Technical developments, automation, and the need for new types of skills are far more influential. In fact, the availability of earlier individual retirement rights under old-age insurance should make it easier for employers to adopt more flexible hiring and retirement policies.

The change I am proposing would recognize these realities. It would reduce the obstacles to retirement which now confront those who have difficulty finding reemployment and those whose infirmities or family responsibilities are such that they should no longer be under economic compulsion to work. It would bring the Social Security System into line with the standards of progressive retirement plans in industry and Government. Civilian employees of the Federal Government may be retired involuntarily at any age after 25 years of service, and have the option of retiring, though with some reduction of annuity, at age 55 after 30 years of service. The Federal Reserve banks permit retirement at age 50. Employees of my own State of New York, as of several other States and large cities, are given retirement benefits at age 60. The American Telephone & Telegraph Co., General Electric, General Motors, DuPont, Eastman Kodak, and the United Mine Workers fund, and the Railroad Retirement System all

provide for retirement at age 60 and, in some instances, at earlier ages.

Mr. Speaker, the bill which I have offered sets the eligibility age for women at 55, 5 years lower than for men. I have always believed that women should be given the choice of retiring at 55 because we know that a woman who must seek employment at this age has an extremely slim chance of finding it, even in today's conditions of high employment. This heartbreaking experience is particularly typical for a widow who goes out to look for work at age 55 or over. Often she has never worked before or has been out of the labor market for many years. She finds all doors closed against her. If she does get a job, it is almost inevitably in retail trade or those personal-service occupations which are among the lowest paid. In the age group 55 to 64, women who have been employed go out of the labor force about 2½ times faster than men. They cannot be expected to be able to continue working as long as men—many of them have carried for years the dual responsibility of job and home. Several large companies have recognized this by providing in their pension systems a lower retirement age for women. These include the General Electric, Standard Oil of New Jersey, and American Telephone & Telegraph Companies.

The average age difference between husbands and wives around age 60 is about 2½ years. In making women eligible for benefits at age 55, therefore, the bill will give earlier protection to the widows of insured workers who have died—many of them before reaching the retirement age. It will enable these women to live out their lives with some measure of economic security and human dignity—a privilege now granted by the social security law only to those whose widowhood or retirement comes after the age of 62.

In urging your support for this legislation, I wish to emphasize my belief that such a reduction of the retirement age is a straightforward approach to many of the difficult social problems which have resulted from the wonderful growth of our industrial productivity. This is a method of assuring, within the framework of our free-enterprise system, that we do not create a forgotten group of older citizens, stranded on an island of insecurity where they are unable to get employment and are temporarily ineligible for retirement income under social security. This bill is concerned with preserving one of the most valuable assets of the Nation—the dignity, the self-respect, the integrity and happiness of millions of our people who in their later years may find themselves unable to get work or who are physically unable to stay at work. It will enable these Americans to have the benefits of retirement when they are most able to enjoy them.

Mr. Speaker, I believe that we must no longer delay in the matter of correcting this inequity in our social security system. In providing benefits at a lower age we will substantially improve the protection provided by social security, and we will help to meet a great need in millions of American homes.

THE LONG-RANGE MINERALS PROGRAM

Mr. DAWSON of Utah. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Utah?

There was no objection.

Mr. DAWSON of Utah. Mr. Speaker, in recent weeks we from the lead- and zinc-mining areas of our Nation have repeatedly brought to the attention of the House the desperate plight of our domestic lead-zinc industry owing to excessive, cheap-labor foreign imports.

Kept afloat on these troubled seas of international trade relations only by such makeshift rafts as bartering and stockpiling, this domestic industry has been leading a day-to-day existence for years, waiting for a rescue which is always on the way but never arrives.

Now the administration has lowered a seaworthy lifeboat called the long-range mineral program. Implementing legislation for this program will be introduced shortly, and, I hope and trust, will soon come before us for consideration.

Included in this program are features which are a wide departure from the sink-or-swim attitude of the last two decades or so. In the realization that American standards of wages and living can never permit the domestic lead-zinc mining industry to meet head on the competition of low-cost foreign producers, the administration proposes a sliding scale of import excise taxes. When lead and zinc prices are at a reasonable level these taxes will go off and those metals will be free-traded. When prices drop below the point of fair return imports will be inhibited by application of the excise taxes at a rate designed to restore the market prices at a level which will permit the American mines feasibly to continue production.

This is the lifeboat which the administration has offered to an industry which is in danger of going down for the last time. Yet before the boat reaches the water, partisan attempts have been made to stave in its sides. The program, it has been said, does nothing for the lead and zinc industry. Significantly, I have not heard that complaint from the lead and zinc industry itself.

Some who 2 weeks ago were ready to grasp at straws now are complaining because the rescue craft is not a luxury yacht.

At the other extreme is the temptation to overload the boat by adding oter minerals to the import excise tax scale. If the boat sinks, none will be saved. In the development of the long-range minerals program the situation of each of the other important minerals was explored and the conclusion was reached that for one reason or another direct Government assistance is not required or would not be beneficial at the present time. They would, however, be benefited by the general provisions for research, development, and exploration which also are included in the administration's program.

I would be the last to say that the long-range minerals policy must be held sacrosanct in its present form; indeed, it has been presented only as a recommendation for a national policy. The danger point in lead and zinc prices well may need some upward revision; changing conditions and fuller consideration may indicate more assistance is needed for some of the other metals; other features of the program may well be improved by amendment.

But we have here the brightest hope which has been held out to the mining industry in three administrations. I for one extend my heartiest gratitude for it to President Eisenhower; to the Secretary of the Interior, Fred A. Seaton, his now-retiring assistant, Felix E. Wormser, and all the others who worked so hard to bring forth this forward-looking program.

I hope the program will obtain the full support of this body for the well-being of our mining industry, our national security and economy, and, last but not least, the thousands of American miners and their families who are dependent upon the industry for their livelihood.

SPECIAL ORDER

The SPEAKER. Under the previous order of the House, the gentlewoman from Massachusetts [Mrs. ROGERS] is recognized for 5 minutes.

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent that the 5 minutes allotted to me today be transferred until tomorrow, because the Republicans are going to have a caucus and I do not want to interfere with it.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

LEAVE OF ABSENCE

By unanimous consent leave of absence was granted to:

Mr. MACHROWICZ, from June 6 to June 25, 1957, on account of official duties.

Mr. MCCONNELL (at the request of Mr. MARTIN), for an indefinite period, on account of official business.

Mr. MCGOVERN, for the balance of the week, on account of official business.

SPECIAL ORDER GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to Mrs. ROGERS of Massachusetts, for 5 minutes, on tomorrow.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL

RECORD, or to revise and extend remarks, was granted to:

Mr. THOMAS and to include extraneous matter.

Mr. SADLAK and to include an editorial.

Mr. HALE and to include extraneous matter.

Mr. THOMPSON of New Jersey.

Mr. MULTER and include extraneous matter.

Mr. PHILBIN and include extraneous matter.

Mr. VAN ZANDT and include related matter.

Mr. WESTLAND and to include related matter.

Mr. NIMTZ and to include related matter.

Mr. BOW.

ENROLLED BILL SIGNED

Mr. BURLESON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H. R. 53. An act to consolidate into one act, and to simplify and make more uniform, the laws administered by the Veterans' Administration relating to compensation, pension, hospitalization, and burial benefits, and to consolidate into one act the laws pertaining to the administration of the laws administered by the Veterans' Administration.

ADJOURNMENT

Mr. ALBERT. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 2 o'clock and 7 minutes p. m.) the House adjourned until tomorrow, Thursday, June 6, 1957, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

920. A letter from the Comptroller General of the United States, transmitting a report on the audit of the Navy industrial fund, United States naval shipyards, Bureau of Ships, Department of the Navy, December 31, 1955, pursuant to the Budget and Accounting Act, 1921 (31 U. S. C. 53), and the Accounting and Auditing Act of 1950 (31 U. S. C. 67); to the Committee on Government Operations.

921. A letter from the Director, Bureau of the Budget, Executive Office of the President, transmitting a draft of proposed legislation entitled "A bill to insure greater consistency among Federal loan programs, to avoid hidden subsidies, and to achieve more effective coordination between Federal loan programs and the fiscal and credit policies of the Federal Government"; to the Committee on Ways and Means.

922. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders suspending deportation as well as a list of the persons involved, pursuant to section 244 (a) (1) of the Immigration and Nationality Act of 1952; to the Committee on the Judiciary.

923. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders suspending deportation as well as a list of the persons involved, pursuant to Public Law 863, 80th Congress; to the Committee on the Judiciary.

924. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders suspending deportation as well as a list of the persons involved, pursuant to section 244 (a) (5) of the Immigration and Nationality Act of 1952; to the Committee on the Judiciary.

925. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of the orders granting the applications for permanent residence filed by the subject pursuant to section 6 of the Refugee Relief Act of 1953; to the Committee on the Judiciary.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. WILLIS: Committee on the Judiciary. H. R. 7261. A bill to amend the Federal Probation Act to make it applicable to the United States District Court for the District of Columbia; without amendment (Rept. No. 532). Referred to the Committee of the Whole House on the State of the Union.

Mr. WILLIS: Committee on the Judiciary. H. R. 6789. A bill to provide for reasonable notice of applications to the United States courts of appeals for interlocutory relief against the orders of certain administrative agencies; without amendment (Rept. No. 533). Referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. WALTER: Committee on the Judiciary. S. 1179. An act for the relief of Harold George Jackson; without amendment (Rept. No. 534). Referred to the Committee of the Whole House.

Mr. WALTER: Committee on the Judiciary. H. R. 1701. A bill for the relief of Abram van Heyningen Hartendorp; without amendment (Rept. No. 535). Referred to the Committee of the Whole House.

Mr. HILLINGS: Committee on the Judiciary. House Joint Resolution 338. Joint resolution for the relief of certain aliens; with amendment (Rept. No. 536). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BROOMFIELD:

H. R. 7928. A bill to authorize the Secretary of Defense to make a monetary allowance in lieu of headstones or markers for certain graves; to the Committee on Armed Services.

By Mr. FOGARTY:

H. R. 7929. A bill to amend the Federal Property and Administrative Services Act of 1949 to permit the donation of surplus property to volunteer fire-fighting organizations; to the Committee on Government Operations.

By Mr. GARY:

H. R. 7930. A bill to correct certain inequities resulting from the involuntary conversion of salaries of certain employees to the postal field service schedule under the Postal Field Service Compensation Act of 1955; to the Committee on Post Office and Civil Service.

By Mr. LANKFORD:

H. R. 7931. A bill to amend the Classification Act of 1949 to authorize the establishment of pay differentials for hazardous employment; to the Committee on Post Office and Civil Service.

By Mr. LESINSKI:

H. R. 7932. A bill to confer jurisdiction upon the United States Court of Claims to hear, determine, and render judgment upon claims of customs officers and employees to extra compensation for Sunday, holiday, and overtime services performed after August 31, 1931, and not heretofore paid in accordance with existing law; to the Committee on the Judiciary.

By Mr. McMILLAN (by request):

H. R. 7933. A bill to amend the act relating to the small claims and conciliation branch of the municipal court of the District of Columbia, and for other purposes; to the Committee on the District of Columbia.

By Mr. METCALF:

H. R. 7934. A bill to authorize Federal assistance to the States and local communities in financing a program of atomic and disaster shelters in the Nation's schools; to the Committee on Armed Services.

By Mr. O'BRIEN of New York:

H. R. 7935. A bill to amend title II of the Social Security Act to include New York among the States which may obtain social security coverage, under State agreement, for State and local policemen and firemen; to the Committee on Ways and Means.

By Mrs. ROGERS of Massachusetts (by request):

H. R. 7936. A bill to encourage employment of veterans with pensionable or compensable service-connected disabilities through Federal reimbursement to any employer, insurer, or fund, of amounts of workmen's compensation paid on account of disability or death arising out of such employment; to the Committee on Veterans' Affairs.

By Mr. SAUND:

H. R. 7937. A bill to amend section 8 (e) of the Agricultural Adjustment Act (of 1933), as amended, and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended, so as to provide for the extension of the restrictions on imported commodities imposed by such section to all imported citrus fruits, and to sliced figs, dried figs, fig paste, dates with pits, dates with pits removed, and date products; to the Committee on Agriculture.

By Mrs. SULLIVAN:

H. R. 7938. A bill to protect the public health by amending the Federal Food, Drug, and Cosmetic Act so as to provide for the safety of chemical additives in food; to the Committee on Interstate and Foreign Commerce.

By Mr. SMITH of Kansas:

H. R. 7939. A bill to provide an improved farm program; to the Committee on Agriculture.

By Mr. THOMSON of Wyoming:

H. R. 7940. A bill transferring the Heart Mountain division of the Shoshone Federal reclamation project to the Missouri River Basin project; to the Committee on Interior and Insular Affairs.

By Mr. BROOMFIELD:

H. J. Res. 348. Joint resolution proposing an amendment to the Constitution of the United States relative to disapproval of items in general appropriation bills; to the Committee on the Judiciary.

By Mr. TELLER:

H. Res. 273. Resolution that a select committee be appointed to conduct a full and complete investigation and study of the use of chemicals and other additives in food and medicine, and beverages with a view to ascertaining what deleterious effects such chemicals have on human life and health; to the Committee on Rules.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

By Mr. HALE: Memorial of the Senate and House of Representatives of the State of Maine in the 98th legislative session assembled, recommending to the Congress of the United States that Senate Resolution 64 before the Senate Committee on Interstate and Foreign Commerce be considered of utmost importance; to the Committee on Interstate and Foreign Commerce.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolution were introduced and severally referred as follows:

By Mr. BYRD:

H. R. 7941. A bill for the relief of Mrs. Harry B. Kesler; to the Committee on the Judiciary.

By Mr. FARBSTEIN:

H. R. 7942. A bill for the relief of Cesare Gugliemi; to the Committee on the Judiciary.

By Mr. GORDON:

H. R. 7943. A bill for the relief of Fong Bick Sem; to the Committee on the Judiciary.

By Mr. MUMMA:

H. R. 7944. A bill for the relief of the Spera Construction Co.; to the Committee on the Judiciary.

By Mr. PASSMAN:

H. R. 7945. A bill for the relief of McRay Vestal; to the Committee on the Judiciary.

By Mr. ROOSEVELT:

H. R. 7946. A bill for the relief of Allan Levy; to the Committee on the Judiciary.

By Mr. SAUND (by request):

H. R. 7947. A bill for the relief of Amarjit Singh Sekhon; to the Committee on the Judiciary.

By Mr. SMITH of California:

H. R. 7948. A bill for the relief of Mrs. Rita Maria Wilson; to the Committee on the Judiciary.

By Mr. WIGGLESWORTH:

H. R. 7949. A bill for the relief of Roy C. Kang; to the Committee on the Judiciary.

EXTENSIONS OF REMARKS

An Adequate Juvenile Court for the Nation's Capital

EXTENSION OF REMARKS

OF

HON. JACOB K. JAVITS

OF NEW YORK

IN THE SENATE OF THE UNITED STATES

Wednesday, June 5, 1957

Mr. JAVITS. Mr. President, when the Congress created the present juvenile court in the District of Columbia, its caseload was approximately 2,500 annually. By 1948 the court was hearing 3,000 cases a year, by 1953 the load had risen to 10,000, and presently this 1-judge court is handling more than 16,000 cases a year. Of these some 2,000 are felony type cases. The United States District Court for the District of Columbia uses a minimum of 3 justices to handle its annual felony caseload of 1,500; the District of Columbia juvenile court must rely on 1 judge.

The Bar Association of the District of Columbia, the Law Enforcement Council of the District of Columbia, the Washington Criminal Justice Association, the Metropolitan Washington Chapter of the National Association of Social Workers, and other civic groups, have joined the District of Columbia Commissioners in their recommendation for a second judge in this most important court. Legislation to this effect, S. 2154, is presently pending before the Senate Committee on the District of Columbia.

As attorney general of the State of New York, I was deeply concerned with crime by youths, and juvenile delinquency, and so my interest as a member of the Committee on the District of Columbia is attracted to that problem in the city of Washington. We find the juvenile court in the District of Columbia heavily overloaded, and a grave need for an additional judge in that court. It is for that reason that I call attention to this matter.

The District of Columbia Council on Law Enforcement asserts that a real emergency exists; and, as the Washington Post, in its editorial of May 25, 1957, emphasizes: "The emergency concerns essential human rights and the welfare of children. It should be met by Congress just as speedily as possible."

I ask unanimous consent that the full text of the editorial be printed in the Appendix of the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

OVERLOADED COURT

It would be hard to point to a community need more clearly demonstrated than the need for an additional judge for the District's juvenile court. The court has a load of more than 16,000 cases a year. No single judge, no matter how dedicated and industrious, could handle such a load with the attention to individual problems which is peculiarly requisite to juvenile court. Judge Orman W. Ketcham, who began service on the court only last week, managed to dispose of 192 cases during his first 3 days on the bench by sitting for a 9- or 10-hour day; even so, he acknowledged, he had a distinct feeling that many persons felt they had not had their proper day in court. In urging the creation of a second judgeship, the District's Council on Law Enforcement was amply justified in asserting that a real emergency exists. The emergency concerns essential human rights and the welfare of children. It should be met by Congress just as speedily as possible.

Going Against the Grange

EXTENSION OF REMARKS

OF

HON. JACK WESTLAND

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 5, 1957

Mr. WESTLAND. Mr. Speaker, under leave to extend my remarks I would like to protest what I belive to be unfair treatment of the National Grange regarding seizure by the Government of National Grange headquarters.

The Government has issued an order of taking on this property, an 8-story building located in the heart of downtown Washington. The property is to be used for landscaping and for a corner of the seventh in a series of Government office buildings.

As I have previously stated, I am opposed to the seizure of this property, which for more than a decade has been the headquarters of one of our outstanding farm organizations. The plans for the new building have been drawn with absolutely no consideration for the special site involved. I am particularly displeased with the fact that the major portion of this property is going to be used for a garden. This may be esthetic, but it is highly impractical for an area which has a limited amount of property that should be put to maximum use. Monumental structures with palatial gardents are not necessary for the efficient conduct of Government business, and their contemplation is testimony to the visionary type of castle building that will cost the American taxpayers millions of dollars to satisfy the whims of a few master planners.

There is no reason why a nice-looking, functional office building could not be erected on the remainder of the block harmonizing with the Grange building, which in itself is an attractive structure. However, since Congress already has alloted funds over which the General Services Administration has sole control, it is evident that seizure of the building is almost inevitable.

My objection to the method being used by the Government is that the Grange will be forced to pay rent on this property, yet the General Services Administration has not signified when it intends to use the site for the new building.

Franklin G. Floete, Administrator of the General Services Administration, in a recent release said that since building costs are at present so high, it would be advisable for the Government to postpone indefinitely its lease-purchase building program because the costs of new buildings would be out of line. Since the order of taking has already been issued, the law says the Grange must start to pay rent on its property until the Government gets ready to use it.

I do not believe that this is fair. This organization will be faced with the prob-

lem of seeking another site, a task that borders on the impossible as far as getting a convenient location similar to the present headquarters. The Grange is being offered about a third of the $1 million price of the property. Moving the headquarters will be expensive.

I believe that the proposal by National Grange Master Herschel Newsom that the title be restored to the Grange until the Government definitely gets ready to use the property has merit. If restoration of title is not possible, I believe it only fair that the General Services Administration should assist this organization in its process of being transplanted by canceling out the rent payments. Somehow it seems rather un-American to me to seize an organization's property today with no particular date in mind for use of this property, and then to force the organization to pay rent until the Government decides what it is going to do with the building and land.

Since the Government's lease-purchase program has wisely been postponed to save the taxpayer the burden of excessive building costs, it appears only logical to me that actions instituted under the old schedule should be subject to review and that amelioration of unjust and onerous burdens which the postponement would impose on groups such as the Grange would be in order.

Visitors From St. Mark's Methodist Church of Houston, Tex.

EXTENSION OF REMARKS
OF
HON. ALBERT THOMAS
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Wednesday, June 5, 1957

Mr. THOMAS. Mr. Speaker, this morning we were privileged to have present in the House gallery a fine representative group of young men and women of the St. Mark's Methodist Church, Houston, Tex., during the prayer given by one of their pastors and counselors, the Reverend John D. Davey. The prayer was a beautiful, inspirational one and well received by the Members. It is a good thing for the Nation for these young people to be brought to the Capitol under the tutelage of their patriotic church leaders. It is upon these young people and others like them that we must depend for the protection of our homes, our churches, and our country against the ever-present threat of communism.

I want to commend the Reverend C. T. Morris and Reverend Davey for their ingenuity and leadership. They are an inspiration to all. Their counselors, Mr. E. R. Beadle, Mrs. Ben E. Loeffler, Mrs. Joyce Thompson, and Mrs. Ruth Froehner also are deserving of much praise for their unselfish, important activities in behalf of this outstanding group, composed of Beverly Nixon, Anne Maresh, Karey Patterson, Marilyn Froehner, Arlie Moore, Bonnie Knepple, Bettye Marie Pfeffer, Verna Bertucci, Sylvia Hughes, Joan Castle, Carolyn Prince, Barbara Gail Kobs, Jeanne Broker, Carol Phillips, Virginia Massey, Jaunece Atteberry, Margaret Jane Nunez, Rhea Jean Brogdon, Thomas Morris, Jr., Johnny Klepper, Ritchie Atteberry, Ella Lee Campbell, Mary Pruett, Mary Standish, Carol Ann Keen, Allen Lee Norton, Richard Wagenhauser, Gary Lee Homburg, Jimmy Mooney, and Richard Gebhardt.

Let's Dedicate Ourselves to America

EXTENSION OF REMARKS
OF
HON. JAMES E. VAN ZANDT
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, June 5, 1957

Mr. VAN ZANDT. Mr. Speaker, in observance of Memorial Day, the editorial of the Family Weekly, a magazine supplement distributed by over 150 daily newspapers in the United States, featured in the May 26, 1957, issue a portion of my Memorial Day message under the title, "Let's Dedicate Ourselves to America."

The article follows:

Memorial Day is a day of memories and a day of rededication.

We Americans know that the man who dies in the service of our country makes this sacrifice in order that the hopes and ambitions of our Founding Fathers might be realized, and that our Constitution may continue to stand as the bulwark of our Nation.

Those whom we honor were adequate to the challenges before them. Now is the time for the living to resolve that we will be adequate to the challenges before us. This is the greatest honor we can give those who have gone before.

We Americans write and speak and think freely. We worship God as we please. We are protected from unlawful searches and seizures. We enjoy the freedom to elect those who administer and legislate for us, and we fix conditions and limitations on their authority. We are secure in our property rights and in living our lives as we wish.

These great privileges, far from being a matter of course, were never enjoyed by any nation until 170 years ago. Are the fortunate and happy conditions in which we live entirely of our own making? They are not. They are gifts from the dead, not conquests of the living.

Let us not only acknowledge our debt, but let us try to pay it. There is one way in which we can make some small payment. These men gave their lives for our Nation and the principles upon which it was founded. We can honor America's dead by understanding our heritage and, further, by preserving unity among the living.

If our honored dead could tell us what reward they would wish us, they would, I believe, say, "Continue the fight for the great cause for which we gave our lives."

These heroes know that our Nation may be destroyed as ruthlessly in times of peace as by ruthless enemies in time of war. In peace, it may be destroyed by subversive doctrine, by abandonment of fundamental principles, by surrender of the rights and privileges of the citizens, by an economy which denies to men their political freedom, or by a vicious and wasteful fiscal system which destroys individual initiative.

Against the armed enemy we rush forward to do our part in defense of our country. Often peacetime undermining of our civic structures comes in such pleasing disguise it leads many to welcome and encourage it.

We are apt to forget history's lesson that government by the people is not eternal and that such governments have fallen victim to internal decay. In paying our debt to the heroes to whom Memorial Day is dedicated, let us be as vigilant in guarding against our own apathy as again foreign foes.

The American form of government is only for those who appreciate it, who deserve it, and who are willing to defend it against all enemies at home or abroad. Let us resolve that, no matter what the cost, we will deserve our form of government, we will protect it, and we will pass it on unimpaired to those who follow.

Today, tomorrow, next week, next month, let us take time to recall in grateful appreciation the services and sacrifices of those who have made possible these blessings which we enjoy.

Let us make Memorial Day truly a day of renewed dedication to all the ideals for which America stands.

Cadet John H. Vickers

EXTENSION OF REMARKS
OF
HON. ANTONI N. SADLAK
OF CONNECTICUT
IN THE HOUSE OF REPRESENTATIVES
Wednesday, June 5, 1957

Mr. SADLAK. Mr. Speaker, yesterday's graduation at the United States Military Academy at West Point was a remarkable day for those who attained their commissions after their strenuous but wonderful 4-year course of scholastic and military training.

I am sure all my colleagues in the House of Representatives join me in rejoicing in the outstanding success of Cadet John H. Vickers, my appointee from Fairfield, Conn., son of Mr. and Mrs. Irving H. Vickers, who graduated as No. 1 in his class and who received 12 of the 29 military and academic awards presented to the members of the first class. The awards to Cadet Vickers were:

A life membership in the National Geographic Society given by the American Legion for the highest rating in chemistry; a wristwatch by the Military Order of Foreign Wars of the United States for the highest average in social sciences; the Francis Vinton Greene memorial pistol for standing first in general order of merit for 4 years; a camera by the Veterans of Foreign Wars for the highest average in physics; and a wristwatch by the Steuben Society of America for the highest rating in foreign languages.

Also, a set of books from the American Bar Association for the highest rating in law; a pair of binoculars by the Ladies Auxiliary of the Veterans of Foreign Wars for the highest rating in mechanics of solids; the Robert E. Lee saber by the United Daughters of the Confederacy for the highest rating in mathematics; a set of books as a memorial to the late Brig. Gen. William A. Mitchell for the highest rating in military engineering and military history; a portable radio by the Armed Forces Communications and Electronics Association for the highest rating in electrical engineering; a portable typewriter by the Daughters of the American

Revolution for the highest rating in mechanics of fluids; and a rifle by the American Ordnance Association for the highest rating in ordnance.

This is the largest number of prizes a cadet has won in recent years; in fact, it might be termed "quite a haul."

I am justly proud and pleased in the brilliant record achieved by this young man who should go far in his chosen career. Each of us entrusted with the privilege and responsibility in naming candidates to the Academies must rejoice with this outstanding example of an opportunity to attend one of those and the remarkable result attained through the application to his studies and using to the fullest his natural talents.

Opinion Poll Report

EXTENSION OF REMARKS
OF
HON. F. JAY NIMTZ
OF INDIANA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, June 5, 1957

Mr. NIMTZ. Mr. Speaker, for the past several weeks I have been conducting an opinion poll among my constituents in the Third Congressional District of Indiana on eight important issues currently confronting the Congress.

Starting late in April and continuing through most of May, questionnaires were mailed from my office in Washington to approximately 100,000 voters in the 4 northern Indiana counties I represent, St. Joseph, Elkhart, La Porte, and Marshall. Ballot forms also were printed as a public service by several daily and weekly newspapers in the district, and readers were invited to mail them directly to me.

Questionnaires were sent to practically every household in the district. Wherever possible, mailing lists of registered voters were used, particularly in the South Bend-Mishawaka area. In cities such as Elkhart, Goshen, La Porte, Michigan City, and Plymouth, telephone directories were employed. Ballots also were mailed to every rural and post-office boxholder in the four counties.

The response has been most gratifying. A total of 12,356 ballots have been received and tabulated to date, and they are still coming in.

A great many voters who took part in the poll added comments to their ballots or wrote separate letters explaining or qualifying their replies. Others expressed views on issues not covered in the poll.

These comments have been carefully studied by me and have been most helpful in determining the sentiment of my constituents on current problems.

Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following news release reporting the results of my 1957 opinion poll:

BUDGET AND TAX CUTS FAVORED IN NIMTZ POLL

Congressman F. JAY NIMTZ, South Bend Republican, today reported the results of an opinion poll among his northern Indiana constituents showing overwhelming support for a cut in Federal spending and a general reduction in taxes.

More than 12,000 voters in St. Joseph, Elkhart, La Porte, and Marshall Counties returned question forms in the poll, which has been underway for more than a month, Congressman NIMTZ reported.

The closest division of opinion was on the question of Federal aid for school construction, NIMTZ said. The vote in favor was 46 percent, with 45 percent opposing and 9 percent expressing no opinion.

A limited program of Federal grants for new school buildings has been proposed by President Eisenhower but is opposed by Indiana Gov. Harold W. Handley.

Eighty-nine percent of those questions favored legislation to regulate and safeguard labor union welfare funds, with only 6 percent opposed.

Greatest opposition in the poll was shown to proposals for a more liberal immigration policy, with 76 percent voting against a change in the law and only 14 percent in favor.

Two key programs of the Eisenhower administration were endorsed by votes of nearly 2 to 1 in the poll. They were the foreign-aid program and the Federal program of flexible farm price supports.

Voters also endorsed Postmaster General Summerfield's request for an increase in postal rates by a margin of 72 to 21 percent.

The vote in favor of a tax reduction was better than 10 to 1, while cuts in the Federal budget were advocated by 65 percent of the voters.

The Nimtz survey got replies from 12,356 voters who either returned question forms sent out by the Congressman or clipped out ballots from newspapers. Here is the final breakdown of the voting:

	Percent		
	Yes	No	No opinion
Do you favor—			
1. Reducing the budget even if it means cutting out programs of direct benefit to you?	65	25	10
2. Legislation to regulate and safeguard labor union welfare funds?	89	6	5
3. A general tax reduction if cuts can be made without leaving the budget out of balance?	89	8	3
4. Increasing postal rates on all classes of mail to help reduce the postal deficit?	72	21	7
5. Direct Federal grants to States to help build more schools?	46	45	9
6. Foreign military and economic aid as a means of resisting Communist expansion?	54	31	15
7. Changing our immigration laws to admit more people to this country?	14	76	10
8. A flexible program of Federal price supports for basic farm products?	52	28	20

Floods and Tornados in Texas

EXTENSION OF REMARKS
OF
HON. RALPH. W. YARBOROUGH
OF TEXAS
IN THE SENATE OF THE UNITED STATES
Wednesday, June 5, 1957

Mr. YARBOROUGH. Mr. President, I have been informed by the Corps of Engineers and the region 5 office of the Federal Civil Defense Administration that the cost of the physical damage caused by the floods which have ravaged my home State of Texas will exceed $100 million.

Existing flood-control projects in Texas, according to estimates of the Corps of Engineers and others, prevented damage in the amount exceeding $100 million. And at least another $50 million in damage could have been prevented, I am informed, if presently authorized but as yet unbuilt projects were in operation.

An untold amount of damage was prevented on the Colorado River watershed alone, to my home city of Austin, Tex., and to all the cities, towns, villages, and farms and ranches on the Colorado below Austin, by the dams of the Lower Colorado River Authority.

And so there is a lesson to be learned from this long-lasting and continuing state of disaster. The lesson is that flood control pays its way and is worth every cent it costs.

Additionally, for those of us whose home areas are subject to alternating periods of drought and flood, as is my home State, there is another lesson. About 80 percent of the floodwaters now roaring down the rivers of Texas are pouring into the Gulf of Mexico, wasted, when if multipurpose dams were in operation on these rivers, this water might be used to generate electric power and might be saved for use in time of drought.

I have no report yet as to the amount of precious topsoil scoured from the face of Texas by these devastating floodwaters, but it is certain to be tens of thousands of tons. This can never be replaced.

I have spoken only of physical damage. There has been another kind of damage—the impact of disaster on human beings. This, of course, cannot be determined in dollars. Some measure of what disaster means to people is contained in a new report just issued at Austin, Texas, by the American Red Cross.

This Red Cross report has been summarized in an article printed in the June 1 editions of the Austin American. I ask unanimous consent that the text of this article be printed in the RECORD at the conclusion of these remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Austin American of June 1, 1957]

FLOODS, TWISTERS LEAVE IMPACT ON 9,000 TEXANS

Floods and tornadoes the last 2 months in Texas left their impact on 9,000 families and damaged or destroyed thousands of homes and buildings, according to a new report issued in Austin Friday by the American Red Cross.

Summarizing its disaster operations during April and May, the Red Cross said more than 36,000 persons felt the force of the State's turbulent weather.

Of these, 8,080 received mass care from the Red Cross—food, clothing, and shelter in the emergency phases of disasters.

Tremendous property loss is revealed in the report's figures on destruction and damage to houses, farm buildings, and other structures.

Floods and tornadoes, according to the Red Cross, destroyed 745 homes, 284 farm buildings, and 197 other buildings. There has been major damage to 1,636 houses, 334 farm buildings, and 665 buildings of other types. Minor damage was found at 5,623 houses, 638 farm buildings, and 665 buildings other than homes or farm structures.

The report also says that 3,738 families have applied to the Red Cross for assistance during rehabilitation phases of the Texas disasters of April and May. This assistance has been for repair or rebuilding of homes, replacing of household furnishings, clothing, food and medical care for the injured, and occupational supplies.

In addition, the Red Cross says it has fed 5,894 rescue workers in disaster areas.

"The Red Cross rehabilitation program for disaster sufferers in Texas for the months of April and May will cost $1,250,000," the report adds.

"Red Cross policy is to assist people affected by disaster in reestablishing themselves in the community * * *. This assistance is given on the basis of the need of the individual and not on the basis of his loss.

"The money spent by Red Cross for families will also help to restore the economic welfare of the disaster-stricken community. The families take Red Cross disbursing orders to local merchants * * * to buy their building materials, household furnishings, etc. In this manner Red Cross dollars in the normal trade channels of the community help to rehabilitate the entire community."

"Americans Have Been Rediscovering That the Most Important Thing in the World Is Ideas With Ideals," Says Mrs. R. I. C. Prout, President of the General Federation of Women's Clubs, Which Heralds a Significant New Trend

EXTENSION OF REMARKS
OF
HON. FRANK THOMPSON, JR.
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Wednesday, June 5, 1957

Mr. THOMPSON of New Jersey. Mr. Speaker, a very important meeting is being held at this time in Asheville, N. C., by the General Federation of Women's Clubs which is holding its 66th annual convention there.

I was very interested to find the first vice president of this fine organization, Chloe Gifford, of Lexington, Ky., saying in her annual report:

> Let us, I beg of you, no longer eye the educated with suspicion or refer to the intelligent individual as an egghead or a highbrow.

She keyed her remarks to this year's convention theme, "Knowledge Is Power," and warned the delegates that one of America's paramount dangers is "the growing loss of individualism." She declared "Let us outgrow our lust for the mediocre."

Mrs. R. I. C. Prout, president of the General Federation of Women's Clubs, told the representatives of the Nation's clubwomen:

> Americans have been rediscovering that the most important thing in the world is ideas with ideals.

It will be recalled that the terms "egghead" and "highbrow" became terms of derision and ridicule only in recent years, mainly in the 1952 political campaign when the Republicans made this the major point of their attack upon the Democrats and Democratic standard-bearer Gov. Adlai E. Stevenson.

At a breakfast in Los Angeles, on September 24, 1954, President Eisenhower said:

> We had so many wisecracking so-called intellectuals going around and showing how wrong everybody is who doesn't happen to agree with them. By the way, I heard a definition of an intellectual that I thought was very interesting: A man who takes more words than are necessary to tell more than he knows. I hope that no one is going to get up and wisecrack to me and say, "You've already done it."

If you were to seek the deep psychological reason for the low estate of the schoolteacher, the college professor, the learned in the society of our time I think you will find it not only in their scandalously low salaries, but in this contempt that seems to have seeped from the top into our thinking about the people among us who can state a cause, a principle, a position without doing violence to vocabulary and to syntax.

I hope I am sorely mistaken if I hold the conviction that one of the reasons for at least the extent of the defeat of Governor Stevenson for the Presidency of the United States in the elections of 1952 and 1956 was the fact that he spoke good English.

It must, I think, go down in the history of elections that at least one quite important segment of the voting public did not understand the Democratic candidate. Yet, if we read his speeches in those campaigns, we would be hard put to it to find anything in them that was either esoteric or highfalutin, or too polysyllabic. His sentences were most simple and declarative, with flashes of wit, and while thoughtful and even profound, they were hardly a tax on the intellect.

Yet they were complained of—of all things—for reasons of style and for the respect which the candidate manifestly had for the intelligence of the American people. The complaint was that the speeches were over the heads of the voters. This complaint when summed up seems to mean that Adlai Stevenson's speeches failed to hit a sufficiently low level of maudlin simplicity.

I believed then, and I believe now, that these criticisms were as false and as distorted as that leveled in editorial and cartoon against Woodrow Wilson because of his professorial past.

Now that the captains and the kings of the era that was Wilson's have departed, who will deny him his place as one of the most brilliantly articulate Americans of our history? And one of the most wisely intellectual and learned? Should that be regarded a shortcoming?

In fact, in our time, what seems to commend a candidate for political office, to some portions of his audience at least, is precisely his inability to complete a sentence.

This is presumed to convey the relaxed attitude and the air of casualness that grafts onto politics and debate the television techniques of presentation.

It is as if a philosophy had been sedulously cultivated that the wrong way of doing things brings us closer to being our free and uninhibited selves.

In fact, I take it there is presumed to be some special sales advantage in being offhandishly ungrammatical. Thus there is this new advertising syntax which tells us that a certain cigarette tastes good like a cigarette should.

I include here as a part of my remarks a report in the Washington Post and Times Herald regarding the 66th annual convention of the General Federation of Women's Clubs.

GENERAL FEDERATION OF WOMEN'S CLUB DELEGATES TOLD: "DON'T CRACK AT EGGHEADS"

(By Eileen Summers)

ASHEVILLE, N. C., June 4.—The much abused "egghead" found a public defender here today at the opening session of the 66th annual convention of the General Federation of Women's Clubs, where some 3,000 delegates met amid the blue banners of their clubs. Chloe Gifford of Lexington, Ky., first vice president of the General Federation of Women's Club, in her annual report said:

"Let us, I beg of you, no longer eye the educated with suspicion or refer to the intelligent individual as an egghead or a highbrow."

She keyed her remarks to this year's convention theme, "Knowledge Is Power" and warned the delegates that one of America's paramount dangers is "the growing loss of individualism." She urged them:

"Let us outgrow our lust for the mediocre."

The Federation's national president, Mrs. R. I. C. Prout, told the representatives of the Nation's clubwomen:

"Americans have been rediscovering that the most important thing in the world is ideas with ideals."

To aid the Nation's clubwomen to reach a clearer understanding of current political and economic events, Mrs. Prout announced that a 2-day world affairs conference has been planned for members of the Federation's national board in October, following their meetings, October 10–11.

President Eisenhower sent his greetings to the Federation. The message said in part:

"Advancing toward common objectives of mutual benefit, your membership combines many talents with notable success. Congratulations as you continue your leadership in public service.

"DWIGHT D. EISENHOWER."

H. R. 6328, To Provide an Additional Remedy for Persons Having a Claim Against the United States Arising Out of Contracts Relating to Certain Vessels

EXTENSION OF REMARKS
OF
HON. ABRAHAM J. MULTER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, June 5, 1957

Mr. MULTER. Mr. Speaker, on March 25, 1957, I introduced H. R. 6328, for the purpose of clarifying the jurisdiction of the United States district courts and the United States Court of Claims in connection with the handling of claims against the United States arising out of contracts of the United States for repair, completion, or alteration of or addition to any type of vessel.

HISTORY OF PROBLEM

As recently as 1951, our Government took the position that claims against the United States arising out of a contract for the repair of a public vessel could not be brought under the Suits in Admiralty Act; and that position was sustained by the courts. *Eastern S. S. Lines* v. *United States* (187 F. 2d 956 (C. A. 1), 125 C. Cls. 422, 128 C. Cls. 775). Again, in the case of *Hadden* v. *United States* (132 C. Cls. 529), where suit was brought in the United States Court of Claims in connection with a contract for ship repairs, removals, replacements, renewals, additions, alterations, separations, and reconversions, the Government did not object to the jurisdiction of the court. Once more, in the case of the *Yankee Comett S. S. Corp.* v. *Brewer Drydock Corp.* (37 F. Supp. 512 (E. D. N. Y.)), the court held that an action for damages for repudiation of a contract to repair a vessel was not a maritime cause of action.

Nevertheless, in two suits now pending in the United States Court of Claims, to wit, *Anco Steel Construction Corp., et al.* v. *The United States*, No. 462–56, and *Continental Casualty Company* v. *The United States*, No. 63–57, the Government has taken the position that since they are based upon claims arising out of ship repair contracts, the United States Court of Claims does not have jurisdiction, such jurisdiction being exclusively in the United States district court under the Suits in Admiralty Act. A similar position was advanced and maintained in the Second Circuit Court of Appeals, in *Sword Line, Inc.*, v. *United States* (228 F. 2d 344), where a suit on a contract for the charter of a ship was held maritime in nature, and, therefore, the admiralty courts were held to have exclusive jurisdiction. Certiorari was granted in that case, and the Second Circuit Court was affirmed by the Supreme Court in a per curiam opinion. In the case of *Smith-Johnson Steamship Corp.* v. *The United States*, the United States Court of Claims—decided July 12, 1956—took the position that the Sword Line decision compelled it to hold that contracts involving the possession or operation of vessels are maritime causes of actions and that the Suits in Admiralty Act furnishes the exclusive remedy against the United States.

THE ISSUE

There is a 2-year statute of limitation which applies to actions brought under the Suits in Admiralty Act, and a 6-year statute of limitations for suits brought under the Tucker Act. The issue is whether suits on ship-repair contracts should be limited by the 2-year statute.

ARGUMENT

Claims arising out of contracts for the repair of vessels "can be no more deemed cases of admiralty and maritime jurisdiction than cases of common-law jurisdiction." Volume 3, Story's Commentary on the Constitution, 1833, section 1666, note, fifth edition, 1891, quoted with approval in *Taylor* v. *Carryl* (61 U. S. (20 How.) 583, 598), and in volume 1, Benedict on Admiralty, sixth edition, 1940, pages 25–26. 266. Contracts for the repair or alteration of vessels are quite similar to contracts for the repair or alteration of buildings. The same legal principles should apply. Moreover, there is nothing more maritime about the repair or alteration of a vessel than the construction of it. Since the construction of vessels is considered not maritime in nature, there is no logic in considering the repair or alteration of a vessel maritime in character.

However, assuming arguendo that there is some maritime aspect in a contract for the repair or alteration, and so forth, of a vessel, this does not mean that the jurisdiction of determining issues arising from such contracts should be exclusively within the Courts of Admiralty. Government contracts for the repair, alteration, and so forth, of vessels have the same "disputes" clause that is found in other types of Government supply and construction contracts. Such a "disputes" clause requires a contractor to appeal to an administrative board within 30 days after the contracting officer makes his findings of fact. In ship-repair contracts, in addition to the direct claims of the contractor, there are claims of subcontractors which must be asserted by the contractor for the benefit of the subcontractors. The situation is sometimes further complicated by the claims of banks or finance companies as assignees of the proceeds of the contract, their rights being derived under the provisions of the Assignment of Claims Act. Still other complications are posed when a surety company is involved as a result of a default and a reprocurement. In many, many cases the resulting situations cannot be resolved within 2 years. The Government's position that suit in such cases must be instituted within 2 years, within the limitations of the Suits in Admiralty Act, would preclude orderly exhaustion of administrative procedures; would compel resort to the courts in numerous cases where administrative disposition of the disputes is not only possible but desirable; and would impose substantial unnecessary burdens on the courts.

I hope that my bill will be set for early hearing by the Judiciary Committee and that it will be favorably reported.

Constitutional Integrity and Foreign Trade

EXTENSION OF REMARKS

OF

HON. PHILIP J. PHILBIN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 5, 1957

Mr. PHILBIN. Mr. Speaker, I have had occasion in the past to express my protests and state of alarm concerning the impact of our reciprocal trade treaties policies and practices. I am fearful that the dire predictions I have made in the past concerning the distressing results that would ensue from opening the floodgates of foreign competition have been realized in our economy to an even greater extent than I had feared.

The textile industry, badgered and plagued by foreign imports over a period of years, has suffered major losses with numerous textile units liquidated and very many others brought into a state of depression. The new plastic and electronic industries are now facing similar conditions because of imports, and many other industries are gravely threatened.

And yet the end of these disastrous developments does not seem to be in sight. Instead of reversing the harmful practices that have produced these economically and socially destructive conditions, this Government has stepped up the tempo, so to speak, and we have proceeded further down the road of free trade under the guise of abortive "internationalism, giveaway, and do-gooder" policies that in the last analysis do not result in much good for anyone concerned, but visit great harm and danger upon American industries as well as upon the economies of some other nations.

In this process facts have been distorted, the evidence has been twisted, speeches and arguments predicated on so-called commendable humanitarian motives have dominated the scene and have succeeded in blinding the eyes of a great many people to the great danger that is being done to our American economy. It is time for us to pause and ask ourselves whether the American Congress, acting under its historic constitutional mandate, or international agencies in which we are badly outvoted, will dominate policymaking for American trade relations and tariffs. I do not want to belabor this point because it has been very broadly discussed in this body by able Members of Congress, but we should never lose sight of the fact that under the Constitution, it is not only our right, but our duty, at all times to retain control of tariffs and imports, and we should never under any circumstances allocate this vital function which, depending upon the way it is exercised, could mean life or death for American industries, to be transferred to any international agency.

Every strategem has been used to throw dust in the eyes of the American people regarding trade and tariff policies, and to try to make them believe that, short of being harmful, present policies are beneficial, when the actual facts clearly indicate that the contrary is the case. We are asked not only to permit foreign agencies, in effect, to make our tariff laws, but also to allow foreign nations to pay for American exports by deluging this country with a flood of foreign imports manufactured and produced abroad at only a fraction of the domestic cost of similar competitive items.

Efforts have been made to amend certain of these internationalistic proposed controls to make them look innocuous and harmless and hence a more palatable dose, but nothing that is done can possibly conceal two facts: first, that these proposals look to placing American tariffs under international control, and, secondly, that the application of present trade policies is resulting in stagnation and threatening ruin to many American industries.

If these policies are continued this stagnation and ruin will spread and grow until it will encompass virtually every segment and every industry in the Nation. We should never forget that American methods of mass production, technology, machinery, and know-how have been, like American money, deliberately migrated to almost every nation in the world. But that is not all. In addition to technical advice and assistance, machinery, scientific methods, and know-how, we have also put up the money under our foreign-aid program by which foreign nations can build factories, powerplants, develop raw materials, and do other things necessary to set themselves up in competitive business with our own country and in increasingly wider, broader fields of activity. If present trends continue, this movement is bound to have fresh and steadily encroaching, damaging effects upon the whole American economy and its component parts, and subsequently upon the employment and well-being of millions of Americans.

It is undeniably true that this Nation must and should encourage world trade. This is in accordance with our historic practice which we have followed for many years. We realize that there are mutual advantages in this trade and that in this era particularly it is designed to strengthen the Free World. The trouble with present programs is that they seek to go beyond the mere encouragement of trade and the mere exchange of goods and dealings on the basis of mutual advantage. Present programs, by affirmative provisions and methods, put all or most of the advantages in the hands of foreign nations. Thus, what is supposedly world trade is tending to become a one-way street. Foreign nations financially supported by our money enjoy marked trade expansion and great prosperity at the expense of the American businessman and workers.

It is time for the American Government to recognize that it exists to promote the welfare of the American people and not the welfare of other peoples. Our own Government exists under free institutions to support and defend the United States and to strengthen its way of life and to advance and improve the welfare of the people and that must continue to be the primary aim of this Government.

It is certainly not a crime, but rather a duty, to protect American interests first. When that has been accomplished, it may then be appropriate to render such help to other nations and peoples that we reasonably can, not only with humanitarian motives which are so compelling to all Americans, but also in our own plain interest to unify and strengthen the Free World. But in these efforts we should never pursue policies that will result in weakening our own country. Yet that is what it seems we are doing when we allow foreign competition ruthlessly to assail one American industry after another.

No number of boards and commissions, hand picked usually to reflect extreme international views, is qualified to cope with these questions. It is only through study and action by the American Congress and its committees that appropriate solutions can be found and a proper balance struck between legitimate world trade, and imprudent, profligate, give-away programs that threaten our very existence. We must remember too, that the American Executive, under our Government, exists to execute the laws, and not to make them. The regulation of foreign commerce and the imposition of tariff duties are duties which the Constitution specifically and definitely imposes upon the Congress, and these are duties which this Congress must discharge fearlessly and courageously and without being dragooned and wheedled by international propagandists and extreme internationalists into abdicating powers and duties which repose solely in the Congress.

It is our province and our obligation to listen to the voice of the American people, and not to the voices of foreign propagandists. We must listen to the men and women who till our soil, who produce and develop our natural resources to sustain the Nation, the workers in our factories and our shops and their families, our professional people, white-collar workers and small-business men, the managers of our great industries, and all those whose livelihood and future destiny is so gravely threatened by foreign competition.

We should ponder well before we authorize any international body in any respect to control our commerce and our tariffs, and we should recognize that we can never permit that result. Foreign control of American constitutional functions is a gross breach of our Constitution and our traditions.

I realize that there are those who say no legislation is necessary to transfer these vast powers over our trade and commerce and imports and tariff to international agencies. I am not in accord with that view, because I do not think it reflects either the law or the facts of our present situation. It certainly does not accord with the public interest of this Nation, and to my mind there is no way by which these organic proposals could possibly be amended which would make them acceptable to the people or compatible with our constitutional provisions.

In a word, we have come too far along the road of allowing foreign nations to determine American policy regarding these matters. It is time, not for extension of these policies, it is a time for further restriction. It is time to revise these policies and the best thing that could possibly happen in the interests of the American economy and the American working man and woman would be if the Congress would reestablish its full power over foreign trade and provide for panels of scientists, educators, businessmen, commerce, trade, and monetary experts, and other highly qualified men and women who know their business to join with the Tariff Commission in regulating tariffs where necessary.

If this step were taken, it would put the Nation back on the original track of its historic policy. It would in the first instance protect our farmers, our workers, our businessmen, and our people. In the second place, it would result in fair treatment of foreign nations and in development of a sound policy whereby free, economic intercourse would be encouraged and a free flow of international trade assured, on a basis that would not be harmful to this country, or to any other country, but that would move in the direction of developing truly, mutually advantageous trade and commercial relations between our Nation and other nations of the world.

I realize we will always have Pollyannas in our midst who can see nothing ahead for future generations but milk and honey, and doubtless we have human ostriches who in the presence of danger and their enemies will hide their heads in the sand. But Members of this body are elected by the people. They are under a direct mandate to protect the Nation and to provide those policies in Government which will develop the economic and social well-being of the Nation. There is no place within the confines of this great land where there are so many able, experienced, patriotic men gathered trying to serve the Nation as in this body. We well know the problems of the moment, and I think most of us full well realize the ominous problems of the future. It may be, in fact, later than people think, but, in any event, it is not a time for glossing over these great problems. We must face them and we must face them soon and realistically, if we desire to carry on our great constitutional mandate and make sure that we have done our best, not only to protect the Nation against its enemies, but to insure the future well-being and development of its economy, its prosperity, and the happiness, safety, and security of its people.

The Wise Use of Federal Money

EXTENSION OF REMARKS
OF
HON. ROBERT HALE
OF MAINE
IN THE HOUSE OF REPRESENTATIVES
Wednesday, June 5, 1957

Mr. HALE. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following address by Senator MARGARET CHASE SMITH:

THE WISE USE OF FEDERAL MONEY

(By Senator MARGARET CHASE SMITH, United States Senator from Maine, senior Republican, Senate Subcommittee on Reorganization)

I am, indeed, pleased to have this opportunity to speak to this distinguished audience upon a subject of such vital importance to each of us: The Wise Use of Federal Money.

In my opinion, no problem of greater significance faces us today than that of restoring this Nation to the sound financial foundations upon which its strength, its integrity, and its greatness have been forged—and which have made it the mightiest Republic upon the face of the earth.

For, surely, it is obvious that we cannot hope to keep our economy strong, maintain the posture of military strength that we must, and move forward into what we fervently hope will be the Atomic Age of Peace,

except upon a foundation of national solvency.

Today, many events, many forces, imperil our economic stability and our national security. World War II, the seething caldrons of Hungary, the Middle East, and Asia, the ever-present threat of another, perhaps final, global war, make it imperative that we maintain our military might at the hilt, with resultant imbalances in our own domestic economy and fantastic expenditures which threaten inflationary disaster.

As you are aware, the President on January 16, last, presented the Congress with a $71.8 billion budget for fiscal 1958—the largest peacetime budget in history. It is the fifth largest in the history of this Nation—only 3, in 1943, 1944, and 1945, the peak years of World War II, and 1, in fiscal 1953, after Korea, have been higher.

And, as each of us knows, the national debt, although reduced slightly in recent years, still amounted to a staggering $272.8 billion last July 1; with the grave danger, despite high Government receipts in 1953, that, if some curb is not placed upon expenditures, we could witness additional increases in the future.

Interest on the national debt, I might remind you, even with reductions in the amount of the debt, it is estimated will reach the alltime high-water mark of $7.3 billion for fiscal 1958—because of higher interest charges in the current "tight money" market.

To me it is almost a frightening comparison that the Federal Government today pays more in interest on its national debt than it paid for all governmental expenditures in fiscal 1938—just 19 years ago.

In addition to our fantastic budget—in addition to our "Frankenstein" of a national debt—the Federal Government has more than $450 billion in loans, commitments, obligations and guarantees outstanding—commitments which this Government must some day meet—debts which future generations some day must pay.

These are some of the forces which threaten our financial solvency—forces which, if not controlled, could set a torch to inflation, which, like a prairie fire sweeping across the plains, could wreck the financial stability of this Government—and this Nation.

In relation to this, it is a harrowing thought to consider that the Government today has outstanding in unexpended appropriation balances the tremendous sum of $74 billion hanging over the head of the Secretary of the Treasury like a dark ominous cloud—more in unexpended balances than the total Government budget for fiscal 1958.

I ask you, how can we have any semblance of sound financial policy when the Government has more money outstanding in unexpended appropriations, some dating back as many as 5 years, than it takes in either annually in tax receipts or appropriates annually for its operations.

How could any business firm or corporation operate in the black in such a Wizard-of-Oz atmosphere?

I think our commendations should go to those officials of the Government who have held Federal spending down, who have held the line against inflation and who have balanced the budget. I refer, among others, to the Honorable George H. Humphrey, the Secretary of the Treasury, who has steadfastly combatted tremendous pressures for more Government spending—the near ruinous policies of the 20 years between 1932 and 1952 which largely are responsible for the dangerous predicament we find ourselves in today.

Parenthetically, I would inform you that on the morning of January 17, 1957, immediately after reading in the papers that Secretary Humphrey had stated that there are a lot of places in this budget that can be cut I wrote him a letter stating that as a member of the Appropriations Committee charged with the responsibility of passing on the budget spending requests, and as one who has been rated by the Council of State Chambers of Commerce as being champion of economy in the Senate, that I would greatly appreciate such information and identification as to those places in the President's budget he felt could be cut. I could have stated that I am equally interested in this in my capacity on the Government Operations Committee, as ranking Republican and former chairman of the Reorganization Subcommittee and as a sponsor of legislation I shall mention later in my remarks.

I sincerely believe that Secretary Humphrey has a solemn obligation and responsibility to the American people and to Congress to specify where he feels the budget can be cut. It is not enough to say that the budget can be cut in several places. Such a public statement carries with it the serious obligation to specify those places instead of placing Congress in the position of guessing as to what those places are.

At this point in my remarks I must digress somewhat from the original text of my speech in the advance release that I made of it last Tuesday. The digression is caused by the fact that on February 1, 2 days after giving the advance release, I received a reply from Secretary Humphrey to my letter. I now read that letter to you:

"MY DEAR SENATOR SMITH: Thanks for your letter regarding my comments on the budget. As I have said publicly several times, as well as to the full House Appropriations Committee, I felt that the budget as presented was the best that we could do at that particular time, and I could point to no specific items which should be eliminated. I do believe, however, that in the next 18 months, before spending under this budget is ended, we should be able on a day-to-day, case-by-case basis to find savings that can be made without hurting our security or necessary services. To do this effectively will require the most earnest cooperation of the public, the Congress, and all the departments and agencies of the Government in searching out not only things which are no longer needed, but make sure that the things we have to do are done in the most efficient manner.

"The President in his state of the Union message asked that everyone in the executive branch continue to search out ways to save money and urged the cooperation of the Congress as well. The President has also expressed publicly the firm belief that if the Congress can find ways to cut spending without impairing security and services that it would be the duty of the Congress to do so.

"If we can achieve more effective control of our spending we will have brought about a desirable restraint on inflationary pressures which can open the way to lower taxes, greater incentive, and the making of more and better jobs for the long-run well-being of our Nation.

"Sincerely,

"G. M. HUMPHREY"

I note with interest that Secretary Humphrey replies that he "could point to no specific items which should be eliminated." Apparently the press statement attributed to him that "there are a lot of places in this budget that can be cut" was in error and he was misquoted. I gather from his reply that he feels the President's budget is fat free.

At this point, I depart from my text since I have received reports that some members of the press are unhappy about this next to last sentence of mine. I made the observation that in view of Secretary Humphrey's letter to me, apparently—and I stress the word "apparently"—he has been misquoted and the press report I read was in error. Representatives of the press complain about this saying that they have the verbatim transcript of the Secretary's press conference to prove otherwise.

If there is any difference on this it is between the press and the Secretary. However, I have never been shown or given the transcript of the press conference and all the proof in this matter that I have is the signed letter of Secretary Humphrey—and my conclusion is based upon the Humphrey letter.

I say here, with all respect to those in high position in the Nation's financial councils, that balancing the budget by taking more money from the people in taxes as their personal income rises or by taking more money from corporate industry as business actively expands is not the way to national solvency—as good as it might look in the newspaper headlines. Balancing the budget by reducing governmental expenditures is.

Time does not permit, nor am I a seer who can prophesy all the steps that must be taken by responsible authorities to bring to halt this trend toward increasing expenditures, toward financial irresponsibility, and, eventually, toward insolvency, but I do wish to mention what I consider to be one of the most significant developments toward financial responsibility of the last decade.

I refer to the Hoover Commission's recommendation to the Congress that appropriations be determined on an annual accrued expenditure basis—recommendation No. 7 in its budgeting and accounting report.

The Senate last June 20 acted favorably upon the Hoover Commission's recommendation when it approved Senate bill 3897, which incorporated all the Commission's recommendations on budgeting and accounting.

However, as you may recall, the all-important section relating to preparing appropriation estimates on an expenditures basis was stricken in conference between the two Houses of the Congress when it became obvious because of the objections of the House of Representatives that we could not get a bill through the Congress implementing the other Hoover Commission recommendations, with the aforementioned appropriations provision in it.

As I stated on the Senate floor when the conference report was filed on July 25, 1956, deletion of the Hoover Commission's highly recommended revision of our appropriations procedures struck at the very heart of the objective we seek: Namely (1) improving financial management within the executive branch, and (2) restoring control of the public purse to the Congress.

A few days after that, and again on January 7, last, in the first days of the present 85th Congress, I introduced legislation to write the Hoover Commission's recommendation into law. I was joined this year in the introduction of this measure by Senator FREDERICK G. PAYNE, of Maine, and Senator JOHN F. KENNEDY, of Massachusetts, on Senate bill 316.

I am confident you will agree that there is no more important legislation pending before the Congress than that which would provide for strengthening the financial foundation upon which this Government rests. The amount of money that the Federal Government spends is controlled when it is appropriated by the Congress—not when it is expended by the executive agencies, although improved fiscal management within the agencies can produce economies in operation which should have sizable sums.

The bill I have introduced would place the entire governmental financial structure on an annual accrued expenditures basis. In other words, the Congress would appropriate for each fiscal year upon the budget estimates of Government expenditures actually to be made or to be accrued during that fiscal year.

The executive agencies would present their estimates for the forthcoming fiscal year, their expenditures for the preceding fiscal year and their justification for new appropriations on the basis of the current fiscal year only—not on the confused, complicated

"obligation" system presently in effect which frequently covers 3 or 4 fiscal years, thereby completely clouding any intelligent grasp of the current state of our finances.

To obtain firm command of Government finances there must be a direct correlation between tax receipts and expenditures for each fiscal year—because the annual budget surplus or budget deficit is measured by the difference between the two—and not the difference between appropriations and expenditures, as many people believe.

By establishing this direct correlation between annual appropriations and annual expenditures as the Hoover Commission wisely recommended, we vest not only in the Congress, but in the President as well, much greater opportunity to control the level of Government operations during the budget year on the basis of actual conditions existing that year.

Moreover, this would eventually mean the elimination of the vast carryover balances to which I have previously referred now available for expenditure some time in the distant future at the discretion of the executive agencies, with little or no control over their spending by the Congress, which is responsible in the final analysis to the people for the use of their money.

I conclude, therefore, with this thought upon the subject assigned to me, The Wise Use of Federal Money—I say without hesitation that I can think of no more important legislation to bring about the wise use of Federal money than the implementation of the Hoover Commission's recommendation toward that goal.

In concluding, I would be remiss were I not to pay tribute to President Hoover for his leadership of the two Reorganization Commissions which bear his name.

The former President not only made a great contribution in heading up these two crusades for better government, but he did something else. He practiced what he preached.

At the expiration of both the Commissions he headed he returned to the Treasury of the United States a surplus. In other words, he took the apppropriation the Congress gave him, did the job Congress asked him to, and then had something left over. A rarity, indeed, in bureaucratic Washington, where the emphasis seems to be to spend, not save.

I am glad to say that I can join President Hoover's exclusive company. As chairman of the Subcommittee on Reorganization of the Senate Committee on Government Operations in the 83d Congress, I, too, returned to the Treasury a surplus, using less money than the Congress appropriated to get the job done.

So, my friends, I, too, practice what I preach.

Thank you.

The Human Approach to Foreign Relations

EXTENSION OF REMARKS

OF

HON. HUBERT H. HUMPHREY

OF MINNESOTA

IN THE SENATE OF THE UNITED STATES

Wednesday, June 5, 1957

Mr. HUMPHREY. Mr. President, it was my privilege to speak to the American Pharmaceutical Advertising Clubs of New York, the Middle West, and Montreal, Canada, in joint session on the noon of June 3, 1957, in New York City. Also in attendance at this meeting were members and officers of the American Medical Association; the AMA is now holding its convention in New York City.

The subject matter of my address was entitled "The Human Approach to Foreign Relations." I ask unanimous consent that the text be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

HEALTH, HAPPINESS, HOPE—THE HUMAN APPROACH TO FOREIGN RELATIONS

(Address by Senator HUBERT H. HUMPHREY, American Pharmaceutical Advertising Club luncheon, Waldorf-Astoria, New York, June 3, 1957)

It is indeed an honor to be speaking before this great assembly of representatives of many pharmaceutical firms and of the professions of pharmacy and medicine today, on the opening day of the American Medical Association annual convention.

I am even more pleased because there is a special personal element in my appearance before you. As many of you know, I am still a registered pharmacist and a part owner of our family drugstore in Huron, S. Dak.

My dad was a pharmacist and pharmacy was my first love. I studied it and worked behind the prescription counter. So this setting is warm to my heart.

How true to our national tradition are you research and manufacturing pharmacists. Less than 20 years ago, the United States was dependent on our European cultural parents, hanging on to the skirts of their pharmaceutical chemistry and industry, just as we were in several other scientific and industrial fields.

With the Second World War we learned we had to produce not planes and tanks alone, but new medicines. And we did it. We produced a stream of fantastic new chemicals and biological armaments against infection.

And it is heartening to report that our creativity in biotherapy and chemotherapy has never left us. Right through the sulfas, broadspectrum antibiotics, hormones, poliomyelitis vaccine, a series of breathtaking developments have taken place which I hardly need to mention here. We can take pride that these developments have enabled our physicians and people to face courageously the problems of degeneration, disease, and death.

To the practicing pharmacist, what a difference the last few years have made. He has to know and keep up with all the potent and specific new agents. Comparisons are odious, but sometimes interesting. For instance, in 1929, our pharmacists filled 166 million prescriptions. Today the figure, I am told, is beyond half a billion.

And the pharmaceutical industry has grown immensely. From a scientific industry of two or three hundred million dollars a year, it has grown to almost a billion and one-half dollars.

If you like to play around with averages, as I do, you might be interested to know that since 1947 alone a new compound has been made available to physicians every day.

Among the people working together in fields associated with you, are more than 188,000 practicing physicians, 50,000 pharmacists, 500 pharmaceutical firms, 9,000 hospitals, 600 distributors of ethical preparations, 300 leading medical and pharmacy journals, and 15,000 "detail" men who help to inform physicians.

This biochemical confederation has helped to save almost a million lives in recent years through the use of pharmaceuticals that were unknown a generation ago. Our pharmaceutical industry is not taking a back seat and gloating over past achievements. It continues to pour more and more of its financial and scientific resources into research. From a research expenditure of $10 million two decades ago, the amount has increased to $100 million a year. This is one of the most intensive research programs throughout American industry. I am proud to be associated with this whole intensive pharmaceutical endeavor, however small my contribution may be.

But while there is this personal element, I want to speak to you as a United States Senator who is concerned with the problems of world health and how they influence our foreign relations. I know that you—the pharmacists, the physicians, the drug manufacturers, the pharmaceutical chemists and the students of medicine—that you are as vitally concerned as I.

Living here in the United States—in this prosperous country of ours and in light of our technical accomplishments—it is difficult for us to believe that more than two-thirds of the world is sick. There are those who would say the figure is closer to 4 persons out of every 5. This is serious food for thought.

Millions of suffering people are bound by the oppressive chains of disease. In large sections of the world, malnutrition, illiteracy, and inadequate shelter are still part of the everyday life of many millions of our fellow men.

Drugs are playing a major role in freeing these people.

For example, the World Health Organization reports that there are still 10 to 12 million lepers in the world. In Nigeria alone, the estimate for 1956 was 195,000. But this high incidence has a new outlook. Lepers are no longer ashamed as they have been for thousands of years. They report to health authorities. And they report largely because of the growing confidence in new drugs to treat this old scourge.

In many parts of the world, trachoma has been a terrible, disheartening enemy of the people. As an American travels, he is deeply affected to see children blinded by this eye disease. Now, many countries are organizing their people against it. In one effort in Egypt, for example, an antibiotic ointment was used to treat 2,500 school children twice a day for 60 days. Five thousand preschool children received sulfa drugs. One can see how drugs enable and inspire society to organize itself against disease. More needs to be done—these are but beginnings.

There are an estimated 300 million annual cases of malaria. There are an estimated 50 million cases of tuberculosis. There are, as well, an unestimated number of cases of other preventable disease, running into additional hundreds of millions. These are diseases which strike in the productive years of life—or before life has barely begun.

I am happy to say there seems unanimous support in Congress this year for President Eisenhower's proposal to fight malaria. The United States under the President's program would pay one-fifth of the $500 million that would eradicate the disease. The antimalaria project has engendered much good will for America.

A vigorous, peaceful, happy, productive world can arise from abundant health and vitality of men and women * * * it can never grow under the existing burden of sickness, malnutrition, and poverty. No amount of diplomacy or armament can bring peace where the bodies and minds of men are sick.

I have seen how communism thrives on misery. Recently the Soviets have moved into the Middle East and the Far East. There on my recent factfinding mission for the Foreign Relations Committee, I saw poverty and misery provide the fertile ground for the very dissatisfactions that so often make communism acceptable.

Faced as we are with a new Soviet approach in those areas where the greatest doubt and misunderstandings as to our way of life exist, we are now, more than ever,

challenged to help the starving and disease-ridden people of the world to raise themselves up out of their misery.

Had Karl Marx never lived, and Lenin and Stalin never come to power in the Soviet Union—had communism never been heard of—there would still be great social challenges that we cannot afford to ignore. We ought not to need, as our motivation for doing what we ought to do anyway, the wicked and evil philosophy of communism. Sick people ought to be healed even if a Communist never lived. Illiterate people ought to be educated without ever having to receive the inspiration for this noble work out of fear of Communist infiltration.

What we Americans need to do is to be ourselves. Just do what comes naturally—to be the generous humanitarian and compassionate people that have endeared us in the past to our neighbors and has become the hallmark of our tradition and heritage.

But I know that the American people have never needed prodding to help others who needed our help. One of the proudest and most cherished traditions in our history is to help those who are suffering or are afflicted.

By helping suffering people to rid themselves of disease, we can place those people on a firmer foundation. It is up to us, a people with tremendous technical ability and know-how, to supply the way for people everywhere to achieve freedom from preventable disease.

There is a growing awareness of the fact that disease-ridden populations are unproductive and therefore a drain upon national economies and upon the world economy. This in turn becomes a drain on our own economy.

The promotion of international health is one of the best means of promoting international cooperation and understanding. Whatever we can do to promote health will also promote peace and will reap for us tremendous dividends in friendship and appreciation of our way of life.

Just as it is right for us to share our blessing of abundance with victims of hunger, so it is also right for us to share our medical skills, supplies, and technical equipment with the victims of disease and ill health. May I assure you, the sharing of our abundance of food and fiber can be a powerful factor in our foreign policy. We need to look upon our great agricultural production and productive capacity as a source of strength in the world scene.

Health is intimately associated with man's cultural, emotional, social, and economic problems. And I recognize, as you do, that pharmaceuticals of both chemical and biological types are fundamental factors in the health field. So I feel I can talk to you and make suggestions for the usefulness of your particular specialty in this battle.

Now all this is not to say that nothing is being done. Far from it. In fact the record is quite impressive.

One of the leaders in the field is the World Health Organization. WHO is participating in 700 health projects in 102 countries. It is this invaluable work which is paying off in terms of a lowered mortality rate throughout the world. This organization is certainly to be commended for its tremendous achievements.

It was my privilege in the last session of Congress to sponsor the joint resolution which authorized an appropriation to enable the United States to extend an invitation to the World Health Organization to hold the 11th World Health Assembly in the United States in 1958. The Assembly will afford another invaluable opportunity for nations of the world to pool their knowledge and line up forces in the fight against ill health in the world.

The World Health Organization, with a membership of 88 nations, was established shortly after World War II as one of the organs of the United Nations. It has the responsibility to serve governments in building up the health and vitality of their people. As you know, WHO welcomes the interests of private and voluntary agencies who want to help humanity everywhere.

In recent years, more and more voluntary agencies have given material help and have cooperated with the World Health Organization in establishing hospitals and clinics.

There are 43 nongovernmental organizations with whom WHO maintains official relations. The World Medical Association, which stemmed from the American Medical Association, is among these. Among others is the International Pharmaceutical Federation, the International Council of Nurses, and the League of Red Cross Societies.

WHO is collaborating with 1,800 scientific institutions in the world, including laboratories research units and scientific studies. Most of these institutions are devoting time and energy on a voluntary basis in the interest of the advancement of science. I understand that only 40 of the 1,800 organizations get any funds from WHO at all. Research is being coordinated in more than 50 laboratories in the field of influenza. Many others are busy in polio research.

Projects approved by the United Nations Children's Fund, known as UNICEF, bring food, medical care, and other aid to more than 32 million children, annually. Impressive as these figures are, they represent only a small proportion of the critical needs of so many children. How many will forget the heartwarming television presentation by Danny Kaye earlier this year in which the dramatic role played by UNICEF in children's health was so well depicted?

Work on the treatment of leprosy in French Equatorial Africa and Gambia and Thailand; on yaws in the Gold Coast and Nigeria among others; on trachoma control in Morocco and Indonesia; on tuberculosis of children in Cambodia, Ceylon, and Vietnam—these are the dramatic attacks on ancient diseases still prevalent in the 20th century. UNICEF is out to eradicate these ancient enmeies of mankind.

Keep in mind that UNICEF is a voluntary, cooperative program of self-help. Each country desiring assistance must first request aid and must be able to give satisfactory evidence that it will be able to develop and continue the program on its own initiative after the UNICEF part of the work has been terminated. In addition, each assisted country must agree in advance to contribute in goods or services an amount equal to the UNICEF contribution. Being the only program devoted solely to children, this work supplements the broad objectives of United States assistance.

Under the Fulbright Act, the United States currently has 27 students, lecturers, and specialists in the field of medicine, including 1 pharmacist, in Europe in postgraduate study. There are 166 foreign students, lecturers, and speicalists, including 13 pharmacists, in the United States for study on the graduate level.

The United States Public Health Service is in the field of international activity, cooperating with other nations in tackling world health problems of concern to us and to others. It also participates in programs in which we give a helping hand to friendly naitons on a country-to-country basis to remove disease and build national strength.

At the National Institutes of Health, there is at all times a small group of research projects which require that individual scientists conduct research in foreign countries or that they work in close formal collaboration with foreign investigators.

The Voice of America and the Public Health Service cooperate closely in preparing broadcasts on international health activities. The Voice interviews trainees from abroad who come to the United States under ICA fellowships. The Voice also broadcasts programs on the activities of the World Health Organization and on United States participation in WHO.

I cannot stress too strongly the cooperation which exists between the various Government agencies and private interests in combating world health problems. Permit me to cite only a single example of scores that can be made.

A number of agencies were jointly concerned with helping the Greek Government in its malaria-eradication program. The Rockefeller Foundation came in first, and later the United Nations Recovery and Rehabilitation Administration came in, followed by the assistance given by the World Health Organization and the United States bilateral program. At one time or another these agencies all worked hand in hand to help Greece tackle various aspects of the malaria problem.

There is cooperation between governmental groups. Tuberculosis, for instance, is still a serious world problem though virtually licked in the United States. WHO and UNICEF continue to cooperate with governments on mass-vaccination campaigns, and on studies of diagnostic and control procedures that might be usefully adopted for antituberculosis programs under primitive conditions. As a result of pilot projects administered by UNICEF and WHO in the field of trachoma, it is now clear that mass treatment with antibiotics has given hope of eventually controlling this serious eye disease which often leads to complete blindness.

The more I have visited various places in the world, the more I have witnessed what we have done in our aid programs, the more I am convinced that it isn't only the money, but rather the people who really count. It is the people * * * their attitudes * * * all over the world that are important in putting across a program. Among the best instruments of this method are the American voluntary agencies, including those supported by the three great faiths. They have been active in 78 countries and areas of the world giving not only first aid, but planful care to the most dispossessed of humanity.

I could relate for hours the work these organizations have done in the field of health, but time will permit me to only give you an idea of their work.

The Jewish American Joint Distribution Committee gives generous support to medical institutions, schools, and children's institutions not only in Israel, but throughout north Africa. * * * In cooperation with an advisory committee of both French and American doctors, the Unitarian Service Committee assisted in the placement of nine French interns in United States hospitals. Also under sponsorship of the Unitarian Service Committee, five American medical scientists shared their knowledge of anesthesiology with Japanese physicians. The American Friends Service Committee runs a surgery and pathology wing in the Kunsan, Korea, provincial hospital and has hope that during this year medical specialists will be sent to Kunsan to give special training to Korean doctors. Incidentally, under this scheme a gynecologist already has been sent.

The American Bureau for Medical Aid to China's overseas program is conducted along various lines—training personnel for all branches of medicine and surgery, providing financial support, medical supplies, and supervisory services for a nurses' training program, supporting nine medical and nursing fellowships for training in America.

My friends, in breaking the vicious circle of poor health, low productivity, and low-living standards leading again to poor health, these voluntary groups, the world organizations, our Government, and some private interests, are helping to eradicate the social and economic causes of war. The goals are not beyond reach: in those places where project goals have been reached, complete

cooperation has been assumed by local governments.

Yet despite these recent improvements in health conditions, there are major problems still to be solved. It will be many, many years before the incidence of malaria, sleeping sickness, yaws and the numerous parasitic infections are reduced to minor proportions.

Forward-looking groups such as yours can and should perform a service in advancing ideas and establishing a favorable climate for a new world health leadership. Science has given us the tools with which to wipe away disease from the face of the earth. What we need is the personnel and research to carry out the work and the funds with which to operate.

There is a need in the world today for a nonpublic, international, professional medical group or foundation whose aim would be to lift the burden of disease from the shoulders of mankind through research, study, assistance, and information exchange.

This foundation could be composed of representatives of medical and pharmaceutical professions and the pharmaceutical industry from all parts of the world. As I have tried to indicate, there are many areas of world health where private enterprises are much more effective than governmental units. And we must keep in mind that the more we can do on a private scale, the less a government is required to do.

The aims of such an interprofessional organization can be generally outlined as follows:

First, to bring the great benefits of American advances in chemotherapy to more people everywhere.

Many countries are extremely backward when it comes to new drugs. If all peoples everywhere were made aware of all the antibiotics, insecticides and new vaccines which are available, it would be possible, not only to control disease, but to eradicate it in many areas. Work with these drugs could be the inspiration for new discoveries, new applications.

A second aim, to encourage the development of pharmaceutical research and other research facilities in countries less advanced than the United States, always with the help of professional, scientific, and industrial experts from other countries with modern technology.

This could be achieved through agreements between a needy country's government and American pharmaceutical firms or those in other countries. Here we see the possibilities of a program designed around private group to government—a relatively new concept.

As we move into countries with preventative medicines, we should realize that this is the only type of health program which is reaching mass populations. In many instances, it is the first contact of modern medical attention these people have had. This mass preventative program lays the foundation for acceptance of curative drugs. Pharmaceutical research could be a vital link in this chain.

A third aim would be to encourage the appreciation, adaptation, and application of our medical and pharmaceutical institutions in other countries.

Many countries and their professional organizations have already shown their interest in studying American institutions and methods such as the Food and Drug Administration, the United States Pharmacopeia, the educational curriculums and many others.

These suggestions and recommendations could be made acceptable through a broader application of person-to-person contact through exchange, hence—

A fourth aim, to encourage many more contacts among physicians, pharmacists, pharmaceutical scientists and industrialists, hospital people and other medical specialists.

Let me give you an example:

Recently a representative of Israeli pharmacy was in the United States seeking assistance for pharmacy colleges there. Through the new group I have suggested, young men and women from pharmacy colleges in Ceylon, Israel, Chile, if they wanted to, could come here. They could become acquainted with our colleges, our pharmacies, our pharmaceutical laboratories, our physicians.

On the other hand, American pharmaceutical firms might organize teams of research chemists, pharmacologists, clinical investigators, to visit other countries to help in problem analysis and the establishment of professional schools.

It is hardly surprising that person-to-person contacts are coming to play a still larger role in international affairs than they have in the past. Experience has indicated the desirability of this expansion, and the ease of arranging international travel in recent years has made it possible.

The opportunities are readily apparent: a growth in understanding on the part of visitor and visited alike, and deeper insights and more lasting impressions than other means of communication usually permit.

We should remember that numerous governments and hundreds of private groups already are supporting programs to exchange students, teachers, and scholars between this and other countries. A few also are enabling persons who are leaders in other walks of life to travel for study or observation. I already have mentioned the Fulbright program. The World Health Organization has 1,000 grants a year in its fellowship program. Foreign governments have invited our doctors to their hospitals, and we have reciprocated. However, there still exists a need for expansion if the people of the United States and other nations are to understand each other better and work together for world health and understanding.

A fifth aim, to help alleviate the shortage of trained pharmacists, chemists, and other related specialists in many countries, including ours, by encouraging students through scholarships to enter the various fields, and by subsidizing the professional institutions either directly or through research projects.

A final, and sixth aim might well be for the private foundations to focus the attention of all governments on such related questions as the status of pharmaceutical development and the standards of education in medicine and pharmacy, through close liaison with such organizations as WHO and UNICEF.

It is my relief that this objective can be more readily obtained if we integrate with the Federal Government's efforts, the potential of the Nation's private economy—the professional people, investors, civil, religious, and educational establishments.

Sometimes any kind of intervention—whether to alleviate hunger or to alleviate ill health—may be misunderstood or resented. People who may be wary of accepting aid from the United States will more readily accept the assistance of an international organization to which they themselves belong. The world professional foundation, of which I have talked, could be one such organization through which professional and industrial members can work to help each other and to help themselves.

Permit me to summarize the aims of this plan once again: They are to bring the great benefits of American advances in chemotherapy to more people everywhere; to encourage the development of pharmaceutical research and other facilities in countries less advanced than ours; to encourage the adaptation and application of our medical and pharmaceutical institutions in other countries; to encourage more person-to-person exchanges; to help alleviate shortages of trained personnel and to focus attention of all governments on aspects of the medical field as developed by the plan.

Through official and private channels, the foundation could offer help with public health education, distributing visual and literal aids.

Meetings could be held in major cities of the world to discuss the pharmaceutical challenges in relation to world health problems. The group could encourage the dissemination of knowledge through publications and, as I have said, person-to-person contact.

Unless I have overlooked limitations of a highly resistant nature, I think the American pharmaceutical industry will not shirk its humanitarian obligations. Again and again it has demonstrated that it cares by shipping needed drugs abroad to help their fellows overcome emergency.

Yours is an industry that has thrived on the challenge and the excitement of creating new medicines. You sometimes even "live dangerously" as business goes, by making a maximum financial effort to find an elusive aid against a disease, with no assurance of success and return to your stockholders.

Such a plan as I have outlined, cannot and should not be achieved solely by the efforts of governments working either independently or together. We need the coordination of private interests and private investments—we need the sharing of skill and experience—we need the helping of the weak by the strong.

The underdeveloped countries, especially those in Asia and Africa have acquired a new importance to the United States and the Free World. No one privileged to serve on our American delegation to the United Nations, as I have been at the current session, can fail to grasp that these new and developing nations of Asia and Africa, now numbering 27, control more than a third of the votes in the General Assembly. Almost all future additions to the family of free nations will likely be in Asia and Africa. The outcome of the great struggle between freedom and communism will unquestionably be decided by the turn of events in these countries. Our future is tied in with theirs.

People can only start thinking of freedom and the rights of the individual when they are freed from the day-to-day concern of trying to eke out a bare survival and are in good enough health to turn their attention to matters other than sheer subsistence. In helping others to help themselves, we are achieving in a practical way a means for these people to live fuller lives.

It is through an increasing coordination of endeavor within nations and between nations—on a people-to-people basis—that the modern need of worldwide health can, will, and is being transformed from a hope into a reality * * * resulting in happy relationships between people. This sort of security can be the basis for a lasting world peace.

But the requirements of a just and enduring peace are exacting and difficult.

Clearly we cannot expect to live peacefully in a world slum overflowing with disease, tension, and hate. Nor can we impose peace by bombs and tanks.

As former President Truman said: "The only kind of war we seek is the good old fight against man's ancient enemies * * * poverty, disease, hunger, and illiteracy."

We must join in this all-out attack on poverty, disease, hunger, and illiteracy. We must share our technical assistance—the scientific know-how—in food production, industrial development, health services, and education. Such a program will increase the health and welfare of the underdeveloped countries and bring greater opportunities to their people.

All of us—through consistent practical, concrete action, must demonstrate in unmistakable terms our genuine concern for the

rank and file of humanity, and our willingness to help them build a better life.

Such a program will take time. The poverty and insecurity that beset the majority of the world's people were centuries in the making, and they will not be erased overnight. But delay cannot be tolerated. We must march ahead with confidence, hope, imagination, and boldness.

Radioactivity in the Columbia River

EXTENSION OF REMARKS
OF
HON. HENRY M. JACKSON
OF WASHINGTON
IN THE SENATE OF THE UNITED STATES
Wednesday, June 5, 1957

Mr. JACKSON. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD an exchange of correspondence between myself and the Atomic Energy Commission relative to the health and safety aspects of using the Columbia River as a coolant for the Hanford Atomic Works.

There being no objection, the correspondence was ordered to be printed in the RECORD, as follows:

MAY 21, 1957.

Mr. LEWIS L. STRAUSS,
Chairman, Atomic Energy Commission,
Washington, D. C.

DEAR MR. STRAUSS: In Albert Schweitzer's Declaration of Conscience, given upon receiving the Nobel prize, and reprinted in the CONGRESSIONAL RECORD for May 15, 1957, there is the following paragraph:

"What this storing of radioactive material implies is clearly demonstrated by the observations made when, on one occasion, the radioactivity of the Columbia River in North America was analyzed. The radioactivity was caused by the atomic plants at Hanford, which produce plutonium for atomic bombs, and which empty their waste water into the river. The radioactivity of the river water was insignificant. But the radioactivity of the river plankton was 2,000 times higher, that of the ducks eating plankton 40,000 times higher, that of the fish 15,000 times higher. In young swallows fed on insects caught by their parents in the river the radioactivity was 500,000 times higher, and in the egg yolks of water birds more than 1 million times higher."

I would appreciate hearing from the Commission any comments it might care to make concerning this statement, and concerning the health and safety aspects of using the Columbia River as a coolant for the Hanford plant.

Sincerely yours,

HENRY M. JACKSON,
United States Senator.

UNITED STATES
ATOMIC ENERGY COMMISSION,
Washington, D. C., May 24, 1957.

Hon. HENRY M. JACKSON,
United States Senate.

DEAR SENATOR JACKSON: Thank you for your letter of May 21, 1957 in which you ask for our comments on a part of Dr. Albert Schweitzer's Declaration of Conscience, and also on the health and safety aspects of using the Columbia River as a coolant for the Hanford plant.

The data cited by Dr. Schweitzer are essentially those presented by Hanford employees of the General Electric Co. at the International Conference on the Peaceful Uses of Atomic Energy. These data were published in 2 papers in volume 13 of the proceedings of this conference. They are:

Paper 280: pages 364–367, The Accumulation of Radioactive Substances in Aquatic Forms, by R. F. Foster and J. J. Davis.

Paper 281: pages 385–388, Radioactivity in Terrestrial Animals Near an Atomic Energy Site, by W. C. Hanson and H. A. Kornberg.

It is important to understand that the figures which appear in the tables in the papers referred to above, and from which Dr. Schweitzer apparently obtained the figures which appear in the paragraph quoted in your letter, represent ratios, that is, the relative increase in concentrations of radioactivity from water to plankton and on down the plant-animal food chain. These ratios are not meaningful from the standpoint of health unless the concentrations are converted into amounts of radioactivity and a comparison is made with permissible concentrations of radioactivity in food consumed by humans. In other words, it is necessary to distinguish between rate of concentration and amount of radioactivity. In this connection, it is also important to take into account the normal process of radioactive decay.

The radioisotope of primary concern which enters the food chain in the Columbia River is phosphorus 32. It has a 14.3 day half-life and has a maximum permissible concentration in water of 2×10^{-4} microcuries per cubic milliliter. Its concentration below the Hanford site is a small fraction of that level, namely, 0.02×10^{-4} to 0.2×10^{-4}. At such levels in the water people could eat fish every day in the year without exceeding the conservative standards for exposure to the general population.

The manner in which Dr. Schweitzer presents the ratios implies that there is a progressive increase in the concentrations of radioactivity through the plant-animal food chain. This is not generally true. If one refers to the table from which Dr. Schweitzer took his values for birds (table 1, p. 385, vol. XIII of the proceedings of the International Conference on the Peaceful Uses of Atomic Energy) it will be found that the last column of the same table gives ratios of concentrations of P–32 in the bird to P–32 in its food. In only one case is the concentration in the bird higher than in its food.

Another problem is that Dr. Schweitzer takes his figures from two different tables. The value of 2,000 which he uses for plankton is for gross activity. The other higher values in the paragraph quoted are for the specific isotope, P–32. Since the P–32 activity in the water is less than 1 percent of the total activity in water, the concentration form of P–32 from water to plankton is 200,000. Hence, the increases in concentrations from water to ducks, of 40,000, and from water to fish, of 15,000, should be compared to the value for plankton of 200,000, not the 2,000 figure which Dr. Schweitzer apparently obtained from another table. Therefore, as a general proposition there is not a progressive increase in the concentration of P–32 throughout the plant-animal food chain as implied by Dr. Schweitzer.

The fish in the Columbia River are monitored through the seasons the year around. The average concentration in whitefish (the species in which the highest concentrations have been measured) has been about 10^{-4} microcuries per gram (the unit of weight comparable to volume as measured in milliliters). At that concentration one could eat 7 pounds of fish a week, year in and year out, and still be within permissible levels.

As you know, the AEC has a substantial health research program at the Hanford site and at all other major AEC industrial sites, and at the Nevada and Pacific test areas. These programs include not only precise monitoring of radioactivity in air, water, and soil, but follow radioactive products as they pass along the plant-animal food chain. Special emphasis is given to consideration of the levels of radioactivity required to produce detectable injury in individuals and in population groups. A conservative estimate of the Commission's expenditures in environmental health research at AEC sites and at universities throughout the Nation, is about $1.8 million a year. This estimate does not include a substantial amount of laboratory support at AEC sites, nor does it include a vast amount of related research, such as, for example, the metabolism of fission products and instrumentation.

Should you desire additional information on the program at Hanford or on the broad environmental health program of the Commission, we shall be pleased to provide it.

Sincerely yours,

LEWIS L. STRAUSS, *Chairman.*

Memorial Day Address by Hon. Richard L. Neuberger, of Oregon, at Hyde Park, N. Y.

EXTENSION OF REMARKS
OF
HON. LISTER HILL
OF ALABAMA
IN THE SENATE OF THE UNITED STATES
Wednesday, June 5, 1957

Mr. HILL. Mr. President, our colleague, the junior Senator from Oregon [Mr. NEUBERGER], delivered the commemorative address at the annual Memorial Day ceremonies held on May 30 at Hyde Park, N. Y., in memory of Franklin D. Roosevelt. The junior Senator from Oregon is a Senate member of the Franklin D. Roosevelt Memorial Commission, and he spoke on the conservation ideals and programs of Franklin D. Roosevelt.

No man in the Nation has given more of his thought and of his time to the conservation of our great natural resources or has used his able pen more in this vital cause than has the junior Senator from Oregon. He truly speaks with authority and is a devcted and valiant disciple of Franklin D. Roosevelt in waging the never-ending struggle for the conservation of America's God-given resources.

The address delivered by the junior Senator from Oregon is most timely, informative, and challenging, and I ask unanimous consent that it may be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

CONSERVATION IDEALS AND PROGRAM OF FRANKLIN DELANO ROOSEVELT ARE HERALDED AT HYDE PARK CEREMONIES BY SENATOR RICHARD L. NEUBERGER

(Excerpts from the address delivered at the grave of Franklin D. Roosevelt on Memorial Day by RICHARD L. NEUBERGER, junior Senator from Oregon and Senate member of the Franklin D. Roosevelt Memorial Commission)

Like Antaeus of old, Franklin Roosevelt gained strength just by touching the goodness of earth. He treasured the land and all its kindred—water, trees, wildlife, soil, flowers, shrubs, and the air above. He had a feeling about America which stemmed from Jefferson and Thoreau and Gifford Pinchot.

He believed that resources were a gift from the Almighty, and that we all are under a sacred duty to hand them on to the next generation—undefiled and untrammeled. He was the greatest conservationist of our era.

Perhaps some of Franklin Roosevelt's philosophy in this respect originated on the shores of the Hudson River, where he was born and raised, and where he today lies at eternal rest.

The quiet majesty of this spot may have helped to inspire the governmental policy which did so much to assist the American people in laying renewed claim to their natural resources in every distant corner of the land. It may be that, at Hyde Park, there was begun the idea which had a far-off fruition in the great canyons of the Columbia and the Colorado, on the uplands of the Yellowstone and the Sierras, and along the forested seacoast of the Olympic Peninsula.

The first time I ever saw Franklin D. Roosevelt was in the municipal auditorium of the city where I was born—Portland, Oreg. He stood there, on September 21, 1932, and promised that the next great hydroelectric-power development to be undertaken by the Federal Government would be along the surging river where lurked more than 40 percent of all the latent hydroelectricity in the Nation.

CAMPAIGN PROMISE KEPT

No promise during a political campaign was ever kept with greater fidelity, rectitude, and with greater benefits.

From that promise came the biggest water-power system ever built anywhere in the world, a system which included Grand Coulee Dam, the most massive single edifice yet reared by man on our planet.

I am glad my wife Maurine is here with me today. I think she could tell something about the tangible benefits to humanity from that one deed initiated by Franklin Roosevelt.

Maurine's widowed mother runs a dairy farm which lies about 10 or 12 miles from the banks of the Columbia. It is one among thousands of farms in the Northwest which had no electricity prior to the arrival in the White House of Franklin D. Roosevelt. The farm was a short distance from the greatest source of hydroelectric power on our continent—but Maurine's mother cooked with kindling, she had no refrigeration, she carried a kerosene lamp from room to room at night, the dairy barn could not be fitted with milking machines or floodlights because there was no power to operate such equipment. In the midst of potential plenty, countless American farm families lived like this—in frontier conditions despite the presence of the electrical age.

Franklin Roosevelt brought about the construction of Grand Coulee and Bonneville Dams. He innovated the Rural Electrification Administration. Today, the farm of my wife's mother—and innumerable other farms—enjoy the blessings of electricity, and at substantially lower rates than are paid in the major cities of this State, for example.

RURAL ELECTRIFICATION INCREASED

When Franklin D. Roosevelt entered the White House in 1933, less than 10 percent of America's farms had central station electric service. When he died approximately 12 years later, 50 percent of our farms had such service.

This single statistic tells a story of natural resources put to work for the benefit of humanity. It tells the story of farm wives and mothers spared the aches and indignity of drudgery; it tells the story of life made more comfortable and bearable; it tells the story of a President who cared about the personal happiness of his people.

I have chosen today to discuss Franklin Roosevelt as a conservationist for two reasons which seem to me to be important. To begin with, few nations have looted their natural resources as profligately and in so short a period as the United States, and we need to be reminded of an era when a great man and his associates dedicated themselves to a program of genuine respect and protection for this legacy which we have received from the Almighty.

And, secondly, as we stand here in this hallowed and historic spot at Hyde Park, an administration reigns in Washington which has surrendered surging rivers, valuable forests, rare wildlife preserves and immense mineral deposits to private groups for piecemeal exploitation. It is well, I think, that the contrast in this vital domain of government between the present administration and that of Franklin Delano Roosevelt should be emphasized on this Memorial Day of the year 1957.

CCC PROVIDED MANY BENEFITS

I wish many of you could go with me into the national forests of the Western States. Today, a quarter of a century after Franklin D. Roosevelt swore the oath of the Presidential office for the first time, we still can trudge trails and camp at picnic grounds in those magnificent outdoor realms which were built by the Civilian Conservation Corps. The CCC may be merely a bygone set of governmental initials now. But, in 1933, it was a program inaugurated by Franklin D. Roosevelt which achieved a dual purpose. It got off the streets and alleys of eastern cities thousands of boys who came from broken homes, who were potential inmates of prison cells and who had no economic chance in life. These boys not only were rehabilitated personally in the scenic arena of our western mountain ranges, but they also helped to restore watersheds, to fight erosion and to provide the finest recreational facilities ever furnished in our marvelous national-forest system.

The program of conservation implemented through the CCC has probably never been matched. Not only did this program help make good citizens of 2½ million American youths, but it resulted in the planting or seeding of over 2½ million acres of trees, the development of 10,000 acres of public campgrounds, construction of nearly 32,000 wildlife shelters, the building of over 6 million check dams to halt soil depletion, plus numerous other conservation and recreation structural improvements which continue to benefit our country today. Yet this great public works project cost less than $3 billion, only a fraction of the value it represents in the protection and maximum development of natural resources.

RIVER VALLEY RESTORED

I wish there were time during this brief ceremony to describe all the achievements in the field of conservation of Franklin D. Roosevelt. I wish time afforded me the opportunity to discuss in detail the Tennessee Valley Authority, which restored perhaps the most worn-out river valley of our Nation and made it a haven for prosperous industries, for modern farms, for growing cities. The dams of the TVA have attracted payrolls with cheap power, they have electrified farms and homesteads, they have retarded and prevented floods, they have provided recreation and boating on vast artificial lakes.

The vision of Franklin Delano Roosevelt is perhaps no better evidenced than in his policies regarding water and power resources development. He saw the problem and the particular projects, not as something isolated and apart, but as a springboard for comprehensive development. In many ways the TVA serves to illustrate. In his message of April 10, 1933, to the Congress proposing TVA, he said in part:

"It is clear that the Muscle Shoals development is but a small part of the potential usefulness of the entire Tennessee River. Such use, if envisioned in its entirety, transcends more power development; it enters the wide fields of flood control, soil erosion, afforestation, elimination from agricultural use of marginal lands, and distribution and diversification of industry. In short, this power development leads logically to national planning for a complete river watershed involving many States and the future lives and welfare of millions. It touches and gives life to all forms of human concerns."

At the dedication of Grand Coulee Dam in my own great Northwest, the President declared:

ROOSEVELT'S VISION CONFIRMED

"We are going to see, I believe, with our own eyes electricity and power made so cheap that they will become a standard article of use, not only for agriculture and manufacturing, but also for every home within reach of an electric light line."

Today's electrified rural America confirms this vision.

As a native of the Pacific Northwest, I feel a particular sense of appreciation to Franklin Delano Roosevelt that he made certain the great hydroelectric resources of our region would be widely distributed to all the people through a so-called postage stamp rate. It is somewhat distressing now to see certain people in Franklin Roosevelt's home State who are taking the leadership in violating this principle. Franklin Roosevelt believed that rivers belonged to everybody, to all the people. We only can hope and trust that his political descendants in the great State of New York will return to this ideal.

The realm of nuclear fission represented an even more adventurous deed by Franklin D. Roosevelt. After the genius Albert Einstein had told President Roosevelt that it might be possible to end World War II with a prodigious weapon produced from the atom, the President staked $2 billion of the American people's funds on the mysterious Manhattan project, a project which never could have been feasible without the immense quantities of waterpower available from Grand Coulee Dam and the TVA. It was a success. It attained its cosmic and unfathomable purpose. But can we imagine the outraged howls which would have gone up from Franklin Roosevelt's political foes, from those who never gave him credit for the Manhattan project, if that collossal undertaking had failed?

F. D. R. ADVOCATED COMPREHENSIVE DEVELOPMENT

I believe it might be fitting to reduce to specific terms exactly what the philosophy of Franklin Roosevelt meant, when applied to natural resources, as compared with some of the attitudes which prevail in high levels of Government today.

Within a few weeks the United States Senate will vote probably for the last time, on the fate of the finest hydroelectric-power site remaining in our country. The choice is decisive. Either the Federal Government will construct at Hells Canyon, in a mile-deep chasm, a dam capable of storing nearly 4 million acre-feet of water for flood control and of making possible 1 million kilowatts of power. Or, as an alternative, a private utility company will impound some 1 million feet of water and produce approximately half the quantity of firm year-around power of the Government dam. Furthermore, the Government dam would sell energy at a cheaper rate and over a far wider geographic area than the private project.

The present administration has used its utmost influence to favor the private project. While he was President of the United States, Franklin Roosevelt employed his prestige, authority, and influence to bring about authorization of water-conservation projects which would combine maximum development of resources with a sharing of the benefits of this development among the entire population. Should a great river be the

property of a single absentee-dominated corporation or should it be the possession of all the people, developed in their interest and welfare by their Government—with power revenues used to finance such benefits as flood control and irrigation of land? This is a crucial question.

In such a clash of philosophies, the views of Franklin D. Roosevelt stand in direct contrast to those of his present successor in the highest elective office of the Free World.

PRESIDENT INSPIRED CONSERVATION EFFORTS

I never knew Franklin Roosevelt intimately. Through the kindness of Mrs. Roosevelt and others, I was privileged to talk with him occasionally. I was then a young journalist specializing in books and articles about conservation and related matters. I always found in the President a source of inspiration to press forward harder and more tirelessly on this vital frontier. Others have told me of similar experiences. Senator LYNDON B. JOHNSON has said that Franklin Roosevelt instilled in him an awareness of the vital importance of water to his arid State of Texas. I have heard from Tom Corcoran, Judge Rosenman, and Ben Cohen of FDR's constant insistence upon the benefits of natural resources being widespread among all the population, instead of narrowed to a powerful few. Oregon's Senator Charles L. McNary, although the Republican leader in the Senate for many years, once remarked to me, "You know, President Roosevelt is a whole lot more familiar with what needs to be done on the Columbia River than are a lot of our own folks right here in the Northwest."

F. D. R. had read his history, his geography, and his economics well. From an observation-car platform in Pendleton, Oreg., or at Boise, Idaho, he could talk more conversantly than some of the local people about the condition of the upland grazing range in that area or how the water table was faring in a year of limited snowfall.

ROOSEVELT CONSIDERED CONSERVATION NONPARTISAN

Although Franklin Roosevelt's faith in conservation was in sharp contrast to some of the exploitation tolerated today by those in charge of our Government, conservation was never to him a partisan issue. Under his aegis the United States Fish and Wildlife Service was originated, thus consolidating in one agency all governmental efforts directed toward a safeguarding of our big-game animals, of our migratory water birds, and of our fisheries.

Franklin D. Roosevelt's first appointment as the new Director of this great Agency was of a lifelong Republican—Dr. Ira N. Gabrielson, one of the Nation's most noted biologists in this field. F. D. R. wanted the best man available to be in charge of our animals and wild creatures. As F. D. R. realized, the man's political party had nothing to do with his knowledge of elk, his familiarity with the seals of the Probilofs, his ability to detect the safest nesting ground for ducks and geese. But we need only compare F. D. R.'s nonpartisanship in this respect with the fact that the present administration discharged the then head of the United States Fish and Wildlife Service when it entered office—not because of any incompetence upon the part of a faithful career servant, but merely because he happened to be registered as a Democrat.

For more than two decades prior to 1933, conservation enjoyed what some have called obscure respectability. The problems of resource use had not been forgotten, but adequate solutions had not yet been applied and many of these problems were becoming increasingly and painfully noticeable to more and more people. In philosophy and experience Franklin Delano Roosevelt was ideally equipped to spark what has since become known as the Roosevelt era in conservation.

CONSERVATION RECORD REVIEWED

I would like to review briefly just a few of his many other accomplishments while he held public office in New York State and during his historic tenure as President of the United States.

Between 1910 and 1914, Franklin Roosevelt was a State senator in the New York State Legislature and served as chairman of the senate committee on forestry. In 1912 he secured the enactment of two laws creating a yield tax provision for small forest owners. When we remember that forestry was just in swaddling clothes at that time, we can see how far Franklin Roosevelt was looking ahead in his effort to recognize the problems of the small timberland owner.

He did not return to State government until 1928 when he became Governor. Conservation was an important part of his legislative program. Governor Roosevelt supported continuation of a monumental study to determine what should be done about the submarginal farmlands of New York State, and under his leadership a constitutional amendment was adopted which provided for the acquisition of lands for timber-growing purposes outside of the Adirondack and Catskill preserves. This farsighted program resulted in New York State acquiring several hundred thousand acres of land better suited for forestry purposes than for farming or dairying. The State is dotted with these forests which are now producing timber and which also serve as demonstration forests, lighting the way toward better forest practices in the Empire State. While there are many people associated with that great effort, full credit must go to Franklin Roosevelt for the interest he showed in solving a critical problem. The land-management concept that was involved later came to be a Federal program when, under his leadership as President of the United States, the Bankhead-Jones Act was enacted.

There were other forward steps in conservation that Franklin Roosevelt took while Governor. Tree nurseries in the State were expanded in 1929. The activities of the conservation department were enlarged to provide for better information to the public on conservation and recreation. In 1931 the area in the Adirondack Park was increased from 3 million to 4.6 million acres. He also lent his support to a constitutional amendment, which was adopted by a vote of 3 to 1 by the people of the State, which allowed the State to incur debts to fight forest fires.

These are just a few of Franklin D. Roosevelt's many accomplishments for conservation in his 8 years in the State government. Because he practiced conservation principles in the management of his own forest lands here at Hyde Park, he knew intimately the problems involved in preservation of this natural resource. He successfully applied these principles through the machinery of State government. The additional training and experience that he received in these 8 full years enabled him to provide this Nation with his tremendous conservation leadership in his 12 years as President.

That the long-standing interest of Franklin Delano Roosevelt in conservation was not quickly devitalized by the far reaches of new political horizons, soon had abundant testimony.

Although much major forestry conservation legislation was already on the books before 1933, a major untouched field of development was land purchase for reforestation. In 1933, the first year of Franklin Roosevelt's administration, land purchase for this purpose jumped from 83,086 acres to 667,314 acres and in 1934 the figure was 4,206,817 acres. These amounts represent more than cold statistics. They are ample evidence of President Roosevelt's desire to protect our God-given resources.

In addition to this massive reforestation project, some 78 primitive wilderness areas, in total area about 14 million acres, were set aside by the Forest Service, thus permitting millions of Americans in future generations to enjoy the beauty of our great outdoors in its pure and undefiled original state.

RESOURCES PLANNING BOARD ESTABLISHED

Though planning is not in itself action, it may well be the basis of more effective action. The recognition of this truth by President Roosevelt was expressed in his continuing interest in the National Resources Planning Board, an organization established by the President in July 1934, to prepare plans of procedure "dealing with all aspects of the problem of development and use of land, water, and other national resources in their physical, social, governmental, and economic aspects."

In January 1935 the President was able to report to the Congress: "For the first time in our national history we have made an inventory of our national assets and the problems relating to them." And the President outlined the direction in which he hoped that the Nation would move in utilizing these resources:

"We think of our land and water and human resources not as static and sterile possessions but as life-giving assets to be administered by wise provision for future days. We seek to use our natural resources not as a thing apart but as something that is interwoven with industry, labor, finance, taxation, agriculture, homes, recreation, good citizenship."

This study represented a milestone in resource planning. Some of the fundamental studies are even now very nearly the only comprehensive factual surveys of parts of the field. In its entirely, it was a great influence in the promotion of integrated thinking and planning with respect to the interrelationships between all natural resources and between difference parts of larger regions.

In April 1935 the Soil Conservation Service came into being. During the 1930's, for the first time in our history, the Nation became thoroughly soil-conscious. The Roosevelt period provided much of the foundation of engineering design, conserving practices and grassroots growth of the program which had by the mid-1950's included nearly a half-billion of our acres and more than 1½ million farmer participants. This handiwork of Franklin Delano Roosevelt and Hugh H. Bennett is on our land, with us and our grandchildren, for scores of years, if not for centuries in the future.

SHELTER BELT PROGRAM INITIATED

Allied with the soil conservation efforts were the immediately acute problems of the Great Plains, especially during and following the major drought years of 1934 and 1936. In 1936, the President allocated to the Forest Service an initial $1 million of emergency funds for large-scale shelter-belt planting. As of June 1942, when the project was transferred to the Soil Conservation Service, some 18,600 miles of shelter belts had been planted with 30,000 farmers cooperating. Today the magnificent success of this program is widely acknowledged.

A major milestone in the development of public land policy for those areas chiefly suited for grazing was accomplished with enactment of the Taylor Grazing Act of 1934, a measure which permitted Federal regulation of grazing on public domain in the interests of national conservation.

Under Franklin D. Roosevelt's administration, a national flood-control policy and program were created and the groundwork was laid for the water pollution legislation enacted after his death.

America's national park system was greatly expanded during President Roosevelt's administration, a conservation achievement of marked significance today for millions of peripatetic recreation-seeking Americans. The President's words at the dedication of Shenandoah National Park illustrate his belief in the value of our national park system: "This park, therefore, together with its many sisters which are coming to completion in every part of our land is in the largest sense a work of conservation. Through all of them we are preserving the beauty and the wealth of the hills, and the mountains and the plains and the trees and the streams. Through all of them we are maintaining useful work for our young men. Through all of them we are enriching the character and the happiness of our people."

Under Franklin Roosevelt's leadership, further protection was extended to our wildlife through enactment of the duck-stamp bill, creation of game sanctuaries on all public properties, and conclusion of the Migratory Bird Treaty with Mexico supplementing a similar treaty with Canada.

INTERNATIONAL RECOGNITION ACCORDED

In January 1935 the President was awarded the Sir William Schlich Memorial Medal, which is made in rotation to five English-speaking countries in commemoration of a world-renowned British forester. In response to this international recognition of his effective work for forest conservation, he said in part: "A forest is not solely so many thousand board feet of lumber to be logged when market conditions make it profitable. It is an integral part of our natural land covering, the most potent factor in maintaining nature's delicate balance in the organic and inorganic worlds. In his struggle for selfish gain, man has often needlessly tipped the scales so that nature's balance has been destroyed, and the public welfare has usually been on the short-weighted side. Such public necessities, therefore, must not be destroyed because there is profit for someone in their destruction. The preservation of the forests must be lifted above mere dollars and cents considerations."

Like Thomas Jefferson, who was his idol, Franklin Roosevelt had a feeling for our land. It stirred him deeply. He once said, in a little speech in the Northwest, that every American lad should go out to the coast by train on the southern route and back by train on the northern route. This, continued Mr. Roosevelt, would afford that lad some appreciation of the vast dimensions and scope of the American Continent. Tales of the pathfinders of old fascinated Mr. Roosevelt—of Lewis and Clark and Fremont and Bonneville and Kit Carson. He knew about our Indians, and his keen sense of injustice was prodded by his historic awareness of the injustices committed by the white invaders against that sublime and noble race. This was why men with real social consciences, men like John Collier and others, served as Commissioners of Indian Affairs when Mr. Roosevelt was President.

"O beautiful for spacious skies, for amber waves of grain—for purple mountain majesty above the fruited plain"; these were more than mere words to Franklin Roosevelt. Exactly 20 years ago, back in 1937, I rode with him on a special Great Northern railroad train over the Washington State uplands which led to the settlement of Ephrata, where he would disembark for an automobile ride with Senators Bone and Schwellenbach to the site of Grand Coulee. The President pointed to the snow-tinted pinnacles of the Cascades at our back, to the gaunt swales of sagebrush billowing all about the railroad right-of-way.

ROOSEVELT SERVED AS EDUCATOR

"Just imagine," said he, "water can make this desert bloom like the Garden of Eden. Orchards and alfalfa and row crops can grow here, if only we use water wisely. That is what I am trying to do, if the people of this country will help me to accomplish it."

He went as fast as the people would let him—occasionally a little faster. He served as an educator, too, and he constantly related to his fellow Americans of what had happened to civilizations which had wasted water, plundered forests, and slaughtered wildlife. He had a respect for government. He did not deride it, as some in our time are prone to do. He saw the wisdom lurking in John Muir's famous remark that "while only God can grow a tree, only Uncle Sam can save a tree." And Franklin Roosevelt did not want Uncle Sam to get into the hands of the wrong people. He knew that no trees, or other parts of our heritage, would be saved then.

He is gone now, and his task has become ours. In this quiet grave of stately trees—trees which saw him grow to manhood and which will be growing when we, too, are gone—let us join with Mrs. Roosevelt in pledging ourselves to a preservation of his ideals. This, of course, will mean a preservation of the resources which are our legacy and those of the future generations who will come after us. Our chief obligation to Franklin Roosevelt is not to eulogize him in words but to perpetuate his program in deeds. Perpetuation of his program, in time, will perpetuate in wise and careful custodianship the water and scenery and forests and animals of this magnificent domain we are privileged to inhabit.

Good Government Is the Issue

EXTENSION OF REMARKS
OF
HON. FRANK T. BOW
OF OHIO
IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 5, 1957

Mr. BOW. Mr. Speaker, in our concern with the immediate problem of effecting economies in the appropriations bills, we should not overlook the long-range benefits to be gained by adopting the recommendations of the Hoover Commission. Our able colleague, the gentleman from Ohio [Mr. BROWN], who was one of the sponsors of the legislation establishing the two Commissions on Reorganization of the Executive Branch of the Government, and who served with distinction on both Commissions, delivered an excellent address on the subject at the Third National Reorganization Conference, sponsored by the Citizens Committee for the Hoover Report. Under leave to extend, I offer Good Government Is the Issue by our colleague:

GOOD GOVERNMENT IS THE ISSUE
(By the Honorable CLARENCE J. BROWN)

I want to congratulate, first of all, the Citizens Committee for the Hoover Report for the splendid work it has done throughout the last few years. You have done a grand job. You have alerted a great many people to the fact that there has been a commission or two commissions operating in Washington to look into the affairs of government and to attempt to obtain greater economy and efficiency in the conduct of public business.

Yet, sometimes, I cannot help but wonder just how well the people have been educated by your efforts. I receive a great many letters in my office as a Member of Congress relative to the Hoover Commission reports; letters which indicate the writers do not know much about the Commission's recommendations, except that they favor them, because they think their tax money may be saved.

I even get some such letters once in a while that hurt me just a bit—letters, even from my district, which demand to know just where I stand on Hoover Commission recommendations. When I reply, I always include a form paragraph which reads something like this:

Inasmuch as I originated the idea of the two Hoover Commissions, personally wrote, sponsored, and guided through Congress the legislation which created both Hoover Commissions; served as a member of both, helped prepare and write all of the recommendations made by both, and now sit on the committee in Congress which must pass upon most of such recommendations when they come before Congress—I can assure you that I do have some little interest in the Hoover reports and the recommendations contained therein.

It is just over 10 years ago—10 years this month—that I introduced in the House of Representatives, and then later Senator Lodge introduced the same bill in the Senate, the bill which created the first Hoover Commission.

I am rather proud of the structure of that Commission and the ideas behind it. It was like nothing ever created, or which ever existed in the past. No other commission had ever been established like the Commission on Organization of the Executive Branch of the Government. It was a bipartisan Commission, 12 members, resembling the jury system which we value so highly in this country. Six members were from private life and six from public life. Four were selected by the Speaker of the House; four by the President of the Senate; and four by the President of the United States. So no one controlled the Commission.

That Commission, like the second one, labored hard and long in a nonpartisan way to make a series of recommendations for obtaining the greater economy and efficiency in government which we sought.

I would like to say here, if I may digress for a moment, that there was never a single division within the Commission along partisan lines, with the Democrats on one side and the Republicans on the other. Never was there a division between the civilian representatives on the one hand and those of us who were in public office on the other.

There were great differences, I think you should bear in mind, between the objectives and authorities of the two Commissions. The first Commission was authorized and directed to serve as an arm of Congress, not of the President, to chart better organization in the executive branch.

President Hoover was elected as Chairman of both Commissions by the Commissions themselves. He was not appointed by anyone. Those of us who were members of each Commission agreed unanimously that Mr. Hoover was the one man best qualified to head the Commissions, and to give to them his great prestige, wisdom, and leadership.

As I have said, we were confined, in the first Commission, to going into matters of organization only, to determine how to achieve a better organization, and a more efficient and economical organization, in the executive branch of the Government.

The second Commission was authorized not only to go into matters of organization, but also into questions of policy. There is a great difference between the two. We

found out in the first Commission that it was not enough just to go into the matter of organization, but that we should also look into the factors that made an organization bad—in other words, some wrong or foolish policy that had been put into effect in the past.

To explain it another way, if the first Commission found the Government operating a barber shop somewhere, our group was limited to giving its suggestions as to how best the Government could operate a more efficient, more economical barber shop. But the second Commission had the authority to say: "You should close this barber shop; the Government ought not to be in the barbering business."

I have learned in my rather long and busy career in public life that you must always seek and know the facts. Let me say to you now, that I am not happy at all with the progress that has been made, and is being made, in effectuating the various recommendations of the Hoover Commission.

True, about 75 percent of the recommendations of the first Commission has been made effective, with savings estimated at from 2 to 3 billion dollars a year.

But the potential savings, if the recommendations of the second Commission are effectuated, are beyond the power of any of us to comprehend. The estimates—depending on the way matters are handled and how many recommendations are adopted—run anywhere from $5 billion to as high as $15 billion annually, and that is a lot of money.

We have saved 2 or 3 billion dollars a year as a result of the work of the first Commission. We are saving several hundred million annually now from effectuating the recommendations of the second Hoover Commission. Yet I wonder where the money we have saved has gone, because we are faced today with a Federal budget that is the highest in all our peacetime history. Virtually every year we have watched the cost of government going up, notwithstanding, and regardless of, the Hoover Commission recommendations. Sometimes I become a bit frustrated, and just a little provoked—if I may use such words—with the fact that somehow or other the spenders seem to be able to get rid of the taxpayers' money faster than we can save it. There is something for all of us to think about.

Now I want to bring up to date what has been done in connection with the second Commission's recommendations. The Commission made 314 or 306 recommendations, according to the way you figure. According to the executive branch of the Government, we made some 479 recommendations, and I understand that since I obtained this information they have broken down the recommendations further to 491.

Of the 479 recommendations that were considered as dealing with the executive branch of the Government, as of last week only 189—or 39 percent—have been, and I quote, "accepted wholly or with minor modification" by the administration and the departments and agencies within the executive branch. Thus far, approximately one and a half years after the reports were issued, only 59—or 31 percent of those recommendations adopted by the agencies—have been implemented. Another 71—or 38 percent—are reported to be what they call, and I quote, "in process of implementation."

Some of us who are veterans on Capitol Hill have had a lot of experience with this process of implementation. It is a long, drawn-out, endless procedure that somehow never gets completed.

The departments and agencies have accepted, and again I quote, "partially or as to objective" the remaining 290 recommendations.

Personally, I do not believe it should take anybody over 2 minutes to accept as an objective the idea that we should have greater economy and efficiency in the conduct of public business. I cannot give much credit for that great decision, since only 11 of these recommendations have actually been put into effect—with an additional 52 reportedly "in process of implementation."

Stating it another way, the executive branch has adopted a total of 70 recommendations and is in the process of activating 123 additional recommendations in whole or in part. Assuming 100 percent completion of this endeavor, a total of 193 recommendations, representing 40 percent of the Commission's work, will have been placed in effect. Our job concerns the balance of 286 recommendations which seem to have fallen by the wayside.

Let us examine the record in more detail. If we assume for the moment that a 40-percent accomplishment is the record to date, let us see if this points to the way in which further progress may be accomplished. The greatest numerical progress has been achieved in accepting the reports on depot utilization and research and development, both of which are more than four-fifths completed. I must add, however, that both of these topics have been the subject of extensive hearings in Congress.

The paperwork recommendations fall next in line. I am told the agencies are making very comfortable progress in this field. Next we find that consideration of the food and clothing report is 73 percent completed. I need not remind you of the impetus given the acceptance of these recommendations by the famous "hamburger hearings," in which I had the great pleasure of being the chief cross-examiner. A great many faces became redder than the hamburger or the catsup involved before we finished.

Consideration of the budget and accounting report is 65 percent complete, after some very fine work by the committees of the 84th Congress. I was a member of the committee which considered the series of bills implementing the recommendations of this report. We did not get all we wanted, but we came out with a bill that at least is a good start toward forming sound budgeting and accounting practices in the Federal Government. Our hearings indicated that it will take several years to fully implement this splendid legislation.

But we at this conference are principally interested in areas where little or nothing has been accomplished. I was sorely disappointed to learn that 11 recommendations of the overseas economic operations report are still under review.

Only meager progress is reported on the findings of the task force on legal services and procedure, and the devoted work done by the water resources and power groups. Only 20 percent completion is reported on the suggestions for reducing expenditures in the field of medical services. The report on business enterprises relating to Government competition with private industry—about which we have heard so much—shows an acceptance factor of only 20 percent, not 100 percent as it should be.

Even more surprising, since it represents probably the greatest potential money saver of all, is the fact that only one-fourth of the recommendations on the business organization of the Defense Department has been put into effect. This report was compiled by a committee headed by Mr. Charles R. Hook, of Middletown, Ohio. No man has contributed more to his Government, or to the efforts of the Hoover Commission, than Mr. Hook. He is not only a great businessman; he is a great leader and a great American.

Most of us know that a great many recommendations by the Hoover Commission can be put into effect through executive or administrative order. Others require legislative action. Some require both executive and administrative orders and legislative action.

The President, in my opinion, has endeavored and attempted in every way possible to cooperate with the Hoover Commission and to put into effect the recommendations which we have made that are subject to executive or administrative order. However—and I am speaking very frankly; for some people may not like it, but I do not particularly care—I am certain there are many within the administration who are only giving lip service to these recommendations.

These people may tell us, "Oh, yes, we are working on it; we are very interested," but they actually are attempting to submarine these recommendations because it disturbs the status quo and the way things have always been done. It remains for Congress and its various committees, and for organizations such as the Citizens Committee for the Hoover Report, to put what we sometimes describe in rough parlance as the "heat" on some of these agencies to see that they do what they are supposed to do.

There are many dedicated men and women in Congress who have set as their goal the introduction, sponsorship, and passage of legislation that will meet the legislative responsibility in connection with these recommendations. It is a big job. It is going to take a lot of time. But inasmuch as the second Commission deals with matters of policy, we have found that when you get into the field of policy, you also enter the field of controversy.

I think we should consistently bear in mind that there is nothing sacred or sacrosanct about the recommendations of the Hoover Commission. If the Congress or the President or the head of any executive agency can come up with some idea, some plan or program, that will better accomplish the desires and objectives of the Hoover Commission, and do a better job than the Commission's recommendations, in obtaining greater economy and efficiency in the Government, then we can only say, "God bless you."

Those of us who served on the Commission for 4 long years—as I did—and others who served for only 2 years, realize that all of the wisdom in the world was not incorporated in our particular group. After all, what we tried to do was set goals which we should strive to reach as a self-governing people.

If there are better ways, or shorter ways, to reach these goals let us hear of them. Otherwise let us get behind these recommendations of the Hoover Commission and, to the best of our ability, see to it that the Congress and the departments and agencies of the executive branch put them into effect.

Commencement Address by Hon. Lister Hill, of Alabama, at the University of Kentucky

---

EXTENSION OF REMARKS

OF

HON. JOHN SHERMAN COOPER

OF KENTUCKY

IN THE SENATE OF THE UNITED STATES

Wednesday, June 5, 1957

Mr. COOPER. Mr. President, on May 27, 1957, the senior Senator from Alabama [Mr. HILL] delivered an address at the commencement exercises of the University of Kentucky, at Lexington. The senior Senator from Alabama is held in high regard in Kentucky, and the people of my State were glad to welcome him.

I ask unanimous consent that the text of the very inspiring address he delivered be printed in the CONGRESSIONAL RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY HON. LISTER HILL, UNITED STATES SENATOR FROM ALABAMA, COMMENCEMENT EXERCISES, THE UNIVERSITY OF KENTUCKY, LEXINGTON, KY., MAY 27, 1957

May I express my deep appreciation for the honor that Dr. Dickey has done me in asking that I speak to you today. It is always a privilege to speak in Kentucky, so glorious in her history and so rich in her contributions to our Nation. But this is a particularly auspicious day—auspicious because you, our young friends of the graduating class, go forth to launch your careers and to begin your life's work; auspicious because the University pays tribute to a great son of Kentucky and of the Nation, my cherished friend, the late Alben W. Barkley. Today you receive his personal papers—intimate and priceless record of so much of the history of our time. Here these papers will be preserved and studied for our benefit and the benefit of future generations.

Alben Barkley was truly a citizen of this century. His political life began literally in the horse and buggy days. It ended in the nuclear age.

Alben Barkley's time overlapped four historic periods in the development of our Nation:

First, America's coming of age with Woodrow Wilson, when a people became conscious of their destiny and their leadership in the family of nations.

Second, the days of the great depression, when it was demonstrated that in time of domestic crisis a vigorous, determined Government can act to protect the people from stagnation, and despair, and needless suffering.

Third were the years of World War II and after, when America used her might to beat down the totalitarian enemies of the free world and then to hold back those who sought world domination by infiltration, subversion and cold war.

And finally, he lived into the age of nuclear energy, of flight faster than sound, of man's first tentative thrust into outer space with the building of the earth satellite.

Alben Barkley was at home in all these times. He retained always the resilience of youth, the zest for new things, the willingness to try uncharted paths. He looked always to the future.

This man lived for us in our time the sturdiest, the most romantic tradition of American political life—the rise from humble and unlovely beginnings to power and international fame. He was born in a log cabin. He worked long and hard on the farm. As he said, he "did man's work at a boy's age." He put himself through college. He became successively county prosecutor, county judge, Congressman, Senator, and Vice President. Like that other immortal Kentuckian, Henry Clay, his name outshines many of those who have held the office of President of the United States.

Alben Barkley had his moments of disappointment and sorrow. But he knew that only the stream impeded has a song. To him, the test was not that he always should win, but that he should carry on. When he lost, he never complained. He met disappointment with determination, and defeat with renewed vigor. His sense of justice, of the eternal fitness of things, never failed him.

In his autobiography, Alben Barkley declares:

"For my part, every time I get to taking myself too seriously, I remind myself of several stories.

"One was told me by a prominent Englishman, who was explaining to me why governmental problems are more complex in the United States than in his country. 'There are at least 57 varieties—like those famous pickles—of you Americans, and every one of you has different ideas,' he said. 'In my country there are only 4 kinds of people with 4 ideas. There are the Scots, who won't wear rubber heels because they give. There are the Welsh, who pray on their knees—and prey on everyone else. There are the Irish, who don't know what they want and are willing to fight for it. And finally, there are the English, who are self-made and worship their creator.'

"The moral, so far as I am concerned, is that every time I get to thinking of myself as a self-made man, I remember not to get too enthusiastic about my 'creator.'"

Thus did Alben Barkley laugh at himself. But he did not laugh at other men. He was too sensitive of the feelings of others, too understanding of human nature, too loving of his fellow man. He laughed with people. He broke their tensions. With his rich fund of stories and his inimitable humor he brought joy and delight to their hearts.

Sir James Barrie tells us that courage is the lovely virtue—the rib of Himself that God has sent down to His children.

Of all the great qualities of Alben Barkley, perhaps the most notable were his courage and his integrity. Throughout his life there runs the shining thread of his courage, his deep sense of personal integrity.

Alben Barkley's courage carried him to a place among the leaders of our Nation. And where he felt his integrity was at stake, Alben Barkley with courage put aside all personal considerations.

During much of his life in Washington, Alben Barkley was the stanch ally and confidant of Franklin D. Roosevelt. In his autobiography he tells the story of his break with President Roosevelt over the tax bill in the spring of 1944. He tells of the President's veto of the tax bill. And of his stinging reply on the floor of the Senate to the veto message, which he felt was a calculated assault upon the legislative integrity of the Members of Congress.

Alben Barkley's courage led him into the break with Franklin Roosevelt. His integrity led him to follow it through, whatever the cost.

In his reply to the veto message, Alben Barkley declared: "There is something more precious to me than any honor. This is the approval of my own conscience and my own self-respect. That self-respect and the rectitude of that conscience I propose to maintain."

The speech may well have cost Alben Barkley the Presidency of the United States. For these words were spoken a few short weeks before the 1944 Democratic National Convention. Alben Barkley knew that the time was too short to heal a breach and open the way for his nomination as the Vice President, the nomination which led to the Presidency. Above this honor he placed his integrity, his self-respect.

But Alben Barkley did not have it in his heart to harbor ill will toward any man. The old friendship for President Roosevelt was still in his heart, and throughout the war years and up to the time of Roosevelt's death he continued to be the President's strong right arm on Capitol Hill.

The lessons we learn from the life, the character and the service of Alben Barkley are many. But one central fact stands out.

In a sophisticated age, he was not afraid to be himself. He treasured the homely virtues of truth and honesty, of courage and forthrightness, of humility and love of his fellow man. Because of his belief in these old and homely virtues, Alben Barkley was at home in any time and any place. Seated on a rock for Thanksgiving dinner with the GI's in Korea, in the company of princes and heads of state, in the bosom of his family, this man bore always the sterling stamp of his pioneer Kentucky folk.

We know that Alben Barkley left the company of living men while addressing the students of Washington and Lee University. This was most fitting. He loved young people, for he was ever young in mind and spirit. He saw in the young the hope and promise of the future. As a true patriot, he went to that great source of patriotism—the enthusiastic spirit and idealism of young men and young women.

As you young people today go out into the great adventure—life—you feel, perhaps, like many other young people that you have missed something exciting by being born in the 20th century. The frontiers, you feel, have disappeared and with them—adventure.

True, there is scarcely a spot on the globe that has not been discovered and charted. But the days of adventure are not past. Never has there been a time in our history when the Nation so greatly needed the pioneer.

Ever present, ever more challenging, is the intellectual frontier. For as we seek new raw materials and new sources of energy, we must delve deeper into the earth's crust and ever outward into space; we must look deeper into the heart of matter and its nuclear secrets. And, as we seek within man himself greater understanding of his being, we must search relentlessly into the human mind.

Bold new adventures lie before us—in the field of medicine, in scientific advancement and engineering, in teaching, in business, in industry and agriculture, in politics and public affairs, and in the building of the peace of the world.

We stand today at the threshold of a golden age of medicine. I predict that within a few short years the world will see a tremendous breakthrough of medical knowledge that will enable us to overcome the dread diseases that have plagued and baffled mankind through the ages. There is reason for confidence that this breakthrough will yield the answer to heart disease, cancer, mental illness, the virus diseases, and the many other crippling and degenerative ailments.

The Salk vaccine has given at last the means for wiping out poliomyelitis in its dread forms. We have radioactive isotopes, antibiotics, multiple vaccines, new drugs and chemicals, and diagnostic tests. Dramatic new tools are now in use or near practical application.

With these tools the hopes and dreams of today can become the realities of tomorrow.

The breakthrough of knowledge will not come from any one discovery. It will be the accumulation of many discoveries. And from you who go forward in the study of medicine—or in chemistry, physics, biology, engineering—from you may come the overlooked fact, the vital unnoticed clue, that causes a host of other facts to fall into place. And brings another sensational step forward.

It has been said that science has compressed into the past 50 years more advances than the previous sum of all man's scientific achievement.

The advance of science and technology unfolds new wonders to this world of ours. It holds out new opportunity and new adventure for you.

Today science and technology serve us in almost every phase of daily living. They produce the food we eat and the fiber we wear, purify the water we drink, and in some localities even cleanse the air we breathe. They are present in industry with new materials, automation, and new equipment for productivity. They form the foundation stone of national defense and our international relations.

Before us lie further developments in nucleonics, electronics, aerodynamics, and other fields. Even as we seek full knowledge

of atomic energy and its constructive uses, man turns to renewed study of solar energy, and the life-giving effects of the light as well as the heat of the sun.

The march of science, the amazing economic growth, the needs of national defense, the increasing complexity of the world we live in have combined to generate a rising demand for trained and skilled people in the United States.

World disorder has forced us to adopt a radically different and a higher concept of defense, employing the most terrible and costly weapons that man can devise, yet we have been willing to limp along on an educational system that is wholly inadequate to turn out sufficient numbers of highly trained citizens and to meet the multiplied demands for moral discipline and for wisdom in great affairs.

The hour demands a radically different and higher concept of education, and a far greater support for our schools, colleges, and universities.

To attract workers industry is spending millions of dollars in newspaper advertisements and sending swarms of recruiters to the campuses of our colleges and universities.

Behind this need for trained manpower lies a more fundamental need—the need for more teachers.

Record school enrollments, and college enrollments which are expected to double by 1970, further accentuate this need.

Teachers are our seed corn of knowledge. We are told that to assure the succeeding harvests of trained young men and women 1 out of every 12 trained persons must be retained for teaching.

In recent years we have been in danger of consuming our seed corn. The shortage of trained people has drawn many teachers out of education and into business and industry.

I have worked with and for teachers for many years. I know the fulfillment that comes with the giving of themselves for the knowledge, the guidance, the inspiration they impart to others. But the teacher, like the rest of us, is human. He has human wants and needs that must be met.

The teacher, in this era of remarkable contrasts and swift change, must be assured of opportunity for continued study and educational growth. Salaries must be high enough to enable the teacher and his family to enjoy a good standard of living, know recreation and travel, and look forward to security in later years.

The Nation must recognize the essential worth and dignity of the teacher. The Nation must realize it is the teacher who nurtures our national destiny.

Here in Kentucky, we see a new day of industrial growth and diversification. This new day gives encouragement to business initiative. It offers opportunity to young men and women in commerce, in production, in distribution, in business management.

You know Kentucky's natural resources. In the production of coal your State is third in the Nation; in production of fluorspar second only to Illinois; it is well endowed with natural gas, petroleum, lead, zinc, and refractory clays. Nearly half of Kentucky's land area—11 million acres—is covered with rich hardwood timberland, a resource that replenishes itself year after year through the selective cutting of your lumber industries. Kentucky burley tobacco is famous and is enjoyed throughout the world.

Upon the foundation of these God-given resources, Kentucky is now building a mighty structure of business, industry, and agriculture. At Paducah the billion dollar atomic energy installation with TVA power has brought new jobs for Kentucky workers and new markets for Kentucky coal and other products.

Kentucky has seen a phenomenal growth in new and expanded industries. Aluminum, steel, chemicals, plastics, electronics, synthetic rubber, glass fiber—these and many more have strengthened and prospered your economy.

Kentucky's splendid growth is an inspiration to all the South. But the very magnificence of her achievement presents a challenge, and particularly a challenge to you young graduates.

With all her progress, Kentucky ranks 43d in per capita income. The South's per capita income is still only 70 percent of the national average. The leading southern State in per capita income ranks only 24th among all the States.

This is a challenge you cannot refuse. Kentucky's proud record of progress demonstrates to you what can be done. The South's young people no longer need migrate to other States to find opportunity and success. Kentucky has cradled you, reared you, educated you—here in Kentucky you can find endless opportunity to use your knowledge, your skills, your training to serve her, while you build your own future.

Today, my friends, we look upon a world, ever new, ever changing, ever bright with opportunity and challenge. In this world one task compels us all, the building of a lasting peace.

We have fought two world wars to bring peace. We have poured out our blood and our treasure. We have shared our wealth, our goods, our resources to rebuild our allies shattered by war. We have stood guard for the free world to preserve an uneasy peace.

Now, new compulsions for men to live without war press upon both sides of the Iron Curtain. The United States and Russia have the atomic means to destroy each other. War within the next decade will mean guided missiles that can travel into space at 16,000 miles an hour and plummet to the other side of the earth, blasting the largest city to atomic dust—or worse, spreading death from bacteriological warheads.

There are signs that even the masters of the Kremlin shrink from bringing such searing, deadly war to this planet. But we must not be misled into false security. The end to danger is not in sight. America must stand strong—flexible in her ability to meet massive attack or the corrosion of minor conflicts. America must hold fast to her historic allies. America must continue to strengthen her friends among the newly independent nations.

Let us look with the eye of history on the events of the past decade. The problems of world politics in this period are the birth pangs of a new world community that must—of necessity—be born. The shape of this world community will depend so much upon the courage and determination, the leadership and vision that we of our Nation give. We are the leader among nations. We must measure up to the demands and responsibilities of leadership.

My young friends of the graduating class, this hour I bid you—whatever may be your life's work—go forward, play your part in public affairs, be leaders in the building of the peace of the world. Go forward with the qualities that were ever Alben Barkley's. Go forward with his untiring dedication to duty, his understanding and sympathy, his skill at bringing agreement among men, his steadfast courage to fight for the right, his love of country.

Go forward, not with the sickly complaint of Hamlet, "The time is out of joint. O cursed spite, that ever I was born to set it right." But rather in the spirit of Rupert Brooke, the Christian Crusader, who gave his life to set men free, and who declared, "Now God be thanked who has matched me with His hour."

SENATE

THURSDAY, JUNE 6, 1957

Rev. C. T. Morris, St. Mark's Methodist Church, Houston, Tex., offered the following prayer:

Our Heavenly Father, we thank Thee for Thy great guiding influence, that, in spite of our differences, our partisanship, and our sectarianism, has molded us into "one Nation, indivisible, under God, with liberty and justice for all." Bless this body of dedicated men who labor here from day to day for the common good of the millions of souls Thou has trusted to the care of our Government; and grant us this day Thy peace, we pray in Jesus' name. Amen.

THE JOURNAL

On request of Mr. JOHNSON of Texas, and by unanimous consent, the Journal of the proceedings of Wednesday, June 5, 1957, was approved, and its reading was dispensed with.

MESSAGES FROM THE PRESIDENT—APPROVAL OF BILLS

Messages in writing from the President of the United States were communicated to the Senate by Mr. Tribbe, one of his secretaries, and he announced that on June 5, 1957, the President had approved and signed the following acts:

S. 93. An act for the relief of Dominic Paul Steinhauser (Hiroshi Tsuruda);

S. 687. An act for the relief of Stylianos Lecomples;

S. 696. An act for the relief of Alecos Markos Karavasilis; and

S. 797. An act for the relief of John Leary.

MESSAGE FROM THE HOUSE—ENROLLED BILLS SIGNED

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the President pro tempore:

H. R. 790. An act to amend the Legislative Appropriation Act, 1955, with reference to official office expenses of Members of Congress;

H. R. 2493. An act to authorize the Secretary of the Interior to permit the construction of a bridge and road across Chincoteague National Wildlife Refuge, and for other purposes;

H. R. 4136. An act to extend the period within which Export-Import Bank of Washington may make loans;

H. R. 5110. An act to amend the Federal Property and Administrative Services Act of 1949, as amended, and for other purposes; and

H. R. 7234. An act to fix the responsibilities of certifying officers and disbursing officer of the Library of Congress.

COMMITTEE MEETINGS DURING SENATE SESSION

On request of Mr. JOHNSON of Texas, and by unanimous consent, the following

committee and subcommittees were authorized to meet today during the session of the Senate:

The Foreign Relations Committee;

The Subcommittee on Roads of the Committee on Public Works; and

The Judiciary Subcommittee of the Committee on the District of Columbia.

TRANSACTION OF ROUTINE BUSINESS

Mr. JOHNSON of Texas. Mr. President, under the rule, there will be the usual morning hour, for the introduction of bills and the transaction of other routine business. In that connection, I ask unanimous consent that statements be limited to 3 minutes.

The PRESIDENT pro tempore. Without objection, it is so ordered.

VISIT TO THE SENATE BY MEMBERS OF THE SENIOR SUNDAY SCHOOL DEPARTMENT, ST. MARK'S METHODIST CHURCH, HOUSTON, TEX.

Mr. JOHNSON of Texas. Mr. President, seated in the gallery today is a group of fine young men and women of whom I am very proud. They are the members of the senior Sunday school department of St. Mark's Methodist Church, of Houston, Tex. Their leader—the Reverend C. T. Morris, who now sits by my side—delivered the prayer that opened today's session of the Senate.

I met with them this morning, and it gave me a deep sense of pride to welcome them to the United States Senate. They are the type of young people who justify the confidence that America has in the future.

To them—and to their parents—I extend the best wishes of all of us.

I ask unanimous consent that a list of those present from St. Mark's Methodist Church be printed in the RECORD.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

ST. MARK'S METHODIST CHURCH, HOUSTON, TEX.

In the group coming to Washington are:

Rev. John D. Davey, minister of education (in charge of the group).

Counselors: Mr. E. R. Beadle, Mrs. L. E. Froehner, Mrs. B. E. Loeffler, Rev C. T. Morris, Mrs. Billy M. Thompson.

Young people: Juanece Atteberry, Ritchie Atteberry, Verna Bertucci, Rhea Jean Brogden, Jeanne Broker, Ella Lee Campbell, Joan Castle, Marilyn Froehner, Mike Gebhardt, Gary Homburg, Sylvia Hughes, Carol Keen, John Klepper, Bonnie Knepple, Barbara Gail Kobs, Ann Maresh, Virginia Massey, James Mooney, Arlie Alice Moore, Tommy Morris, Beverly Nixon, Allen Norton, Margaret Nunez (president), Karey Patterson, Bettye Pfeffer, Carol Phillips, Carolyn Prince, Mary Pruett, Mary Standish, Richard Wagenhauser.

FLOOD DEVASTATION AT LAMPASAS, TEX.

Mr. JOHNSON of Texas. Mr. President, the grim reality of flood can be appreciated only by those who have lived through it.

Last week's issue of Newsweek carried an article on the city of Lampasas, Tex., one of the worst-hit towns in my State. It it a story of devastation and of courageous people who are determined to stick it out and to recover.

I want my colleagues to have a vivid picture of the kind of people who would be saved from disaster by the projects which so often are sneeringly called "pork." I ask unanimous consent that the article written by Simon Bourgin, of Newsweek's Los Angeles bureau, be printed in the RECORD, as part of my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DROUGHT, FLOODS, TORNADOES: A TOWN TAKES A BEATING

(EDITOR'S NOTE.—For weeks, the weather in the American Southwest has been the worst on record. And the hardest hit of all the Southwest States has been Texas. First, Texas suffered its most severe drought since 1670. Then came floods (the State is having the wettest weather in more than 50 years) and tornadoes. In a year that may well go down as the most tornado-ridden in history, Texas recorded 20 or a single day last week alone. How do people stand up under such repeated assaults? For the answer to this question, Simon Bourgin, chief of Newsweek's Los Angeles bureau, gives an on-the-spot report on one of the worst-battered towns in all Texas, the community of Lampasas.)

The remarkable thing about Lampasas, Tex., last week was the tone of ferocious optimism of its people: The lost-nerve optimism of people who have no place to go but up.

If you wanted to ask the question, how much disaster can a town take, Lampasas had the answer: Just about any amount if its people keep their nerve.

Through its 101-year history, Lampasas has known its highs and lows. Once it was called "The Saratoga of the Southwest" because of its red-plush, 24-hour-a-day gambling facilities and its sulfur springs; and once it boasted the longest frame building in the United States—325 feet—where the Texas Democratic convention of 1892 was held. Nowadays, it serves principally as a market place (population: 5,000) for the livestock raisers of the surrounding ranches.

Like many another town in central Texas, for almost 8 years Lampasas had been scraping through the worst drought of its recorded history. The cattlemen had used all their cash reserves long since; they were mortgaged to the last nickel. Many of them were holding down jobs at nearby Fort Hood, while their wives worked the ranches; the banks could extend no more credit. Lampasas was about on its last legs.

Relief, when it came a few weeks ago, wore the face of disaster itself: Early in the evening of May 12, what seemed like a "wall" of water 15 feet high (it rose at the rate of a foot every 2 minutes) rolled through the town. Five persons were killed, damage was estimated at $3 million, 90 percent of the businesses in town were destroyed.

Next morning, the town knew the despair that only people who have been through disaster plied on calamity can know. (To add to their troubles, the looters had been out at dawn, stealing what they could.) Homes and stores were wrecked, meat was already rotting in the sun, most of the town was deep in what one Lampasasan called "the slickest, slimiest, nastiest damned mud you ever saw." This was the penalty of living along a stream called Sulphur Creek. This, thought most of the town's citizens, was the end.

One merchant after another looked on the wreckage of his business:

Grocer Fred McDonald found his store washed from its foundations.

Chevrolet dealer Gar Wood Burns lost his stock of nine new—and uninsured—cars. (Most dealers buy on terms, which include insurance; Burns had paid cash.)

A. Boone Chastain, of the Chastain-Miller Department Store, who had already twice lost his business (once to a tornado, once to fire) was completely wiped out again.

The town was a shambles, and at first the townspeople were almost apathetic; they couldn't get going.

"They didn't know what to do," said Ryan Howard, Lampasas insurance agent and rancher. "They knew they had to get the mud out of their places. I watched one fellow leaning on his wide-open store front—the glass was out—watching somebody else clean up. He just hadn't made up his mind what to do: Just leave the whole mess where it was, or start to work."

First things had to be done first, however, and help was already on the way; a bright, sparkling sun was rising in the blue and cloudless sky.

The Red Cross and the Salvation Army were already on the scene; special supplies of medicine had been rushed in and doctors from Temple, east of Lampasas, were preparing to give typhoid shots; the State highway patrol and soldiers from Fort Hood were patrolling the streets to halt the looting; the 35th Engineer Construction Group was on its way to town (also from Fort Hood) to help in the task of cleaning up.

In the morning, the sun began to dry the mud.

Hail the Army: By noon, canteens were feeding people in the streets. The Army was burying exposed meat, canned goods, and debris; they had started on the Herculean task of moving 10,000 truckloads of muck. (No praise could be too high for the Army in Lampasas.)

By evening of the first day after the flood, with hours of hard work behind them, the dead-tired mood of the Lampasasans had begun to change. (The author-editor Stanley Walker, who lives in Lampasas, once described the "peculiarly fine-grained type of citizenship" of his fellow townsmen.)

By the morning of the second day, people had had a little time to think things over. That morning, two Lampasasans met by chance in Elsasser's bakery.

"I hear that some folks are leaving," one said.

"That's a damned lie," said the other, a little hotly, "don't you go telling anyone that."

The task of cleaning up and rebuilding was interrupted by the melancholy chore of burying those who had been killed. There was sorrow, but it was the sorrow of life that can be borne.

As the days went by, Lampasas slowly struggled back to its feet; it was through these days that it developed its spirit of ferocious optimism—the feeling that nothing could stop it.

Financial help: The first aid given the town from the outside world had been to bind up its wounds from the flood; in the following days it got further aid to assure its recovery. The first came from the Federal Small Business Administration; then individual private corporations lent a hand.

By last week, most Lampasasans were concerned only with the future; the flood had not destroyed them.

One of the town's leading physicians, Dr. W. M. Brook, said: "Now, with the rains, it will take 4 years to get the debts paid, to get grass on the range, and put some money in the till. But nobody here is quitting. That's just part of living in Texas."

LEGISLATIVE PROGRAM

Mr. JOHNSON of Texas. Mr. President, I should like to make a brief announcement, for the information of the Senate:

Our workload on the floor of the Senate this year has been as heavy as is normal in the first session of a Congress. But in the days to come, the workload is going to be materially increased.

It is the hope of the leadership to have before the Senate, during the next week, the following extremely important appropriation bills; and I want this notice to appear in the RECORD, so that each Senator will have proper advance notice regarding the heavy schedule confronting us:

First, we hope to have the independent offices appropriation bill reported by the subcommittee tomorrow. The chairman of the subcommittee is the Senator from Washington [Mr. MAGNUSON.]

The Labor-Health, Education, and Welfare Subcommittee of the Appropriations Committee will report its bill to the full Appropriations Committee tomorrow, and we hope it will be promptly reported to the Senate. That subcommittee is under the chairmanship of the senior Senator from Alabama [Mr. HILL].

The District of Columbia Appropriations Subcommittee, under the chairmanship of the Senator from Rhode Island [Mr. PASTORE], reported the District of Columbia appropriations bill this morning to the full committee and the full Appropriations Committee has ordered the bill reported to the Senate. The hearings, the bill, and the report will be available to any Senator who may desire to receive them tomorrow.

The Agriculture Appropriations Subcommittee, under the chairmanship of the senior Senator from Georgia [Mr. RUSSELL] has already marked up its bill; and we expect the full Appropriations Committee to report it to the Senate tomorrow. The extensive hearings, the report, and the bill will be available to all Senators who may care to review them over the weekend.

We are hopeful that the Interior appropriations bill, under the chairmanship of the distinguished senior Senator from Arizona [Mr. HAYDEN], will be reported to the Senate in time to be considered next week.

So, Mr. President, in summarizing, let me say that we expect the Interior Department appropriation bill; the independent offices appropriation bill; the Labor-Health, Education, and Welfare appropriation bill; the District of Columbia appropriation bill; and the Agriculture appropriation bill to be reported to the Senate within the next few days.

In the meantime, let me say, for the information of the Senate, that hearings are being held in both the morning and the afternoon on the Defense Department appropriation bill; and there have been rather extensive hearings on the public works appropriation bill. It will probably take another 10 days to complete the work on the Department of Defense appropriation bill, and of course the Senate cannot act on the public works appropriation bill until it has been passed by the House of Representatives and until the appeals have been taken and the additional hearings have been held.

There are pending many general pieces of proposed legislation in which a great many Senators are interested.

I am hopeful that by the end of next week I may have for the Senate a report on the current status of the 146 various recommendations—some important; some not so important—which have come to the Congress from the executive branch of the Government, particularly from the President of the United States. I expect to make a report on that matter to the Senate in open session, so all Senators may understand the situation which will confront us in the days ahead.

Next week, I expect the Senate to meet early in the day, and perhaps to hold sessions each day of the week. I give notice now that if it meets with the approval of my colleagues the Senate sometimes will convene as early as 9:30 or 10 a. m., and the sessions will run until late in the evening, if that is necessary, in order to dispose of the appropriation measures before the end of the fiscal year.

I am expecting the Foreign Relations Committee to report, next week, the atomic energy treaty and the mutual aid authorization bill. Both the treaty and the authorization bill will require some debate.

Therefore, Mr. President, I want all Senators to be informed that although the Senate has not had many yea-and-nay votes on Mondays, and although it has not been necessary thus far—through June 6—to hold more than 1 or 2 night sessions, and although we have been able to accommodate our colleagues by not holding sessions on Fridays and Saturdays, those days are gone and forgotten; and—

> The bridge of the railroad now crosses the spot
> Where the old diving logs lie, sunk and forgot.

We are now entering a period during which the Senate will meet in the mornings and in the evenings and on Mondays and on Saturdays. So I hope all Senators will adjust their schedules accordingly.

I thank my colleagues for their indulgence.

Mr. THYE. Mr. President, will the Senator from Texas yield?

Mr. JOHNSON of Texas. I yield.

Mr. THYE. Mr. President, I think the schedule just announced is an excellent one, and I accept it with enthusiasm.

Mr. JOHNSON of Texas. Mr. President, my friend, the Senator from Minnesota, has already endeared himself to me by his generous consideration of my problems; and I must say that today I feel deeper in his debt than usual.

Mr. President, unless Senators wish to ask questions on this subject, I shall yield the floor.

Mr. WATKINS. Mr. President, I desire to join my friend, the Senator from Minnesota, in saying that the Senator from Texas has worked out a good program. It will be somewhat strenuous, of course. I have the feeling that I would have preferred to have had it stretched over the entire session, rather than to have it concentrated in a period of 2 months. Nevertheless, I am willing to cooperate as best I can.

Mr. JOHNSON of Texas. The Senator from Utah has always cooperated. I know he understands that except for the cooperation I have received from the leadership on his side of the aisle, including his own help, we would not be able to function with the efficiency and dispatch with which we have functioned. Of course, the constitutional requirement that all revenue measures originate in the House, and the interpretation which has been placed on that requirement with respect to appropriation bills, make it almost impossible for the Senate to give due consideration to those measures until and unless the House has acted on them. For that reason, the Appropriations Committee is unable to consider the general appropriation bills for the first 3 or 4 months of the session. After the Senate receives them, it takes several weeks for the committee to process them. In my judgment excellent progress has been made. So I commend all of my colleagues and express my gratitude for their diligence and understanding and for their dedication to the national good.

Mr. WATKINS. I did not hear any announcement as to the consideration of any other proposed legislation except appropriation bills.

Mr. JOHNSON of Texas. The Senator from Texas said he hoped to have a report from the chairmen of the various legislative committees on all the 146 recommendations the President in his wisdom has submitted to the Congress. When that report on the present status and what action is contemplated is received, the Senator from Texas will make the information available to his colleagues. I hope that may be the latter part of next week or the early part of the following week.

Mr. WATKINS. Am I to understand that action next week will be only on appropriation bills?

Mr. JOHNSON of Texas. Not necessarily. I do not want to be precluded from having the Senate take action on other bills. I hope to have the atomic energy treaty and the mutual-aid authorization bill ready for consideration, in addition to the five appropriation bills, which ordinarily have the highest priority.

The PRESIDENT pro tempore. Morning business is now in order.

IMPROVEMENT OF FEDERAL BUDGETARY PROCEDURE

The PRESIDENT pro tempore laid before the Senate a letter from the Director, Bureau of the Budget, Executive Office of the President, transmitting a draft of proposed legislation to insure greater consistency among Federal loan programs, to avoid hidden subsidies, and to achieve more effective coordination between Federal-loan programs and the

fiscal and credit policies of the Federal Government, which (with the accompanying paper) was referred to the Committee on Finance.

AREA REDEVELOPMENT—RESOLUTION OF PENNSYLVANIA SENATE

Mr. CLARK. Mr. President, I have the honor to inform the Members of this body that the Senate of the Commonwealth of Pennsylvania has adopted a resolution in support of a bill that the eminent senior Senator from Illinois [Mr. DOUGLAS] and 18 other Senators, including myself, have introduced to provide Federal assistance to areas of chronic and heavy unemployment. This bill, S. 964, is pending in the Banking and Currency Committee.

The resolution is of particular interest since it was passed by a legislative body where the Republicans are in the majority. Since the Governor of Pennsylvania, the Honorable George M. Leader, and members of his Cabinet, have testified on behalf of this legislation, it is clear that this expression of the Pennsylvania Senate reflects the views of both parties and the preponderant sentiment of our entire Commonwealth.

I ask unanimous consent that the resolution be inserted in the RECORD and appropriately referred.

There being no objection, the resolution was referred to the Committee on Banking and Currency and, under the rule, ordered to be printed in the RECORD, as follows:

Senate resolution memorializing Congress to enact Senate bill 964, known as the area redevelopment bill

Pennsylvania has had to face serious economic and unemployment problems for decades; and Pennsylvania's unemployment rate has consistently run higher than other States and the Nation for many years, all of which problems derive from the fact that the State's unemployment has always been very heavily concentrated in certain distressed areas of the State; and as a consequence Pennsylvania has continuously had far more than its share of areas of substantial labor surplus or so-called depressed areas; and

Pennsylvania currently has 11 areas classified as areas of substantial labor surplus on the official area classification list of the United States Department of Labor, 4 of which are major metropolitan areas which are regularly included in the classification system and 7 are smaller areas which are classified because they have substantial labor surpluses, and all have been continuously classified as surplus areas for 2 years or longer; and

In the United States as a whole, only 19 major areas are currently listed as areas of substantial labor surplus, so that the 4 major areas in Pennsylvania alone account for more than one-fifth of the total in the entire country and the 7 smaller areas of substantial labor surplus represent one-eighth of the United States total of that type; and

The basic cause of Pennsylvania's unemployment problem arises out of the fact that the State and its depressed areas have a heavy preponderance of basic national industries in which severe and sustained long-term employment declines have been occurring due to the toll of progress and technological advancements of which anthracite and bituminous coal mining, railroad transportation, railroad equipment manufacturing, textile manufacturing, and metals manufacturing are notable examples; and

The persisting heavy volume of unemployment has contributed very substantially to the large volume of unemployment compensation activity in Pennsylvania, as represented by over 56 million claims filed and over $990 million—almost $1 billion—in benefits paid during the years 1950 to 1956, inclusive; and

Public assistance costs in Pennsylvania have been swollen as a result of the continuing high levels of unemployment in the years 1950–56, inclusive, to over $732 million in direct payments to people in need; and

Although extensive efforts have been undertaken by the State government and by local communities to increase employment in the depressed areas the gains have not been sufficient to stem the rising tide of unemployment flowing from continued job losses in problem industries and from the continued normal growth of local labor forces; and

In order to reduce unemployment to 3 percent of the labor force in these 11 surplus areas in Pennsylvania, 56,941 additional jobs are needed, requiring a total estimated capital investment of $427,095,000, approximately 25 percent of which, or $106,774,000, would be required for factory buildings alone; and

Assuming that 10 percent of this total, or $11 million, is raisable from community subscriptions for equity capital, and 50 percent of this total, or $53 million, is raisable from private banks, insurance companies and other sources of private investment capital as first mortgages, a balance of 40 percent, or $43 million, in second mortgage revolving capital funds would be necessary from State and Federal Government sources; and

The job to be done is manifestly enormous, and it is obvious that the problem of chronic unemployment with its vast waste of manpower and severe drains on the economy of a State as large and important as Pennsylvania should be a matter of grave concern to the Nation and to the Congress, as well as the State itself and the communities directly involved, and since various aspects of the problem transcend State boundaries and are sectional and even national in scope, and therefore are not susceptible to State and local remedies: Therefore be it

Resolved, That the Senate of the General Assembly of Pennsylvania, in behalf of the people of Pennsylvania hereby memorialize the Congress of the United States to enact Senate bill No. 964, known as the area redevelopment bill; and be it further

Resolved, That copies of this resolution be transmitted to the President of the United States, the Vice President of the United States, the Secretary of Labor and Industry, the Secretary of Commerce, the Speaker of the House of Representatives, the chairman of the Committee on Banking and Currency of the Senate, and to each Senator and Representative from Pennsylvania in the Congress of the United States.

Adopted May 23, 1957.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. SMATHERS, from the Committee on Interstate and Foreign Commerce, with an amendment:

S. 939. A bill to amend section 22 of the Interstate Commerce Act, as amended (Rept. No. 410).

By Mr. RUSSELL, from the Committee on Armed Services, without amendment:

H. R. 6548. An act to amend the Universal Military Training and Service Act, as amended, as regards persons in the medical, dental, and allied specialist categories (Rept. No. 411); and

H. R. 7505. An act to permit a retired officer of the Navy to be employed in a command status at Port Lyautey, Morocco (Rept. No. 412).

DISTRICT OF COLUMBIA APPROPRIATIONS—REPORT OF A COMMITTEE

Mr. PASTORE. Mr. President, from the Committee on Appropriations, I report favorably, with amendments, the bill (H. R. 6500) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending June 30, 1958, and for other purposes, and I submit a report (No. 409) thereon.

The PRESIDENT pro tempore. The report will be received, and the bill will be placed on the calendar.

Mr. JOHNSON of Texas. I desire to thank the Senator from Rhode Island for his fine job in holding hearings on the appropriation bill. This is the Senator's first year on the Appropriations Committee, and we welcome him to the committee. If it meets with the Senator's approval, we expect and hope to act on the bill Tuesday next.

Mr. PASTORE. I shall be ready.

OFFICE BUILDING FOR ATOMIC ENERGY COMMISSION—REPORT OF A COMMITTEE—INDIVIDUAL VIEWS

Mr. ANDERSON. Mr. President, from the Joint Committee on Atomic Energy, I report favorably, without amendment, the bill (S. 1918) to amend Public Law 31, 84th Congress, 1st session, to increase the authorization for appropriation to the Atomic Energy Commission for the construction of a modern office building in or near the District of Columbia to serve as its principal office, and I submit a report (No. 413) thereon. I ask unanimous consent that the individual views of the junior Senator from New Mexico and the senior Senator from Georgia [Mr. RUSSELL] may be printed as a part of the report.

The PRESIDENT pro tempore. The report will be received, and the bill will be placed on the Calendar; and the individual views will be printed as requested by the Senator from New Mexico.

BILLS AND JOINT RESOLUTIONS INTRODUCED

Bills and joint resolutions were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. WATKINS:

S. 2230. A bill to authorize the Secretary of the Interior to convey certain lands to the Charlotte Rudland Dansie Association; to

the Committee on Interior and Insular Affairs.

By Mr. McCLELLAN (by request):

S. 2231. A bill to amend section 203 (c) of the Federal Property and Administrative Services Act of 1949 to permit the exercise of options contained in certain leases of Government property; to the Committee on Government Operations.

(See the remarks of Mr. McCLELLAN when he introduced the above bill, which appear under a separate heading.)

By Mr. HILL:

S. 2232. A bill for the relief of Sherrie Kay Helms; to the Committee on the Judiciary.

By Mr. WILLIAMS:

S. 2233. A bill for the relief of Mrs. Elise Sophie Omsted Miller; to the Committee on the Judiciary.

By Mr. BENNETT:

S. 2234. A bill to amend section 615 of the Internal Revenue Code, relating to exploration expenditures; to the Committee on Finance.

(See the remarks of Mr. BENNETT when he introduced the above bill, which appear under a separate heading.)

By Mr. JENNER:

S. 2235. A bill for the relief of Maria E. Watson; to the Committee on the Judiciary.

By Mr. SMATHERS:

S. 2236. A bill to amend section 5701 (b) (2) of the Internal Revenue Code of 1954 so as to adjust the rates of tax on cigars; to the Committee on Finance.

S. 2237. A bill for the relief of Viola Belger; to the Committee on the Judiciary.

By Mr. MARTIN of Pennsylvania:

S. 2238. A bill relating to the applicability of section 164 (d) of the Internal Revenue Code of 1954 to taxes on real property sold before date of the enactment of such code pursuant to a contract of sale entered into before January 1, 1954; to the Committee on Finance.

By Mr. THURMOND:

S. 2239. A bill for the relief of Wadiha Salime Hamade; to the Committee on the Judiciary.

By Mr. PURTELL:

S. 2240. A bill to amend the Tariff Act of 1930 with respect to the marking of imported articles and containers; to the Committee on Finance.

By Mr. MAGNUSON:

S. 2241. A bill to authorize the Secretary of Commerce to sell war-built vessels and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. COOPER (for himself, Mr. MORTON, Mr. DIRKSEN, Mr. DOUGLAS, Mr. CAPEHART, and Mr. JENNER):

S. J. Res. 98. Joint resolution to establish a commission for the commemoration of the 150th anniversary of the birth of Abraham Lincoln; to the Committee on the Judiciary.

(See the remarks of Mr. COOPER when he introduced the above joint resolution, which appear under a separate heading.)

By Mr. BEALL:

S. J. Res. 99. Joint resolution proposing an amendment to the Constitution to provide that the people of the District of Columbia shall be entitled to vote in Presidential elections; to the Committee on the Judiciary.

AMENDMENT OF FEDERAL PROPERTY AND ADMINISTRATIVE SERVICES ACT, RELATING TO EXERCISE OF OPTIONS IN CERTAIN LEASES

Mr. McCLELLAN. Mr. President, I introduce, for appropriate reference, a bill to amend section 203 (c) of the Federal Property and Administrative Services Act of 1949 to permit the exercise of options contained in certain leases of Government property. I am introducing the bill at the request of the Administrator of General Services.

A recent decision of the Attorney General questions the authority of the Administrator of General Services to make use of options to purchase in leases executed under the provisions of the Federal Property and Administrative Services Act of 1949, as amended, and casts doubt upon the authority to use options to renew or extend leases executed under the act. The purpose of this bill is to clarify the authority of the Administrator to renew or extend the term of leases for one or more additional periods, and to permit the exercise of options to purchase in accordance with the usual commercial practice.

I ask unanimous consent that a letter from the Administrator of General Services addressed to the President of the Senate, which explains the purpose of this proposed legislation, be printed in the RECORD.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the letter will be printed in the RECORD.

The bill (S. 2231) to amend section 203 (c) of the Federal Property and Administrative Services Act of 1949 to permit the exercise of options contained in certain leases of Government property, introduced by Mr. McCLELLAN (by request), was received, read twice by its title, and referred to the Committee on Government Operations.

The letter presented by Mr. McCLELLAN is as follows:

GENERAL SERVICES ADMINISTRATION,
Washington, D. C., May 24, 1957.

Hon. RICHARD M. NIXON,
President of the Senate,
Washington, D. C.

MY DEAR MR. PRESIDENT: There is enclosed a draft of a proposed bill "To amend section 203 (c) of the Federal Property and Administrative Services Act of 1949 and to permit the exercise of options contained in certain leases of Government property." It is respectfully requested that appropriate steps be taken to secure consideration by the Congress of this legislative proposal.

The draft would amend section 203 (c) of the Federal Property and Administrative Services Act of 1949 (63 Stat. 385, 40 U. S. C. 484 (c)) by inserting after the word "lease" the parenthetical clause "(which may include one or more options to purchase or to renew or extend the lease)."

The Attorney General has recently expressed doubt as to whether the Federal Property and Administrative Service Act of 1949, as amended, confers authority for the use of options to purchase in leases executed thereunder. This expression also casts doubt upon the authority to use options to renew or extend the lease in leases executed under the Federal Property and Administrative Services Act of 1949, as amended.

At the present time the General Services Administration is administering leases executed pursuant to the act referred to above, which contain options to purchase or provisions similar thereto, or which contain options to renew or extend the term for one or more additional periods in accordance with the usual commercial practice.

There are two cases now pending in which the lessee has given notice of intent to exercise an option. One of them involves an option to purchase in a lease the term of which expires May 31, 1957. The other involves an option to renew in a lease expiring December 31, 1957.

Since these options were granted in good faith and in the belief on the part of the representatives of the Government and the lessees that the governing legislation gave authority to use options and their use conformed to administrative practice of many years standing established in connection with disposals under earlier laws, it is felt that the General Services Administration is under obligation to recommend legislation to the Congress to clarify the statute so as to remove any doubt as to whether it includes authority for the use of options.

The Bureau of the Budget has advised that there is no objection to the submission of this proposed legislation.

Sincerely yours,

FRANKLIN G. FLOETE,
Administrator.

AMENDMENT OF SECTION 615 OF INTERNAL REVENUE CODE, RELATING TO EXPLORATION EXPENDITURES

Mr. BENNETT. Mr. President, I introduce, for appropriate reference, a bill to amend section 615 of the Internal Revenue Code, relating to exploration expenditures.

Under section 615 of the Internal Revenue Code of 1954 a mining company could deduct up to $100,000 a year for each of 4 years for money spent on exploration and development. The purpose of this bill is to permit companies, which in the past have not had 4 years of income against which they could make such a deduction, to have the privilege of making deductions for up to 4 more years if they have profits in those years.

In effect, the program proposed is for the benefit of those companies which, under the inspiration and impetus of the previous program, actually spent their money in search of mineral deposits, but which, because they either did not discover any deposits, or those which they did discover, did not yield them a net profit, have not, in fact, been able to take advantage of the provisions of the act.

This bill, if enacted, would give them the encouragement to continue their exploration and, if and when they discovered new deposits showing possibility, would permit them to use this special allowance, which has been available for 4 years in the past, to companies whose operation has made them profit large enough to take advantage of the offsetting deduction permitted by section 615.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 2234) to amend section 615 of the Internal Revenue Code, relating to exploration expenditures, introduced by Mr. BENNETT, was received, read twice by its title, and referred to the Committee on Finance.

ONE HUNDRED AND FIFTIETH ANNIVERSARY OF THE BIRTH OF ABRAHAM LINCOLN

Mr. COOPER. Mr. President, I introduce, for appropriate reference, a joint resolution to establish a Commission for the Commemoration of the One Hundred and Fiftieth Anniversary of the Birth of

Abraham Lincoln. Joining me in the introduction of the joint resolution are my colleague, the junior Senator from Kentucky [Mr. MORTON], the senior Senator from Illinois [Mr. DOUGLAS], the junior Senator from Illinois [Mr. DIRKSEN], the senior Senator from Indiana [Mr. CAPEHART], and the junior Senator from Indiana [Mr. JENNER], all of us representing the States in which Abraham Lincoln lived. I do not think the purpose of the joint resolution needs any elaboration on my part.

The PRESIDENT pro tempore. The joint resolution will be received and appropriately referred.

The joint resolution (S. J. Res. 98) to establish a Commission for the Commemoration of the One Hundred and Fiftieth Anniversary of the Birth of Abraham Lincoln, introduced by Mr. COOPER (for himself and other Senators), was received, read twice by its title, and referred to the Committee on the Judiciary.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the RECORD, as follows:

By Mr. BEALL:

Address on Communism, delivered by him at banquet of Maryland Forty and Eight, Baltimore, Md., June 1, 1957.

Statement for himself and Senator BUTLER relating to installment sales credit.

By Mr. BENNETT:

Correspondence dealing with S. 11, on the subject of freight absorption.

By Mr. MURRAY:

Article entitled "MANSFIELD Says It's Time That Benson Recognized Small Farmers' Dilemma," and editorial entitled "MANSFIELD Points to Benson's Conflicting Statements," published in the Great Falls (Mont.) Tribune of May 31 and June 1, 1957.

THE PRESIDENT'S PRESS CONFERENCE

Mr. JOHNSON of Texas. Mr. President, President Eisenhower at his press conference yesterday made a number of statements which will have considerable impact upon the policies of this country.

He stated his views on banning nuclear-test explosions; on trade with Communist China, and on the case of the American soldier who has been turned over to Japanese authorities for trial.

This press conference was of such importance, Mr. President, that I believe it should be available to all who follow the CONGRESSIONAL RECORD.

Therefore, I ask unanimous consent that the transcript, carried in the New York Times, be printed in the body of the RECORD at this point in my remarks.

There being no objection, the transcript was ordered to be printed in the RECORD, as follows:

[From the New York Times of June 6, 1957]

TRANSCRIPT OF THE PRESIDENT'S NEWS CONFERENCE ON FOREIGN AND DOMESTIC MATTERS

President Eisenhower: "Please sit down. Good morning, ladies and gentlemen. I have no announcements."

Marvin L. Arrowsmith, of the Associated Press: "Mr. President, in the last few days some top geneticists and other scientists have testified that fallout radiation from nuclear weapons tests will damage hundreds of thousands and, perhaps, millions of the yet unborn in terms of physical deformities and shortened life spans. Could you, as the man who must make the final decision on these tests for our country, tell us what your scientist advisers tell you on this matter?"

Answer: "Well, first of all, last October we published a very long report from the National Academy of Sciences which gave a very full discussion of this whole matter, bringing up the amount of radiation you get from natural sources, the sun and X-ray pictures and all the rest of it—I believe down even to include phosphorous on the dial of your watch, and things of that kind.

"That is the authoritative document by which I act up to this moment, because there has been no change that I know of. Now, on the other hand, here is a field where scientists disagree. Incidentally, I noticed that in many instances scientists that seem to be out of their own field of competence are getting into this argument, and it looks like almost an organized affair.

"I am concerned just as much as I am of this fallout, I am concerned with the defense of the United States. [The President apparently meant that he was just as concerned over fallout as over defense.] I have tried, and this Government has tried, to make the abolition of tests a part of a general system of disarmament, controlled and inspected disarmament.

"If we can do that, we will be glad enough and very quickly, to stop tests. But we do have the job of protecting the country."

TESTS CALLED DEFENSIVE

"Our tests in recent years, the last couple of years, have been largely of the—in the defensive type of armament to defend against attack from the air and, particularly, to make bombs cleaner so there isn't so much fallout.

"We have reduced the fallout from bombs by nine-tenths. So that our tests of the smaller weapons have been in that direction, to see how clean we can make them."

Peter J. Kumpa of the Baltimore Sun: "Mr. President, Mr. Alcorn, the chairman of the Republican National Committee, told you yesterday that some of the State finance chairmen are having trouble and difficulty in getting contributions from some of the old heavy contributors. He said that they were not happy about the high budget. I wonder, sir, if you have any advice to these State chairmen in their soliciting?"

Answer: "Well, I don't know whether advisement at this time—I think Meade Alcorn, or whoever gets to be chairman of the finance committee, would do that.

"I would point out one or two things, however: That it might be better for some of these people that are complaining so bitterly to look up the actual facts instead of merely listening to partisan speeches, and some of the facts that would be interesting is what would be the budget today if it followed the projection that was here in 1953, or what would be the budget if we had followed and adopted some of the programs presented by the opposition in the last 2 or 3 years affecting roads and schools and a number of other things that involved a lot of money.

"I have no particular appeal of my own to make to these people, except to read the facts, understand what is going on, why we need a lot of money for this Government, and what are they going to do about it."

QUESTIONED ON FALLOUT

Merriman Smith of the United Press: "Mr. President, could you elaborate a little for us, sir, on your saying that among the disagreeing scientists on the question of fallout that some of them are out of their field of competence, and it looks like an organized affair? Why do you say that, sir? Who is organizing it, in your opinion?"

Answer: "I don't know. I haven't any idea, but I just say it seems to come up in so many places and so many different speeches, and you find scientists of various kinds other than geneticists and physicists in this particular field that have something to say about it."

Robert E. Clark of International News Service: "Mr. President, can you tell us what you think about Khrushchev's television interview Sunday, including his offer to withdraw Russian troops from Europe if the United States would do likewise?"

Answer: "Well, this is what I say, of course, about such an appearance. Now, let us make no mistake, that appearance was not the same as taking a kinescope of one of these press conferences and broadcasting it completely in Russia.

"We know that there are no prepared questions here and no prepared answers. It is a matter of trying to deal honestly with each other, and then putting it on—in the papers and on the radio and in the television—on the television screen; and this other performance of last Sunday afternoon was far from that.

"Now, with respect to his proposal, he took one part of a proposal that affects not especially our country, but countries of our allies, and it is an old method: When you are dealing with a number of allies to try to propose something which seems to be to the obvious interests of one in order to drive a wedge between them.

"What is done in Europe, what we do there, is always going to be the subject of consultation between us and our allies before we do anything about it.

"So this matter—I noticed he didn't say that Germany would be reunified or anything of that kind, just merely withdraw the troops."

Edward V. Koterba of the Hammond (Ind.) Times: "Mr. President, the new Federal highway program has caused apprehension among some communities and States and toll-road commissions.

"These agencies have been waiting for the interstate projects to get going and this, in effect, has caused them to hold up their own road-building plans. Could you, sir, give some assurances of a speedup in Federal road building that may clear up any doubts regarding the Federal highway program?"

Answer. "Well, the last report on it, I thought it was rather favorable. It had not been authorized too long; and it takes time to get these things going; and I believe they told me $700 million in contracts are already let. And I would think that would be a pretty good showing up to this moment. There is no—not even a suggestion has been made to me that we should evade, let up, or do anything else but to carry out the law just as it is written [laughter]."

BACKS GAS BILL AGAIN

Milburn Petty of the Oil Daily: "Mr. President, do you still feel that legislation to remove utility-type controls from gas producers is still absolutely essential, as you said several weeks ago?"

Answer: "Yes, I believe that a reasonable bill to encourage exploration for gas and oil in this country is just as much in the interests of the consumer as it is of the producer.

"I don't by any manner or means say that someone with a monopoly on this kind of fuel should be able to exploit the country to the full. But you do have these public utilities which are the interstate pipelines; but I do seriously object to any kind of public utility control over the well or the producer himself."

John Scali of the Associated Press: "Mr. President, Mr. Khrushchev, in answering questions on disarmament, said that Russia,

in his words, was quite prepared to seek a first step of partial disarmament agreement rather than to hold out for the comprehensive disarmament agreement, which has been their policy in the past. Since this objective also is what we are seeking, do you think that his words, at this particular time, add encouragement to the possibility that an agreement along these lines is really possible at this time?"

Answer: "Well, I think that we can only say we can only hope so.

"As I told you before, all the reports are that this time at London the conference reflects, apparently on all sides, a more serious, a more definite purpose to get ahead with substantive matters than ever before, and to use it, the occasion, less as mere, as a mere platform for propaganda. So every word that indicates a desire to meet sensibly on a step-by-step basis, which is the only way, by the way, I think it can ever be done, I welcome it, and certainly don't reject it until it's been explored to the full."

Louis R. Lautier of the National Negro Press Association: "I wonder if you would care to add any comment to that of the Attorney General on efforts of opponents to add crippling amendments, such as the jury-trial amendment, to your civil-rights proposals?"

Answer: "Well, I don't think I have anything to add. One thing that I have been struck by, it was [former] Chief Justice Taft's comments on a similar effort, and he stated that if we tried to put a jury trial between a court order and the enforcement of that order, that we are really welcoming anarchy.

"Now, I think most of us here are not great constitutional lawyers. But, Mr. Taft, by the way, made that statement when he was President in 1908, but there is no evidence that he ever changed his mind; and I would take his opinion far more than I would an opinion that was given in, let's say, in the heat of partisan argument."

HOME FOR VICE PRESIDENT?

Ronald W. May of the Madison (Wis.) Capital Times: "Joseph E. Davies has offered to give his million-dollar estate as the official residence for the Vice President.

"No one has accepted this offer, and some have suggested that the Vice President needs such a residence for official entertaining, as you did in your budget message earlier this year.

"Senator WILEY [Republican, of Wisconsin] has now proposed a study commission of Members from Congress and from the executive branch of Government to look into the whole question of official entertaining.

"I wonder if you still favor such a residence and how you feel about such a commission?"

Answer: "Well, certainly, I think if the Vice President is being used to the limit of his capabilities, I mean the limits of his capacity, for aid in the interests of the United States, he ought to have something of that sort.

"Now, you must remember that the history of America does not always show any close connection between the President and Vice President. In fact, sometimes they have been rather opposed to each other, and under such circumstances, I assume the Vice President can do very little except to attend to his own constitutional duties.

"But in the way that Mr. NIXON has worked and in the way he has acted in the welfare—for the interests of the United States, I certainly think that kind of a Vice President should have it, and since, I assume, that we are probably establishing a little precedent for others to follow, I am in favor of it very much."

James Reston of the New York Times: "Mr. President, the comments here this morning, sir, about the fallout are, I think, open to the inference that this is just an organized campaign, and that the scientists who are——"

Answer: "Oh, no."

Question: "Disturbed about it——"

Answer: "Oh, no; I didn't say that at all. I said there does seem to be some organization behind it. I didn't say a wicked organization."

Question: "I think it is, the way it is left right now, this is merely an opinion, is open to that inference."

Answer: "Well, I don't mean that at all.

"There are as many of these people just as honest as they can be, there is no question about that. But as I say, when they begin to talk a little bit out of their field, then I would rather go myself to the Academy of Sciences, which has no ax to grind of any kind, is not looking for publicity, and say, 'Now, what do you people think?' I made mention that I was living by the document that they have given at this moment."

DOES NOT HAVE PLANS

Question: "May I ask two questions about this: Whether you have any plans to deal with anxiety of the country about the fallout; and, second, whether in any way you are modifying your plan about testing?"

Answer: "Well, I wouldn't say I have got a plan, because the plans that we have for testing are all bound up in the plans we have for disarmament, which we think is necessary. We think if you are going to include these weapons as a positive or almost certain weapons of war in any future global thing, we would be foolish indeed to be behind anybody else.

"Now, that means testing because the scientists in your laboratories each year believe they have found something that makes them cleaner, better, more efficient or particularly what we are working on so hard, as you know, is defense against hostile aircraft. So those people cannot continue to work unless they can test them.

"On the other hand, I would like to allay all anxiety in the world by a total and complete ban of all testing, based upon total disarmament in this field is what I'd like."

Raymond P. Brandt of the St. Louis Post-Dispatch: "You have told us several times what you would do and would not do as President. Can you give us your conception of the role of a President as the leader of his party?"

Answer: "Well, that is quite a lecture, I should think, you are asking for. He is the leader not of the, you might say, the hierarchy of control in any political party.

"What he is, is the leader who translates the platform into a legislative program, in collaboration with his own executive department and with the legislative leaders.

"And after that, once that program is established, I think it is his duty to use whatever means he deems most effective in order to get that program as large as he can translated into law."

Question: "On that point, we have had in American history, three strong Presidents: Theodore Roosevelt, Franklin Roosevelt, and Harry Truman. They were leaders of their party. Do you consider yourself in that class?" [Laughter.]

Answer: "I don't believe I would go in for comparisons, thank you." [Laughter.]

Spencer Davis, of the Associated Press: "In view of the attention that has been focused on the status of forces agreements by the Girard decision yesterday, would you say if you felt that"——

Answer: "I didn't understand the first part of your question, you will have to repeat it."

Question: "The attention that has been focused on Status of Forces Agreement"——

Answer: "Oh."

Question: "By the decision in the Girard case announced yesterday, do you see any need for a new approach to the status of forces agreements in our relations with foreign countries? And also would you have any comment on your decision in the Girard case?"

Answer: "I think that the Status of Forces Treaty lays out as nearly an equitable arrangement between sovereign states as can be devised. You might change it a little bit in some detail. I started working on this in 1951, when I was sent to Europe, after leaving Columbia, and all the time I was there I conferred with governments in the effort to get this Status of Forces Agreement written.

"One of the most irritating things that one nation can do is to have its own troops stationed in the territory of a friend. It gives rise to all sorts of difficulties, and it creates dissenion at home when people believe that their sons should always be tried solely by the courts of their own nation.

"Now, the Status of Forces Treaty in this particular case was not brought into question.

"The United States never gave up primary jurisdiction in this case, I mean, never admitted that it does not have a primary jurisdiction. But in the actual operation, there are certain processes that go through that sometimes make it better, better for all concerned, to cede or to turn over to another primary jurisdiction.

"For example, there have been over 14,000 cases of this kind arise in Japan. Thirteen thousand six hundred and forty-two of those were turned over by Japan with primary jurisdiction to the American forces, voluntarily. It wasn't—they weren't compelled, and there wasn't in the treaties—there was nothing in the treaties that could have kept them from trying these 13,000 if they had wanted to. They turned them over voluntarily.

"In this case, due to a number of things that are explained fully and carefully in the statement just issued yesterday morning, jurisdiction was turned over.

"Now, I do want to make this one comment: Merely because you let another nation try your man does not relieve the defense forces or, indeed, the commander in chief for the need for following that case and seeing that justice, fair justice, is done.

"Actually, in the cases the Japanese courts have tried, they have been eminently fair, and our legal people have reported to me that their respect for the Japanese legal procedures and the sentences that they pass out is very high indeed, and based upon very great concern for the rights of the individual, and justice to him.

"We pay for the lawyer to defend him; we watch it through our lawyers all the way through, and if any possible injustice happened to that man, it would be a case that would be taken up diplomatically, of course."

NO TIME FOR SUCH STUFF

Harold R. Levy, of Newsday:

"It has been suggested that the time might be appropriate for realinement of parties, such as has occurred before in American history. That today's modern Republicans and liberal Democrats might form one new party, and the nonmodern Republicans and southern Democrats another. What do you think, sir, of the possibility or desirability of such a realinement?"

Answer: "I am busy; I am working hard. I haven't any time for such stuff as that."

William McGaffin, of the Chicago Daily News: "Sir, the newspaper reports say that you will not ask for equal time on the Soviet radio and television to reply to Mr. Khrushchev. Well, sir, aren't you missing a good opportunity to get to the Russian people?

You would have a perfect reason to ask for a quid pro quo in this case."

Answer: "Well, now, let's take a look at this: A commercial firm in this country, trying to improve its own commercial standing, went to [laughter] unusual effort to get someone that was, really made a unique performance in front of our people, and he could do that because this is a free country. Everybody could listen, and the newspapers carried it in general in the full text.

"Now, if the President of the United States should go to Russia and ask for full time, now let's see what he would get: First, of all, there are 12 television stations—[the President conferred with James C. Hagerty, his press secretary]."

Mr. Hagerty: "Fourteen."

Answer: "Pardon me. Don't let me cheat—14—and there is radio coverage.

"I would say this: If the Soviet Union, in return for that courtesy of themselves wanted to ask an American, no matter who it might be, because, after all, you know Khrushchev is not the head of the Russian state—except in power [laughter]—but if they should invite an American to come, and guarantee that there would be no jamming, there would be no interference, that they wouldn't put up counter attractions to take people away from their radios, and all that sort of thing, for that time, if you can believe that that will happen, I can tell you this, that somebody in this Government would be glad to accept."

MACAULAY QUOTED

Robert J. Donovan of the New York Herald Tribune: "Mr. President, on the same subject: The President, former President Truman had a grandson born this morning. Do you believe that this lad will grow up to live under socialism?"

Answer: "Well, you can see, of course, and in any free country, developments and signs that seem to point toward a readiness of some part to accept governmental control over great portions of their economic life in return for something that might appear to be a quick advantage. Such things can, of course, in the long run lead to communism, but we have had this same kind of thing inherent in our form of Government for many years.

"If you will read your Macaulay again, you will find that Macaulay, I think about 1828, showed why the American experiment was bound to fail under the influence of pressure groups on the Congress, and that eventually you would have an entirely different form of Government. While he didn't say socialism, it was something of that kind.

"Now, frankly, if they are going to have socialism by the time that child grows up to live under it, at least they are going to say this:

"If I live these next 3½ years, the first 3½ years are going to be a terrible battle. They can say that."

Chalmers M. Roberts of the Washington Post: "The speaking, sir, of your desire for what I believe you call the total and complete ban on tests under disarmament agreement, do you mean, sir, that you would be willing to agree to such a ban under this first step agreement, as part of this first step agreement, with the Soviet Union?"

Answer: "You could only do that, I think, in toto, the way I expressed it there, in a complete thing, you could do that only if the same agreement were so couched, so made, that you could see there would be no more atomic bombs used in war."

Question: "But it could be as part of the so-called first step if it were firm enough?"

Answer: "Well, only if it brought in that other part, though, that we were going to eliminate these things as weapons of war, and there was an inspection system that could make sure that was coming about; otherwise, you couldn't do it."

Question: "I am not clear, sir. Are you speaking of the so-called fourth country problem?"

Answer: "No, not at all. Other fourth countries have got a right to do as they please. I am saying that we couldn't enter into any program which forever banned tests unless we also had a system which we knew would and could be convinced would, forever ban the use of weapons—of these weapons in war."

Mrs. May Craig of the Portland (Maine) Press Herald: "Mr. President, the simultaneous translation of the Khrushchev TV appearance was very sketchy. Did our Embassy in Moscow or any other official American take a tape or a stenographic, for our use, or on what are you depending for the text?"

Answer: "Nothing except what the rest of you have seen on the—in the—have we got——"

[The President conferred with Mr. Hagerty.]

"Mr. Hagerty says we have it. I haven't seen it. All I have seen is what you saw on the television."

Charles Von Fremd of Columbia Broadcasting System: "A moment ago you referred to a commercial firm [laughter] trying——"

Answer: "I meant it was not governmental."

Question: "Trying to improve its commercial standing, sir. The CBS news and public affairs program was 'Face the Nation,' which is a sustaining program. I just did want to get this clear, sir."

Answer: "Well, isn't the CBS a commercial firm?"

Question: "Yes, but the program on which he appeared is a sustaining program. I just did want to get this straight, Mr. President, and that is: You don't believe, do you, that CBS was remiss in its news judgment in seeking to get Mr. Khrushchev to appear on the program?"

Answer: "Well, I am not willing to give an opinion on that one [laughter]."

Sarah McClendon of the San Antonio Light: "Sir, a House Public Works subcommittee surveyed the flood situation in the Southwest last week, and found the dams that had been constructed were saving millions of dollars worth of property, but that there were not as many dams there as were needed. I wonder if you would go along with the views of Senator LYNDON JOHNSON that expenditures for flood control is a good—are a good investment?"

Answer: "I go along with the advice, the engineering advice, of the Corps of Engineers, and the Bureau of Reclamation when they have surveyed each carefully as a part of a whole rivers system and say that such and such a dam is necessary and is consonant with the need of the whole, with the whole river basin, and not merely that immediate part; that is what I go along with."

Edward P. Morgan of American Broadcasting Co.: "Mr. President, particularly since the Formosa riots, there have been an increasing amount—there has been an increasing amount, of speculation on the possible need to reassess our position toward the two Chinas.

"Can you clarify this, particularly on two points: The possibility of some increased commercial relations with Peiping, and what this administration thinks of the durability of our relations with the Nationalist government in the possibility of the disappearance of Chang Kai-shek, either by death or other means?"

Answer: "Nobody—it has occurred to no one to ask any easy question this morning, has it? [Laughter.]

"In the first instance, there is nothing in this particular case that would in itself require a reassessment of our relationships with the so-called two Chinas. The Generalissimo has been very prompt in his expressions of regret and has, as a matter of fact, taken a great deal of blame for himself for not moving more rapidly.

"While the violence of the outburst was unexpected, there was also very many signs that there was some kind of organization behind it, no one knows what. But in any event, our relationships with Formosa are unchanged as a result of that incident as of this moment, and so far as I know, no one has suggested any change.

"With respect to the trade, there is a law on the books, I believe, preventing all shipments of American property to Red China. So long as that law is on the books, of course, that is that.

"Now, there is a very great division of opinion in America, as there is in the world, about the value of trade with Communists.

"There is—we have had this subject up here before—there is one school of thought that thinks any trade with the Communist countries is bound to be to their benefit; whereas there is another school of thought that thinks that the Yankee, for example, is a very fine trader, and that we got to be a great country by trade, and they assert that trade in itself is the greatest weapon in the hands of a diplomat, and if skillfully used, it can be used as a very great instrument of governmental policy.

"In this case the argument or the point of issue has been, over the last many months, Should we maintain the differential between the shipments allowable to the western part of the Communist area, in Eurasia, and the eastern part?

"Those that argue for the elimination quote several things. First, that it is foolish to say China can't have something, and then you ship it to Russia and it can go on through. The opposing argument is that they have to do that and use their transportation space; that costs them some money.

"Another argument on the side of this, of the liberation—the liberalizing of this trade—is that Japan, our friend, must make a living. She can't trade all around the world because too many people have some kind of bars. Here in this country, as you know, there is constant agitation to set up bars against textiles and light machinery, and all that sort of thing.

"Where is she going to trade? All right. They say we want Japan for our friend, 95,000,000 of people. They should be allowed to trade somewhere and, therefore, we ought to liberalize the trade with China.

"The other side says if you let that happen, the next thing you know you are going to have Japan communized. So it is that kind of an argument, going into numbers of factors, that goes on all the time.

"Now, frankly, I am personally of the school that believes that trade, in the long run, cannot be stopped. You are going to have either just authorized trade or you are going to have clandestine trade. You can stop the shipments from here, that is on the law, and that will be continued as long as it is on the law.

"But whether or not it should be—whether we should eliminate this differential, frankly, I don't see as much advantage in maintaining the differential as some people do, although I have never advocated its complete elimination."

Robert L. Riggs of the Louisville Courier-Journal: "Can you give us any information on the progress of the selection of a board member for the Tennessee Valley Authority?"

Answer: "The what?"

Question: "The selection of a board member for the Tennessee Valley Authority, TVA?"

Answer: "No, that is still under argument."

Richard L. Wilson of Cowles Publications: "Mr. President, it seems to me that the discussion on testing of H-bombs has left a lot of vacant spaces that we don't completely understand—at least I don't understand. You have said that our tests are going toward the point of testing clean weapons at the present time."

Answer: "Yes."

Question: "Does this mean that we will not test any more H-bombs which create a great fallout?"

Answer: "Well, as a matter of fact, I don't think your statement is correct. I think we have found that the H-bomb in proportion to its size is probably one of the cleanest. I don't think that your statement is correct."

Question: "Let me ask it again."

Answer: "You could check up against—you could check up against the AEC and Admiral Strauss (chairman of the AEC), but I think that is correct."

Question: "Let me ask it again. Will there be any more tests of H-bombs similar to the large one in the Pacific which caused such a wide fallout?"

Answer: "The early one, you mean?"

Question: "Yes."

Answer: "I would doubt that anything like that would ever be repeated. But I want to say this again: Our plans, and even our thinking on this, we are trying to weave into programs which we must concert with our allies before they are of great value, and if I have not been as frank in this one subject as you people think I should, remember this, if I say something that Britain or France or some other great ally, or Canade, cannot accept, and they get irritated or embarrassed by it, then our whole program of trying to achieve real disarmament and real cessation in all these terrible fields is hurt. So I have told you what I think is public property, and what I think is proper to say."

Edward T. Folliard of the Washington Post: "Mr. President, this is an easy question.

Answer: "Sure."

Question: "It is about the plan to tear down this old State, War, and Navy building, and put up a White House office building. As you know, there has been some controversy about it."

Answer: "Yes."

Question: "Just how do you feel about that plan?"

Answer: "Well, put it this way: I worked 9 years in this building, and so from sentiment's sake I would say probably I wouldn't want to see it torn down.

"But I appointed a disinterested commission, and I have this feeling, that only in a term of office such as I am now holding can you really expect progress to be made on this line and disinterested action to be taken. Everybody knows you couldn't change things in time to do anything for me. Therefore, it is for future Presidents that we should be concerned.

"Now, this commission was made up of able men, thoughtful men, who turned in a good report, and as long as they say that is what should be done, I believe it should, and I will add one thought:

"We must never minimize what the White House, just as a building, means to America. I have seen strong men come into that building, and merely because they were invited to walk through its social parts, with tears on their cheeks.

"Therefore, I think the White House should never be overshadowed by anything or ill-treated, that we weren't maintaining a White House of this type of architecture for every generation that is coming along, not only these grandchildren we talked about a while ago, but on into the distant future."

Mr. Smith: "Thank you, Mr. President."

UTAH STATE UNIVERSITY COURSE ON IRRIGATION PROBLEMS AND PRACTICES

Mr. WATKINS. Mr. President, I wish to take a few moments to call to the attention of my colleagues an annual educational program of international interest which will be conducted for the fifth time next month at Utah State University at Logan, Utah.

The occasion is the fifth annual special short course on irrigation problems and practices that is being conducted at the Utah State University at Logan, Utah.

This course, conducted by internationally-known specialists at the Utah school, will attract 15 irrigation leaders from 10 foreign nations this year. It is a part of a program at this educational institution of extending American know-how in irrigation and arid land reclamation to our neighbors in foreign lands.

A description of this program was carried in a recent issue of the Logan Herald-Journal. In view of the general interest in such programs of American economic assistance, I request unanimous consent to have this article by Mr. Ed. Haroldsen, which appeared in the May 19 issue of the Herald-Journal printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

HERE'S IRRIGATION COURSE THAT COVERS 4,000 MILES

(By Ed. Haroldsen)

A little United Nations on wheels!

That's the air-conditioned, chartered bus scheduled to leave Utah State University to take a group of foreign irrigation officials on a 4,000-mile tour of western reclamation projects this summer.

The tour will climax the fifth annual special short course on irrigation problems and practices opening June 2 at Utah State University, an internationally recognized event.

Fifteen irrigation leaders from 10 foreign nations will participate this year. The course is being given by the Utah State University irrigation department in cooperation with the International Cooperation Administration and the United States Department of Agriculture.

The foreign students will go to school at Utah State University and tour Utah points of interest until July 7. Then they will leave on the extended tour.

Utah State University was picked to conduct the short course because it has an international reputation in irrigation agriculture.

As every schoolboy knows, Utahans were the first white men to practice irrigation in America. In 1847, Mormon pioneers under the leadership of Brigham Young turned the waters of City Creek onto parched desert soil in what today is downtown Salt Lake City.

Dr. John A. Widtsoe, onetime Utah State University president and director of the agricultural experiment station, wrote the world's first textbook on irrigation. Dr. O. W. Israelsen, emeritus professor of irrigation at Utah State University, is author of the leading college textbook on irrigation used today. His book has been translated into Russian, Spanish and Portuguese. It now is being translated into Chinese.

Dr. R. H. Walker, dean of agriculture and director of Utah State University's foreign programs, was assistant director of the Foreign Agriculture Service in Washington, D. C., while on leave from Utah State University in 1952 and 1953.

Drs. Wynn Thorne and H. B. Peterson of Utah State University are authors of a textbook on fertilization and management of irrigation soils used throughout the Nation today.

Thus it is not surprising that Utah State irrigation people are in worldwide demand. For instance, Dr. Israelsen has served as irrigation engineering consultant in such faraway places as Brazil, India, Iran, and South Africa. Prof. Cleve H. Milligan, present head of the department, spent 2 years in Iran. Prof. Alvin Bishop has been in the Dominican Republic and recently returned from a 6 months' assignment in Japan. Dr. Vaughan E. Hansen has been in Brazil and in South Africa several times. Prof. Bruce Anderson has spent 4½ years in Iran. Prof. Jay Bagley was in South Africa.

And Utah State University irrigation graduates are world leaders in their field. For instance, the entire Canadian delegation and many members of other foreign delegations attending the recent third congress of the International Commission for Irrigation and Drainage in San Francisco were Utah State University graduates.

"It was just like old home week at Logan," Professor Bishop reported.

Leader of this year's short course will be Prof. James R. Barker. Professor Barker does not claim to be a Dag Hammarskjold. But he's got a big job in international relations.

He not only has to keep the group on schedule in an exhausting class and tour program extending over 3 months and a lot of States; but he has to work out a host of details on meals and accommodations to suit divergent tastes, cultures, and prejudices.

NO PLANNED MENUS

"We've found that it's best not have any planned menus," explained Professor Bishop, who has conducted the course in the past. "However, almost everyone, Jew, Mohammedan, or Christian, will eat fish and chicken."

One year, a foreign irrigation leader became ill on the tour and had to be hospitalized for a week. And the tour leader had to make the hospital arrangements.

This year everyone of the group speaks good English. Thus language shouldn't be a problem. Nine have been enrolled at Utah State University the past quarter and taking a class from Professor Barker.

Language was a problem the first 2 years the course was held. In 1953, 2 women linguists acted as translators. As Utah State University instructors lectured, the linguists translated simultaneously, one into French and the other into German. Students listened in Utah State University's Rural Arts Building with headsets just as delegates do at the United Nations in New York.

Trouble developed, however, when the group began touring. Headsets couldn't be used. And at every stop where someone gave a talk the group had to wait until it could be translated into the two other languages. In 1954, everyone spoke English but five Italians. So they had to wait for the Italian translator.

UNDERSTAND ENGLISH

Since 1954, the folks planning the course have insisted that participants know English.

With many nationalities represented some interesting situations have developed, even without language difficulties. Two years ago, for instance, Honduras and Nicaragua were having border troubles in Central America. But the Honduran and Nicaraguan members of the short course were buddies.

One year, when the Jews and Arabs were skirmishing in the Near East as usual, there were both Jewish and Arab representatives in the short course.

"But they had no arguments—just didn't mix," Professor Bishop recalled.

Since 1953 when the course began, more than 100 irrigation leaders from 34 foreign nations have been represented in the program. Participants have generally been government officials charged with administering irrigation affairs in their own lands.

This year the students are from Afghanistan, Brazil, China, Costa Rica, Israel, Japan, Philippines, Greece, Thailand, and Yugoslavia.

WALRUS HUNTING

Mr. WATKINS. Mr. President, at the last session, by request, I introduced a bill dealing with improved conservation measures in the taking of walrus in North Pacific waters. The Congress thereafter approved this proposal, and, upon signature of the President, it became public law.

I am pleased to note that new regulations, based upon this law, have now been issued by the Department of the Interior.

There is a conservation lesson for us all in this situation. Walrus originally were abundant in the Bering Sea, but ruthless slaughter in the 19th century, almost annihilated them. Thereafter protective measures were taken. We now have a stable walrus population, and through proper safeguards there is no reason why hunting and economic interests of Alaskan natives and sportsmen cannot be assured under this new program.

In an article entitled "United States Plans Revival of Walrus Hunting," the New York Times of June 5 referred to the new regulations. I ask unanimous consent that the article be printed as a part of my remarks at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

UNITED STATES PLANS REVIVAL OF WALRUS HUNTING

Walrus hunting off the coast of Alaska is to be revived under new regulations issued by the Department of the Interior.

The Department's Information Service said that the hunting season would be limited to the 3 months from May 15 to August 15 of each year. Hunters will be restricted to territorial waters of the Bering Sea, Chukchi Sea and the Arctic Ocean north of 59 degrees north latitude.

They are allowed, under the new regulations, to bring back the head and the hide of the walrus bagged. The successful hunter, however, must donate the meat of the animal to the inhabitants of the nearest native village. A nonnative hunter must employ and be accompanied by a native guide when stalking a walrus.

Walruses are large marine mammals and originally were abundant throughout the Bering Sea area. The animals were hunted ruthlessly from 1840 to 1890. From 12,000 to 15,000 walruses were killed annually and their number was depleted sharply.

Conservation measures have achieved a stable walrus population in recent years. Experts now feel that regulated hunting will not endanger the future of the walrus.

THE CASE OF MIKE OSCEOLA, A SEMINOLE INDIAN

Mr. WATKINS. Mr. President, during the 83d Congress, while serving as chairman of the Subcommittee on Indian Affairs, I well remember the hearings conducted regarding the proposed termination of special Federal supervision over the Seminole Indians of Florida; and particularly during the Seminole hearings I recall with pleasure the forthright and thoughtful statements made by a great-great-grandson of the famed Seminole warrior-chief, Osceola. This man was Larry Mike Osceola, who at the time of the hearings in March 1954, was but 33 years of age and yet already noted for the record of individual achievement he had made.

Here was an Indian fullblood, born, as he told the subcommittee, "right with the crocodiles and snakes in the Everglades," who "traveled around the country first, then wanted to go to school," and who, without any prior education, in attending Miami High School achieved not only a commendable scholastic record, but likewise distinguished himself in athletics. In 1940 Mike Osceola was Florida State champion in the javelin, second in the discus, third in the shotput, and on the football and track teams.

Later, while awaiting a military call, he became a trainee in an aircraft factory, in 3 months worked to a top classification, and thereafter as a civilian served in the United States Naval Air Corps.

Still later, just out of the hospital following an illness, and now married, on a $1.35 capital, determination, and trust, Mike secured a 10-acre property upon which he began a highway-area business. In 3 or 4 years a valuation of $50,000 was put upon it, such was Mike Osceola's enterprise.

Mr. President, I feel very keenly about the matter of Indian rights and Indian citizenship. As a boy, I grew up in an area in Utah where Indians were our constant neighbors. I have known many fine ones, but I believe that I can say that the impression that Mike Osceola left with me following those hearings on the Seminole program was among the best I have received of any one of them.

Imagine then my feelings when I saw in newspaper reports yesterday, Wednesday, that Mike Osceola, according to his own statements, was staked out to bake in the Florida sun—and this by four of his brothers, aided by other members of his tribe. And the reason for this, Mike Osceola said, was the nature of his progressive ideas. For these he was first beaten and then left tied in the sun.

According to the press report, his brothers became angry when he helped a committee to draft a constitution for operation of the Seminole nation, and the tribal elders did nothing to aid when he was staked out, his hands bound behind his back.

Through action of Sheriff Doug Hendry, of Collier County, deputies arrived and freed Mike Osceola. Warrants have been sworn out for the four brothers and deputies assigned to search the swamp for them. The victim's watch and $200 from his wallet have not yet apparently been recovered.

Mr. President, when Mike Osceola testified before the Senate subcommittee 3 years ago he spoke from wide knowledge of and deeply sympathetic interest in his people. He emphatically favored full recognition for the Seminoles as first-grade American citizens. He felt they should stand on their own feet, go out into the world and secure regular employment. Yet his interests were completely sympathetic with his people and as he said:

I would be the first one to give my last dollar to anyone who needs it, that is crippled, sick, or anything like that. But I am not sympathetic, I must admit, to the people who just don't have any desire to do anything or don't want to do anything for themselves.

Mr. President, the right to freedom of speech is one we as Americans especially cherish. I have a feeling that from the frank and revealing testimony Mike Osceola gave to the members of our subcommittee here in Washington may stem much of the hostility that exists between this witness and others of his family and tribe. I believe that in all fairness we should take further interest in learning what are the facts in this case, and in seeing to it that Mike Osceola is assured the full protection of his civil rights and the safety of his own property and person.

I therefore urge that the chairman of the Senate Committee on Interior and Insular Affairs or the chairman of the Subcommittee on Indian Affairs call for a full investigation of this unfortunate situation, and that all aid be given to civilian authorities in seeing that justice is done.

As the Senate is aware, the Seminoles of Florida were among those tribes named in House Concurrent Resolution 108 of the 83d Congress as being most eminently fitted for full freedom from special Federal controls. It was, and I am sure is, Mike Osceola's opinion that the Seminoles should be accorded that freedom soon, particularly for their own best interests.

If, by not taking conclusive action at that time and in later sessions, we have left bad blood among the Seminoles, it is high time that we do what we can in this Congress to rectify the situation.

Mr. President, I ask unanimous consent to have printed in the RECORD as a part of my remarks the article, referred to above, from the Washington Post and Times Herald of June 5. It is very brief.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SEMINOLE SAYS BROTHERS LEFT HIM TO BAKE IN SUN

MIAMI, FLA., June 4.—A 36-year-old descendant of a Seminole Indian chief charged today that four of his brothers staked him out to bake in the sun because of his progressive ideas.

Mike Osceola told police his brothers, aided by other members of the tribe, seized and beat him yesterday at a green-corn dance on the Seminole Reservation in the Everglades.

Sheriff Doug Hendry, of Collier County, said that warrants were sworn out for Doug, Howard, John, and William McKinley Osceola. Deputies were assigned to search the swamp for them.

Mike, the first Florida Seminole to attend a public school, said his brothers became angry when he helped a committee draft a constitution for operation of the Seminole Nation recently. This activity, he said, got him tagged as a "progressive" Seminole.

Mike said tribal elders stared at him impassively while he was staked out with his hands bound behind his back. Deputies, apparently tipped off by other Indians, arrived and freed him. Mike also charged that his brothers stole his wristwatch and took $200 in cash.

Mr. HOLLAND. Mr. President, will the Senator yield?

Mr. WATKINS. I yield to the Senator from Florida.

Mr. HOLLAND. Mr. President, first I wish to express my very great appreciation for the sustained interest which the Senator from Utah has shown in the Seminole Indians in Florida, and particularly in the young Indian he has just mentioned.

Like the Senator from Utah, I have been deeply distressed to see the press reports of the violence done to this young man, apparently by his own brethren, as a result of his efforts to advance the Seminole Indians in their acceptance of civilization and, further, their acceptance of status as full citizens of the United States.

I wish to assure the Senator from Utah, since he is concerned about the matter, that I have asked the peace officers of Florida who handled the matter to submit a full report as to what happened. Apparently, from the reports, the Florida officers have been diligent in successfully averting a tragedy, but as to what has happened within the Osceola family or within the tribe I have no further information than that which is stated in the news article.

I wish to assure the Senator, first, of my appreciation for his interest and, second, of the fact that we in Florida realize this is a difficult problem which will have to be worked out in some way with these aborigines, and that we stand ready to do our full part in seeking to inculcate in them a more enlightened point of view.

I hope to be able to report in some detail to the Senator who, because of his interest, is certainly entitled to know what is the immediate reaction following the discovery of this near tragedy in the Everglades of Florida.

Mr. WATKINS. Mr. President, I greatly appreciate the remarks of the Senator from Florida. I wish to say that I have a rather deep feeling that this particular young Indian, who has shown such marked ability, probably incurred much resentment among the members of his tribe because of the testimony he gave before the committee on the matter of the so-called termination bill which was then before the committee. Most of the tribe testified against the bill, and as a result of their testimony no action was taken on it.

I think it would be very wise indeed for the Committee on Interior and Insular Affairs to conduct an investigation, though not necessarily a public one. The committee should have someone check to ascertain what happened in Florida to this Indian.

Mr. HOLLAND. Mr. President, if the Senator from Utah will yield further, I hope he will follow through with that suggestion. The Senator will recall that during the course of the hearings to which he referred some of the older Seminoles professed not to be able to understand English, and the committee was having great difficulty with them. When the Senator from Florida came into the hearing, the Senator from Utah was astounded to find that the particular old Indian who was on the stand, who had stated he could not understand English, was at least able to understand the kind of English spoken by the Senator from Florida. [Laughter.] All the Senators then present will remember that we all had a good laugh because of that incident.

The Seminoles are simple-minded people, but I think most of them want to do the right thing. This is a matter which is going to call for very great patience and kindness, such as have been exemplified by the attitude of the Senator from Utah.

Mr. WATKINS. Mr. President, I thank the Senator for his remarks. I hope the suggestion he made will be followed.

WATER RESOURCE DEVELOPMENT IN THE COLUMBIA BASIN

Mr. MURRAY. Mr. President, on May 8 the Senators from Oregon and Washington, the junior Senator from Idaho, the junior Senator from Montana, and I respectfully requested a conference with the President, to discuss water-resource development in the Columbia Basin.

The seven Members of the Senate received a reply to this request on May 25.

It was, as is the White House custom under this administration, signed not by the President but by one of his assistants, Jack Z. Anderson.

Mr. Anderson informed the seven Senate Members, including me, that the President asked him to say that such a meeting would be premature.

As the junior Senator from Oregon observed, the President was willing to take time out for conferences with Dave Beck last fall, but he does not have time to confer with seven Senators representing a part of the Nation with the greatest natural resources.

This morning's Washington Post and Times Herald indicates that while the President will not see seven Northwestern Senators on a matter of great national concern, he will see an oil millionaire who wants the Government to provide him a private lake.

I ask unanimous consent to have printed at this point in my remarks an article in this morning's Washington Post and Times Herald reporting on yesterday's hearing before a House Government Operations Subcommittee, headed by Representative CHUDOFF. This article relates how Mr. Sid Richardson, Texas oil millionaire, complained to the President when the Army engineers tried to buy some of his land for a reservoir, suggesting they take an easement instead. The President talked to the Deputy Chief of the Army Engineers about this complaint. A review of policy followed.

The PRESIDING OFFICER (Mr. HOLLAND in the chair). Is there objection?

There being no objection, the article was ordered to be printed in the RECORD, as follows:

PROBERS TOLD OF COMPLAINT TO PRESIDENT

(By Tom Nelson)

House investigators heard testimony yesterday that Sid Richardson, Texas oil millionaire, complained to President Eisenhower personally when Army engineers tried to buy some of his land for a reservoir.

Maj. Gen. Bernard L. Robinson, Deputy Chief of the Engineer Corps, said Mr. Eisenhower mentioned the complaint when Robinson went to the White House to outline land acquisition policies.

Robinson appeared before a House Government Operations Subcommittee which is looking into these policies. Chairman EARL CHUDOFF, Democrat, Pennsylvania, said it wanted to determine whether the policies were revised with the aim of "taking care of one man in Texas who wanted to have a private lake."

The dispute involved about 1,200 acres of Richardson's land near Fort Worth, which the engineers wanted to acquire for construction of the Benbrook Reservoir.

Robinson said Richardson wanted to give the Government an easement on the land rather than sell it outright. An easement would allow the land to be used only for a specific purpose. CHUDOFF said the easement "would have given Mr. Richardson a private lake."

He told of going to the White House in July 1954, with Robert B. Anderson, then Deputy Secretary of Defense. Robinson said Anderson, a Texan whom Mr. Eisenhower recently nominated to be Secretary of the Treasury, felt the engineers were acquiring too much land by purchase when they built reservoirs.

He said Mr. Eisenhower told him he had received "a personal complaint from Mr. Richardson." Afterward, he said, there was a review of the policy. The acquisition of the Richardson property still is tied up in the courts, he said.

Mr. MURRAY. Mr. President, I ask unanimous consent to have printed in the RECORD this morning's column in the Washington Post and Times Herald by Drew Pearson. Mr. Pearson reports how President Roosevelt and President Truman responded personally to Members of Congress. President Roosevelt and President Truman also conferred with Members of Congress whenever possible.

As Mr. Pearson points out, Democratic Senators are not singled out for refusals. It is even difficult for members of the President's own party to see the present White House incumbent.

It is in my judgment very regrettable when the man who bears the responsibility of the Presidency is so insulated that Senators of either party cannot see him on issues of great importance.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE WASHINGTON MERRY-GO-ROUND

SENATORS UNABLE TO SEE PRESIDENT

(By Drew Pearson)

One reason Ike is having trouble with his budget is that Senators and Congressmen

seldom get in to see him. They can't even get him to answer letters. Every Congressman who wrote a letter to Mr. Roosevelt or Mr. Truman always received a personal reply. Almost all who requested appointments with Mr. Truman got in to see him. He made it a point to see every Congressman except ADAM CLAYTON POWELL, of Harlem, Democrat, and Clare Boothe Luce, Republican, of Connecticut. Both had once criticized Mrs. Truman.

Not every Congressman got in to see Mr. Roosevelt during the war years, but they did prior to the war.

One month ago eight Southern Senators asked to see Mr. Eisenhower regarding what they considered CAB discrimination against Eastern Air Lines. They received a reply from Gen. Wilton Persons, Ike's Deputy Assistant, as to why they couldn't get an appointment. Six weeks ago, seven Senators asked to see Ike regarding Hells Canyon. They are MURRAY and MANSFIELD, of Montana; MAGNUSON and JACKSON, of Washington; MORSE and NEUBERGER, of Oregon; CHURCH, of Idaho.

After waiting a month, White House aide Jack Anderson wrote a long, involved letter explaining why Ike couldn't see them.

Observed Senator NEUBERGER: "The President was willing to take time for conferences with Dave Beck last fall, but he hasn't time to confer with seven Senators representing a part of the Nation with the greatest natural resources."

ADDRESS BY MR. HARVEY WILLIAMS, PRESIDENT OF THE PHILCO INTERNATIONAL CORP.

Mr. WILEY. Mr. President, I have long stressed the importance of encouraging free enterprise throughout the world to serve the needs of mankind, to increase world trade, raise domestic standards of living, and promote economic health.

I was pleased, therefore, to note a significant and constructive address which was delivered by Mr. Harvey Williams, president of the Philco International Corp.

Keynoting the second annual conference on Foreign Operations of the International Management Association, Mr. Williams addressed himself to this very important problem and challenge.

He specifically suggested that we make greater use of the potentialities for good will and good economic relations which are available to us through Public Law 480, which, as we recall, provides for sales of farm surpluses to friendly foreign lands with repayments in the buyer's currency.

He suggested that there be expanded the present administration objective which is to the effect that 25 percent of the amounts loaned back should be channeled to private enterprise. This goal, as Mr. Williams indicated, has unfortunately not been met to date. But, far from falling short of it, he suggests that we ought to surpass that goal and try to see that 40 percent of local currencies are earmarked for private enterprise use.

I commend his thoughtful observations to the earnest review of my colleagues. I ask unanimous consent that the text of his address be printed at this point in the body of the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

NEW DIMENSIONS FOR AMERICAN FOREIGN OPERATIONS

(Keynote address by Harvey Williams, president, Philco International Corp., before second annual special conference on foreign operations of the International Management Association, New York, N. Y., May 22, 1957)

It is both a responsibility and an honor to be asked to keynote this second annual conference on foreign operations of the International Management Association. Many of you will recall the first meeting, held in this same building a year ago, when the keynote address was delivered by my old chief and associate, Jack Heinz.

From the program of this year's conference even the old experienced hands should find much to stimulate new lines of thought, while newcomers to foreign operations should receive a particularly well-rounded indoctrination. We should congratulate Larry Appley and his AMA organization, but particularly Fred Pemp and the IMA organization, for a fine piece of programing and express our warm appreciation to them for the many hours of forethought and hard work needed to bring about a conference with such a well-balanced agenda.

It is a stroke of genius that the purpose of this conference is described as plotting a course for new profit horizons. American enterprise, inventiveness, and skill have combined to fashion an economy and a society within the boundaries of the United States which enjoys the highest standard of living ever achieved by any nation in history. The productivity of our people, enhanced by the mechanization of all kinds of activity from farming great acreages in the corn- and wheat-growing States to dishwashing in our individual homes, has become so great that we have outrun our domestic supplies of important raw materials and must go abroad for iron ore, bauxite for aluminum, copper, molybdenum, and manganese—just to mention a few.

The phenomenal development of the American economy is one of the great wonders of the world. What can be more reasonable or more challenging now, than that the financial, production, selling, and administrative brains which have created this standard of living in our own country should be turned to assisting our friends abroad in raising their standards of living by supplying them, or teaching them how to produce for themselves, more of the goods, services, and conveniences which are now commonplace on the American scene.

I am convinced that the next two decades will demonstrate such overseas extension of activities to be one of the great growth opportunities in both sales and profits open to American industry.

To accomplish such an objective for enduring peace and widespread prosperity requires overall, long-range planning—the discussion of which this conference envisages. Business expansion abroad is dependent, to a large degree, on political implications. The seething Middle East is a vivid demonstration. For these reasons, may I reflect for a moment on the world as we find it today and then offer some suggestions for business development abroad in light of present conditions.

Canada enjoys circumstances and environment so like our own, including currency and language, that many American companies continue to consider their Canadian operations as part of their domestic activities.

Many of you, I am sure, are familiar with the Fortress America concept which conceives the maintenance of the free enterprise system in the North and South American Continents utilizing the scientific, technical, and production experience of the United States and Canada in conjunction with the large population and vast stores of raw materiels in South America. Its proponents urge the particular attention of American industry and Government to the rapid development of South America as a supplement and backstop to our own economy in the event of atomic warfare.

In Latin America, we find traditions, customs, and environments entirely unique to these nations. The relatively lesser degree of economic development in South America, than in some other areas, means that these economies start, today, lower on the upward curve of development. Therefore, their rate of growth will be more rapid, their demand for capital will continue at a high level and the returns will be large for successful enterprises in these countries.

Great Britain is an economy carrying on under very special circumstances. It raises 40 percent of its own food, but it must manufacture and sell in export a quantity of goods sufficient to earn the money to buy the remaining 60 percent of its food plus its requirements for clothing, shelter, and other personal needs plus the raw materials with which to continue the manufacturing on which it is dependent for existence.

When Britain devotes too large a proportion of its total man-hours to making products for its domestic market, the goods available for export diminish—and so do Britain's earnings of foreign currencies.

Consequently, the British Government finds itself continuously on the horns of a dilemma. It would like to increase the standard of living of the British people by allowing a greater proportion of total production to flow into domestic consumption. On the other hand, it must maintain controls, through taxes or otherwise, designed to force a substantial portion of Britain's production into export markets and so maintain earnings of foreign exchange. It is a highly developed society balancing on an economic razor edge.

In continental Europe, the common market slowly approaches a reality. Not all customs barriers will be swept away quickly. If, over a period of 12 to 15 years, barriers against the movement of goods can be eliminated substantially, and labor can flow from over-populated sections with unemployment, to industrial areas providing jobs, we can look forward to the possibility of a unified economy, of approximately 180 million people, with the opportunity to greatly increase its standards of living by lowering production costs and increasing productivity of the individual—much as has taken place in the United States.

The exciting potentialities of this development can be illustrated by a single comparison. In the American economy of 168 million people today, there are approximately 52 million automobiles. In the continental European economy of 180 million people, there are now only 14 million automobiles.

Imagine a development in Europe which might bring the use of automobiles within 20 years to two-thirds that in the United States currently. Then, there would be some 35 million automobiles in Europe with the collateral manufacturing and service activities the development of which we witnessed in the United States between 1920 and 1940.

This is an opportunity for American manufacturers and for American exporters alike. American companies which become established in Europe now will share in this economic development as their parent organizations have shared in the expansion of our domestic economy. Exporters will benefit by supplying specialized capital

goods and other types of products required by the expanding economy which the common market will create.

We are all familiar with the degree to which our own economic development was financed by British and European capital between the end of our Civil War and the beginning of World War I. We may well be on the verge of several decades during which we shall see a reversal of that historic capital flow and during which a renaissance of production and material well-being in Europe will be financed, in part, from the United States.

Currently some risk attaches to investment in Europe due to its proximity to the Communist area. Recent events in Hungary and Poland indicate restlessness in the eastern satellites. If their desire for self-determination and for a return to the ideals and ways of the free enterprise system continues, and manifests itself with violence as it did in Hungary, one cannot escape the risks of proximity to such potentials. However, if the eastern satellites regain a measure of self-determination by the slower and more conservative tactics of Yugoslavia and Poland, American investments in the European area may have a bright future by virtue of the development of the common market.

It seems likely that Africa will be developed from Europe and will be the special expansion area of the older European economies. We see the French interested heavily in Tunisia, Algiers, Morocco, and the Sahara; the Belgians in the Congo—the British in the East African areas and South Africa. Consequently, American participation in European business activities may well carry with it the corrolary of participation in the very undeveloped areas of Africa.

I am one of those who believe that the future business potentials of the portion of Southeast Asia which remains in the free enterprise area are enormous. In Pakistan, India, Burma, Thailand, Malaya, Indonesia, and the Philippines, there are some 700 million people living at almost minimum standards. The circumstances and environments existing in these economies are totally different from those existing in Europe, Africa, or South America. These are areas more easily subverted by communism because of their poverty and illiteracy. For that reason alone, they should have the special attention of the foreign-aid officials of our Government but, more particularly, the interest and aid of our able and foresighted managers in private industry.

Japan is an island economy which must import and export to maintain its existence. If the Japanese will hasten the conclusion of reparations agreements with additional nations in Southeast Asia, their need for trade with Communist China will be lessened and their economic potential can rise quickly. The American companies which have established operations in Japan, often in association with Japanese concerns, would benefit substantially.

In Australia there is a special situation—a continent equal in size to the United States, wealthy in vast natural resources, currently populated by only 9 million people. It is an economy in continuing need of capital and one which has made outstanding progress since World War II. It is a society particularly friendly to the American way of doing business and one which Americans can well afford to include in plans for overseas operations.

Consequently, as men of management approach the objective of securing maximum market penetration overseas with maximum profitability, we find no common denominators which will work equally well in every country. The only common characteristic is the urgent need for encouraging and assisting economic development to meet the universal demand for a higher standard of living. This urgent desire for a better way of life, combined with a dramatic reduction in infant mortality, a lengthening of the average span of life and an accelerating pace of technological development is why we find growth trends abroad roughly double those in the United States.

Most of us are familiar with certain basic foreign trade figures, but let us restate them to create a frame of reference. Our exports are running at the rate of approximately $17 billion a year. Concurrently, our imports are on the order of $13 billion. The differential of $4 billion to $5 billion is a very important factor in our relationships with other nations. If it had not been made up by military aid expenditures, foreign economic aid and American investment abroad, our customers in foreign countries would long since have used up their available dollars. Our exports then, would be necessarily of somewhat the same size as our imports. Of one thing we can be sure, every dollar which goes abroad as payment for an import, for investment purposes, for a loan for economic development, or an expenditure for military security will, in due course, come back to the United States to purchase American goods or services.

Prior to World War I, our foreign trade consisted largely of exports of agricultural products such as cotton and wheat. We were a debtor nation. We used exports of food and raw materials to pay interest and to return capital which had been invested in the development of the United States by foreign investors.

After World War I, we became a creditor nation. We needed relatively few products from abroad. Therefore, our imports were limited. However, we continued to try to sell overseas. Our manufactured goods became increasingly attractive to foreign customers and consumers. As a result, the foreign exchange situation became acute in the late twenties and continued so until after World War II.

With much of the world looking to the United States for capital goods and the supplies necessary for reconstruction after World War II, the foreign exchange situation became really critical. The Marshall plan and its successors, providing economic aid and military expenditures abroad, bridged the gap. The $52 billion expended by the United States during the last 12 years has enabled our friends abroad to procure from us what they needed. Now, as we are forced to spend more dollars overseas for raw materials, it is quite likely that there will be a gradual lessening of the acute dollar scarcity paralleling the increase in our dollar payments to the rest of the world.

Meanwhile, a new dimension has been added to our foreign operations. Prior to the First World War, our direct investments abroad are reported by the Department of Commerce to have been $2.7 billion. In 1929 they approximated $7.5 billion.

By the end of 1957 United States investments overseas are likely to be $32 billion, producing profits at the rate of about $4 billion annually. It has been estimated that American-owned subsidiaries and branches abroad are manufacturing close to $40 billion worth of goods in 1957. This is three times the value of manufactured goods exported from the United States last year. In the case of our own company, the ratio of production abroad to exports from the United States will be 5 to 1 in 1957.

This is one of the vital new dimensions in foreign operations—investment and production abroad as the principal means of penetrating foreign markets rather than by traditional export sales programs.

The excellent study of American investment and operations in Latin America made by Messrs. Pizer and Cutler, of the Department of Commerce, is the most comprehensive analysis which we have today on the effects of American investment and American production in foreign economies. It would be a most constructive step in aiding American businessmen and our Government to fully understand what is really taking place abroad if the Department of Commerce could undertake promptly a similar analysis for the entire free-enterprise area of the world. This should include research not only on the output of American-owned operations abroad but also on the output of licenses or other overseas affiliates of American parent companies.

It is clear that this new dimension of private investment and production abroad creates a factor in overseas market penetration which did not exist earlier in this century. Competition encountered today is more likely to come from American-owned or American-sponsored production abroad than from American exports.

What are the other circumstances which are creating such an increase of interest in foreign operations amongst American investors and businessmen today.

First, many growth potentials abroad are greater than those in the United States. We think of Great Britain as an advanced, venerable, highly organized economy. Nevertheless, out of 14 million British homes wired for electricity, less than 10 percent use electric refrigerators—as compared with 94 percent in the United States. Only 18 percent use washing machines contrasted with 85 percent here.

In the United States, we take running hot water for granted. Yet, in countries such as France and Germany, it is doubtful if over 30 percent of the dwelling units have any supply of running hot water. No wonder sales of consumer durables are increasing more rapidly in such economies than they are here.

Second, the reduction in infant mortality and the lengthening of the span of life made possible by modern pharmaceutical and medical knowledge are skyrocketing populations, particularly in the less developed economies. We live and must plan in a period of "exploding" populations when the number of our potential customers is being revised upwards repeatedly.

Thirdly, nationalism brings not only increased import barriers and restrictions, but also local industrialization and the urbanization of populations. As more and more people become employed in cities at regular wages, in more or less skilled occupations, growing middle-class markets are created. In some countries overseas, this is a unique development—close to being revolutionary. It is another vital cause for the increasing purchasing power of foreign markets.

We are also in an era of petroleum politics. With oil and natural gas being used more and more to produce electricity, and with automobiles, trucks, tractors and aircraft providing the modern means of transportation, petroleum is becoming the key source of energy to power the progress of the world.

Petro-politics was involved when the Egyptians bottled up the Suez Canal. This action has had a deep effect on the thinking of the free-enterprise area. There is no doubt that the development of petroleum resources in South America, West Africa, the Sahara and other areas will be stimulated and expedited as a result. Adequate petroleum resources in Brazil, Argentina, Australia, or West Africa could harden local currencies or strengthen such economies dramatically.

With this brief review of the environment and circumstances within which foreign operations must be planned and conducted today, let us examine what these conditions impose upon the three fundamentals of every business enterprise—men, materials and money.

Men are the most important element in any enterprise. One can have fine bricks and mortar, machinery and inventories, warehouses and other facilities, but without a

dedicated team and an energetic, inspired leadership little may be accomplished.

This conference includes discussions of personnel and personnel practices related to overseas operations. Therefore, only two brief points are significant now.

First, if you can staff your foreign operations with nationals of the country in which they are located, you will have a more economical operation and probably a more satisfactory one.

Second, when a man moves from domestic into foreign operations, a most important quality for him to possess is tolerance and sympathetic understanding. American methods which work successfully—in fact are essential—in our highly competitive economy, may seem quite as inappropriate in another country as did some of the actions of the proverbial Yankee in King Arthur's Court. Our job as managers is one of adaptation and combination, not one of imposition of American ideas and methods, without regard for local custom, tradition, and conditions.

Prior to World War I and in the decades between the two world wars, a relatively few American companies established subsidiaries abroad. A far more usual concept of foreign market penetration was an export manager located in an obscure office, assisted by a couple of clerks, a stenographer and a shipper. In years when business was good in the United States, he had great difficulty getting merchandise for his foreign customers. In years when business was bad at home, he was under pressure constantly to liquidate surplus inventories abroad. Usually, he was a third, fourth, or fifth echelon executive with little or no contact with the president of his corporation and no participation in long-range planning with respect to product design, merchandising and sales strategy, company financial policies, etc. There are still American companies today which follow this concept of foreign selling but, fortunately, they are becoming fewer and fewer. If you wish to peddle goods in Puerto Rico, Venezuela, Cuba, or the few other countries which have ample dollars, then, perhaps, you can be satisfied with this approach. However, under today's conditions of overseas trade and international economic development, it is as obsolete as the horse and buggy.

Today's complex international factors have created a new type of executive responsible for his company's overseas operations.

A modern manager of foreign operations finds himself to be a market and financial analyst today, a negotiator of prospective manufacturing licenses tomorrow, a member of a foreign board of directors representing his company's minority stock interest, and a consultant—in the management engineering sense—to licensee and subsidiary company managements. He must be a financier, manufacturer, sales executive, personnel director, economist, negotiator, and diplomat. More probably, he is a capable analyst, planner, and administrator with proven ability to coordinate into an effective team specialists in all of the various functions of business.

He is responsible for exporting American-made goods to countries which have sufficient dollars to buy them and also, for exporting similar goods made abroad to countries which can buy only with other currencies.

He finds himself responsible for the welfare of wholly owned foreign subsidiaries for which he implements the full range of management functions. He must assist local operating management in arranging adequate finance, personnel development, management succession, provision and maintenance of economical production facilities, production schedules, sales objectives, cost control, and, finally, personnel training and development including the bringing of local nationals to the home office and factories of the parent company for training and instruction.

In relationship to overseas licenses, he exercises similar management functions, but often in an advisory rather than a direct manner.

Even this brief definition of the functions of a modern manager of foreign operations makes it clear that he can only discharge these responsibilities well with the closest collaboration of his top management in integrating the domestic planning, policies, and organization of his company with its program for foreign operations. He must be in constant contact with his company's senior executives on finance, manufacturing, selling, and research—which means that the modern manager of foreign operations needs to be a member of senior top management.

How can he know whether or not to plan for another subsidiary operation abroad unless he knows his corporation's future financial program.

With today's rapid dissemination of news and of American publications to foreign businessmen and bankers, any change of price, model, or sales approach announced to the American public through domestic advertising is known to most overseas distributors and their bankers within a maximum of 3 weeks. A well-planned foreign-selling program can be upset completely by announcement of a domestic sales campaign of which foreign operations was uninformed when it launched its own plans.

The top managements of the leading American corporations, which have attained the greatest success in foreign operations, recognize these principles with respect to personnel and organization.

With respect to materials, the second fundamental in any foreign enterprise, the same basic considerations apply as in the United States. There must be an adequate, economical source of supply of raw materials, transportation, an appropriate labor force, proper channels of distribution and all the similar other elements necessary for success. I do not believe that we are here this morning to repeat these familiar fundamentals.

So let us consider the final, but most important, element, money. Until now the $52 billion of aid and military expenditures made by the United States overseas during the last 12 years has provided the life blood which stepped up the level of employment and the rate of production around the world to record heights. As employment increased, as more wages were earned, as purchasing power grew larger, the desire for a better way of life was fed. The demand so created requires record capital investments not alone in the United States but in the other major countries of the free-enterprise area as well. So, today we find that substantially every more advanced country is outspending its rate of savings. Capital has grown scarce and interest rates have increased materially. With the worldwide desire for more goods and better living, capital will continue relatively scarce and interest rates relatively high for a considerable period to come.

Under these conditions, how do we finance new foreign operations? How does American industry take advantage of the desire for its know-how and abilities to establish or increase local production abroad? How can economic aid be made available through the enduring relationships of private endeavor and private enterprise?

The manufacturing license agreement is a partial answer because such arrangements utilize the existing basic facilities of the overseas licensee. New capital is required primarily for special tooling and inventories of the newly licensed products. However, in many countries abroad where money is tight and expensive, it may be more difficult for local enterprise to raise capital funds than for an American company to do so at home.

There is, I believe, another very simple answer, merely awaiting implementation by Washington officials, through a mechanism which has already been established. I am referring to the use of the funds obtained from the sale of our commodity surpluses to foreign countries for local currency under Public Law 480.

A few weeks ago Secretary of State Dulles proposed to the Senate Foreign Relations subcommittee that a means be found for providing true nonmilitary economic aid, on a long-range basis, through the economic development fund. The sequence of action envisaged by Public Law 480 can provide the mechanism which the Secretary of State was seeking.

Under our agricultural support programs, enacted by the Congress, the Commodity Credit Corporation purchases certain surplus commodities from our farmers. Today an inventory of over $7 billion worth of such commodities is in storage.

To move these commodities to nations in need of them, the Congress enacted Public Law 480 authorizing the Department of State to make sales agreements with friendly foreign countries under which the purchase price is paid in the buyer's currency. Contracts totaling almost $3 billion have been negotiated.

When the United States Government is credited with these local currencies, the International Cooperation Administration is authorized to loan such currencies back to the country from which they came or to keep a portion for on-the-spot official American use. The administration has a policy guidance that 25 percent of the amounts loaned back should be channeled to private enterprise but actual experience appears to indicate that this objective has not been reached.

How useful to our foreign aid and foreign development programs would it be if these funds, in local foreign currencies, could be loaned on an increasing scale to competent private borrowers—either Americans or others—for local investment in new productive enterprises. This would make it possible for American private enterprise—often in association with local interests—to undertake additional projects abroad, create new job opportunities, and participate materially in economic development toward higher standards of living. It would enlist the full knowledge, competence, and experience of the American business community in seeking out those productive enterprises which can be established most soundly and profitably under existing conditions.

If the Congress wishes to take an enlightened viewpoint toward the fuller utilization of these local currency funds, it might well stipulate that 60 percent be loaned back to the Government of the country in question—one half (or 30 percent) to be used for public works, including highways, irrigation, public buildings, hospitals and schools—the other half to be used to augment or improve fundamental services such as transportation, communications and the generation of electric power.

With respect to the remaining 40 percent, the Congress should stipulate that it is to be earmarked for lending to private industry—one half to be loaned by the United States Government through a Washington agency while the other half is loaned through a local financial agency designated by the foreign government.

Obviously, such loans should be made on terms commensurate with conditions prevailing in the country in question. In addition, the terms available to private industry through Washington or the local financial agency must, of necessity, be the same.

Such local currency loans to private industry provide an added source of capital in a worldwide tight capital market.

In addition, the use of such local currencies eliminates the exchange risk of devaluation which is always present when a direct dollar investment is made abroad. Avoidance of this risk alone should be a great

encouragement to greater industrial development overseas under the guidance of American private enterprise.

With continuing purchase of agricultural commodities under the various support programs, and a continuing need for such commodities by foreign countries abroad, we have the prospect of a reasonably steady flow of funds in local currencies for both public and private investment overseas. With such a plan, Congress could report to its constitutents that foreign aid programs are of direct benefit to both the agricultural and industrial sectors of the American economy.

From the standpoint of the overseas country involved in such a program, it will bring to it a more rapid influx of American know-how; a greater willingness of Americans to invest; more jobs and a corresponding increase in local purchasing power; greater skills to local populations; and a demand for collateral services and activities will create additional local investment, business activity and jobs. These are the foundation stones of both economic and political stability.

In consequence, let us bring these elements together into an orderly conclusion.

The demand for a better way of life is expressing itself vigorously throughout the world. The resultant demand for goods and services is exhausting the savings of the advanced nations and is creating a world-wide capital shortage with increasing interest rates. The opportunities thus offered to investors in the more advanced nations make less attractive the development of more primitive areas.

The Congress has created a plan through Public Law 480 which could well generate a pool of local currencies of perhaps $1 billion per year. In these circumstances, is the time not ripe for the American Government and American private enterprise to combine these local currency resources and dollar funds available through a bonafide, nonmilitary, economic foreign aid program? Such a program could carry to both the older, more advanced nations as well as to the hundreds of millions of people in the relatively primitive new nations an effective public and private development program including local production and employment of a type best suited to each particular economy, leading to more earning power, consumption, economic and political stability, and a better way of life.

Through such a joint effort, the Congress and the administration can enlist all the American genius for organization, financing, production, distribution, personnel training and development, and can apply it in the most enduring fashion through enterprises in which Americans and local nationals are working together under normal, commercial incentives.

I believe, gentlemen, that the organization of such a program can be one of the most effective "secret weapons" of the United States in winning the cold war or maintaining the peace. Organization of such a program on a basis which is equitable to both the Americans and the businessmen and workers of the country in which each project may be undertaken, is one of the greatest challenges which American industry ever has had the opportunity to accept.

I commend to you the thought that the new dimensions in American foreign operations—the experience we have had already in organizing for production and distribution abroad has prepared us, as businessmen and free enterprisers, to carry our part of the responsibility for the success of such a joint program.

SWEDISH CONSTITUTION AND FLAG DAY

Mr. HUMPHREY. Mr. President, it is with a great deal of pride and personal regard that I rise today in the United States Senate to pay tribute to one of the greatest friends and partners for peace that the United States has, the great nation of Sweden. Today is the 148th anniversary of the adoption of the Regeringsformen, the liberal Swedish Constitution.

Sweden, this gallant friend of freedom, embarked on a reform movement in 1809 which has resulted in a model democrary that stands today as an inspiration to the peoples of the world. It is a tribute to her great and courageous people and their fine government, Mr. President, that this Scandinavian nation enjoys today one of the world's highest living standards.

The adoption of the constitution 148 years ago came as the result of a reform movement that overthrew the despotic ruler, Gustav IV. Beginning with Charles XIII, who was placed on the throne, Sweden entered into an era of progressive liberalization in government and of industrial development that lives on to this day.

There are today in the United States more than a million Swedish descendants in our farm communities alone—a sturdy and self-reliant people who are carrying on the farming traditions of their parents' homeland, helping to produce the blessing of abundance that the United States enjoys today.

Mr. President, it is with added pride that I say that almost 250,000 of these descendants live in my own State of Minnesota, according to the 1950 census. The Swedish population of Minnesota has been instrumental in building there a civilization recognized throughout the United States for its contributions to a liberal, democratic society—once again, a reflection of a heritage brought from beyond the seas.

The arts and sciences, agriculture, and industry in the United States, are enriched by the works and accomplishments of those who are of Swedish descent within our borders.

Mr. President, the United States and Sweden have worked together in warm and sincere efforts to bring to the world a lasting peace by setting an example in economic, social, and political cooperation.

It is with the thought in mind of continued "togetherness," that I offer this statement as an expression of good will to Sweden and as a salute on this important anniversary.

SUPPRESSION OF REPORT RELATING TO DANGERS INHERENT IN EXPOSURE TO RADIOACTIVE MATERIALS

Mr. NEUBERGER. Mr. President, today I again bring to the attention of the Senate a matter which I believe is of great importance to the American people.

On Tuesday of this week, Dr. H. Bentley Glass, professor of biology at Johns Hopkins University, indicated through the press that a report on strontium 90 effects submitted to the Atomic Energy Commission by an advisory committee, of which Dr. Glass is a member, has not yet been issued in final form due to official reluctance on the part of the AEC. I understand that the study was requested by the Commission over 2 years ago.

The American public has a right to know of the dangers inherent in exposure to radioactive materials. Suppression of this report on the part of the Atomic Energy Commission represents a betrayal of public trust.

This subject is one of vital concern to all Americans. It affects not only the present population of the United States, but future generations as well. An attempt to shield the facts from public scrutiny is inexcusable.

I believe that the AEC owes the public an explanation as to why the report was not previously released.

I urge the Atomic Energy Commission to make public the report on strontium 90 effects prepared by its Advisory Committee on Biology and Medicine. Full disclosure of unclassified information regarding radiation exposure is vital to establishment of informed public opinion and the rational discussion of this issue which looms paramount in the minds of many Americans.

BARRIERS TO TRADE WITH ISRAEL

Mr. HUMPHREY. Mr. President, in the Washington Evening Star of June 4, 1957, there appeared an article entitled "Arabs Plan New Barriers on Trade With Israel." The Associated Press dispatch is dated Cairo, June 4. It points out that—

> The 9-nation Arab League says it is going to tighten its economic squeeze on Israel.
>
> The league's economic committee decided last night to:
>
> 1. Blacklist motor firms that sell vehicles to Israel.
>
> 2. Blacklist foreign firms under contract to furnish Israel services or goods.
>
> 3. Set up a unified boycott system to control exports and imports between Arab States and others in order to prevent Arab goods from reaching Israel and to prevent Israeli products from reaching Arab nations through intermediaries.

I ask unanimous consent that the entire article be printed in the RECORD at this point as a part of my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ARABS PLAN NEW BARRIERS ON TRADE WITH ISRAEL

CAIRO, June 4.—The nine-nation Arab League says it is going to tighten its economic squeeze on Israel.

The league's economic committee decided last night to—

1. Blacklist motor firms that sell vehicles to Israel.

2. Blacklist foreign firms under contracts to furnish Israel services or goods.

3. Set up a unified boycott system to control exports and imports between Arab States and others in order to prevent Arab goods from reaching Israel and to prevent Israeli products from reaching Arab nations through intermediaries.

The Arabs in the past have blacklisted only a few firms for doing business with Israel. The chief effect of the boycott against Israel has been to bar Israeli shipping from the Suez Canal and to close the oil pipeline across Saudi Arabia to Haifa.

The council, which has been conferring 10 days, also called for an Arab congress to meet in Cairo next February to try to

unify Arab policy on oil, main resource of the Middle East group.

It recommended that the Arab States exchange ideas on coordinating oil refinery output and distribution of refined products so they could benefit to the greatest extent possible.

It urged construction of refineries to produce high octane aviation gasoline.

Mr. HUMPHREY. Mr. President, I note that these nation states are pursuing a course which can lead only to further trouble. This is not a contribution to peace and stability. It surely is not a recognition of the urgent need of the area, namely, the exchange of goods and services.

I had hoped that those who direct our foreign policy would give their attention to trying to inculcate a sense of reality in the minds of the Arab leaders. We are contributing millions of dollars to the Arab States, under the Eisenhower doctrine. Much of the money is going for very useful purposes.

But we are also a friend of the State of Israel, and I think we ought to make it crystal clear to the Arab States that we do not respect their boycott, and that under no circumstances will the Government of the United States knuckle down to the kind of blacklisting which goes on with respect to American firms which may wish to do business with a friendly nation state.

I ask unanimous consent that an editorial entitled "Barren Statesmanship," published in the Washington Evening Star of June 5, 1957, relating to this news story, be printed in the RECORD at this point as a part of my remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

BARREN STATESMANSHIP

On certain issues, some members of the Arab League—which is made up of Egypt, Saudi Arabia, Syria, Jordan, Lebanon, Iraq, Yemen, Libya, and Sudan—are barely on speaking terms with each other. But all of them seem to be able to maintain a common front of sorts against Israel. And although their unity in that respect may actually be more apparent than real, it is nonetheless formidable enough, at least from the propaganda standpoint, to be a major impediment to a peace settlement in the Middle East.

This is well illustrated by the league's decision to intensify its economic squeeze on its Jewish neighbor in two ways, among others: (1) By boycotting firms that sell motor vehicles to Israel or are under contract to provide it with goods and services, and (2) by establishing a unified system of export-import controls that would prevent intermediary nations from shipping Arab products to the Israelis or Israeli products to the Arabs. If really put into full effect, such an operation could be seriously hurtful not merely to Israel's interests, but to those of the entire Middle East as well.

Of course, because of its own internal divisions, the Arab League may in fact be incapable of effectively waging this type of economic warfare, and so the whole undertaking may prove to have much more bark than bite in it. But still, as something that can serve only to keep alive mutual hostility and tension in the Middle East, it constitutes an act of barren statesmanship deplorably designed not to promote but to obstruct progress toward a decent Arab-Israeli settlement. Certainly its authors are poor candidates for the Nobel peace prize.

Mr. HUMPHREY. The editorial points out, in the concluding portion, that—

Of course, because of its own internal divisions, the Arab League may in fact be incapable of effectively waging this type of economic warfare, and so the whole undertaking may prove to have much more bark than bite in it. But still, as something that can serve only to keep alive mutual hostility and tension in the Middle East, it constitutes an act of barren statesmanship, deplorably designed not to promote but to obstruct progress toward a decent Arab-Israeli settlement. Certainly its authors are poor candidates for the Nobel peace prize.

I join with the editor of the Washington Evening Star in underscoring every line of that editorial. I wish to commend him. I hope that our representation in those countries, through our Embassies, will make it crystal clear that the action of the Arab League is about as close to hostilities as it is possible to come without shooting a gun. I hope it will be made clear that we deplore it and reject it, and that we will do everything we possibly can to avoid it. I hope it will be made clear that we will not contribute to such an operation, designed to strangle a friendly state, namely, the State of Israel.

FINANCIAL PROBLEMS OF THE ADMINISTRATION

Mr. BUSH. Mr. President, I hold in my hand an editorial entitled "A Problem Is Not a Crisis," published in today's issue of the New York Times. The editorial has to do with the debate now in progress with respect to the question of interest rates, the money market, the financing of the United States Government, the assertions that this administration fosters a so-called hard money or tight-money policy, and the argument that this presents a crisis.

The editorial writer takes issue with those who claim that there is a crisis. He says in part:

But when political opponents and other critics of the administration employ the term "crisis" to describe this situation, publicly lament the danger of rising Government interest costs and speak darkly of the "threat to Government credit," they are being even more unrealistic.

The editorial also states:

The purpose behind the current policies of our monetary authorities is the prevention of all-out inflation.

The editorial goes on to say:

While the Treasury may not be particularly happy with conditions as they are, it realizes that, though it may not be able to finance, for the time being, on as favorable terms as it would wish, it is not complaining about the Federal Reserve Board's monetary policies. And it is not complaining because it knows that, despite the immediate cost of those policies, they represent the best insurance man has yet devised against the infinitely more costly danger of inflation.

Mr. President, the editorial makes it clear that the responsibility for the management of the money market—if it can be called that—lies not with the Treasury, but with the Federal Reserve System. I have attempted to point that out repeatedly, and I believe it needs emphasis.

I ask unanimous consent that the editorial appearing in today's New York Times be printed in the RECORD at this point in my remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

A PROBLEM IS NOT A CRISIS

When he takes over the reins as Secretary of the Treasury as successor to George M. Humphrey, Robert B. Anderson will take over at the same time a number of pieces of unfinished business that rate the designation of "problems." Generally speaking, these problems are to be found in the area of debt management. They are the sort of problems that might be expected to beset an administration that (1) inherited a huge public debt, consisting in the main of short-term obligations, and (2) has been compelled to do its refinancing for 2 years now under conditions of uninterrupted prosperity and tightening money rates.

It would be unrealistic to deny that these represent very real practical difficulties, and certainly they have constituted a major setback to the Treasury in its plans to put the Federal debt on the sound permanent basis it wants to see it. But when political opponents and other critics of the administration employ the term "crisis" to describe this situation, publicly lament the danger of rising Government interest costs, and speak darkly of the "threat to Government credit," they are being even more unrealistic.

Interest charges on the Federal debt amount at the present time to roughly $7 billion a year, and certainly this is a very substantial figure, judged by historic standards. But let us keep things in perspective. Only a very small fraction of that figure is attributable to the present and recent high cost of money. Lest we forget, the Federal debt, which is now in the neighborhood of $280 billion, was only $50 billion as recently as at the end of 1940. No nation can increase its public debt by nearly fivefold, even under artificially easy interest rates, and not expect a pretty spectacular rise in that part of the budget representing interest.

What is the answer, then? If you are to believe those critics who, one suspects, are less worried by the Government refinancing problem than the inconveniences to which they find themselves subject as a result of tight money it lies in a return to cheap money. There is no question that such a program would help simplify the immediate problems of the Treasury; but to stop there is to consider only one side of the balance sheet.

The purpose behind the current policies of our monetary authorities is the prevention of all-out inflation. As against the effect of a restrictive monetary policy in this $7 billion annual figure, it is necessary, therefore, to consider for a moment what a removal of the anti-inflation brakes could mean in terms of Government costs as a whole.

A glance at the most recent figures on the gross national product shows spending on goods and services by the Federal Government alone to be running currently at an annual rate of approximately $50 billion a year. A rise in prices and living costs of 5 percent, everything else being equal, therefore would mean an increase of $2.5 billion in this figure; a price inflation of 10 percent would mean an increase of $5 billion, and an increase of 14 percent would raise it by $7 billion, the amount of the total burden of carrying the public debt.

This is the simple basic arithmetic behind the fact that, while the Treasury may not be particularly happy with conditions as they are, it realizes that, though it may not be able to finance, for the time being, on as favorable terms as it would wish, it is not complaining about the Federal Reserve Board's monetary policies. And it is not

complaining because it knows that despite the immediate cost of those policies they represent the best insurance man has yet devised against the infinitely more costly danger of inflation.

THE GIRARD CASE IN JAPAN, AND THE STATUS OF FORCES AGREEMENTS

Mr. JAVITS. Mr. President, there is a great deal of interest being manifested in the Girard case.

As a member of the other body, I had occasion to consider the legislation authorizing the Status of Forces agreements. The basic line of division was between the performance of duty when the serviceman should be absolutely under the United States control, including any crimes committed, and leave or off-duty time, when the serviceman entered into the normal community life of the country where stationed, when under suitable safeguards, the host country should have jurisdiction over any crimes committed. The question was in neither case one of guilt or innocence of the accused. I deeply believe that the people of our country will understand the situation if this line of demarcation is kept very clear.

The Girard case in Japan, as well as the case of Sergeant Reynolds in Formosa, raises the whole question of Status of Forces agreements.

I wish to express my deep belief that those agreements are essential to the security of the United States and the Free World and to world peace. Without them, local pressures and public opinion could soon invalidate the presence of United States forces in many countries where their presence is now indispensable to security against Communist aggression.

Moreover, the absence of such agreements would make our country more vulnerable to subversive propaganda within the countries where our forces are now stationed. But, as I believe in the need for these Status of Forces agreements, they must, at the same time, be so fair and just as to be acceptable to the people of our country and to the mothers and fathers, families and friends, of the 1,250,000 American soldiers, sailors, and marines who serve overseas, afield or afloat.

I believe that in this regard the Girard case is especially noteworthy, in view of the fact that the general commanding Girard's division has certified that he was engaged in the performance of official duty. In that case, even if he exceeded his orders, he should be considered subject to military discipline and military disciplinary action.

I realize the solemnity of decisions made by our Government and by our President, and I respect them, and I certainly propose to abide by them. However, as a Senator from New York, I urge upon the Federal Government that there is a real difficulty in the operation of the United States-Japanese Security Treaty which deals with this question, because the procedure to determine whether or not Girard was engaged in the performance of official duty was not backed up with sufficient detailed criteria.

After all, as a lawyer, I know that the commission of a crime would never be in the line of performance of official duty. Therefore, at all times the question would be subject to negotiation between the two Governments, through their top representatives.

The Status of Forces Subcommittee of our Armed Services Committee will undoubtedly make some findings and submit recommendations with respect to our internal organization in these areas. However, our Government should invite the Japanese Government to undertake the renegotiation of the United States-Japanese Security Treaty and the administrative agreement under it, with a view specifically to clarifying the line of demarcation which I have suggested, and changing the clause introduced into the agreement in a protocol of September 23, 1954, which permits a contrary interpretation. The other agreements made under the status of forces legislation should be similarly reviewed, as well as our situation in Formosa with which we have no such agreement.

Mr. President, my reason for making these suggestions, most respectfully, to our Government, is this: There is a grave danger in the present situation of a wave of public opinion in the United States which will cause Congress to repeal the authorizing legislation and sweep away the Status of Forces agreements. I would consider this a serious reversal of our foreign policy, and a serious jeopardy to our national security.

For that reason I believe the administration must give the United States-Japanese Security Treaty its prompt attention.

At this point I ask unanimous consent to have printed in the RECORD an editorial published in the New York Times entitled "The Girard Case," which makes a substantial number of the points I have made.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE GIRARD CASE

After a full review of the case of Army Specialist Girard, charged with killing a Japanese woman on an American rifle range in Japan, President Eisenhower and Secretaries Dulles and Wilson have agreed to yield to Japanese demands and to turn the accused man over to the Japanese courts for trial. They have done so, they say, to keep good faith in carrying out our Status of Forces Agreement with Japan and to preserve the Free World's defense structure against Communist imperialism in the Far East.

This defense structure has already suffered a blow to its prestige as a result of the riots on Taiwan following a similar incident, and Japanese leftwing elements have so inflamed public opinion over the present case as to threaten like outbursts in that country. We need not lack understanding of the feelings of a proud people over the irritations and often deplorable incidents arising from the presence of foreign troops on their soil. But it will be an evil day if Communists or other anti-American elements are permitted to impair the defense structure by exploiting or manufacturing incidents. The situation calls for reciprocal understanding of popular feeling in the United States.

The question involved here is not the guilt or innocence of the accused, which must still be determined. The question is whether American soldiers on duty abroad are to submit to the judgment of foreign courts such decisions as whether they were or were not on duty at the time of an incident, whether they properly carried out their duty or whether they exceeded it, and even whether and how far they are to be under control of their officers in military affairs. This involves the fundamental question of military morale and discipline, and neither we nor the host countries can have any interest in impairing these elements of military strength.

There is no doubt in this case that Girard, being on an American rifle range during military exercises and assigned to guard duty, was on duty. The general commanding his division has certified this fact. Girard may have, as our Government's statement concedes, exceeded his orders; he may be even guilty, as some assert, of playing a cruel game with Japanese scavengers who invaded the rifle range. But, even then, he should be considered subject to military discipline and military disciplinary action.

The Status of Forces Agreement provides for trial by local courts of offenses committed by American soldiers abroad while off duty and off military grounds, and the clause introduced in the agreement with Japan 4 years ago, permitting a contrary interpretation, has no proper place there. The Japanese promise a fair trial for Girard, and there is no reason to question their good faith, proved in many previous cases. But the best thing the Japanese court could do would be to declare the case outside of its jurisdiction and return Girard to American justice, where he belongs.

ORDER FOR CERTAIN FORMAL PROCEDURES DURING THE ADJOURNMENT FOLLOWING TODAY'S SESSION

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that during the adjournment following today's session of the Senate, authority be given, first, to the Secretary to receive messages from the House of Representatives; second, for committees to submit reports; and, third, for the Vice President or the President pro tempore to sign enrolled bills and joint resolutions duly passed by the two Housse.

The PRESIDING OFFICER. Without objection, it is so ordered.

RADIOACTIVE FALLOUT

Mr. BENNETT. Mr. President, one of the most pressing problems confronting the great nations of the world today is that of steadily increasing radioactive fallout as a result of the testing of nuclear weapons. On the one hand, we are faced with the conflicting but disconcerting testimony of scientists; on the other hand, we are faced with the obvious risks involved in any slowdown of our program of nuclear research and development.

I ask unanimous consent to have printed in the RECORD at this point an editorial from the Salt Lake Tribune of June 2, which in my opinion summarizes very effectively the situation we now face in this respect.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

FEAR OF NUCLEAR FALLOUT CAN'T BE IGNORED

In one week of hearings the Senate-House Committee on Atomic Energy has developed

the fact that there is agreement among American scientists on the need for international action limiting tests of nuclear weapons. The agreement is qualified, of course, by the wide divergence in scientific opinion as to the extent of the danger to mankind from radioactive fallout under present conditions. That is understandable. Fission and fusion are so new that the matter of long-range radioactive consequences must involve a great deal of guesswork.

The important point, however, is the agreement among the scientists, including spokesmen for the Atomic Energy Commission, which heretofore has minimized radioactive danger. The AEC's position is that radioactive risks had to be taken because of the greater danger involved in failure to keep ahead of Soviet Russia in the development of nuclear weapons.

Whenever a nuclear explosion is set off, tiny particles of radioactive material are dispersed into the atmosphere, most threatening of them being strontium 90, a probable cause of bone cancer and leukemia. Strontium 90, unlike some other radioactive products, also remains potent for a long time. And since each nuclear explosion puts more strontium 90 into the atmosphere, the more nuclear tests there are, the more menacing the problem becomes.

Last week residents of the Northern Hemisphere were given something else to think about when a meteorological researcher told the Congressional committee that radioactive fallout, no matter what its point of origin, tends to concentrate in the atmosphere over the heavily populated North Temperate Zone.

Undoubtedly many popular ideas about fallout verge on the hysterical, at least from the scientific standpoint.

But it is highly improper, as well as unscientific, to blame hysterical people for the widespread, genuine concern over fallout.

First of all, the scientists themselves are far from agreeing. Some say there is nothing to worry about. Others believe that there is a definite danger, and this group includes geneticists who are concerned with generations yet unborn rather than with persons now living.

Second, and probably more important, the public itself simply doesn't know what to think when scientists disagree. Science has become such a fetish that when science does not produce a definite answer the fear of the unknown becomes overwhelming.

The Senate-House committee has bravely attempted to explore the unknown. It remains to be seen whether the committee was the proper agency for the job. Nevertheless, somebody had to do something. Discussion of radioactive fallout had taken off into the stratosphere and was losing all connection with reality. And the Atomic Energy Commission, which should have been a stronger anchor, didn't help any with its policy of substituting tut-tutting for frankness.

The danger from fallout may or may not be as great as many people fear it to be, but the very fact that the fear exists cannot be ignored.

The committee hearings, though inconclusive as yet, disclosed the depth of the fear and the need of action to allay it.

That may mean international action, something still in the future. How long can we afford to wait?

If bomb tests continue unchecked, it is possible that the atmosphere could become so poisoned as to make conventional disarmament talks academic.

In this matter, as in most others, the prime question is how far the Communists can be trusted. But there is also one big difference—the atmosphere recognizes no political boundaries and radioactive fallout cannot be driven away by border guards. If the Communists are reasonable and logical men, they should recognize these things as clearly as anyone else.

Mr. BENNETT. Mr. President, one of the very real dangers in this situation is the fact that the technical nature of the problem can easily result in misinterpretation of published data, thereby creating hysteria based upon half-truths.

When Paul Jacobs' now famous article on radiation was published in the Reporter magazine, creating widespread alarm, particularly in certain communities of Utah and Nevada, I wondered if this might be such an example. For instance, he had pointed out that in one city in Utah the volume of the danger of radioactive fallout was 1,260 times the maximum permissible level.

I asked the AEC, in a letter dated May 9, 1957, to reply to the assertion in the Reporter article.

I have received a letter from Dr. W. F. Libby, of the AEC, together with a report made by the AEC's Division of Biology and Medicine on the questions I raised. These two documents do not pretend to answer all the questions now being asked in connection with radiation fallout, but they do answer, to my satisfaction at least, several of the statements made in the Reporter article which have caused a great deal of anxiety.

Because of the urgency of this problem and because of the interest in the current hearings being conducted by the Joint Committee on Atomic Energy, I ask unanimous consent that Dr. Libby's letter and the Report of the Division of Biology and Medicine be printed in the RECORD at this point.

There being no objection, the letter and report were ordered to be printed in the RECORD, as follows:

DEAR SENATOR BENNETT: Thank you for your letter of May 9, 1957, expressing interest in the promotion of safety in connection with nuclear weapons tests in Nevada and requesting comments on some of the statements made by Mr. Paul Jacobs in an article which appeared in the May 16, 1957, issue of the Reporter magazine. You indicate particular interest in the statement that exposure of residents of St. George, Utah, to radiation "* * * during one 24-hour period was 1,260 times greater than the provisional permissible concentrations established for radiation workers * * *" You also request comments on the exposures to radiation experienced by residents of Hurricane, Utah, in 1953 and in the same year to occupants of Riverside Cabins off Highway 91.

We share with you, of course, the view that the record should be set straight and that the facts should be publicized. This we have endeavored to do by a variety of means over the past several years. There have been statements to the press, numerous articles prepared by the technical staff and published in scientific journals and in nonscientific periodicals; speeches by Commissioners and by the scientific staff of the Division of Biology and Medicine; correspondence with Members of the Congress, and detailed discussions in our seminannual reports to Congress. Our 13th semiannual report featured a 48-page section, Public Safety in Continental Weapons Tests, discussing the many factors involved in assuring public safety; and our most recent report, the 21st semiannual report to Congress, featured a 150-page section, Radiation Safety in Atomic Energy Activities.

The statement by Mr. Jacobs concerning the air concentration at St. George illustrates the difficulty of keeping the record straight because of the complexity of the subject matter. Our 13th semiannual report discusses briefly the basis of maximum permissible concentrations and states, "Fallout material includes a number of radioisotopes, some of which are of more concern than others as internal radiation hazards. A maximum permissible air concentration for mixed fission products following a nuclear detonation has been established by the United States Atomic Energy Commission upon the recommendation of an advisory panel of experts * * * averaged over a 24-hour period * * * the maximum permissible concentration is 1 microcurie per cubic meter of air if the radioactivity is associated with particles less than 5 microns in diameter." However, Mr. Jacobs in commenting on the concentration of fallout in the air at St. George, reported by the AEC to average 1.29 microcuries per cubic meter over a 24-hour period, states that the concentration was 1,260 times permissible concentrations.

Mr. Jacobs' statement is presumably based on his own interpretation of table 2, page 11, of National Bureau of Standards Handbook 52, a copy of which is enclosed for convenient reference. This table, as is apparent from the accompanying text, is intended to apply only to concentrations of radioactivity of unknown identity in air and water and for much longer periods of time. It assumes, in fact, that the radioactivity could consist entirely of strontium 90, whereas only about 0.001 percent of the radioactivity in fallout at 24 hours after detonation is due to this radioisotope. The table is, therefore, not applicable to fallout situations in which the isotopic composition and the chemical and physical characteristics of the radioactive material are sufficiently well known to permit estimates of permissible concentrations appropriate to the relatively short periods of time that the material is in the air. Hence the application of the value from table 2, used by Mr. Jacobs, to fallout from weapons tests constitutes an incorrect use of the table and results in a grossly misleading and inaccurate conclusion.

In discussing the actual exposures of residents of St. George to radioactivity in the air, it should be noted that the residents were generally indoors during the period of high concentration. Experience shows that the concentrations of fallout indoors, as in the case of other dusts, are much smaller than outdoors. Thus the average concentration of radioactivity in the air actually inhaled by the residents of St. George may have been only a small fraction of the one microcurie per cubic meter criterion.

Because of the complexity of the subject matter I have asked our Division of Biology and Medicine to prepare a report describing in appropriate detail the differences between exposure to concentrations of fallout in the air and exposure of the whole body to radiation from fallout on the ground, and the significance of these different forms of exposure from the standpoint of possible hazard to health. This report, which is enclosed, shows that in the evaluation of exposure from early fallout, the radiation dose from the inhalation of radioactive materials in air is relatively small compared to the radiation dose from fallout on the ground.

The fallout of radioactive material at Riverside Cabins resulted in the highest radiation level observed to date in the United States in an inhabited place outside of the test site. Taking into account the average protection afforded by shelter and reduction in intensity due to weathering, it is estimated that the 15 nontransient residents might have accumulated a dose of from 7 to 8 roentgens. A detailed discussion of the considerations involved in evaluating the significance of this exposure is given in the enclosed report.

Current discussion of the possibility that radiation from fallout at such low dose levels might be hazardous is concerned entirely with the possibilities of delayed effects—leukemia, cancer, or reduction in life expectancy, and genetic mutation. If these effects can occur from low levels of exposure, such as those under consideration here, it is to be expected that the probability of such an effect will depend upon the radiation dose accumulated over a period of years.

Consideration of the possibilities of delayed effects coupled with increased opportunity for exposure to radiation over periods of many years is reflected in a recent revision of the recommendations of the National Committee on Radiation Protection adding to previous standards a recommendation which limits the average exposure of radiation workers over a period of years to 5 roentgens per year. Under current standards (as recently revised) an occupational worker could accumulate radiation doses up to 15 roentgens per year and may, over a period of 20 years, accumulate a radiation dose up to 100 roentgens. By comparison, the exposure to the residents of Riverside Cabins was approximately one-half the dose which an occupational worker might accumulate in 1 year. That the National Committee on Radiation Protection would in its recommendations permit exposures as high as 15 roentgens in 1 year and 100 roentgens over 20 years gives some indication of the remoteness of the possibility of delayed effects from exposures in that range and over similar periods of time.

Insofar as immediate effects are concerned (as distinguished from the remote possibility of delayed effects), exposures to levels much higher than those experienced by the residents of Riverside Cabins would produce no detectable effect on the well-being of the individual.

We shall be pleased to provide you with any additional information you may desire to assure you and the people of Utah of the elaborate precautions taken in connection with test operations.

Sincerely yours,

W. F. LIBBY,
Chairman.

REPORT BY THE DIVISION OF BIOLOGY AND MEDICINE CONCERNING QUESTIONS RAISED BY SENATOR WALLACE F. BENNETT, UTAH, IN CONNECTION WITH AN ARTICLE BY PAUL JACOBS, CLOUDS FROM NEVADA, THE REPORTER, MAY 16, 1957

The following information is provided in reply to questions raised by Senator WALLACE F. BENNETT in his letter of May 9, 1957.

In discussing the fallout on St. George during the Nevada test series of 1953, as reported in the Atomic Energy Commission's 14th semiannual report to Congress, July 1953, Mr. Jacobs says:

"The entire matter is disposed of in a few sentences. * * * Nothing is said in the report of the fact that in St. George the air contamination at one time was 1,260 times more than the provisional permissible concentration established for radiation workers."

Page 51 of the same semiannual report gives a list of eight "* * * highest concentrations of airborne radioactivity in communities surrounding the test site * * *" during the series. The community of St. George appears first on the list, with an estimated average concentration, for the 24-hour period following the arrival of the fallout, of 1.29 microcuries per cubic meter. Following the table is the statement: "As an operational guide, the test organization has attempted to hold airborne radioactivity to a level of 1 microcurie per cubic meter, averaged over 24 hours. Since the highest reading of 1.29 microcuries per cubic meter existed for only a single 24-hour period, it can be concluded that this was not a dangerous concentration level."

Mr. Jacobs' statement that the observed concentration was "1,260 times more than the provisional permissible concentration established for radiation workers" is presumed to be his own interpretation of a recommendation of the National Committee on Radiation Protection as published in Handbook 52 of the National Bureau of Standards, 1953. A copy of this handbook is attached. Table 2, page 11, of the handbook gives "provisional levels of permissible concentration of radioactive contaminants for use beyond the control area."[1] For beta or gamma emitters in air, the table gives the value of 10^{-9} microcuries per cubic milliliter, which is equivalent to 0.01 microcuries per cubic meter. The concentration of 1.29 microcuries per cubic meter for St. George quoted in the Commission's 14th semiannual report is 1,290[2] times this value.

The values contained in table 2 of handbook 52 are intended for use, (1) where one knows nothing of the radioisotopic composition of the radioactive material involved, and (2) where it may be assumed that exposures at these levels may be continuous over long periods of time.

In the case of fallout from a weapons test, the composition is well known as a function of time. See, for example, the analysis by H. F. Hunter and N. E. Ballou, Fission Product Decay Rates, published in Nucleonics, November 1951. The value given in table 2 is not only inapplicable to the conditions under discussion but, contrary to the impression given by Mr. Jacobs' statement, the concentration of fallout in the air at St. George contributed only a small fraction of the total dose received by the inhabitants. The dose of principal importance was whole body dose which inhabitants may have received from fallout on the ground—which in the case of St. George was about 3 roentgens.

In the protection of persons against excessive exposure to radiation, one's interest in cencentrations of radioactivity in air is primarily in the radiation doses which may result to various portions of the body as a result of inhalation of the radioactive material.[3] If it were assumed that the residents of St. George were out of doors during the period of high air concentrations, the radiation doses received by various portions of the body would have been approximately as follows: lungs, 0.3 roentgen[4] thyroid, 0.3 roentgen; large intestine (as a result of swallowing inhaled material), 0.1 roentgen; skeleton (from strontium 90, strontium 89, barium 140, and rare earths), 0.01 roentgen. Because the inhabitants were indoors, the concentrations of radioactive material in the air which they breathed and, consequently, the radiation doses to these organs were much less. Observations elsewhere indicate that concentrations of fallout indoors may be from 1 percent to 10 percent of those outdoors.

The dose to the thyroid is a direct quotation from an article by Dr. Gordon Dunning, of this division, Two Ways to Estimate the Dose to the Thyroid, Nucleonics, February 1956, in which he uses the fallout at St. George as an example. A reprint of this article is attached. Doses to the gut and to the skeleton are based on unpublished computations.

In considering the importance of a dose to the lungs of 0.3 roentgens or less, in relation to a whole body dose of perhaps 3 roentgens, it should be explained that a dose of 3 roentgens to the whole body means a dose of 3 roentgens to each portion of the body. The sum of the 2 doses is, then, a dose of 3.3 roentgens to the lungs, plus a dose of 3 roentgens to the remainder of the body. However, because the radiosensitivity of the lungs is much less than that that of several other portions of the body, particularly the blood-forming organs, this additional dose to the lungs may be neglected in evaluating the total effect of the exposure.

Our conclusion that the radiation from inhaled fallout is of much less importance than the radiation from fallout outside the body is borne out by observations made in the case of the very heavy fallout on the island of Rongelap, Marshall Islands, in March of 1954 from which the inhabitants are estimated to have received radiation doses of about 175 roentgens from fallout outside the body. The studies of the medical team that cared for the Rongelapese are summarized in the publication, Some Effects of Ionizing Radiation on Human Beings, published by the Atomic Energy Commission, July 1956. A copy of this report is attached. In paragraph 6.35 of the summary of this report the authors state:

"* * * From data on the Marshallese exposed to fallout, it is seen that the degree of internal hazard in the exposed persons was small. This is encouraging, since these people lived in a relatively primitive state where the maximum probability of contamination of food and water supplies existed. If the hazard was minimum under those conditions, it should be even less under conditions of modern American living."

Estimates of radiation doses received at Hurricane and Riverside Cabins from material outside the body are about 4.2 roentgens and from 7 to 8 roentgens, respectively. For brevity, we consider only the case of maximum exposure, that of the 15 nontransient residents of the Riverside Cabins. The fact that the exposures to these persons were from 2 to 3 times established in the criteria for the guidance of the Test Organization raises the question of possible effects upon the individuals exposed.

A dose of 5 or 10 roentgens produces no detectable effect upon an individual. Doses required to produce symptoms of radiation sickness are in the range from about 75 to 150 roentgens. There is no reason to suppose that the current health of these individuals is affected in any way by a radiation dose of 10 roentgens. One's interest in radiation doses of this size is in the hypothetical possibility that they may contribute to a serious delayed effect. Delayed effects which can result from much higher doses of radiation, received either in a short period of time or accumulated over long periods of time, are increased probability of leukemia, cancer, aplastic anemia, and genetic mutation, and reduction in life expectancy.

---

[1] Mr. Jacobs is in error in referring to the values given in table 2 as "permissible concentrations established for radiation workers. As indicated in the heading of table, they are "for use beyond the control area."

[2] We assume that Mr. Jacobs' use of the number 1,260 in this statement involves a typographical error.

[3] While there is exposure of the whole body to radiation from the radioactive material in the air, in the case of early fallout from nuclear weapons the dose from this source is small compared to the dose received from material deposited on the ground.

[4] If the dose to the lungs were estimated, by direct proportion, from the value given on page 116 of the Commission's 13th Semiannual Report to Congress, January 1953, one would obtain a dose of 1.4 roentgens. There an observed concentration of 0.19 microcuries per cubic meter, averaged over a 24-hour period, observed in the test series of 1952, was estimated to result in a dose to the lungs equivalent to 0.2 roentgens. The present estimate assumes that only 20 percent of the inhaled radioactivity underwent radioactive decay in the lung.

Even with large numbers of animals and under carefully controlled conditions, it is impossible to determine directly whether or not levels of exposure much higher than those to the general population from weapons tests can induce leukemia or cancer. Some of our leading radiobiologists believe that there must be levels of exposure to radiation below which there is no possibility of the exposure's resulting in leukemia or cancer; while others believe it possible that for any dose of radiation, no matter how small, there is a correspondingly small probability that it will result in such a disease. In either case, one can intelligently discuss the risk only in relation to the size of the radiation dose.

Similar considerations apply to reductions in life expectancy resulting from exposure to radiation. Some experiments on animals have indicated that if a large group of small animals is exposed to enough radiation to kill about half of the animals, the average lives of those which survive will be reduced by about 7 percent. Lower doses are less effective in reducing life expectancy. In fact, some experiments seem to indicate that at levels up to several hundred times natural background, the effect may be to prolong life rather than to reduce it. While this apparent result is believed to be due to difficulties involved in measuring small effects, it serves to illustrate the fact that statements concerning possible reduction in life expectancy from exposure to low levels of radiation are highly speculative.

Standards for protection of radiation workers against excessive exposure to radiation over a period of many years are based on the judgment of radiobiologists that the probability of a radiation induced disease from a cumulative exposure of one or two hundred roentgens received during one's period of employment is either zero or is so small that it represents an acceptable risk.

In the case of occupational exposures to radiation, the principal interest in a single dose of from 5 to 10 roentgens is not in the effect of the dose, but in the possibility that over a period of years the employee who incurs such exposures frequently will accumulate a radiation dose which involves a serious risk. These considerations have led the National Committee on Radiation Protection and the International Commission on Radiological Protection to recommend the exposures of radiation workers be limited to 15 roentgens in any 1 year and to an average of 5 roentgens per year. The recommendations of the national committee further limit the 13-week dose to the equivalent of 3 roentgens per 13 weeks if the exposure is taken at a nonuniform rate. A copy of the statement of the National Committee on Radiation Protection on the subject is attached for your information.

One of the principal reasons for recommending certain limitations on the dose received per week, per quarter, or per year is that these low-dose rates make it administratively easier to limit average dose rates over long periods of time. It is possible that a 10-roentgen dose received in 1 day constitutes a somewhat greater insult to the human body than if the same dose were accumulated over a period of several months or a year. However, there is no evidence of a significant difference, and it seems unlikely, from our knowledge of the effects of large exposures to radiation accumulated over a period of many years that a 10-roentgen exposure received in 1 day would be of much greater significance to an individual than if spread over a period of a year or more.

A second comparison of interest is with the radiation exposures which participants in test activities may take on a planned basis. In some tests, measurements are required which cannot be taken without the chance of one or several participants receiving exposures which are anticipated to be in the range of 10 to 15 roentgens and which conceivably may be as high as from 20 to 30 roentgens. We do not consider these exposures desirable; however, if the data is badly needed we consider that the overall risk involved is acceptable under the circumstances.

A recent article discussing the possibility of leukemia from small doses of radiation is that by E. B. Lewis, Leukemia and Ionizing Radiation, Science, May 17, 1957. On the basis of estimates of the probability of production of leukemia from high doses of radiation, and on the assumption that the natural incidence of leukemia is due to natural sources of radiation, Lewis speculates that each roentgen of radiation dose received by an individual contributes 2×10^{-6} to the probability of his contracting leukemia in any subsequent year. If his hypothesis were correct, this would mean that an individual receiving a dose of 10 roentgens would have 2 chances in 100,000 of contracting leukemia in any subsequent year, and one chance in 1,000 of contracting leukemia in the next 50 years.

In quoting Lewis, we should mention that he is not a specialist in leukemia, and that it is too early to say what acceptance his hypothesis will receive among scientists who are students of leukemia. Rather we use his hypothesis as an illustration of the kind and degree of risk which might conceivably be involved in a radiation dose of 10 roentgens if such low doses can contribute to the incidence of leukemia.

Precautions taken by the Atomic Energy Commission in conducting its testing program have been discussed in considerable detail. The section of the 13th semiannual report dealing with this subject was printed separately and widely distributed. Some discussion of this subject is contained in the booklet Atomic Tests in Nevada, a copy of which we attach.

If Senator BENNETT desires more detailed information on any of the matters discussed above, we will be glad to supply any information available.

FLOODS

Mr. FULBRIGHT. Mr. President, the rains came to the Ozarks in February of this year; and as my colleagues know from reading the newspaper accounts and listening to the radio and television broadcasts, many of the areas of the Southwest long ago passed the saturation point. Prolonged torrential rainfall has caused violent flooding, bringing about the loss in lives and property which inevitably follows such conditions. But in one area of my State, Mr. President, citizens have escaped the attendant circumstances of prolonged flood conditions, and they have escaped by reason of one fact—the fact that a dam exists on the White River to protect them from the specter of flood devastation.

I ask unanimous consent, Mr. President, that an article appearing in the Northwest Arkansas Times, Fayetteville, Ark., on Saturday, June 1, 1957, be printed in the body of the RECORD at the conclusion of my remarks.

This article, entitled "Unfinished Table Rock Dam Proves Lifesaver for White River Valley," is an excellent story of how one dam—a dam not yet completed—has already paid for itself.

Had it not been for the dam—

The article states—

the White River Valley would have suffered its worst flood in history this spring.

Mr. President, we in the Senate will shortly consider an appropriation bill for a program of construction of public works. I urge my colleagues to read this excellent article before considering the public-works appropriations, and I express the hope at this time that the current so-called economy wave in the Congress does not affect the thinking of the Congress when we vote on this bill.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ENGINEERS WERE SURPRISED—UNFINISHED TABLE ROCK DAM PROVES LIFESAVER FOR WHITE RIVER VALLEY

BRANSON, MO.—The price tag on giant Table Rock Dam, now 70 percent finished, is $78 million—but ask anyone living in the White River Valley below the barrier and he'll tell you the dam already has paid for itself.

No one, least of all the Army engineers and the construction companies, had any idea there would be any water behind the dam until the gates were closed sometime next year, but right now, after weeks and weeks of almost steady rainfall, Table Rock Lake probably contains as much water as it was designed to impound.

Had it not been for the dam, the White River Valley would have suffered its worst flood in history this spring. It could well be that the cities of Branson and Hollister, immediately below the dam, and all the resort area stretching along Lake Taneycomo would today be a shambles, were it not for the dam.

As the 261-foot-high concrete wall across the river commenced to take form, all that was left open at the river floor were the flood gates, large enough to accommodate a normal flow of water, plus an occasional high water such as has been experienced in the preceding 5 years of drought.

But along in February it began to rain in the Ozarks of Missouri and Arkansas—and seemingly it has been raining almost every day since. For a time the floodgates were large enough to take the runoff, but gradually water began backing up behind the dam.

WATER RISES DAILY

Through March and April the water mounted steadily higher, and the contractors—Morrison-Knudsen, Inc., and a syndicate of six other firms—took advantage of every possible break in the weather to build the concrete monolith ever higher. Once in early May, it appeared that the flood threat had been licked when 16 feet of concrete in a narrow gap was poured in a week's time—enough to keep ahead of the flood crest by a scant 4 inches.

More rains came in mid-May, however, and the contractors found it impossible to keep ahead of the rising tide. On May 25 the water began flowing across the top of the dam, and by the time the flood had reached its crest, on May 28, water to a depth of 7 feet was churning through the narrow 54-foot gap.

Had it not been for the dam, unfinished as it is, the White River Valley for many miles downstream would have been hit by the worst flood in history. As it turned out, Lake Taneycomo and Bull Shoals Lake downstream, have been well able to absorb the excessive flow.

Table Rock Dam, 20 years in the planning stage, didn't actually begin to take form until late in 1954. When it is completed in the spring of 1958, it will be a concrete and earthen wall stretching 6,400 feet across the valley. Behind it will be a lake covering 52,000 acres with a shoreline of 857 miles, most of it in Stone County, Mo., but with arms reaching into Barry and Taney Counties in Missouri and into Carroll and Boone Counties in Arkansas.

Engineers hope, of course, that the present high water will drain out of the lake at least so that work can proceed with two bridges crossing arms of the lake and so that trees and underbrush can be cleaned out.

At the crest of this month's high water, the level had been computed at 880.9 feet above sea level. Eventual top elevation of the dam's flood-control pool is to be 931 feet.

CHRYSLER CORP. TANK CONTRACT

Mr. McNAMARA. Mr. President, for some weeks I have been closely involved in attempts to secure a $119 million tank contract for the Detroit area.

This contract was to be awarded by the Army to Chrysler Corp. However, the question was whether Chrysler should perform the work at Detroit or in Newark, Del.

Governor Williams, of Michigan, and I, and others, in meetings and by correspondence with Army Secretary Brucker, established Detroit's claim to this contract.

Primarily, we emphasized the available tank-producing facilities in Detroit; the need for keeping these facilities in readiness; and the high unemployment level in the Detroit area.

Last Friday, however, Secretary Brucker announced that the contract would be placed in Delaware. He stated that, all factors considered, a saving of $1,879,000 would be produced by building the tanks in Delaware.

In a letter to me last Monday, Secretary Brucker itemized how these savings would occur. He stated:

Chrysler's basic bid for production at Detroit was $49,000 less than its bid for production at Newark. Another saving of $142,900 in certain transportation costs would have been realized if the work were performed at Detroit Arsenal. Further savings of $90,000 in the cost of maintenance of idle equipment and of $175,000 in cost of facilities would have been realized by producing tanks at Detroit. In summary, a total of $456,900 accrued to the credit of Detroit Arsenal as a result of our evaluation.

On the other hand, savings to be effected by performance of the contract at Newark include $1,352,900 in terms of transportation; $300,000 as a contingent liability because of the Michigan State possessory use tax, and $683,000 required to transfer production equipment between the Newark area and Detroit. The total thus accruing to the credit of the Newark facility amounts to $2,335,900—or $1,879,000 more in savings than could be realized at Detroit Arsenal.

There may be a legitimate quarrel with the Army over how some of these costs were figured. Some would appear not to have a wholly sound basis.

Unfortunately, the coldly analytical approach of the Army does not take into account the 98,000 unemployed workers in the Detroit area. Since human and economic suffering does not lend itself to a dollars-and-cents formula, Detroit's unemployed have no place in the Army's calculations.

However, the shocking thing to me was how the loss of this contract was greeted by certain elements in Michigan. Did they attempt rationally to challenge the Army's figures? Did they accept this loss and immediately proceed to win new contracts for Detroit?

No. They sought, instead, to link the loss of the tank contract to the vicious and untruthful attack on Governor Williams. This attack was leveled for political reasons, and by those who would like to evade their responsibilities to the State of Michigan. I referred to this matter in remarks on the Senate floor on May 17.

When news of the contract award reached Detroit last Friday, this was the banner headline in the Detroit News: "Tank contract lost; high taxes blamed."

What were the high taxes affecting the tank contract, Mr. President?

As I quoted from Secretary Brucker's letter to me, the Michigan possessory-use tax was figured as conceivably costing the Government $300,000 if the contract were placed in Detroit.

According to the Army's figures, however, even had this tax not been involved, the so-called savings to the Army by placing the award in Delaware still would have been in excess of $1,500,000. Therefore, the use tax was an almost insignificant factor.

This does not mean that the Michigan tax is a bad one. It is considered to be eminently fair. I understand California has a similar tax; still, defense contracts worth more than $2 billion went to California in the 6 months ending in December, while Michigan received contracts worth only $158 million.

Neither Michigan taxes nor Governor Williams is to blame for what has happened in this instance. Yet those who row the gravyboat for giant industry persist in using this argument. What they are actually doing is discrediting their own State.

Mr. President, I ask unanimous consent, in this connection, that some statistics compiled by Governor Williams in support of his position in this matter be printed at the conclusion of my remarks.

There being no objection, the statistics were ordered to be printed in the RECORD, as follows:

STATISTICS COMPILED BY G. MENNEN WILLIAMS, GOVERNOR OF MICHIGAN

LANSING.—Some new figures have just been compiled at my request by the Department of Economic Development, which completely demolish the claim that business has been leaving Michigan.

These figures show that in the 5 years from 1952 to 1956, Michigan had a net gain of more than 150,000 jobs from the movement of industry.

These are the first trustworthy statistics on this question which have come to light in all the recent commotion about an alleged "exodus of business" from our State. I believe they are just about as close as you can get to the truth, bearing in mind that there are some borderline cases which could be counted either way.

THREE TO ONE

The economic development figures show that the companies moving into Michigan outnumbered those that left Michigan by about 3 to 1.

In the 5-year period, 35 plants moved out of the State for a variety of business reasons, with a loss of 5,369 jobs. In the same period 104 plants moved into Michigan, with 12,535 new jobs.

Also, in the same period, companies already operating in the State established new plant facilities here equivalent to 143,060 new jobs.

By adding and subtracting these figures, we get a net gain of 150,226 jobs.

That is what some of the daily papers have been calling a business "flight" from Michigan.

AUTO PLANTS

There has unquestionably been a decentralization of the automobile industry as the big companies build branch plants closer to regional markets. There has also been a marked trend toward merger and monopoly in the auto industry, with consequent loss of jobs in all the independent auto plants.

This trend has nothing to do with State taxes. Such plants as Packard, Kaiser-Frazer and Hudson, which did not move away from Michigan but for all practical purposes went out of business, are not included in the above computation. Only plants which actually moved in or actually moved out and continued in business are counted.

OHIO AND INDIANA

It is noteworthy that in the list of 104 plants which moved into Michigan, 10 came here from Ohio and 13 from Indiana. These are two great neighbor States which have been pictured as industrial tax-free paradises, into which Michigan business was flocking as fast as it could pull stakes.

Maybe part of the answer lies in some facts which I discovered last week when I checked into the Indiana tax structure. A little over 50 percent of that State's total revenues are obtained from something called a "gross income tax." This is a tax on everything taken in by individuals and business firms, whether in return for goods sold, or services rendered, or in the form of wages and salaries.

It is really a pyramided sales tax on top of an income tax. Everybody passes it along to the next fellow, until it gets down to the consumer, the wage and salary earner, the small-business man, and the farmer.

These groups, being low men on the Indiana totem pole, have nobody to pass the tax along to, and consequently they pay the great bulk of it, either directly or in higher prices.

Inequitable as Michigan's tax structure is, I don't think the people of Michigan would put up with that type of taxation for very long.

The last session of the Indiana Legislature raised this tax by about 50 percent, and provided that it must be withheld from the wages of the little fellows so they'll be sure to pay it.

The pasture on the other side of the fence always looks greener, but seldom is.

PLANTS MOVING INTO MICHIGAN IN THE LAST 5 YEARS

Abitibi Power & Paper Co., Ltd., of Toronto, to Alpena.

Acme Protection Equipment Co., of Chicago, Ill., to South Haven.

Aircraft Tool & Manufacturing Co., of Thorpe, Wis., to Vassar.

Albert, Inc., of Chicago, to Negaunee.

Aluminum Specialties Co., of Manitowoc, Wis., to Iron Mountain.

American Agricultural Chemical Co., of New York, to Kalamazoo.

American Bitumals & Asphalt Co., of San Francisco, to Howell.

American Can Co., of New York City, to Detroit.

American Colortype Co., of Chicago, to Decatur.
American Nitrogen Corp., of Huntington, W. Va., to Traverse City.
Auto-Crat Co., division of B–N Corp., of Los Angeles, to Ypsilanti.
Benson Optical Co., of Minneapolis, to Escanaba.
Bituminous Materials Co., of Terre Haute, Ind., to Bay City.
Bituminous Materials Co., Inc., of Terre Haute, Ind., to Escanaba.
Bliss, E. W., Co., of Canton, Ohio, to Hastings.
Bliss & Laughlin, Inc., of Harvey, Ill., to Macomb County.
Bolta-Carparts, Inc., of Lawrence, Mass., to Owosso.
Bound Brook Oil-Less Bearings Co., of Bound Brook, N. J., to Sturgis.
Bowes Industries, Inc., of Paducah, Ky., to Three Rivers.
Bradford Machine Tool Co., of Cincinnati, Ohio, to Lansing.
Bridgeport Brass Co., of Bridgeport, Conn., to Adrian.
Brine Stock, Inc., of St. Louis, Mo., to Eaton Rapids.

Wright Machine Co., of Riverside, Ill., to Montague.
Whetstone & Mueller, of Spencerville, Ohio, to Zeeland.
Young & Greenawalt Co., of East Chicago, to Shelby.

POINT 4 FOR AMPUTEES

Mr. HUMPHREY. Mr. President, one of the truly outstanding citizens of the United States is Dr. Howard A. Rusk. He has contributed much of his professional skill and his very valuable time to the service of the United States Government. He has been one of the foremost advisers in the Veterans' Administration medical program. As a result of his advice, the program has been considerably improved.

Dr. Rusk also, as we know, has been a member of the President's Committee on Mobilization of Medical Manpower Resources, and has made a significant contribution to the adequacy of medical care for our men and women in the Armed Forces.

I could continue to list many other qualifications and contributions of this distinguished gentleman and outstanding doctor. I would, however, note now that Dr. Rusk has been dedicating a good deal of his time and effort to the promotion of international projects for the improvement of health.

I call to the Senate's attention an article written recently by Dr. Howard Rusk, entitled "Point 4 for Amputees. A View on the Need for the United States To Share With Others Its Advances in Prosthetics." The article was published in the New York Times of Sunday, June 2, 1957.

Dr. Rusk is an expert in the field of medicine and rehabilitation. His advice and counsel are sought the world over. He has done much good work in the field of research and development of artificial limbs for amputees. The United States has one of the finest programs in the world, if not the best, in this field of research.

Dr. Rusk's proposal is that a program to cost $1 million should be established under the authority of the International Cooperation Administration, for applying, on a worldwide basis, the advances the United States has made in the artificial limb industry.

I ask unanimous consent that this splendid article written by Dr. Rusk may be printed in the RECORD at this point in my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

POINT 4 FOR AMPUTEES—A VIEW ON THE NEED FOR THE UNITED STATES TO SHARE WITH OTHERS ITS ADVANCES IN PROSTHETICS

(By Howard A. Rusk, M. D.)

When our first casualties in World War II came home, those who had suffered amputations strongly criticized the quality and efficiency of the artificial limbs they received. Many remarked bitterly, "It doesn't seem right that a nation capable of producing the atom bomb and radar shouldn't be able to give us better artificial limbs."

Congress held a series of hearings on their complaints and found them justified. In the past the development of artificial limbs had proceeded through the years without the benefit of an organized, scientific approach.

However, since 1946 the Veterans' Administration, with a special Congressional appropriation of about $1 million a year, through the prosthetic research board of the National Academy of Sciences has conducted an extensive artificial limb research program through nonprofit contracts with universities.

In addition, the Army and Navy cooperate by supporting prosthetic research laboratories within their medical services, and the Veterans' Administration also conducts direct programs.

Earlier last month Congressional committees saw a spectacular demonstration of the achievements of the last 10 years' effort. All types of amputees dramatically showed their modern artificial arms and legs in action. Today without doubt our Nation has the finest prosthetic devices in the world.

CONTRIBUTIONS SHARED

We in the United States are interested in sharing the technical advances in nuclear energy for peaceful purposes with the rest of the world. We could make a significant contribution to the effective understanding of American ideals of democracy and the high value we place on human worth and dignity if, as a part of our mutual security program, we would share these advances in prosthetics with the rest of the world. This is truly a people-to-people program.

Currently, some international voluntary organizations such as the World Veterans Federation, the International Society for the Welfare of Cripples, and the new World Rehabilitation Fund are attempting to do this. Important as their efforts are, however, they are meager in relationship to both the need and the opportunity to advance American ideals.

As with other aspects of technical assistance under the point 4 program, the potential values of this prosthetics-for-peace program are too great for voluntary effort. Yet the estimated fund of $1 million a year required over a 2-year period, if supplied by our Government, would cost each American but one-half cent a year. It would require but 0.027 of 1 percent of the total foreign aid proposal.

With this relatively small sum, highly qualified American consultants could be sent, at the invitation of interested governments, to visit all parts of the world to survey their needs. Four completely equipped mobile prosthetic shops, each staffed by a qualified American prosthetist and physical therapist could be sent to southwest Asia, the Near East, north Africa, and South America.

These units could spend 4 to 8 weeks in a given community working with local surgeons in giving direct service to amputees by fitting them with prosthetic devices and training them in their use. It is ironic that a similar and highly successful project, which had a great political impact, has recently been conducted in Okinawa by the Japanese Government. It is even more ironic that the director of the project had his advanced training in prosthetics in the United States.

CENTERS ESTABLISHED

The one-half cent a person a year program would also permit United States assistance in establishing permanent demonstration prosthetic shops and training centers at strategic points throughout the world. Sufficient artificial limb components to provide modern prosthetic devices for 40,000 amputees could be distributed globally. All of the available technical literature and visual aids in prosthetics developed here in the United States could be translated and published in the necessary languages.

Lastly, the most important part of the project, more than 400 trainees from parts of the world lacking prosthetics services could be brought to the United States for prosthetic training. These prosthetic trainees would then join the 600 health workers receiving professional training in the United States under the auspices of the International Cooperation Administration and the hundreds more trained here by voluntary groups and their own governments.

Nowhere else could we get permanent ambassadors to spread the ideals of democracy as well, as effectively, and as cheaply as these dedicated rehabilitation workers who would return to their own countries to teach the lame and the halt to walk and to work.

Prosthetics for peace is a program the man in the street can see and feel and understand. He may not know who built the dam in the hills or the roads or factories, but he will know who taught his neighbor to walk and his child to play.

We in the United States have received a rich dividend on our investment in prosthetic research in vastly improved artificial limbs for both veteran and civilian amputees. Further political, social, and humanitarian dividends would accrue if we would take these advances to the amputees of the world. Never could more goodwill, understanding, and dignity be purchased for so little.

Mr. HUMPHREY. Mr. President, I simply add that Dr. Rusk describes his program as "the one-half-cent-a-person-a-year program."

He said the program would also permit United States assistance in establishing permanent demonstration prosthetic shops and training centers at strategic points throughout the world.

He continues by pointing out that a program costing less than one-half cent a person a year would actually make it possible to provide modern prosthetic devices for 40,000 amputees distributed globally.

I have advanced this proposal in the Committee on Foreign Relations. My reason for asking that the article be printed in the RECORD today was that I am hopeful it will be possible to get a directive for such a program in the authorization for the mutual-security-assistance program. If that is not possible, it is my intention to offer an amendment on the floor of the Senate and to ask for its favorable consideration. Therefore, I urge my colleagues to read Dr. Rusk's article.

ARMENIAN INDEPENDENCE DAY

Mr. PURTELL. Mr. President, last week, we observed the 39th anniversary of the proclamation of Armenian independence.

Tragically, there was no observance in the homeland and heartland of this great people. Many of the sons and daughters of this land, which is one of the oldest countries of recorded history, have been scattered to the four corners of the world. They have been forced to abandon their homes and all that they hold dear.

Yet, wherever Armenians gathered throughout the world last week, there was an observance of Armenian Independence Day. The love of liberty held by these people could not be denied expression—even though the expression was made thousands of miles from their homeland.

In that homeland, that same fierce love of freedom burns in the hearts of those Armenians who daily bear the brunt of Soviet oppression. Yet they were united spiritually with their countrymen who, in far places throughout the world, were observing the anniversary of Armenia's independence.

Civilization had a new start in Armenia when the biblical Ark of Noah came to rest on Ararat. Today, that nation is a symbol of physical conquest by communism; but its people remain unconquered and true to their ancient traditions and love of freedom which sustained them from 1375, when the independent kingdom was lost, until 1918, when independence was proclaimed.

Early in 1921, these valiant people threw out the occupying Communists, and were able to resist for 3 months the military might of the Reds. But then the Republic fell before the overwhelming might of the Soviets; and since that time it has been under the Soviet yoke, as one of the 16 so-called independent Republics of the U. S. S. R.

We who love freedom join with the Armenians of the world in the prayerful hope that independence will once again be restored to this ancient land and its resourceful people, who have contributed much, not only to our own welfare, but to the welfare of the world.

We join with our fellow Americans of Armenian descent in observing this anniversary as a signal to those in Armenia that they are not forgotten and that they will not be forgotten.

THE RISE IN INTEREST RATES

Mr. GORE. Mr. President, during consideration of the housing bill last week, on May 28, I expressed my deep concern over the policies being pursued by the administration, which have had, and are having, the effect of pushing interest rates higher and higher. By means of an amendment to the bill, I sought to bring about Congressional action which would have had the effect, I believe, of halting, at least with respect to certain categories of loans, the spiraling rise of interest rates. Unfortunately, my amendment was not adopted. But, Mr. President, at the time I suggested that unless these policies were reversed, interest rates would go still higher.

I wish to read from an Associated Press article appearing in today's issue of the Washington Post and Times Herald, under a New York dateline:

> The cost of borrowing money in a tight-money market rose another notch today with ⅛ percentage point boosts in the rates of both bankers' acceptances and commercial paper. Both are now at their highest rates in more than 20 years.

The article concludes with the following:

> The bond market currently is at the lowest level in more than 20 years, as the tight-money squeeze has repressed the value of fixed-income securities, analysts said.

There appeared in today's issue of the New York Times, in the financial section, an article containing the following:

> Short-term money rates were advanced yesterday. Dealers increased the rate on one maturity of commercial paper and on all bankers' acceptances one-eighth of 1 percentage point.

The article further states:

The increases put the commercial paper rate at the highest level since the early 1930's.

Mr. President, I also note that the Government Victory bonds are now selling at approximately $12 below par.

During the debate on the housing bill, the distinguished senior Senator from Florida [Mr. HOLLAND] interrogated me with respect to the inequities which might flow from adoption of the amendment I proposed.

In reply, I called to his attention the inequities resulting from current monetary policies and the discrimination being practiced against the holders of Victory bonds. I called to the attention of the distinguished senior Senator from Florida my conviction that unless action was taken to reverse these fallacious policies, the inequities would become more severe.

Only a week later United States Government 2½-percent bonds were selling for 87.24. I am advised that there are a number of small banks in the country which would be insolvent today if their holdings of Government bonds were listed at their current market values. Bank examiners, so I am advised, permit banks to carry Government bonds at par rather than at market value.

I also call attention to the fact that after I warned the Senate that unless remedial action was taken in some way, somehow, at some time, to call a halt to the interest-rate spiral, further increases in interest rates would occur, on the very next day, May 29, 1957, 91-day United States Government bills were offered, and they sold at the highest rate since 1933. Ninety-one-day bills sold on May 29 at an interest rate of 3.374 percent. When this administration came into office, 91-day bills were being sold at a rate of interest of about 2 percent.

Mr. President, again I express to the United States Senate my deep concern over this trend toward higher and higher interest rates. It is accelerating, gathering momentum as it goes. If the only cost were the increase in the cost of carrying the national debt, I would not be so concerned as I am, although that increase in cost is significant and it must be paid for many years to come.

More serious is the effect upon the economy of the country. While the interest rates reach new highs, and Government bonds reach new lows below par, the bankruptcy rate is reaching new highs and small businesses are closing their doors at the highest rate since the early 1930's.

The excuse offered for this policy is that it is necessary to control inflation. Meanwhile the cost of living has increased each month for 14 consecutive months. I shall have something to say a little later about the type of inflation we have experienced and about the inadequacy and the inappropriateness of the so-called remedy which is being applied. I want to say to the Senate once again that if this policy is pursued further, disastrous effects are inevitable.

Mr. LONG. Mr. President, will the Senator from Tennessee yield?

Mr. GORE. I yield.

Mr. LONG. I am sure the Senator from Tennessee realizes that if the same so-called independent action of the Federal Reserve Board, theoretically making interest rates entirely subject to supply and demand—had been pursued during World War II and in the years subsequent thereto, unless we had had higher taxes the Nation would be at least $50 billion more in debt than it is today.

Mr. GORE. I thank the able Senator for his contribution.

Mr. LONG. We would be paying higher interest rates on that extra $50 billion debt, too.

Mr. GORE. I agree with the Senator that the national debt would have been very much larger and the cost of carrying the debt would have been still much greater.

Mr. LONG. I am sure the Senator will agree with me that if during the time when we had real inflationary pressures we had tried to control inflation by increasing interest rates, interest rates could have been pushed to the sky and still inflation would not have been controlled.

Mr. GORE. I repeat what I said last week. There are few factors more inflationary than a spiraling interest rate.

The cost of money is an important factor in the cost of products and in the cost of doing business. Higher interest rates are no answer to inflation. Higher interest rates have certain restraining influences under certain conditions, but they are not the answer to the inflation in the price of certain goods and commodities which we have witnessed during the past months.

Mr. LONG. Mr. President, will the Senator yield further?

Mr. GORE. I yield.

Mr. LONG. The Senator from Tennessee failed to mention farmers in his speech. Is the Senator aware that if interest rates on farms are increased 1 percent, it means a 2½ percent reduction in net farm income? If interest rates are increased 2 percent, which is more nearly what has happened to farm loans, it means a 5 percent reduction in net farm income.

Mr. GORE. I appreciate the comments of the able Senator and congratulate him for his study of this problem and the diligent manner in which he has applied his great ability to this issue, which will become a paramount issue before the American people. Unfortunately, I believe the issue is not now properly understood by the American people; but I fear that disastrous consequences may cause it to become all too widely understood.

JURY TRIAL IN CONTEMPT CASES

Mr. CASE of New Jersey. Mr. President, I am deeply troubled by the double standard implicit in the effort to block right-to-vote legislation by requiring a jury trial for those who disobey court orders. I know of no other explanation for the discrepancy between civil rights opponents' endorsement of jury trials for Federal contempt cases and the contrary practice in their own home States.

Their preachments recall the counsel of those "ungracious pastors" who, as Hamlet's fair Ophelia complained:

Show me the steep and thorny way to heaven, whilst like a puff'd and reckless libertine, himself the primrose path of dalliance treads.

Some time ago my attention was called to the discrepancy between advice and action which prevails on this jury question in the South. I have had this assertion checked. The best legal advice I can get indicates that not 1 of the 10 Southern States which are in the forefront in the effort to defeat right-to-vote legislation has in its laws a provision for jury trial in contempt cases of the kind here involved.

In most, if not all of these States, the legislature has provided by statute that courts of record—and in many instances certain quasi-judicial agencies—may punish for contempt persons who willfully disobey court orders. And their casebooks are replete with decisions asserting the "inherent power" of courts to punish without a jury trial persons who refuse to comply with orders of the court. As Arkansas' highest court stated in the case of *Freeman* v. *State* (188 Ark. 1058):

The power of punishment for contempt is independent of statutory authority, being inherent in and an immemorial incident of judicial power, its conclusions to be reached and judgments found without the intervention of a jury.

This is, of course, precisely what Attorney General Brownell and a number of others among us have been saying since this question was first raised. The Federal precedent has been amply documented on several occasions. Those who still seek to stall the right-to-vote bill under the shibboleth of jury trial might well look to their own State law, if they will not heed the dictates of Federal precedent.

They cannot, then, fail to see the jury slogan for what it really is: at best, an effort to apply in this particular bill a different standard for the Federal courts than has heretofore applied to State or Federal courts in other cases; at worst, an effort to seriously undermine the courts' authority. As President, and later Chief Justice, Taft said of a similar proposal in 1908:

Never in the history of the country has there been such an insidious attack upon the judicial system as the proposal to interject a jury trial between all orders of the court made after full hearing and the enforcement of such orders.

TENTH ANNIVERSARY OF THE MARSHALL PLAN

Mr. SMITH of New Jersey. Mr. President, yesterday, June 5, was the tenth anniversary of the so-called Marshall plan. It was just 10 years ago that Secretary Marshall delivered his famous commencement address at Harvard and announced the American plan to restore economic health to a stricken Europe. It was a self-help program. The European nations developed the

necessary plans and also put up funds to match America's contribution.

In the midst of the current economic boom and strength of the Western World, we tend to forget that only 10 years ago Britain was forced to ration even potatoes, that the French bread ration had fallen to two-thirds of what it had been under German wartime occupation, and that coal and steel production was below prewar levels. It was tragically evident that hope and the will to resist tyranny were ebbing in Europe, in 1947.

In announcing the plan, the United States made evident a major decision, the iteration of our belief that without the return of normal economic health in the world, there could be no political stability and no assured peace. In the years since 1947, peace has prevailed in Europe. Communism has been contained.

The United States spent $12 billion on the plan in 3 years, and at the end of that period Europe was producing 40 percent more than in 1938. The rise in industrial and agricultural production was joined by increasing financial stability and expanding overseas trade by the European nations. Vitality returned to our exhausted allies, and the advance of famine, disease, and lethargy, on which communism breeds, was halted and thrust back.

The Marshall plan was a spectacular example of enlightened self-interest by America. It represented the assertion to the world of the American recognition of the correlation of interest among all free nations, and our willingness to assume responsibility in the great task of checking communism. I am happy today to recall my memories of that occasion 10 years ago, and to pay tribute to the men who were most responsible for conceiving and putting the plan into execution, Secretary Marshall and the late Senator Vandenberg.

The progress of the free world and the increase in its strength have been very substantial since 1947. Today we are in a formidable position of power, far more able to contain and retaliate against Soviet aggression than ever before. The anniversary of this momentous event is a moment in which to consider the gains and triumphs which have been attained, and to renew our pledge of responsibility of continuing the effort until peace becomes an eventuality for all mankind.

ORDER FOR ADJOURNMENT TO MONDAY

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that when the Senate concludes its business today, it stand in adjournment until 12 o'clock noon on Monday next.

The PRESIDING OFFICER. Without objection, it is so ordered.

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

EXECUTIVE SESSION

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to consider executive business.

EXECUTIVE MESSAGES REFERRED

The PRESIDING OFFICER (Mr. MONRONEY in the chair) laid before the Senate messages from the President of the United States submitting sundry nominations, and withdrawing the nomination of William E. Barmore, to be postmaster at Donalds, S. C., which nominating messages were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

EXECUTIVE REPORTS OF A COMMITTEE

Mrs. SMITH of Maine. Mr. President, from the Committee on Armed Services I report favorably the nominations of 11 rear admirals for permanent promotion in the Naval Reserve and the nomination of Maj. Gen. Richard Clark Lindsay to serve as commander, Allied Air Forces, Southern Europe, in the rank of lieutenant general. I ask that these nominations be placed on the Executive Calendar.

The PRESIDING OFFICER. The nominations will be placed on the Executive Calendar, as requested by the Senator from Maine.

The nominations are as follows:

Maj. Gen. Richard Clark Lindsay, Regular Air Force, to be assigned to a position of importance and responsibility designated by the President in the rank of lieutenant general; and

John J. Bergen, and sundry other officers, for permanent promotion to the grade of rear admiral in the line and staff corps of the Naval Reserve.

Mrs. SMITH of Maine. Mr. President, in addition to the above officers I report favorably a group of 1,405 temporary and permanent appointments and promotions in the Navy and Marine Corps in the grade of captain and below. These names have already appeared in the CONGRESSIONAL RECORD. To save the expense of printing on the Executive Calendar, I ask unanimous consent that they be ordered to lie on the Vice President's desk for the information of any Senator.

The PRESIDING OFFICER. Without objection, the nominations will lie on the desk, as requested by the Senator from Maine.

If there be no further reports of committees, the Executive Calendar is in order.

PINK SALMON PROTOCOL

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the consideration of Executive C, a protocol between the United States and Canada relating to sockeye salmon fisheries.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas.

The motion was agreed to; and the Senate, as in Committee of the Whole, proceeded to consider the protocol (Ex. C., 85th Cong., 1st sess.) a protocol between the Government of the United States of America and the Government of Canada to the Convention for the Protection, Preservation, and Extension of the Sockeye Salmon Fisheries in the Fraser River System, signed at Washington on the 26th day of May 1930, which protocol was signed at Ottawa on December 28, 1956, which was read the second time, as follows:

The Government of the United States of America and the Government of Canada, desiring to coordinate the programs for the conservation of the sockeye and pink salmon stocks of common concern by amendment of the Convention between the United States of America and Canada for the Protection, Preservation, and Extension of the Sockeye Salmon Fisheries in the Fraser River System, signed at Washington on the 26th day of May 1930, hereinafter referred to as the Convention,

Have agreed as follows:

ARTICLE I

The Convention as amended by the present protocol shall apply to pink salmon with the following exception:

The understanding stipulated in the Protocol of Exchange of Ratifications signed at Washington on the 28th day of July 1937, which provides that "the Commission shall not promulgate or enforce regulations until the scientific investigations provided for in the Convention have been made, covering 2 cycles of sockeye salmon runs, or 8 years;" shall not apply to pink salmon.

ARTICLE II

The following words shall be deleted from the first sentence of article IV of the Convention: "* * * that when any order is adopted by the Commission limiting or prohibiting taking sockeye salmon in any of the territorial waters or on the high seas described in paragraph No. 1 of article I, such order shall extend to all such territorial waters and high seas, and, similarly, when in any of the waters of the United States of America embraced in paragraph No. 2 of article I, such order shall extend to all such waters of the United States of America, and when in any of the Canadian waters embraced in paragraphs No. 2 and 3 of article I, such order shall extend to all such Canadian waters, and provided further".

ARTICLE III

The following paragraph shall be added to article VI of the Convention:

"All regulations made by the Commission shall be subject to approval of the two Governments with the exception of orders for the adjustment of closing or opening of fishing periods and areas in any fishing season and of emergency orders required to carry out the provisions of the Convention."

ARTICLE IV

Article VII of the Convention shall be replaced by the following article:

"The Commission shall regulate the fisheries for sockeye and for pink salmon with a view to allowing, as nearly as practicable, an equal portion of such sockeye salmon as may be caught each year and an equal portion of such pink salmon as may be caught each year to be taken by the fishermen of each party."

ARTICLE V

Paragraph (3) of the understandings stipulated in the Protocol of Exchange of Ratifications signed at Washington on the 28th day of July 1937, shall be amended to read as follows:

"That the Commission shall set up an Advisory Committee composed of six persons from each country who shall be representatives of the various branches of the

industry including, but not limited to purse seine, gill net, troll, sport fishing, and processing, which Advisory Committee shall be invited to all nonexecutive meetings of the Commission and shall be given full opportunity to examine and to be heard on all proposed orders, regulations, or recommendations."

ARTICLE VI

1. The parties shall conduct a coordinated investigation of pink salmon stocks which enter the waters described in article I of the Convention for the purpose of determining the migratory movements of such stocks. That part of the investigation to be carried out in the waters described in article I of the Convention shall be carried out by the Commission.

2. Except with regard to that part of the investigation to be carried out by the Commission, the provisions of article III of the Convention with respect to the sharing of cost shall not apply to the investigation referred to in this article.

3. The parties shall meet in the seventh year after the entry into force of this protocol to examine the results of the investigation referred to in this article and to determine what further arrangements for the conservation of pink salmon stocks of common concern may be desirable.

ARTICLE VII

Nothing in the Convention or this protocol shall preclude the Commission from recording such information on stocks of salmon other than sockeye or pink salmon as it may acquire incidental to its activities with respect to sockeye and pink salmon.

ARTICLE VIII

The present protocol shall be ratified and the exchange of the instruments of ratification shall take place in Ottawa as soon as possible. It shall come into force on the day of the exchange of the instruments of ratification.

In witness whereof the undersigned, duly authorized by their respective governments, have signed this protocol and have affixed thereto their seals.

Done in duplicate at Ottawa this 28th day of December 1956.

For the Government of the United States of America:

[SEAL] LIVINGSTON T. MERCHANT.
WM. C. HERRINGTON.

For the Government of Canada:

[SEAL] JAMES SINCLAIR.

Mr. JOHNSON of Texas. Mr. President, the distinguished chairman of the Foreign Relations Committee, the beloved senior Senator from Rhode Island [Mr. GREEN], is prepared to give a brief explanation of the protocol; but before doing so, and in accordance with the procedure which the distinguished minority leader and I have agreed on, I ask for the yeas and nays on the question of agreeing to the resolution of ratification so all Senators will be on notice that there will be a rollcall on the protocol.

The yeas and nays were ordered.

Mr. JOHNSON of Texas. I wonder if the Senator from Rhode Island is prepared to give a brief explanation of the protocol.

Mr. GREEN. Mr. President, the principal purpose of the pending protocol is to institute a program for the conservation of pink salmon of the Fraser River system, coordinate with that which was established for sockeye salmon under the convention of May 26, 1930. To that end, the protocol amends the 1930 convention, so as to charge the United States-Canada commission with the same duties with respect to pink salmon that it now has in the case of sockeye salmon.

These duties are: To make an investigation of the history of pink salmon and its spawning-ground conditions; to recommend to the two governments the removal or bypassing of obstructions to the river ascent of the salmon; to regulate the taking of salmon in the Strait of Georgia, the Strait of San Juan de Fuca, and in certain areas of the Pacific Ocean, and to prescribe open and closed seasons, as well as the size of net mesh. The fisheries would be controlled so as to allow an equal portion of the catch to United States and Canadian fishermen.

The provisions of the 1930 convention relative to enforcement of orders and regulations adopted by the commission will apply, under the protocol, to orders and regulations issued concerning pink salmon. In that connection, article III of the protocol amends article VI of the 1930 convention so as to require the approval of both governments for all regulations issued by the commission, excepting those to adjust the closing or opening of fishing periods and areas in any fishing seasons, and emergency orders required to carry out the provisions of the convention.

The administration has emphasized the urgency of the pending protocol because the spawning season of the pink salmon, which occurs in alternative years, will take place next August. In consequence, if effective conservation measures are to be taken, they will have to be adopted in the very near future, well in advance of the spawning period.

At very moderate cost, which is estimated at the average annual sum of $60,000, an important segment of the national economy, as well as of American food resources, will be protected against depletion.

The protocol, Mr. President, has the unqualified endorsement of the labor and management leadership in the fishing industry, as well as of officials of the State of Washington, whose government is most directly concerned in this matter.

I therefore urge the Senate to give its approval to the protocol, so that it may be implemented with the least possible delay.

Mr. MAGNUSON. Mr. President, I wish to say to the distinguished chairman of the Committee on Foreign Relations that the enabling legislation which will implement this protocol was approved by the Committee on Interstate and Foreign Commerce, and the Senate has already passed the bill authorizing United States participation in the provisions of the treaty with Canada.

Mr. President, I wish to add a few remarks, because the protocol before the Senate does involve primarily the State of Washington.

Mr. President, the Senate has before it by Executive request or protocol, a new treaty, for approval, which involves both the United States and Canada in a cooperative effort to protect an important fisheries resource of the Pacific coast, known as the pink salmon.

The protocol, to which the United States and Canada have agreed, places the control and the management of the pink salmon under the jurisdiction of the International Pacific Salmon Fisheries Commission. It was signed at Ottawa, Canada, on December 28, 1956.

So far as the United States fisheries are concerned, this matter involves only the fisheries of the State of Washington.

Since the adoption of the original treaty to provide for international control of the Fraser River sockeye salmon fishery with Canada, May 26, 1930, our two countries, working together, have made great progress in the rehabilitation of these fisheries.

The sockeye and the pink salmon fisheries concerned under this treaty annually provide a large revenue for both United States and Canadian fishermen and millions of pounds of the most delectable food for the American and the Canadian people.

It should be noted that these natural runs of salmon returning to the rivers of the State of Washington and British Columbia are of such a delicate nature that the full cooperation of all interests are required if these resources are to be maintained.

The advancement of our modern civilization causing diversions of our streams and pollution of our waterways, in addition to the problems arising from management, makes it paramount that we share with Canada the responsibility of caring for this important resource, and to divide equally the rewards gained from this cooperative effort.

In the case of the Pink Salmon Treaty now before the Senate for ratification, I am pleased to speak for Gov. Albert D. Rosellini, the legislature, and the industry of the State of Washington, who have memorialized Congress, requesting the approval of this treaty, and for the passage of the enabling legislation which provides for United States participation in the management of these important fisheries, which the Senate has already approved.

I have been informed that the Canadian Parliament has preceded us in the ratification of this agreement, and has enacted legislation to implement it.

Often I have appeared critical of the manner of our administrations' handling of international fisheries' problems; however, I am pleased to praise the fine work of the Department of State for their part in concluding this important understanding with our Canadian neighbors.

Mr. NEUBERGER. Mr. President, I wish to join with my colleague the senior Senator from Washington [Mr. MAGNUSON] in commending the Department of State, the Senate Committee on Foreign Relations, and the chairman of the committee, the Senator from Rhode Island [Mr. GREEN], for their work in bringing the protocol with our neighbors from Canada with respect to salmon before the Senate.

A great many of the fishermen from the Oregon seacoast, particularly those from the area near the mouth of the Columbia River, go with their trawlers into the waters and reaches of the Puget Sound to fish for the famous sockeye salmon. This is one reason, Mr. President, why so many of us, such as the

senior Senator from Washington and myself, have been active in opposing the proposed diversion of the upper Columbia River into the Fraser River system. This has been suggested by some prominent people in Canada. If it were done, the next step would be a series of very high dams in the gorges of the Fraser River, and this, of course, would result in the probable destruction of the Fraser River as a source of salmon spawning. These dams would be too high to be negotiated by ladders, and in all probability the small fingerling fish would be killed on their travels downstream to the Pacific.

I was pleased that the Senator from Washington mentioned this question in his dedicatory speech at the Ice Harbor Dam project last week along the Snake River.

For this reason, a great many of us hope there will be successfully concluded with Canada a series of negotiations for power development on the upper Columbia River. This realm already has been shut off for migratory fish and spawning salmon, so that the question of fisheries is not involved. These particular salmon runs have been moved in toto. If we can secure adequate power development and hydroelectric projects on the upper Columbia in Canada, there will no longer be any legitimate excuse for blockage of the great fish runs of the Fraser River system. It is those runs that are involved in the protocol which the Senate soon will vote upon.

In conclusion, I ask unanimous consent to have printed in the RECORD an article from the Vernon, British Columbia, News of May 27, 1957, which describes the speech made in that area by James Sinclair, the Minister of Fisheries for the Dominion of Canada. In that speech Mr. Sinclair emphasized what I have related to the Senate today. Mr. Sinclair pointed out that power development in British Columbia should be secured on the Upper Columbia River, because, in his words:

> To dam the Fraser would be to ruin the last great salmon river in the world.

I fully support what the Canadian Minister of Fisheries has pointed out. I believe he is correct. He wants to save the Fraser for sockeyes. I believe his views, as well as those already stated on the Senate floor, point to the wisdom of the Senate today advising and consenting to the resolution of ratification of this protocol.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CAN HAVE POWER AND FISH SINCLAIR TELLS MEETING

"Columbia River power development can satisfy the power demands of southern British Columbia for the next 20 years—without damming the Fraser and ruining the salmon industry," Hon. James Sinclair, minister of fisheries, told an audience at the Vernon Senior High School Friday.

Speaking in support of Hilda Cryderman, Liberal candidate for Okanagan-Revelstoke, Mr. Sinclair painted a growing picture of the industrial future of the Okanagan Valley when cheap power is available from the Columbia.

"Ontario is the biggest industrial Province because of its cheap hydroelectric power," Mr. Sinclair told an audience of over 200. "The Okanagan Valley and the interior of British Columbia can build up industry, too, if a plentiful supply of power is brought in.

"To dam the Fraser would be to ruin the last great salmon river in the world. But with the Columbia harnessed, we can have fish and power, too."

Pointing out that there are two great issues at stake in this election, the minister listed them as security of lives in the era of the hydrogen bomb, and economic security within the framework of Canadian living.

The PRESIDING OFFICER. If there be no objection, the protocol will be considered as having passed through the various parliamentary stages up to and including the presentation of the resolution of ratification, which the clerk will state.

The legislative clerk read as follows:

Resolved (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of Executive C, 85th Congress, 1st session, a protocol between the Government of the United States of America and the Government of Canada to the Convention for the Protection, Preservation, and Extension of the Sockeye Salmon Fisheries in the Fraser River System, signed at Washington on the 26th day of May 1930, which protocol was signed at Ottawa on December 28, 1956.

The PRESIDING OFFICER. The question is, Will the Senate advise and consent to the resolution of ratification of the protocol. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from Illinois [Mr. DOUGLAS] and the Senator from West Virginia [Mr. NEELY] are absent on official business.

I further announce, if present and voting, the Senator from Illinois and the Senator from West Virginia would each vote "yea."

Mr. DIRKSEN. I announce that the Senator from Wyoming [Mr. BARRETT], the Senator from New York [Mr. IVES], the Senator from Michigan [Mr. POTTER], and the Senator from Kansas [Mr. SCHOEPPEL] are absent on official business.

The Senator from North Dakota [Mr. LANGER] and the Senator from Maine [Mr. PAYNE] are absent because of illness.

The Senator from Colorado [Mr. ALLOTT] and the Senator from Nevada [Mr. MALONE] are detained on official business.

If present and voting, the Senator from Colorado [Mr. ALLOTT], the Senator from Wyoming [Mr. BARRETT], the Senator from New York [Mr. IVES], the Senator from Maine [Mr. PAYNE], the Senator from Nevada [Mr. MALONE], the Senator from Michigan [Mr. POTTER], and the Senator from Kansas [Mr. SCHOEPPEL] would each vote "yea."

The yeas and nays resulted—yeas 85, nays 0, as follows:

YEAS—85

NOT VOTING—10

Allott	Langer	Potter
Barrett	Malone	Schoeppel
Douglas	Neely	
Ives	Payne	

The PRESIDING OFFICER. Two-thirds of the Senators present having voted in the affirmative, the resolution of ratification is agreed to.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the President be notified forthwith that the resolution of ratification has been agreed to.

The PRESIDING OFFICER. Without objection, the President will be immediately notified.

LEGISLATIVE SESSION

The PRESIDING OFFICER. Without objection, the Senate will resume legislative session.

The Senate resumed the consideration of legislative business.

CONTRACTS FOR CLEANING AND CUSTODIAL SERVICES

Mr. MANSFIELD. Mr. President, after consultation with the acting minority leader, I should like to call up several noncontroversial bills.

Mr. President, I move that the Senate proceed to the consideration of Calendar No. 403, S. 1535.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (S. 1535) to amend the Federal Property and Administrative Services Act of 1949 to authorize the Administrator of General Services to make contracts for cleaning and custodial services for periods not exceeding 5 years.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Montana.

The motion was agreed to, and the Senate proceeded to consider the bill.

Mr. HUMPHREY. Mr. President, I shall not discuss the bill, but merely ask unanimous consent to have printed in the RECORD a statement of the purpose of the bill. It is a noncontroversial

measure, and was reported unanimously by the Committee on Government Operations.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

AMENDING THE FEDERAL PROPERTY AND ADMINISTRATIVE SERVICES ACT OF 1949 TO AUTHORIZE THE ADMINISTRATOR OF GENERAL SERVICES TO MAKE CONTRACTS FOR CLEANING AND CUSTODIAL SERVICES FOR PERIODS NOT EXCEEDING 5 YEARS

PURPOSE

This bill would further amend the Federal Property and Administrative Services Act of 1949 by authorizing the Administrator to enter into contracts with private concerns for cleaning, maintenance, elevator operation, and similar custodial services of Government buildings for periods not exceeding 5 years.

NEED FOR LEGISLATION

This bill was introduced at the request of the Administrator of General Services, as a part of the GSA legislative program for 1957. The purpose and objectives of the bill have been approved by the Bureau of the Budget and the General Accounting Office.

Under existing law, the Administrator is permitted to procure space for Government use in and outside the District of Columbia for periods of time not exceeding 5 years. However, no authority of law or regulation exists for the procurement of custodial services, elevator operation, or cleaning of public buildings beyond 1 year. As a result, many buildings are cleaned and serviced by Government employees who are paid on an hourly rate in accordance with the area wage-board rates of pay.

The Administrator has requested enactment of S. 1535, because it is believed that certain economy and efficiency will be possible, by permitting the execution of contracts with private concerns for such services in excess of 1 year but not exceeding 5 years' duration. These objectives will be possible in those areas where the number of Federal buildings are not large enough to obtain maximum efficiency from a full-time custodial force, or in those instances where the buildings are located in isolated areas, or where a centralized custodial staff would not be practicable or efficiency maintained. It is also believed that, if this authority is granted, the Administrator will be in a position to make cost and management surveys and, if convinced that savings can be effected and the service improved, he could then solicit bids and execute multiple-year contracts for such services from private concerns. Under this procedure, savings could be effected because the contractor could amortize the cost of supplies and equipment over a 5-year period, rather than on a single-year basis as is the customary practice at the present time.

The Administrator states that this proposal may be considered as a tool for better management and custody of public buildings, and will increase economy and efficiency in the maintenance and operation of Federal space, since in some areas it is quite possible that public building services can be obtained on a contractual basis for less money than is possible by the use of full-time Government employees.

The committee is advised that the House Committee on Appropriations has considered the proposal to utilize private contractors for these services and has concurred in the recommendations of the Administrator of General Services that legislation, as proposed by S. 1535, be enacted to authorize the use of private contractors for cleaning and maintenance of public buildings.

The PRESIDING OFFICER. If there be no amendment to be offered, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That section 210 (a) of the Federal Property and Administrative Services Act of 1949, as amended (40 U. S. C. 490 (a)), is further amended by the addition of paragraph (13), to read as follows:

"(13) to contract for cleaning, maintenance, elevator operation, and similar custodial services for periods not exceeding 5 years."

FACILITATION OF PAYMENT OF GOVERNMENT CHECKS

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 404, S. 1799.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (S. 1799) to facilitate the payment of Government checks, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Montana.

The motion was agreed to, and the Senate proceeded to consider the bill.

Mr. HUMPHREY. Mr. President, this bill, likewise, was reported unanimously by the Committee on Government Operations. It is a procedural bill, to expedite and reduce the cost of processing and handling Government checks. We believe it will result in a substantial saving to the Government.

I ask unanimous consent that an explanation of the bill be printed in the RECORD at this point.

There being no objection, the explanation was ordered to be printed in the RECORD, as follows:

PURPOSE

This bill will make possible a number of changes in the accounting procedures required by existing statutes, in paying Government checks, issuing substitutes for checks which are lost, stolen, or destroyed, and related accounting operations. The provisions of the bill are designed and intended to expedite and reduce the cost of processing and handling Government checks.

The bill amends several provisions of law which will make possible changes in the internal accounting methods and procedures followed by the Department of the Treasury in handling checks drawn on the Treasurer of the United States.

The bill was introduced in the Senate at the request of the Secretary of the Treasury. It was drafted by representatives of the Department, in cooperation with the Bureau of the Budget and the General Accounting Office, as a part of a project of the joint accounting program. These agencies reported that the bill will make possible improvements in operating procedures and reduce the cost of processing checks drawn on the Treasurer of the United States.

The PRESIDING OFFICER. If there be no amendments to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That section 1 of the act of July 11, 1947 (61 Stat. 308; 31 U. S. C. 132) is hereby amended to read as follows:

"That (a) all checks heretofore or hereafter drawn on the Treasurer of the United States, including those drawn by wholly owned and mixed-ownership Government corporations, shall be payable without limitation of time: *Provided,* That where on presentation of any check for payment the Treasurer of the United States is on notice of a doubtful question of law or fact the payment of such check shall be deferred pending settlement by the General Accounting Office.

"(b) The amount of all checks drawn by authorized officers of the United States on designated depositaries which have not been paid prior to the close of the fiscal year next following the fiscal year in which the checks were issued shall be withdrawn from the accounts with such depositaries and deposited with the Treasurer of the United States for credit to a consolidated account or accounts on the books of the Treasury. Claims for the proceeds of such unpaid checks shall be payable from such consolidated accounts by checks drawn on the Treasurer of the United States pursuant to settlement by the General Accounting Office.

"(c) The limitation imposed in respect to certain claims or demands against the United States by the act of October 9, 1940 (54 Stat. 1061; 31 U. S. C. 71a, 237) shall not be deemed to apply to original or substitute checks heretofore or hereafter drawn on the Treasurer of the United States, including those drawn by wholly owned and mixed-ownership Government corporations, or drawn by authorized officers of the United States on designated depositaries."

SEC. 2. Section 3 of the act of July 11, 1947 (61 Stat. 309; 31 U. S. C. 134) is hereby amended to read as follows:

"SEC. 3. The Secretary of the Treasury is authorized to transfer, at appropriate intervals, amounts of unpaid checks from the accounts on which drawn to a consolidated account or accounts on the books of the Treasury and to transfer to such consolidated account or accounts the balance of the special deposit account established pursuant to section 1 of the act of July 11, 1947 (61 Stat. 308), which consolidated account or accounts shall be available for the payment of such checks, and any unpaid checks heretofore payable from the special deposit account. The Secretary of the Treasury is further authorized to transfer, at appropriate intervals, from the accounts available for the payment of unpaid checks to the appropriate receipt account on the books of the Treasury any amounts not required for the payment of such checks and with the concurrence of the Comptroller General to make such rules and regulations as he may deem necessary or proper for the administration of the provisions of this act."

SEC. 3. (a) Section 2 of the act of June 22, 1926 (44 Stat. 761; 31 U. S. C. 122) is hereby amended to read as follows:

"SEC. 2. Hereafter all claims on account of any check, checks, warrant, or warrants appearing from the records of the General Accounting Office or the Treasury Department to have been paid, shall be barred if not presented to the General Accounting Office or the Treasurer of the United States within 6 years after the date of issuance of the check, checks, warrant, or warrants involved. However, any claims for the proceeds of checks payable in Philippine pesos heretofore issued in payment of claims certified by the Philippine War Damage Commission,

shall not be barred if received by the representative of the Chief Disbursing Officer, United States Treasury Department, at Manila, Republic of the Philippines, within 6 years after the date of issuance of such checks."

(b) Section 1 of the act of March 6, 1946 (60 Stat. 31; 31 U. S. C. 129) is hereby amended by inserting immediately after the words "General Accounting Office" the words "or the Treasurer of the United States."

SEC. 4. Subsection (a) of section 3646 of the Revised Statutes of the United States, as amended (31 U. S. C. 528 (a)), is hereby amended to read as follows:

"(a) Except as provided in this section, whenever it is clearly proved to the satisfaction of the Secretary of the Treasury that any original check of the United States is lost, stolen, or wholly or partly destroyed, or is so mutilated or defaced as to impair its value to its owner or holder, the Secretary of the Treasury is authorized to issue to the owner or holder thereof against funds available for the payment of the original check a substitute showing such information as may be necessary to identify the original check, upon receipt and approval by the Secretary of the Treasury of an undertaking to indemnify the United States, in such form and amount and with such surety, sureties or security, if any, as the Secretary of the Treasury may require; but no such substitute shall be payable if the original check shall first have been paid: *Provided*, That nothing contained in this section shall be deemed to relieve any certifying officer or his sureties or any disbursing officer or his sureties of any liability to the United States on account of any payment resulting from the erroneous issuance of the original check."

SEC. 5. (a) Subsection (c) of section 3646 of the Revised Statutes of the United States, as amended (31 U. S. C. 528 (c)), is further amended by deleting the phrase "prior to the expiration of 10 years from the date on which the original check was issued" and inserting in lieu thereof "prior to the close of the fiscal year next following the fiscal year in which the check was issued".

(b) Subsection (e) of section 3646 of the Revised Statutes of the United States, as amended (31 U. S. C. 528 (e)), is further amended by deleting the phrase "prior to the expiration of 10 years from the date on which the original check was issued."

(c) Subsection (f) of section 3646 of the Revised Statutes of the United States, as amended (61 Stat. 310; 31 U. S. C. 528 (f)), is further amended to read as follows:

"(f) Substitutes issued under this section drawn on the Treasurer of the United States shall be deemed to be original checks and payable under the same conditions as original checks."

SEC. 6. Section 2 of the act of July 11, 1947 (61 Stat. 309; 31 U. S. C. 133) and section 5 of the act of July 1, 1916, as amended (61 Stat. 309; 31 U. S. C. 154), are hereby repealed.

ALLOWANCES TO CIVILIAN EMPLOYEES FOR TRANSPORTATION OF HOUSE TRAILERS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 405, S. 1408.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (S. 1408) to provide allowances for transportation of house trailers to civilian employees of the United States who are transferred from one official station to another.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on Government Operations with an amendment on page 1, line 10, after the word "States," to insert "within Alaska, or between the continental United States and Alaska," so as to make the bill read:

Be it enacted, etc., That section 1 (b) of the act entitled "An Act to authorize certain administrative expenses in the Government service, and for other purposes," approved August 2, 1946, as amended, is amended by adding at the end thereof the following: "Under such regulations as the President may prescribe, any civilian officer or employee who transports a house trailer or mobile dwelling within the continental United States, within Alaska, or between the continental United States and Alaska, for use as a residence and who would otherwise be entitled to transportation of household goods and personal effects under subsection (a) shall be entitled to a reasonable allowance, not to exceed 20 cents per mile, in lieu of such transportation."

Mr. HUMPHREY. Mr. President, this bill was requested by the Department of the Interior. Its enactment will to a considerable extent help to ease the difficult housing situation encountered by workers going from one area to another, particularly outside the continental limits of the United States. It will result in a saving of money to the Government. The bill was reported unanimously by the Committee on Government Operations. I ask that an explanation of the bill be printed in the RECORD at this point.

There being no objection, the explanation was ordered to be printed in the RECORD, as follows:

PURPOSE

This bill, as amended, would authorize the heads of departments and agencies of the Government to pay a mileage allowance to civilian employees to cover the cost of transporting their house trailers when transferred from one official station to another, within the continental United States, within Alaska, or between Alaska and the continental United States. The bill further provides that the mileage allowance to be authorized will be controlled by regulations promulgated by the President of the United States, and will be paid to employees who would otherwise be entitled to the movement of household effects at Government expense. The amount to be paid will be determined by the head of the agency; however, in no instance would the amount exceed 20 cents a mile for transportation of house trailers or mobile dwellings.

The bill further provides that the trailers would have to be used for dwelling purposes by the employee, and their movement would have to be in connection with a permanent change in duty from one official station to another. To qualify for a mileage allowance the employee would have to be entitled to transportation of his household goods and personal effects because of a change of official duty.

ESTIMATE OF COST

During the consideration of an amendment to the Career Incentive Act of 1955, testimony was given before the House Armed Services Committee that, if an employee had 5,000 pounds of household effects and was transferred from Topeka, Kans., to Fort Worth, Tex., the Government would save about $106 by moving his personal effects and house trailer on a reimbursable basis in lieu of packing, crating, and transporting his household effects by common carrier.

When the Senate Armed Services Committee considered this measure in 1955 and reported a bill (H. R. 4720) to cover the movement of house trailers for military personnel, the report (S. Rept. 125) contained the following statement:

"The committee was of the opinion that it was only equitable that a serviceman who transports his trailer for use as a residence should receive an allowance. It is significant to note that the cost to the Government will be much less by awarding the mileage allowance than it would be by shipping the man's household effects by private carrier under the prescribed weight limitations."

The committee, in reporting S. 1408, agreed that, since employees who elect to ship their household goods and personal effects, when transferred from one place of employment to another, are entitled, within limitations prescribed by regulations, to the expenses of transportation, packing, crating, temporary storage, drayage, and unpacking such items, the enactment of the proposed legislation would effect savings to the Government.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

DONATION OF CERTAIN RECORDS TO THE GOVERNMENT OF THE REPUBLIC OF THE PHILIPPINES

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 406, S. 1141.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (S. 1141) to authorize and direct the Administrator of General Services to donate to the Philippine Republic certain records captured from insurrectors during 1899–1903.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on Government Operations with an amendment on page 1, after line 9, to strike out:

SEC. 2. Prior to effecting such transfer, the Administrator of General Services shall cause to be made a complete microfilm copy of said records for preservation in the National Archives of the United States.

SEC. 3. There is hereby authorized to be appropriated the sum of $35,000 to cover the costs of microfilming and of transporting said records to Manila.

And, in lieu thereof, to insert:

SEC. 2. Before effecting such transfer, the Administrator of General Services shall cause to be made a microfilm copy of each document contained in such records which the Secretary of State or his designated representative shall select for preservation in the National Archives of the United States.

SEC. 3. There is hereby authorized to be appropriated to the Administrator of General Services such sum, not exceeding $35,000, as may be required to cover the costs of microfilming records and transporting the originals thereof to Manila in conformity with the provisions of this act.

So as to make the bill read:

Be it enacted, etc., That the Administrator of General Services is authorized and directed to transfer to the Government of the Republic of the Philippines, without compensation, the records captured by United States forces from the Philippine insurgents during the period 1899–1903 and now maintained as part of record group 94 in the National Archives of the United States.

SEC. 2. Before effecting such transfer, the Administrator of General Services shall cause to be made a microfilm copy of each document contained in such records which the Secretary of State or his designated representative shall select for preservation in the National Archives of the United States.

SEC. 3. There is hereby authorized to be appropriated to the Administrator of General Services such sum, not exceeding $35,000, as may be required to cover the costs of microfilming records and transporting the orignals thereof to Manila in conformity with the provisions of this act.

The amendment was agreed to.

Mr. HUMPHREY. Mr. President, this is a procedural bill. It deals with vital records which are held by the Federal Government, and which are to be transferred from the National Archives to the Government of the Philippine Republic.

Rather than to take the time of the Senate to make a detailed explanation, I ask unanimous consent to have printed at this point in the RECORD the explanation of the bill and the amendment which is contained in the committee report.

There being no objection, the explanation from the report (No. 399) was ordered to be printed in the RECORD, as follows:

PURPOSE

This bill would authorize and direct the Administrator of General Services to transfer, without reimbursement, to the Philippine Government certain records now maintained by the Archivist of the United States. It further provides that certain records and documents be microfilmed by the Administrator of General Services. The sum of $35,000 is authorized to be appropriated to defray the cost of microfilming such records as may be designated by the Secretary of State or his designated representative, prior to transfer to the Republic of the Philippines.

The purpose of the amendment is to establish a maximum to be expended to cover the cost of microfilming and transportation of the records to Manila, since it is the view of the committee that the sum of $35,000 requested for this purpose is excessive.

The committee is of the opinion that some of these records may not be of such great importance or significance as would require microfilming for retention in the files of the United States Government. Therefore, the committee approved the amendment in an effort to reduce the costs, if possible, and, further, provided that the Secretary of State, or his duly authorized representative, review the records and determine which papers should be microfilmed before released to the Philippine Republic.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

SUSPENSION OF TROOP CEILINGS IN THE ARMED FORCES

Mr. MANSFIELD. Mr. President, I ask the Chair to lay before the Senate the unfinished business.

The PRESIDING OFFICER. The Chair lays before the Senate the unfinished business, which will be stated.

The LEGISLATIVE CLERK. The bill (H. R. 7143) to amend the Act of August 3, 1950, as amended, to continue in effect the provisions relating to the authorized personnel strengths of the Armed Forces.

THE INESTIMABLE PRIVILEGE OF TRIAL BY JURY

Mr. ROBERTSON. Mr. President, for us in Virginia there is irony in the fact that in the midst of celebrating the 350th anniversary of the Jamestown settlement, where representative government on the North American continent was started, we must pause to fight a proposal sponsored by the President of the United States to abridge one of the most valued rights of self-government, namely, trial by jury.

Under the mocking label of civil rights, the President and his chief law-enforcement officer, the Attorney General, are pressing upon the Congress legislation which would undermine our constitutional liberty and restrict rights which have been cherished since colonial days.

Earlier this week the Senate committee which has been considering the so-called civil-rights bills voted to insert in the one recommended by its subcommittee an amendment assuring to defendants in civil-rights cases the same kind of protection of their right to a jury trial which is now granted in cases involving labor disputes.

On the other side of the Capitol, however, there is a bill under consideration almost identical with the Senate subcommittee's bill in which the threatened abridgment of jury rights still remains.

We do not know what the status of this provision will be in the bill which may be sent to the Senate by the other House. We cannot be sure that those who have accepted the Attorney General's viewpoint that abridgment of jury trials is the heart of the bill will not succeed in their efforts to have the Senate Judiciary Committee reverse its decision. And, in any case, we know that whenever one of these bills is considered on the floor of the Senate a major issue will be the right of trial by jury.

When the time comes for that Senate debate, which now seems inevitable, I shall say, as I have said throughout my service in the Congress, that so-called civil-rights legislation is ill considered, inadvisable and unnecessary. I shall try to point out how it would create friction and ill will that, in the long run, would harm instead of help those alleged to be its beneficiaries. And, above all, I shall try to make clear the danger that the precedent set and the forces placed in motion by such legislation would strike another blow at the already weakened foundation of a government of balanced powers—a central government having only delegated powers with the sovereign States and the people retaining control of all others not specifically prohibited to them.

In the meantime, however, before the stage of debate on a specific bill is reached, I want to bring to the attention of the Senate the significance, as I see it, of the issue of trial by jury as it is involved in this legislation. I desire to remind the Senate of the background of the right which would be infringed and to point out that this is not a sectional matter but a fundamental one which vitally concerns the citizens of every State of the Union.

And, Mr. President, because I have high personal regard for the present occupant of the White House, it is with sorrow that I must point out the disservice he is doing to the cause of constitutional liberty, in which I am sure he too believes, when he allows the prestige of his office to be thrown behind this legislation.

What a grand opportunity the 350th anniversary of the first permanent English settlement gave the President to emulate the example of Daniel Webster on the 100th anniversary of the birth of George Washington. After praising Washington's contribution to the birth of a new nation; after extolling the benefits the people had derived from the form of government Washington had helped to frame, Webster made an eloquent plea for its preservation. He concluded with the eloquent reminder, which I have often quoted in the past, that other misfortunes may be borne and their effects overcome, but that we cannot reconstruct the fabric of demolished government.

"Who shall rear again the well-proportioned columns of constitutional liberty?" Webster asked; and he solemnly answered "If these columns fall, they will be raised not again."

I had hoped that when the President of the United States became aware of the significance of some of the proposals being made under the label of civil rights he would denounce them in the name of constitutional liberty, but I have been disappointed.

At a press conference last month the President said:

> The civil rights bill is a very moderate thing, done in all decency and in a simple attempt to study the matter, see where the Federal responsibilities lie, and to move in strict accordance with the Supreme Court's decision, no faster and no further

Then, when the representative of a Virginia newspaper asked how he felt about the bill's denial of jury trials, the President replied that he was "not going to talk about that matter," and said his questioner would have to ask Attorney General Brownell, who "knows more about it than I do."

As I have said, I have high personal regard for the President and although I do not always agree with him, I frequently have been able to support his

recommendations. I am not unmindful of the fact, however, that the Attorney General is by tradition a political appointee who after he has taken office does not always abandon his partisan viewpoint and I must frankly say that my observation of the conduct in office of Mr. Brownell has not convinced me he is an exception to this rule.

Therefore, I am not willing to accept as final the word of the Attorney General as to the merits and characteristics of this and other civil rights bills, and I am concerned by the implication in the quotations I have cited that the President has placed such reliance on this subordinate official.

I am not so optimistic as to believe the President will find time to read all that I say here today, or that it will be read by the millions of citizens who have not yet realized what a chipping away of the right of trial by jury might mean to them and to their children in the future.

I am determined, however, at least to get on the record some analysis of the right of every citizen to trial by his own neighbors, which has been well called the favorite child of English law.

There is, it seems to me, Mr. President, a certain lack of logic in the argument of the sponsors of these bills. On the one hand, they protest that it is only a little thing to slip civil rights cases into the limited classifications of injunctions which may be handled without jury trials, and they say all the important legal rights of defendants still will be preserved.

On the other hand, however, the Attorney General calls the jury provision the heart of the bill, and it is coupled with such shortcutting procedures as authority to institute action whenever the Attorney General thinks someone is about to engage in acts that would violate the law, and the privilege of taking cases directly to Federal court before available State administrative remedies have been attempted.

No wonder the Washington Star, in an editorial published on April 16, 1957, said these bills contemplate a radical and even dangerous projection of the Federal judicial power, and asked: "In principle, why should not defendants in civil-rights disputes be entitled to at least the same jury protection as defendants in labor disputes?"

To give just one illustration of the meaning of these proposals regarding jury trials, let us contrast an actual case with one which might arise if the Attorney General's proposal is accepted.

On May 27, in Guntersville, Ala., where a labor dispute was in progress, there occurred a shooting in which 2 persons were killed and 6 others were wounded. A local judge then granted a temporary injunction against mass picketing. If, in that acute situation, pickets had marched, in defiance of the order, and had been arrested, they could have demanded and obtained a jury trial.

On the other hand, let us suppose that a registrar of voters in some State should refuse to register an applicant who failed to comply with some requirement of State law. Let us suppose, further, that the applicant belonged to a minority group and appealed to the Attorney General who, under the proposed civil-rights bill, could then go into a Federal court and obtain an injunction in the name of the United States, calling upon the official to register the would-be voter. The registrar might feel he was in peril of prosecution from the State if he made the registration in violation of the State law; but if he refused, and thereby violated the Federal injunction, he would be subject to imprisonment, and would have no opportunity to have the facts in his case considered by a jury.

Obviously, just such cases are the ones the sponsors of this proposed legislation have in mind when they say there cannot be the kind of enforcement of the civil-rights laws which they want, if jury trials are permitted. They anticipate that a man's neighbors, who know his reputation and his devotion to duty, will not see him sent to jail for making the wrong choice between apparently conflicting obligations. In a direct conflict between Federal and State laws, they know the former must prevail; but they will distinguish between such cases and attempts to enforce some Federal official's ideas of what should be done in the light of modern sociological trends and psychological studies.

As the Senators from North and South Carolina said in their minority subcommittee views on the Senate bill:

> The arguments that criminal prosecutions are cumbersome and slow and that jurors are reluctant to indict and convict are identical with those given for the establishment of the court of star chamber, the enactment of the acts of Parliament depriving American colonists of the right of trial by jury, and the congressional opposition of former days to the jury trial provision of the Clayton and Norris-LaGuardia Acts.

Mr. President, I digress here to add something which is not included in my prepared remarks. I refer to a development of yesterday, namely, the statement President Eisenhower made when he quoted from the acceptance speech of William Howard Taft, in 1908, at the Chicago nominating convention. Mr. Taft, who later became the distinguished President Taft, was a great and able man. But ultimately he was defeated because he was in favor of a high protective tariff, especially on wool, and that displeased his sponsor, Teddy Roosevelt; and also because in that speech Mr. Taft went on record as saying that it would never do to give union labor or labor of any kind a jury trial, when the case was before a Federal judge on injunction proceedings.

Because my friendship with President Eisenhower has lasted a long time—I knew him when I was a major in the Army, in World War I, and he was a lieutenant colonel, and I have known him ever since—I regret that anyone should suggest to him that he attempt to bolster the opinion of the Attorney General in this matter, in regard to a broad category of cases, by quoting the statement made by William Howard Taft in regard to trial by jury—a statement which evidently the press did not catch correctly, because I have before me the exact words used by Mr. Taft, as published; and I heard over the radio a quotation from President Eisenhower's statement. In the first place, the words used by President Eisenhower are not exactly the ones used by Mr. Taft, although perhaps President Eisenhower was quoting from memory. However, the point is that Mr. Taft was at that time criticizing the Democratic platform on which William Jennings Bryan had been nominated, which platform said that when a violation of an injunction order occurs outside a courtroom, those who had engaged in the violation should have the right of trial by jury.

Trial by jury, Mr. President, never was intended as a quick and easy way to obtain convictions. Trial by ordeal or by torture used to be much more effective from that standpoint. The introduction of the principle of trial by jury into Anglo-Saxon jurisprudence was not for the purpose of simplifying the work of prosecutors, but was for the protection of the rights of the accused; and it was established only over the opposition of kings and tyrants and their henchmen.

Even though there are, as the Attorney General and his assistants have pointed out, particular kinds of cases involving either civil or criminal contempt in which citizens of the United States have no constitutional right of trial by jury, the primary purpose in these instances is to protect the status quo with regard to property while the issue is being settled. To argue that because there is this limited area of exclusion, we are justified in extending it to include new classes of cases by the indirect device of making the United States a party to the action, is to ignore the whole theory on which trial by jury rests and the history of its development.

In his interesting historical study entitled "Trial by Jury," published in 1875, William Forsyth said:

> Trial by jury does not owe its existence to any positive law * * * it is not the creature of an act of Parliament establishing the form and defining the functions of a new tribunal.

The great English legal authority Blackstone called it "a trial that hath been used time out of mind in this Nation, and seems to have been coeval with the first civil government thereof"; and Sir Francis Palgrave said a tribunal of sworn witnesses elected out of the popular courts and employed for the decision of rights of property may be traced to the Anglo-Saxon period, although the use of a jury in criminal cases appears to have been unknown until the time of William the Conqueror.

Blackstone thought trial by jury was provided for in Magna Carta, which declared that no freeman shall be hurt in either his person or property except by the legal judgment of his peers or by the law of the land. Forsyth doubted whether the term "trial by his peers" could have been applied to a jury because of its limited function of passing on facts, rather than rendering judgments; but he conceded that a conclusive finding of facts is a judicial act, and

said the term "judgment" might, therefore, be applied to a jury's decision.

This is a nice point for controversy, and I invite my Senate colleagues to visit Jamestown, Va., where one of the originally enrolled copies of Magna Carta is on display, and read that document for themselves. I am happy to see on the floor two distinguished colleagues who have already done that, the distinguished Senator from Ohio [Mr. LAUSCHE], and the distinguished Senator from North Carolina [Mr. ERVIN]. Regardless of technicalities, I believe any of my colleagues who visit Jamestown will come away from that spot "where the infancy of our Nation was cradled and defended" convinced that the spirit, at least, of Magna Carta is violated when a politically appointed officer in the executive branch of the Government is authorized to intervene in an action of one individual against another individual in the name of the Federal Government and to obtain a sentence of imprisonment from a Federal judge appointed for life, without an opportunity for the accused to call on a panel of his fellow citizens to pass on the facts involved in the case.

Going back to the early history of England, we find disputes respecting land decided by the voice of the community where the parties lived, and, as a later development, a select number was substituted for the whole community. This group gave their testimony upon oath and therefore were called the jurata. This suggested to Henry II and his counselors the idea of the assize, which was the jurata in a technical form, but the assize had a technical meaning and was applied only to certain proceedings.

An ancient statute of uncertain date provided that in cases where land of small extent or value was involved the justices might select a jury of 12 free men instead of the grand assize of 12 knights. Thus, the common man obtained a decision from his peers. Gradually justices appointed to hold the assize were directed to entertain other questions than those concerning land, and juries were allowed to accept evidence from witnesses in court. By the reign of Edward III, trials by jury in criminal cases were nearly, if not quite, the same as at the present day.

This was the Anglo-Saxon heritage which came to America with the colonists in 1607, and which they made a part of their own system after the first representative government in America was set up at Jamestown in 1619.

The regard in which our forefathers held the right of trial by jury is indicated by their statement in the colonial Declaration of Rights of October 19, 1765, which said "trial by jury is the inherent and invaluable right of every British subject in these Colonies," and which condemned an act of Parliament "extending the jurisdiction of the courts of the admiralty beyond its ancient limits," so they could try the colonists for various offenses without a jury—a procedure similar to that attempted in the bill before the Judiciary Committee today.

This colonial reaction against the Stamp Act enforcement methods had been preceded by a more reserved resolution passed by the Virginia House of Burgesses on May 30, 1765, but it was followed, on February 27, 1766, by an unequivocable statement of a distinguished group, headed by Richard Henry Lee, which met at Leedstown, Va.

The Leedstown resolution signers declared "all due allegiance and obedience to our lawful sovereign," and asserted their determination to "preserve the laws, the peace, and good order of this Colony as far as is consistent with the preservation of our constitutional rights and liberty."

They went on to say, however, that they knew it to be the birthright privilege of every British subject, including the people of Virginia, to be legally tried only by their peers, and they declared:

> If therefore any person or persons, shall attempt by any action or proceeding to deprive this Colony of those fundamental rights we will immediately regard him or them as the most dangerous enemy of the community and we will go to any extremity not only to prevent the success of such attempts but to stigmatize and punish the offender.

Mark you, Mr. President, that was long before the Declaration of Independence.

The resolutions pointed out that the Stamp Act in many cases worked to deprive the British American subject of his right to trial by jury, and said:

> We do determine at every hazard and paying no regard to danger or to death, we will exert every faculty to prevent the execution of the said Stamp Act in any instance whatsoever within this Colony.

Mr. President, the names of many of the Virginians who signed the Leedstown resolutions are preserved in our State today through their descendants, and their spirit also has been handed down. If the attempt is made by the Federal Government now, in a so-called civil rights bill, to constrict the right of trial by jury, as George III did nearly two centuries ago in his Stamp Act, Mr. President, you will find not dozens, but thousands of Virginians, and their fellow believers in constitutional liberty in other States, ready again at every hazard to exert every faculty against usurpation of their fundamental rights.

As I previously indicated, the sentiments expressed in the colonial resolutions of 1765 and 1766 were stated again in the Declaration of Rights of October 14, 1774, which said the colonists were entitled to "the great and inestimable privilege of being tried by their peers of the vicinage."

These views were reiterated in the Declaration of Independence, written by Thomas Jefferson and adopted by the Continental Congress in 1776, which accused the King of England of trying to establish an "absolute tyranny," and included in the list of grievances against him: "depriving us in many cases of the benefits of trial by jury."

And, of course, trial by jury in criminal cases was embodied in and made part and parcel of the Constitution of the United States, which provides in article III:

> The trial of all crimes, except in cases of impeachment, shall be by jury; and such trial shall be held in the State where the said crimes shall have been committed.

When the first 10 amendments were adopted this was reinforced by the 5th amendment, which says:

> No person shall be held to answer for a capital, or otherwise infamous crime, unless on a presentment or indictment of a grand jury.

And the sixth amendment, which says:

> In all criminal prosecutions, the accused shall enjoy the right to a speedy and public trial, by an impartial jury of the State and district wherein the crime shall have been committed.

The framers of the Constitution included no provision for jury trials in civil cases, leaving that to determination by the respective States, but this omission led to such sharp and widespread criticism that in the first session of the Congress there was included, among the Bill of Rights amendments, the seventh, which provides:

> In suits at common law, where the value in controversy shall exceed $20, the right to trial by jury shall be preserved. And no fact tried by a jury shall be otherwise reexamined in any court of the United States than according to the rules of the common law.

This—

Said Mr. Justice Story—

> is a most important and valuable amendment, and places upon the high ground of constitutional right the inestimable privilege of a jury trial in civil cases—a privilege scarcely inferior to that in criminal cases, which is conceded by all to be essential to political and civil liberty (Story's Commentaries, III, 638).

Mr. President, I want to repeat, for emphasis, the last quotation from one of the great Justices of our Supreme Court and one of our leading authorities on constitutional law. Mr. Justice Story said the privilege of trial by jury in civil cases is "scarcely inferior to that in criminal cases, which is conceded by all to be essential to political and civil liberty."

How ironic, then, to seek, in what is called a civil-rights bill, to tamper with, circumvent, and limit a right which is conceded by all to be essential to political and civil liberty.

Mr. Justice Story, in his discussion of this subject, also referred to a Supreme Court decision on an appeal in a civil suit in which it is stated:

> The trial by jury is justly dear to the American people. It has always been an object of deep interest and solicitude, and every encroachment upon it has been watched with great jealousy. The right to such a trial is, it is believed, incorporated into, and secured in every State constitution of the Union.

It has been said that if Englishmen are distinguished for one moral feature more than another it is a love for fair play and an abhorrence of injustice. The very essence of the jury trial is its principle of fairness.

A significant comment on the influence of jury trials on national character and political institutions is to be found in Alexis de Tocqueville's book on Democracy in America.

De Tocqueville warned that a jury system limited to criminal trials always is

in peril because the people see it in operation only at intervals and in particular cases. They are accustomed to dispense with it in the ordinary affairs of life and look upon it merely as one means, and not the only means, of obtaining justice. But this French statesman and writer, a keen observer of our American experiment, who predicted that the two great powers of the world would be Russia and the United States, said that when jury trials embrace civil actions they are constantly before the eyes of the people and affect all their interests. The jury then becomes associated with the very idea of justice.

He said the jury, and especially the civil jury, serves to imbue the minds of the citizens of a country with a part of the qualities and character of a judge, and this is the best way of preparing them for freedom. It spreads among all classes a respect for the decisions of the law; it teaches them the practice of equitable dealing. Each man in judging his neighbor thinks that he may be also judged in his turn. So, said de Tocqueville, the greatest advantage of the jury is its use as an instrument for the education of people who will govern themselves.

This writer went on to say that the jury also is a political institution of the highest value.

The jury—

He wrote—

is emphatically a political institution. The man who judges in criminal cases is, then, really a master of society. The institution of the jury places the people themselves, or at least one class of citizens, upon the seat of the judge. The institution of the jury, then, actually places the direction of society in the hands of the people, or of this class.

In his book on the English Government, Lord John Russell said:

It is to trial by jury more than even to representation (as it at present exists) that the people owe the share they have in the government of the country; it is to trial by jury, also, that the government mainly owes the attachment of the people to the laws; a consideration which ought to make our legislators very cautious how they take away this mode of trial by new, trifling, and vexatious enactments.

Once again, Mr. President, I want to repeat for emphasis that statement of Lord Russell, reminding us of how much the attachment of a people to the laws of their country stems from their reliance on trial by jury and warning legislators that they should be "very cautious how they take away this mode of trial by new, trifling, and vexatious enactments."

The proposal of the Attorney General, backed by the President, to abridge the right of trial by jury is new and it is vexatious. But its final effect may be far from trifling.

No Member of this distinguished body will dare assert that the preservation of American constitutional liberty is of no moment in his home State. How, then, can any Senator assume that if he votes to limit and restrict the constitutional right of jury trial he is not voting away cherished rights of his own constituents?

The first experiment in the use of such new Federal power to evade jury trials because it is easier to convict without a jury may be in the South, but the cold, hard fact is that we are considering a law of national application, not limited to the question of suffrage. As stated on page 17 of the subcommittee minority views, the Senate bill "covers in substantial measure the entire spectrum of civil rights."

No State, of course, is without the seeds of an economic, religious, or racial problem.

The point involved here is well illustrated by a case decided by the Supreme Court of the United States in 1866—*Ex parte Milligan* (4 Wall. 2 (118)). This involved a citizen of Indiana who had not been in military service but who was sentenced by a military tribunal in 1864 to be hanged for disloyal conduct during the Civil War.

Just as the pending bill would allow civil rights cases to be taken directly into Federal courts and tried without a jury without first exhausting administrative remedies or the possibilities of action by State courts, so in 1864 the military court took jurisdiction and sentenced a man although the courts of Indiana never were closed during the war.

The Supreme Court set aside the military conviction, saying the defendant should have been tried before a jury in a court of law and in the decision this language was used:

Time has proven the discernment of our ancestors; for even these provisions, expressed in such plain English words that it would seem the ingenuity of man could not evade them, are now after the lapse of more than 70 years, sought to be avoided.

Those great and good man foresaw that troublous times would arise, when rules and people would become restive under restraint, and seek by sharp and decisive measures to accomplish ends deemed just and proper, and that the principles of constitutional liberty would be in peril unless established by irrepealable law. The history of the world had taught them that what was done in the past might be attempted in the future. The Constitution of the United States is a law for rulers and people, equally in war and peace, and covers with the shield of its protection all classes of men, at all times, and under all circumstances. No doctrine involving more pernicious consequences was ever invented by the wit of man than that any of its provisions can be suspended during any of the great exigencies of government. Such a doctrine leads directly to anarchy or despotism.

That statement, made by the Supreme Court of the United States in 1866, is no less pertinent today and certainly there is less excuse for avoiding jury trials now to help the Attorney General handle some pet cases than there was for trying to get around it in the stress of the War Between the States.

The only safe and just rule to follow is the golden rule, and if my colleagues will think of what might happen sometime in their own States, as it did in Indiana in 1864, they will join me in opposing any bill which would deprive a single citizen of the right of trial by jury which he otherwise would enjoy.

Mr. ERVIN. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. TALMADGE in the chair). Does the Senator from Virginia yield to the Senator from North Carolina?

Mr. ROBERTSON. I yield to my colleague, the Senator from North Carolina.

Mr. ERVIN. I wish to commend the able and distinguished Senator from Virginia for his excellent explanation of the right of trial by jury, and why that sacred right of the American people ought not to be abrogated as to any segment of our society as to any class of cases.

I have observed that the President has been asked a number of times at press conferences about this bill. On one occasion he stated that he did not understand the legal quirks in the bill, and that his questioners would have to ask Attorney General Brownell about that subject. Is that the Senator's recollection?

Mr. ROBERTSON. That is correct. To me that is rather discouraging.

Mr. ERVIN. I will ask the Senator if, from his study of the campaign speeches of the President, he does not believe that President Eisenhower would be opposed to the enactment of this bill if he understood the bill and its implication?

Mr. ROBERTSON. President Eisenhower's campaign speeches were so persuasive that the Senator from Virginia would have voted for him if he had not been a dyed-in-the-wool Democrat. The Senator from Virginia cannot reconcile the President's statements on the subject of States' rights with the provisions of the bill.

The only logical conclusion is that the bill has not been presented to the distinguished soldier in the light of a legal argument he could fully understand. As I have already mentioned, he would not have used as authority the reference to what Judge Taft said in 1908 about jury trials if he had realized that he was going on record against all the labor unions in the Nation, and against what we have given them since 1914, under democratic legislation, in the form of the right of trial by jury in injunction proceedings. I know that he did not intend to imply that he favors repealing the right of trial by jury in labor disputes.

Mr. ERVIN. I ask the distinguished Senator if, at the time William Howard Taft made the statement which has been quoted, he was not engaged in making a political speech, rather than acting in a judicial capacity, and pointing out what the law should be?

Mr. ROBERTSON. He had accepted the nomination for President, and was hopeful of being elected. The natural inference is that he was engaging in a little political discussion.

Mr. ERVIN. I ask the distinguished Senator from Virginia if William Howard Taft, in making that speech, was not speaking in opposition to the Democratic platform, which guaranteed that the Democratic Party would stand for the right of trial by jury on behalf of labor when labor was charged with contempt based on alleged violations of injunctions issued by Federal courts.

Mr. ROBERTSON. As I have previously stated, either the President did not quote the speech correctly, or the press did not quote the President correctly.

The Senator from Virginia will answer his distinguished colleague by reading what Judge Taft actually said:

> With respect to notice, the Democratic platform contains no recommendation.

There has been much dispute as to whether injunctions should be issued against labor unions without any previous notice. Taft had said, "There are too many of them. We must act quickly. We do not have time to handle them." But, he said, "There are not too many cases of this kind, and it does not make any difference whether they get notice or not."

Reading further:

> Its only intelligible declaration—

That is, the Democratic platform's—

> in regard to injunction suits is a reiteration of the plank in the platform of 1896 and 1904, providing that in prosecutions for contempt in Federal courts, where the violation of the order constituting the contempt charge is indirect, that is, outside of the presence of the court, there shall be a jury trial.

There is the record. There are the words of Judge Taft, that from 1896 on the Democrats wanted to give the workingman, who was grabbed by the scruff of the neck and haled into Federal court, a chance for a jury trial before he was sent to the penitentiary. Judge Taft said, "Oh, no; that will not do at all. We could not stand for that."

That was apparently good politics in 1908; but in 1912 the same candidate for the Presidency carried only two States. The Senator can draw his own conclusion as to where the labor vote went.

Mr. ERVIN. On May 31, 1957, Attorney General Brownell, who is reputedly the father of the current civil-rights bill, wrote a letter to Representative KEATING, of New York, advancing certain arguments for the enactment of that bill. I wish to read one of the statements the Attorney General made in that letter, which appears in the CONGRESSIONAL RECORD for June 4, 1957, at pages 8325–8326. The Attorney General said:

> Suits for preventive relief under the proposed legislation will be governed by the traditional rules of procedure which have always applied to such suits.

I ask the distinguished Senator from Virginia how he or Attorney General Brownell himself can reconcile the Attorney General's statement which I have just read with the provision of the bill which says that the suits are not to be brought in the name of the real party in interest, but are to be brought in the name of the United States, and, according to the Attorney General's interpretation, can be brought by the Attorney General without the consent or even against the will of the real party in interest. How can the Senator from Virginia or the Attorney General of the United States reconcile the statement of the Attorney General, to the effect that the bill merely authorizes traditional equity procedure, with the provision of the bill to which I have referred?

Mr. ROBERTSON. The Senator from Virginia has read the bill. He has read a great deal of the testimony. He has read the reports of committees in both the House and Senate. He cannot reconcile the statement of the Attorney General with the provisions of the bill, because, in the opinion of the Senator from Virginia, the statement is 100-percent wrong.

Mr. ERVIN. As a matter of equity procedure, I ask the Senator from Virginia if it is not a basic rule of equity that a suit in equity must be brought by the real party in interest in the name of the real party in interest.

Mr. ROBERTSON. Absolutely.

Mr. ERVIN. I ask the Senator if that traditional equity procedure is not absolutely inconsistent with the provisions of the bill, and if the Attorney General's statement with reference to the bill is not absolutely inconsistent with the provision of the bill.

Mr. ROBERTSON. The Senator from North Carolina is indubitably right.

Mr. ERVIN. I read to the distinguished Senator from Virginia another statement made by the Attorney General of the United States in the same letter:

> The Government seeks no new or radical procedures to govern injunction suits in civil-rights cases.

Mr. ROBERTSON. Does the Senator wish to have me answer that statement?

Mr. ERVIN. Yes.

Mr. ROBERTSON. I have made a study of so-called civil-rights cases. I read the 100-page decision in the Slaughter House cases. I have read outlines as long as one's arm. The courts have enumerated a great many issues as being civil-rights issues. Civil rights have been interpreted as covering the 13th amendment, the 14th amendment, the 15th amendment, and due process of law.

What does the bill do? It covers them all. It outlines in great detail questions relating to suffrage.

The third section of the bill gives the Attorney General the right to enter school segregation cases at almost any point. Then he can act on behalf of any citizen, any alien, or any corporation coming to him with a complaint that some civil right, involving due process of law, has been violated.

What is "due process of law"? The courts have not yet finished defining what due process of law is, but it involves many civil-rights cases. Therefore it is the pluperfect of camouflage to call the bill in dispute a voting bill. It covers all civil rights. It is misrepresenting essential facts when the Attorney General asks for the privilege of obtaining court decisions, in suits primarily devised for the protection of property without the intervention of juries, to say that he is not proposing to take away the right of trial by jury in hundreds of instances, involving millions of people.

The proposal is something new. It is a departure. It is a violation of their constitutional rights.

Mr. ERVIN. Mr. President, I should like to invite the attention of the distinguished Senator from Virginia to the question raised by the attorney with respect to equity procedure. I invite his attention to an opinion of the Supreme Court of the United States, in the case of Myers against the Bethlehem Corporation, which is found in volume 303, United States Reports, beginning at page 41. The court, speaking through that great liberal jurist, Justice Brandeis, stated that the plaintiff was not entitled to equity relief by way of injunction, because under the "long settled rule of judicial administration, no one is entitled to judicial relief for a supposed or threatened injury until the prescribed administrative remedy has been exhausted."

I also invite the Senator's attention to the effect that in footnote 9, at the bottom of page 51 of that decision, Justice Brandeis sets out that this rule, namely, that one cannot resort to courts for judicial relief until he has used and exhausted the prescribed administrative remedy, "has been most frequently applied in equity where relief by injunction was sought."

Although the Attorney General says he does not seek any drastic changes in equity procedure, the bill twice states, in substance, that whenever the Attorney General exercises his discretionary power to bring suits under the civil rights bill, all administrative and other remedies cease to be in force and effect.

I ask the Senator from Virginia if he can possibly reconcile these two provisions in the bill with the statement in the Attorney General's letter, which reads as follows:

> The Government seeks no new or radical procedures to govern injunction suits in civil rights cases.

Mr. ROBERTSON. The Senator from Virginia cannot reconcile those statements. What the bill proposes represents a wide departure from established procedure. It goes even further than the Senator from North Carolina has indicated, because it also confers upon the Attorney General, or his assistant who would be handling the cases, the privilege of acting on what he thinks will happen. He can say, "I think something will happen," and proceed with his judicial process.

Mr. ERVIN. I ask the distinguished Senator from Virginia if he can imagine a more radical or a more drastic change that can possibly be made in equity procedure than to provide that State laws and administrative procedures can be nullified at the whim of the Attorney General.

Mr. ROBERTSON. As the distinguished Senator from North Carolina probably knows, the junior Senator from Virginia has been giving a great deal of thought in recent months to the 350th anniversary of the settlement of Jamestown. He has been reviewing the political history and the economic history of the country, its development first as an aggregation of Colonies, then as a weak Nation, and then as the strongest Nation in the world.

In my honest opinion there have never been, in the three hundred and fifty-odd years, more than two other similar attempts of this kind. One was when King George took trial by jury away from the people; the other was when a partisan Congress passed the act of 1866, which President Johnson vetoed as unconstitutional. It was necessary to get another

amendment to the Constitution. The partisans then wanted the military courts to function, and designated Virginia as Military District No. 1. It was stated that Virginia was incapable of self-government.

Those are the two instances in which the right of trial by jury was taken away, or attempted to be taken away, in the history of our Nation.

Mr. ERVIN. In other words, the present executive department is the first executive department since the establishment of American independence which has made an attempt to secure the passage by Congress of a law under which American citizens can be deprived of the right of trial by jury. Is that not correct?

Mr. ROBERTSON. Let the junior Senator from Virginia say, because of his great fondness for the President, it is the one time in the history of the United States that the Attorney General has come forward with a proposal to take away the right of trial by jury.

Mr. ERVIN. In other words, we have had King George of England, and a Reconstruction Congress under the leadership of Thaddeus Stevens take such action in times past?

Mr. ROBERTSON. That is correct.

Mr. ERVIN. And now an Attorney General of the United States emulates their examples. Those are the only three men, in responsible executive positions in Government, who have advocated taking the right of trial by jury from American citizens?

Mr. ROBERTSON. That is correct so far as my knowledge of history is concerned. If anyone can cite another instance, we will give him plenty of time to state it before this argument is over.

Mr. ERVIN. Mr. President, will the Senator yield further?

Mr. ROBERTSON. I yield.

Mr. ERVIN. Is it not true that under the law as now written, there are sufficient statues on the books to enforce all the alleged civil rights of all the American people by the present system of procedures, without the passage of any new laws?

Mr. ROBERTSON. There can be no question about that. I am rather familiar with voting in Virginia, because I first ran for public office in 1916, and have been running for public office ever since. I have never known of any illegal effort in Virginia to deprive anyone of the right to vote because of race, color, or previous condition of servitude. If a person does not pay the poll tax, he cannot vote. However, it is utterly absurd to say that we have deliberately or illegally deprived anyone of his right to vote.

So far as all the other so-called civil rights are concerned, Virginia juries honor their oaths. They are made up of responsible men. It is a base slander to say that in a Federal case a jury in Virginia should not be permitted to pass on the issue because the members of the jury would ignore their oaths and turn a guilty person loose. That is a base slander.

Mr. ERVIN. I should like to ask the Senator from Virginia whether all civil rights cannot now be enforced by the following methods: First, by criminal prosecution, in which the accused has the right, in the case of a felony, to be indicted by a grand jury, and the right, in the case of a felony or a misdemeaner, to be tried by a petit jury, and the right to confront and cross examine his accusers?

Mr. ROBERTSON. The Senator is correct.

Mr. ERVIN. In the second place, any individual who is aggrieved by any alleged denial or deprivation of his civil rights, has the option of bringing suit for damages, or a suit in equity for injunctive relief.

Mr. ROBERTSON. That is correct.

Mr. ERVIN. I will ask the Senator, if such a person brought a suit for damages, the parties would be entitled to trial by jury under the seventh amendment to the Constitution; and in case the suit was brought in equity, he would not be entitled to trial by jury under the Clayton Act, as embodied in sections 402 and 3691 of title 18 of the United States Code?

Mr. ROBERTSON. The Senator is correct. There is one thing that should be added. As I previously said, when the Democrats came into power in 1913 the Clayton Act was amended to provide trial by a jury in cases of indirect contempt in injunction suits in labor cases and the penalty was limited to 6 months in jail.

In 1948, Congress saw fit to lift those provisions from the antitrust act, and to put them in both the code and the Statutes at Large. The Senator from North Carolina, who is one of the ablest lawyers in the Senate, and a former member of the supreme court of his State, knows that the civil-rights bill will seriously affect these statutes. Is that not correct?

Mr. ERVIN. It is certainly true.

Mr. ROBERTSON. Certainly the limit on punishment would be removed.

Mr. ERVIN. Yes. The Senator from Virginia has correctly observed that under existing provisions of the Clayton Act, which are embodied in section 402 and section 3691, of title 18, there is a limitation on punishment of 6 months' imprisonment and a fine of not to exceed $1,000, when the fine is paid to the Federal Government.

If the bill were passed in its present form, containing the provision that the action is to be brought in the name of the United States, rather than in the name of the aggrieved party, the defendants in civil-rights cases would lose the protection of that limited punishment and could be sent to jail for contempt, under the Federal decisions, for years and years and years, until it was shown that there had been a violation of the very nebulous provision of the eighth amendment which prohibits cruel and unusual punishment. I have found one Federal decision which upheld a jail sentence of 4 years in a case tried without a jury.

Despite that fact, the Attorney General tries to tell Congress that this is a mild bill. But if the bill be passed, the punishment of 6 months could be extended to any number of years a judge might decree, until it offended the eighth amendment.

I will ask the distinguished Senator from Virginia if it is not true that where a man is punished for a contemptuous act which is also a crime, he can still be punished for violating the criminal law, can he not?

Mr. ROBERTSON. The Senator is correct.

Mr. ERVIN. He can be subjected to double punishment, despite the double-jeopardy provision of the Constitution. This is true because the theory is that in one case he has violated the criminal law, and in the other case he has disobeyed the command of the judge not to violate the criminal law.

Mr. ROBERTSON. Yes. The Attorney General has tried to tell us that this is a mild and innocuous bill, one which is intended to provide a little improvement in the protection of the right to vote. But he has not sold that idea to one State, to my knowledge; the States know it is not correct.

Mr. ERVIN. I ask the Senator from Virginia if the proposed law would not, in a sense, become the possession of the occupant of the Office of Attorney General, and if the Attorney General could not grant the use of the law to one citizen, deny it to another, use it against another, and refuse to use it against still another?

Mr. ROBERTSON. Certainly; the Attorney General would have absolute discretion.

I was interested to learn that a motion was made in the House Committee on the Judiciary to limit the number of assistants to the Attorney General to 25; but the motion was defeated, because the Attorney General did not want the number of his assistants to be limited to 25. He wants the right to appoint 100, 200, or 250, depending on the amount of money Congress grants. Those assistants then would spread out over the country, and each one would exercise his own discretion. He could say, "In the name of the United States, open the code."

Mr. ERVIN. I believe the United States is supposed to have a government of laws rather than a government of men. The fundamental distinction is that in the one case the laws have authority over men; in the other case, men have authority over the laws.

I ask the Senator from Virginia if the bill does not offend that principle, in that it gives the Attorney General complete control over the proposed law.

Mr. ROBERTSON. For the first time in the recollection of the Senator from Virginia—and I have been in Congress since the spring of 1933—I have seen a bill which provides that something shall not be a crime until the Attorney General decides it is a crime.

Mr. ERVIN. I will ask the Senator if the bill does not place a political club in the hands of the Attorney General, and if the Attorney General could not use it to usurp the power of the State and local officials. Could not the Attorney General say to a registrar, "If you do not register this man," or to a school princi-

pal, "If you do not assign this child to that school," I will put the law on you; and when I put the law on you, the legal and financial might of the United States will be arrayed against you in a suit in which you will be denied the benefit of all the constitutional and legal safeguards erected by the Constitution and Congress to protect American citizens from governmental tyranny" I ask the Senator from Virginia if that could not be done under the provisions of the bill.

Mr. ROBERTSON. The Senator is eminently correct. The bill is honeycombed with politics, and includes powers which could be exercised in a political manner by the Office of the Attorney General.

Mr. ERVIN. I ask the Senator from Virginia, if that kind of action on the part of the Attorney General, would not compel the local official to whom such a threat is directed to take one of three different courses of action. First, he might be tempted to say, "Well, I am serving in this local office as a matter of public duty, without any adequate compensation. Rather than to run the risk of being victimized by the Attorney General, I will resign my office. I will quit."

He could do that, could he not?

Mr. ROBERTSON. He could do that.

Mr. ERVIN. Or he could say, "The only thing I can do under the circumstances is to bow down and make obeisance to the will of the Attorney General and run my local office just as the Attorney General wants me to do."

Mr. ROBERTSON. He could do that.

Mr. ERVIN. Or he could stand up for his convictions and run the risk of being sent to jail for years and years and years, unlimited by anything except the eighth amendment, simply because his idea as to how the should discharge the duties of his State office might differ from those of the Attorney General and a single Federal judge.

Mr. ROBERTSON. Over and above that, while I do not know what the laws of North Carolina provide, in Virginia there is no fund with which to defend a person who is prosecuted by the district attorney or the Attorney General; he must defend himself. If he is bankrupt, he has to defend himself.

Under the bill, if someone made a charge, and the Attorney General should ask, "Can you prove it?" and the complainant said, "No, but I suspect it," that would be sufficient to put the case in court. The defendant then would have to pay the costs of his own defense.

Mr. ERVIN. I ask the Senator, from his own knowledge of conditions in Virginia and other States, if most of the defendants in such cases will not be State or local officials who are performing necessary governmental services at State and local levels, with little or no compensation, out of a sense of public duty.

Mr. ROBERTSON. That is true. But consider, also, the places from which witnesses could be subpenaed. I have not seen the latest action of the committee of which the Senator from North Carolina is a member; but under the bill, as I recall, a person could be subpenaed anywhere within the jurisdiction of the circuit court of appeals having jurisdiction of a case. For example, if he lived in the jurisdiction of the Fourth Circuit Court of Appeals, that would include Baltimore and every other place in Maryland, Virginia, West Virginia, North Carolina, and South Carolina. He could be subpenaed anywhere he could be reached within that area.

Think of what a departure that would be from the practice of proceeding against a man in his home area and among his home friends. But the bill provides that a proceeding against him may be started anywhere in the jurisdiction of the circuit court of appeals of his area.

Mr. ERVIN. I ask the Senator from Virginia if he has ever seen or heard of a single human being whom he would be willing to entrust with the autocratic and despotic power which the bill would confer upon the occupant of the Office of the Attorney General.

Mr. ROBERTSON. No; I never have. As Thomas Jefferson said, we should grant no man power on the assumption that he would not violate it. Bind him down, Jefferson said, by the chains of the Constitution. The proponents of the bill are trying to violate the Constitution by providing more power than any man should have.

Mr. ERVIN. I ask the Senator if this is not a fair analysis of what the bill would accomplish, if it were enacted: It would place State and local officials on a constitutional and legal basis inferior to that granted to murderers, counterfeiters, dope peddlers, smugglers, and persons alleged to be parties to the Communist conspiracy.

Mr. ROBERTSON. The bill would do that, and would do it to an extent which used to be mentioned during the prohibition days, namely, to such an extent that a four-horse team could be driven through the hole which would be broken in the 10th amendment to the Constitution.

Mr. President, these rights must be maintained. All through the years they have been upheld by the Supreme Court. Bu this bill would wipe out the distinction between the Central Government and the sovereignty of the States, as set forth in the 10th amendment to the Constitution, namely:

> The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people.

Mr. ERVIN. Mr. President, the Senator from Virginia undoubtedly has heard the term "second-class citizen," which has been used for several years now. If the bill were enacted into law, would it not make legal pariahs and third-class litigants out of State and local officials involved in civil-rights cases?

Mr. ROBERTSON. It certainly would have a tendency to do that very thing. Certainly we do not want to see that happen in Virginia.

Mr. ERVIN. I thank the Senator from Virginia for yielding to me.

Mr. ROBERTSON. Mr. President, I have been glad to yield to my colleague, the Senator from North Carolina, for the reason that he is the best informed Member of the entire Congress in regard to this proposed legislation. We in Virginia are eternally grateful to him for the fight—at great inconvenience to himself, because he carries a heavy load in other committees—which he has made, in endeavoring to see to it that the facts in regard to the bill are developed in the committee and on the floor of the Senate and in the press.

Much remains to be done, because the people of the Nation honestly do not realize what the bill really means. It is a short bill. It sounds simple. If one should read it when he is half asleep, he would not think it means very much except an effort to help someone who claims he is not permitted to vote. But when we examine the penetrating analysis which has been made of the bill by a great lawyer, such as the Senator from North Carolina [Mr. ERVIN], it chills one's blood to think that before 2 weeks have passed, if last year's example is followed, this measure, without any substantial amendment, will come to the Senate from the House of Representatives. Then what will the Senate do? Is the Senate to say, "We wash our hands of it"? Mr. President, the Senate cannot wash its hands of this measure; the Senate has a grave responsibility.

I have taken this opportunity—far from undertaking to discuss the provisions of the bill, because I do not know what they will be, in the final analysis—to discuss one phase of the subject of which Viriginia has always been the keystone in the arch of our independence, of our freedom, and of our representative form of government. As Webster said:

> If you tear down that structure—

Namely, the Constitution—

> which so skillfully unites national sovereignty with State rights and the prosperity of the people, it will never be reconstructed.

Mr. President, that is the issue on which we shall have to pass before the end of this session.

So again I desire to express my thanks to the distinguished Senator from North Carolina [Mr. ERVIN] for the helpful questions he has asked me. I regret that I did not know more about this matter, so I could have responded more fully to his questions. But I thank him, on behalf of the people of Virginia, and on behalf of all the people of the Nation, for the magnificent work he has been doing to inform us and the American people just what is under consideration.

Mr. LONG. Mr. President, will the Senator from Virginia yield to me?

The PRESIDING OFFICER (Mr. SYMINGTON in the chair). Does the Senator from Virginia yield to the Senator from Louisiana?

Mr. ROBERTSON. I yield.

Mr. LONG. I wish to congratulate the Senator from Virginia on the very able statement he has made on this matter. I agree with him completely concerning the right of trial by jury.

I also wish to associate myself with the compliment he paid the distinguished Senator from North Carolina [Mr. ERVIN]. I read the minority views of the subcommittee which reported the bill to the full Judiciary Committee, and I must say that it is one of the best pieces of legal analysis I have seen for some time.

Mr. ROBERTSON. I thank the Senator from Louisiana. I am sure that all of us join in the opinion he holds of the distinguished Senator from North Carolina.

Mr. THURMOND. Mr. President, will the Senator from Virginia yield to me?

Mr. ROBERTSON. I yield.

Mr. THURMOND. Mr. President, I wish to join in congratulating the distinguished Senator from Virginia for the magnificent address he has made. I am sure it is enlightening to the Nation to have a great statesman from a great State make to the Senate and to the people of the country so illuminating a presentation as the one he has made on this occasion.

I also wish to associate myself with the distinguished Senator from Virginia in complimenting the able and distinguished Senator from North Carolina [Mr. ERVIN]. I do not know of any Senator who has worked more zealously or has done more to bring to the attention of the people of the country the dangers inherent in these so-called civil-rights bills. Actually, they are not civil-rights bills; instead, they are so-called civil-rights bills.

Mr. President, the civil rights of the people of the United States are set forth in the Constitution of the United States. The right of trial by jury is to be found in the original Constitution, in article 3, section 2, and in the amendments to the Constitution.

I am very proud that the Senator from Virginia has on this occasion brought his excellent analysis to the attention of the United States Senate.

Mr. ROBERTSON. Mr. President, my distinguished colleague, the Senator from South Carolina, has praised me beyond my desserts; but I appreciate very much his kind words.

Mr. President, I yield the floor.

UNITED STATES-MEXICAN AIR SERVICE

Mr. LONG. Mr. President, recently, Mr. Drew Pearson, on his radio program and in his syndicated column, attributed to me certain statements with regard to the recent recommendation of a Civil Aeronautics Board examiner that Eastern Air Lines be denied the right to operate nonstop service between the New York, Washington, and Mexico City terminals of their certificated route, and that these rights should be granted, instead, to Pan American World Airways.

Pan American World Airways apparently feels very sensitive about the matter, because this world-girdling corporation immediately went to the trouble of issuing a special blue brochure defending its position and attacking the statements attributed to me, without ever taking the trouble to inquire whether those statements represented my views.

I did not make the statement, attributed to me, that the award of these rights to Pan American World Airways was the "most inconceivable example of malfunction in Government" that I had ever seen. I have perhaps seen worse examples of malfunction in Government. What the Civil Aeronautics Board's examiner recommended that this Government do for Pan American World Airways in this case, however, cannot be justified by any logic or language.

Mr. President, the issue involved is greater than that of justice for the people of New Orleans and the State of Louisiana. The record in this case demonstrates how the people of my State and 10 other sovereign States have been deliberately denied their rights and privileges for 11 long years, in order that Pan American World Airways could enjoy an unfair monopolistic advantage in international air traffic. It illustrates the tremendous power this global corporation exercises within our Government and on our relations with the other nations of the world, on whose friendship and cooperation we greatly rely in our plans for peace.

Of all of the regions of the United States, the section which, historically, has been most seriously handicapped by lack of adequate transportation for the development of trade and closer relations with our neighboring Republic of Mexico, is the area from the Atlantic seaboard through the Southeast to Mexico. In the 12 States which comprise this area are concentrated the bulk of our country's industry and population.

Some 23 years ago, to provide this area with the benefits of modern air transportation, Eastern Air Lines pioneered the direct air route from New York and New England, through the key cities of the South, to New Orleans. Because at that time there were no aircraft capable of providing passenger service across the open Gulf of Mexico, this New York-New Orleans route was extended around the gulf to the Mexican border. There, however, after carrying their passengers some 2,000 miles from New York, Eastern was forced, because of Pan American's original monopoly, to turn them over to that carrier at Brownsville, Tex., for the final four-hundred-odd-mile stage of the through flight from New York.

In 1946, when aircraft capable of flying across the Gulf of Mexico became available, the Civil Aeronautics Board issued to Eastern Air Lines authority to extend its service from New Orleans, thus completing the direct route from New York to Mexico City. The purpose and intent of the Civil Aeronautics Board and the White House are clearly spelled out in that 1946 order of the Board and in Eastern's certificate.

On pages 883 and 884, the decision of the Board stated:

> Eastern's service from New Orleans to Mexico City will serve the eastern seaboard.
>
> As has been indicated, the primary benefit which will accrue from this (Eastern) route is the establishment of a direct service between Mexico City and the East.

In the pattern of air service determined by the Civil Aeronautics Board and the President as required to serve the public need for improved transportation between various sections of the United States and points in Latin America, the United States certificated three airlines, each authorized to provide service to Mexico from specified areas in the United States. They were Eastern Air Lines, from the Northeast to Mexico City, on the direct New York-New Orleans-Mexico City route; American Airlines, from the central sections of the United States, through Dallas and Fort Worth; and Western Air Lines, from the Pacific coast area through Los Angeles. At the same time, this Government confirmed three exclusive routes for Pan American World Airways: one from Miami to Merida, in Yucatan; the second, from New Orleans to Merida, and beyond to Central America; and a third route which would extend their original service from the border northward to Houston, Tex.

For the next 11 years no other routes but those of Pan American and American Airlines were put into operation. For year after frustrating year, first one obstacle, then another, was placed in the path of Eastern Air Lines and the other carriers which had been commissioned by the United States Government to extend their services to Mexico City in 1946. Frequently, it appeared that the stumbling blocks were raised in Washington. Just as frequently, it appeared that the obstructions arose in Mexico City. In every case it seemed quite clear that behind-the-scenes influences were operating to make it impossible for any other carriers, except American and Pan American, to operate into Mexico.

After 6 years of futile bilateral negotiations the Government of Mexico granted Eastern Air Lines a permit to extend their service from New York and New Orleans to Mexico City. Eastern then had the formal authority of both the United States and Mexico to institute the long-delayed service. But the forces which had been successful in preventing bilateral agreement again prevailed, and the authority for Eastern's operations was stated to be withdrawn. This irregular stratagem continued effectively to block the implementation of this service.

Two years later, in 1954, the Civil Aeronautics Board granted a foreign-flag carrier, Air France, authority to operate nonstop service between the New York and Mexico City terminals of the Eastern route. The intent and purpose of the authorization to Air France, of course, was to permit that carrier to serve the traffic moving between Mexico and France. Because our Government had held up the implementation of Eastern's New York-Mexico City certificate, however, we were confronted with an embarrassing spectacle. We were forcing United States citizens to use the service of a foreign-flag carrier in order to move expeditiously between New York and Mexico City.

In what they described as a "national emergency," the State Department and the Civil Aeronautics Board, meeting behind closed doors in a confidential session, arrived at a decision to call upon

American Airlines to save the United States flag. Lacking the overall bilateral agreement with Mexico, and while the hands of Eastern Air Lines were tied, the Board called upon American Airlines to provide through service from New York to Mexico City.

The United States courts did not look with favor upon the Civil Aeronautics Board's methods in this instance, and a stay against the Board's order was issued. Mexico took a similarly dim view of the plan, and refused to grant American Airlines the necessary permit. In the meantime, 90 percent of the traffic between the New York and Mexico City terminals of Eastern's route was being, and still is being, carried by Air France.

Two years ago the importance of adequate American-Mexican air service to the two governments was mutually recognized, and at the meeting between the heads of state during the conference at White Sulphur Springs a year ago, it was agreed that a fair and equitable exchange of air-route permits would be agreed upon to provide for an intensive development of trade and tourism between the two republics. It was through the recognition of the importance of this objective to the foreign relations of both countries, as well as for the benefits of the peoples of the United States and Mexico, that the present provisional air agreement between the two countries was successfully concluded.

On March 6, 1957, an agreement was signed. Within 24 hours, the President of the United States reconfirmed the validity of the certificate issued to Eastern Air Lines in 1946 between New York and Mexico City, and urged that these services be made—the word he used was "immediately"—available.

High hopes were inspired by the conclusion of the agreements and the prompt action of the President in confirming the 1946 service authorization. We were given every reason to believe that these long-delayed services would be made available as soon as the new bilateral agreement went into effect on June 5.

Senators can readily appreciate our deepening disappointment while the necessary intergovernmental permits, provided for in the bilateral agreement for the extension of the route from New Orleans to Mexico City, are still not issued.

The key to the whole situation seems to be the processing of applications for authority to operate the nonstop services between the New York, Washington, and Mexico City terminals of that 1946 New York-Mexico City air route. This situation itself came into true focus when an examiner for the Civil Aeronautics Board recommended that the nonstop service between the New York, Washington, and Mexico City terminals of Eastern's certificated route be granted, not to Eastern Air Lines but to Pan American World Airways.

This recommendation, as I have said, cannot be justified by any logic or any language. It cannot be harmonized with either the intent or the provisions of the Civil Aeronautics Act.

I invite Senators' consideration of the lengths to which the examiner has gone in order to find justification for his recommendation to deny Eastern Air Lines nonstop rights and to grant them instead to Pan American World Airways. In the light of the past history of the whole matter, I have read the formal briefs of both parties in the case and have read and reread the examiner's opinion. I can find no conceivable justification that can be offered for such a decision as the examiner recommends that the Board submit for the approval of the President of the United States.

Without burdening Senators with the details, let me cite these four salient points:

First. In innumerable instances the Board and the examiner emphasize that the issues in this case are concerned only with the service between New York and Mexico City.

Second. The bilateral agreement between the United States and Mexico specifically limits the authorization to service between New York and Mexico City.

Third. The understanding reached between the President of the United States and the President of Mexico was that the agreement would be devoted to the intensive development of trade and tourism between the two Republics.

Fourth. The certificate issued to Eastern Air Lines, and the order of the Civil Aeronautics Board in connection therewith, specifically authorize Eastern Air Lines to provide service between New York and Mexico City.

Nevertheless, Mr. President, the examiner for the Civil Aeronautics Board recommends that Pan American World Airways be given the right to use the New York and Mexico City terminals of this main route. This is not to serve the needs of the people of the United States, but to enable that operator to seize on another global air route, an air route from Mexico City to Europe, on which this Nation has no rightful claim.

Pan American World Airways says, and the examiner agrees, it is vital that the United States recapture this tremendous flow of traffic now carried by Air France, if it is to maintain its dominant position across the Atlantic and on the global airways. Just what is this tremendous traffic?

The traffic between Mexico City and Europe, this traffic which Pan American says, and the examiner agrees, it can recapture for the United States, amounts to exactly 1½ passengers per flight per day in each direction between Mexico and Europe.

Mind you, Mr. President, Air France is already flying over this route 2 flights daily with planes carrying more than 70 passengers each to serve these 13 passengers per day. Does that appeal to Senators as a reason for the decision the examiner has recommended to the Board and to the President?

The 50 million citizens of 12 States have a serious interest in this matter. Everyone realizes that the costs of selling tickets for short flights is just as great as that for long flights. The cost of handling baggage is the same. Other administrative costs are similar. Yet long flights bring much higher prices. Consequently the long-range flights tend to be the more profitable for an airline. Profits thus generated tend to reduce the administrative costs, particularly when considered on a passenger-mile basis. It also makes possible a better balanced, better planned schedule. It means better equipment and better service for the money.

Furthermore, the fact that an airline providing the milk-run local services is permitted to carry some of the cream has other advantages to the intermediate points. For New Orleans, it means that Eastern should and could encourage New York to Mexico tourists to visit New Orleans at no added cost as a part of the return trip, thus helping New Orleans to share more fully in the benefits of mutually advantageous American-Mexican tourist business.

Pan American World Airways is demanding, and the Examiner for the Civil Aeronautics Board agrees, that they should have a right to overfly 11 States on the domestic route certificated to Eastern Air Lines. This would deprive citizens of these States the full measure of service to which they are rightfully entitled, in order to carry a small amount of traffic to which neither this country nor that carrier is entitled under the bilaterial agreement with Mexico. In addition, the traffic could only be carried by Pan American at the expense of our country's good relations with Mexico and at a considerable cost to the American taxpayer.

Nowhere in the many pages of Pan American's legal briefs to the Board do they, at any time even suggest that they would provide this service without calling on the American taxpayers to provide additional millions for subsidy, for a service which could not, in any way, benefit the American people.

On the other hand, the examiner appears to be properly impressed with Pan American's threat that if this Government does not give them the route they want, it is going to cost the American taxpayer another $500,000 a year in subsidy.

Let me touch on this subject of subsidy for a moment. Pan American World Airways has received more money from the United States Treasury in subsidies than all other United States airlines combined. The Civil Aeronautics Board in the pursuit of its responsibilities does not know, nor does any other agency of this Government know, the actual amount of money Pan American has obtained from the United States Treasury.

In the almost 30 years of its existence, Pan American has never yet had to make a detailed accounting of the money it has received. The best estimate that can be made is that Pan American World Airways has drawn from the American taxpayer, in subsidies and in the form of other revenues from the United States Government, an amount in excess of $750 million.

Contrast this, if Senators will, and as obviously the examiner did not, with the fact that Eastern Airlines was the first scheduled airline to stop requesting Government subsidy. It has not been subsidized for the past 10 years and it commits itself unreservedly to provide this nonstop service without asking for

a penny. In fact, it promises to reduce fares.

This is a matter of importance to our foreign relations, to use the term employed by the President of the United States, in urging the Civil Aeronautics Board to take prompt advantage of the hard-won agreement with Mexico. As I have previously stated, the agreement itself and the underlying and motivating understanding was that the agreement would be used to provide for the most intensive possible development of trade and travel between our two Republics.

There have been long years of distrust and the lack of confidence in dealing with us on aeronautical matters, which the Mexican Government had to overcome in order to enter into this present agreement. The Mexicans were assured that, if they would sign, they would be dealt with fairly and equitably. In the somewhat limited terms which could be included in the formal document itself and in the gentlemen's agreement accompanying it, the Mexican people were assured that we would work out our neighborly destinies in aviation matters in the true spirit of fairness and equity which is due between such close neighbors.

It is important to realize that this agreement, in the first place, is provisional only and is limited to 2 years. Mexico insisted on this 2-year limitation to give the United States a full opportunity to prove its friendship and its proffer of partnership in the development of the mutually vital air services to serve the best interests of the two Republics.

The use of this provisional agreement by Pan American to operate an airline, not devoted to the interests of both countries, but designed for Pan American's global ambitions, would be a violation of both the spirit and the letter of that agreement. That this Government would be a party to such a breach of faith is unthinkable.

Traffic between Mexico and Europe is the concern not of the United States, but of Mexico and of the European countries. Mexico has the hope of one day carrying its own flag proudly across the Atlantic and around the world. But Mexico realizes that its aviation must walk before it runs. It needs time to develop the experience and the resources with which to enter this highly competitive field of foreign operations.

No one needs to be an expert in international negotiations to appreciate what harm can be done to Mexico if the examiner's recommendation is accepted by the Board and the President. To give a powerful and richly subsidized operator, Pan American World Airways, with all of the wealth, the resources and control of equipment and supplies and innumerable other details, a 2-year head start on the route between Mexico's capital city and Europe, would leave little room for the Mexican-flag airline to later gain a foothold on a route which properly belongs to them and not to us.

When the time comes for Mexico to negotiate for its own reciprocal rights in Europe, Pan American's prior seizure of Mexico's traffic with Europe would leave little with which Mexico could bargain in negotiating with the European countries principally involved.

In all of its aeronautical dealings with every other country in the world, this Government has inflexibly insisted that neither this Nation, nor any other nation, could usurp such air rights to such traffic. The Congress, itself, made this the firm policy of the Government when it provided, in section I of the Civil Aeronautics Act, that the air commerce which our civil aviation was to serve was that commerce "with the United States, or its Territories and possessions, and between the United States, its Territories and possessions, and points outside thereof."

In section II of that same Civil Aeronautics Act, the Congress expressly stated that the authority of the Board extended only to the encouragement and development of an air-transportation system for the needs of the foreign and domestic commerce of the United States. This proposal to deny a United States certificated carrier of its rights to a route, established in accordance with the specific requirements of this act, in favor of a global air carrier whose purpose is to serve largely unrelated traffic between Mexico and Europe, cannot be reconciled with the law of this land.

Furthermore, in section 1102, the Congress directed the Civil Aeronautics Board to act "consistently with any obligation assumed by the United States in any agreement" with any other country. Certainly, the obligations assumed by the United States under the agreement with Mexico are clear and unequivocal. Yet, in the case of our closest neighbor on the south, the examiner for the Civil Aeronautics Board would have us ignore this policy and violate the law to favor Pan American World Airways with another global air route and another key to the United States Treasury.

For this Government to be a party to an attempt by Pan American World Airways to grasp a 2-year head start, in order to dominate Mexico's own traffic to Europe, would be a colossal blunder. It could mean that by this demonstration of our lack of good-faith compliance, our agreement with Mexico might not be renewed in June 1959 when the current accord expires.

Even more serious is the fact that an attempt by the Civil Aeronautics Board to give this route to Pan American could mean that even the present agreement might never go into effect.

Having discussed this matter with responsible persons in the State Department whose duty it is to advise on these matters, I am free to say that it is their opinion that if Pan American or any other American airline is given the New York-Mexico City route for the reasons stated in the examiner's decision, it will constitute a direct violation of the bilateral agreement. This could well mean that the Mexican Government may very well refuse to permit the agreement to be implemented.

The operating permits which, under the agreement, each Government is obligated to issue, have not yet been forthcoming from the Government of Mexico. Normally, the State Department advises me, a period of 30 days is sufficient to complete the necessary technicalities and the intergovernmental formalities involved in such an international agreement. Ninety days have already passed since the agreement was signed. The permits have not yet been forthcoming.

That is only one side of the coin. The other is the obvious fact, which Pan American has demonstrated over the past 11 years, that so long as our Government could be induced to insist upon a bilateral agreement before air routes would be authorized, only Pan American World Airways could operate any United States service to Mexico with the one exception of American Airlines' inland route from Dallas and Fort Worth. In other words, the status quo would favor Pan American and its Mexician subsidiaries, CMA and Aeronaves.

Now, after 11 years of maintaining this one-sided status quo, can we be sure that even now we have all of the facts on the record? Can any of us be sure that Pan American's efforts are not, even now, aimed primarily at again frustrating rather than implementing air traffic by competing carriers from the United States to Mexico? Can we be sure, Mr. President, that such a perverted use of this hard-won agreement would not force Mexico to refuse to permit it to go into effect? Can we be sure that this is not the real purpose behind Pan American's demands—to break up this bilateral agreement and force both Mexico and the United States to revert to the status quo under which Pan American's monopoly is maintained and all threat of unsubsidized competition is barred?

I urge the interested Members of the Congress, the Civil Aeronautics Board, and the President to most carefully consider all of the facts before rendering a decision which could have seriously harmful effects upon our relations with our good and friendly neighbor to the south.

Mr. President, there is another point which bears directly upon the question of those facts. For 11 years, 50 million citizens of the United States have been deprived of urgently needed air transportation services due to our Government's failure to arrive at a satisfactory agreement for an exchange of air route permits with the Government of Mexico.

Repeated charges have been made by some of the highest and most honorable servants of our Government that the failure of our Government to implement these services has been due to the willful and deliberate interference of Pan American World Airways, either directly, through its controlled subsidiaries or by both methods to prevent the United States from carrying out its policy and purposes.

Evidence on this subject is contained in reports and documents in the files of the State Department and of the Civil Aeronautics Board, protected under the label of "secret." The records of this present nonstop case have been held open for more than 2 years because of these secret documents. And after 2 years of pleading, the examiner for the Civil Aeronautics Board finally agreed

to permit legal representatives of the interested parties a restricted view of these documents under pledge of secrecy which prohibited them from in any way revealing their contents.

I was, therefore, surprised to read the conclusion of the examiner in this case, presumably reached after study of those documents, that neither Pan American World Airways nor any of its representatives at any time interfered with this Government's efforts to implement the 1946 certification of Eastern Air Lines. Having also reviewed these documents personally, I am strongly drawn to the opposite conclusion.

Under the peculiar circumstances surrounding this case, Mr. President, the examiner has placed himself in an impossible position. If the examiner's conclusion is in accordance with the facts contained in those documents, then secrecy is no longer needed.

If the examiner is right, then this Government owes it to Pan American World Airways to make these documents available so that the public, impartial and unbiased, can render its own judgment. If the public confirms the conclusion of the examiner, then this Government owes Pan American World Airways a clean bill of health.

Quite the contrary, the whole picture continues to suggest a long period of seeking improper advantage. For that reason, I have felt compelled to make my views on this matter known in the hope that they may in some measure contribute to a proper and just solution of this problem.

Admittedly the secret files do not prove that Pan American is guilty of the charges of improper methods. Yet they offer a good starting point for anyone who wanted to prove such charges, and they reflect the opinion of honorable and responsible men who have no ax to grind to the effect that such charges are true.

However, the point is not so much that improper influence has been used as the fact that there is no good reason why Pan American should have the route in question as compared with Eastern Airlines. While there is in fact compelling reason that Pan American should not have it, there is every reason of justice, fairness, equity, and every possible precedent to support an award of the New York-Mexico City route to Eastern Airlines.

If Pan American is given the right to fly nonstop between New York, Washington, and Mexico, thus overflying Eastern Airlines' route, it will be the first time that the CAB has given nonstop rights to another carrier before the local service carrier has been authorized to fly nonstop between the terminal points on its own route. It should require compelling and valid reasons to break the precedent which has been established in this regard. There is no such justification in this case.

It is manifestly fair to grant the first nonstop privileges to the carrier which has to provide service on intermediate points. If traffic develops which will justify certifying an additional carrier, I am wholly in accord with the practice of the CAB in certifying an additional carrier or carriers. In fact, I have always favored the maximum amount of competition between airlines when circumstances would permit, and I have no favorites among the airlines in this respect.

Only recently I strongly advocated that Delta Airlines be authorized to compete with Eastern Airlines on its New Orleans to New England routes, which was vigorously fought by Eastern. If future traffic between New York, Washington and Mexico City should make it possible to provide for an additional carrier to provide additional service, I would have no personal objections to this certification being given to any other American air carrier provided, of course, it was agreed that no increase in their subsidy would result from their operation of this route.

It should be noted that there will be three carriers competing for this traffic in the very near future. Air France is already flying the route and there will be a Mexican carrier named by the Mexican Government very soon. It cannot be expected that traffic will be sufficient to justify a fourth airline for some time to come. If Eastern Airlines is not authorized to operate nonstop service at the present time, therefore, the injury to that airline may well be of long duration.

Pan American World Airways, in its blue brochure attacking my views, infers that a Senator from Louisiana has no legitimate interest in this matter. I have already given several reasons why Pan American is wrong in making that suggestion; and there is another.

We who serve in the Congress must remember that the CAB is a creature of the Congress. Congress, having created the CAB, and having delegated lawmaking powers to that board, has the duty constantly to observe its functioning.

As a Member of the Congress, I deem it my duty to speak out when I believe that improper action or injustice is afoot in any regulatory agency of this Government. I shall do so as long as I serve in this body.

Mr. ELLENDER. Mr. President, I, too, have been singled out for special attention by Pan American World Airways. My name and an alleged report of my activities as a member of this body, and in connection with my obligations to the people of my State, were featured in the remarkable literary treatise, the blue brochure, to which my distinguished colleague [Mr. LONG] has referred. I may also say that I have had other attentions conferred upon me by this great global corporation, particularly within the past week or so. Were I susceptible to pressure, I would certainly have been blown to bits by this time. However, I have, obviously, so far survived.

As many Senators so well know and, particularly, as do my colleagues from other States whose people have been so unjustly deprived of rights and benefits by the denial of this air service for the past 11 years, I have periodically brought to the attention of this body, and of the White House, reports on the progress, or rather lack of progress, in implementing the orders of this Government with respect to the air service between New York, New Orleans, and Mexico City—service which the Civil Aeronautics Board and the White House authorized Eastern Airlines to provide in 1946.

Through all these years, I have, occasionally, also voiced my growing concern over the repeated and demonstrated inability of our Civil Aeronautics Board or the State Department to control the activities of Pan American World Airways, even when their activities were clearly recognized by all concerned to be subversive to the clear policy and purpose of the Government of the United States.

The issue of whether or not the forces capable of being generated by this global corporation are to be permitted to continue to deprive our citizens in the northeast and the southeast of the urgently needed transportation facilities which this Government promised, but failed to produce for 11 years, is a matter of considerable concern to all of us.

However, the present case pending before the Civil Aeronautics Board and upon which the President of the United States will shortly be required to render judgment, becomes of much greater importance to this Government and to the American people than the matter of the air services involved and the question of which carrier shall operate them.

This importance is magnified because the case of the air services between New York, New Orleans, and Mexico City illustrates, perhaps more graphically than any similar issue with which the Civil Aeronautics Board and our Government have been confronted, the manner in which Pan American World Airways, has been able to use the power it has amassed from 30 years of largesse from the Public Treasury, to dictate its own terms on aeronautical matters.

The economics of this case, the historical precedents and the law itself, are abundantly clear in pointing to the only decision which can be made in accordance with the rights of our citizens, the provisions of the law and the policies of the United States.

My distinguished colleague has presented an excellent brief on this subject. I wish, however, to elaborate upon only one phase of this remarkable situation. In his recommendation to the Civil Aeronautics Board, a trial examiner included another incredible opinion, that Pan American World Airways, or its representatives were not guilty of obstructing the implementation of the 1946 orders of the Civil Aeronautics Board.

Now, the reasons for the repeated failure of the Government of the United States to arrive at a satisfactory bilateral agreement with Mexico are well known both to our Government and to the Government of Mexico. The records locked in the so-called secret files of the Civil Aeronautics Board and the State Department and which have, from time to time over the years, been made available for the confidential information of interested members of committees of the Congress, contain incontrovertible proof that the repeated failure of this Government in its negotiations with Mexico

was due to the willful and calculated obstructions placed in the way of this Government's negotiators by Pan American World Airways.

Eastern Air Lines brought formal charges that Pan American World Airways had deliberately obstructed the implementation of the air service between New York, New Orleans, and Mexico City which this Government certificated Eastern Air Lines, in 1946, to operate.

Yet time after time, on one pretext or another—or none at all—requests that the accusing documents be made a matter of record in this case, were repeatedly refused.

This very case has been held open for nearly 2½ years to give the Board and the State Department time to consider whether and how they can handle this "hot potato" of the "secret" documents.

Once the bilateral agreement was signed, there appeared to be a clear desire on the part of Pan American to use that treaty for their own advantage. The Civil Aeronautics Board moved with alacrity to clear up this matter of the New York-Mexico City nonstop. To do so, the Examiner had to do something with the secret papers which, at repeated urging, the Civil Aeronautics Board had collected. The Board decided that legal counsel of the airlines concerned could read certain excerpts bearing on the question of Pan American's guilt, but only on the condition that they would take an oath of secrecy not to use any of the material contained in those documents, except within the restrictions of the Board. Under no circumstances could any of the information be made available to the public.

These documents contain an abundance of evidence pointing to behind-the-scenes manipulations by Pan American—actions which were the motivating factor if not the absolute cause of successive breakdowns in negotiations concerning this much-needed service.

Yet, despite the weight of evidence to the contrary, the Examiner reached the amazing conclusion that Pan American World Airways was innocent of the serious charges launched against them.

Mr. President, the contents of those documents, which are known to me, categorically deny any conclusion that Pan American's hands were clean.

However, as an illustration of Pan American World Airways' methods, they have seized upon this questionable conclusion of the Trial Examiner to prejudice the press and other interests on their behalf on the matter of the New York-Mexico City nonstop service.

As only one example of these methods, for instance, a newspaper in New Orleans, in an editorial prominently featured in Pan American's brief to the Civil Aeronautics Board, has criticized me for having raised the question of Pan American's guilt and has challenged me to produce the evidence which would show Pan American's implication in the process of obstructing this Government's implementation of the 1946 air services authorized for New Orleans.

This challenge was promoted by those who knew full well that so long as the Civil Aeronautics Board was kept from making these documents public, I would be left without the means of answering the charges through my inability to publicly produce the documents which contain the true facts of the case.

Members of the Senate have, on many occasions in the past, raised serious questions on the type of information which various governmental agencies shield under the label of "secret." The example, in this case involving Pan American World Airways, shows to what ridiculous limits this sometimes arbitrary policy can be stretched.

I submit, Mr. President, that the Civil Aeronautics Board has an obligation to the Members of this Chamber and to the American people, to make these records public, and I have formally called upon the Chairman of the Civil Aeronautics Board to make these documents available.

If the Board's examiner is correct in his conclusion that these documents do not reveal Pan American's guilt then, certainly, there can be no reason for any longer concealing them.

If they do, as I maintain, document the activities of Pan American in thwarting for over a decade the air service my State needs, and deserves, then they should be made public as a matter of vital public interest.

From my past knowledge of the history of such matters, I can anticipate that the answer will be that these documents cannot be made public because of the injurious effect they could have upon the foreign relations of the Government of the United States.

This is the time-worn shield behind which Pan American World Airways has hid for more than 30 years—on every occasion when a question of their irregular activities has ever been raised. Probably, the best thing we could do for our foreign relations with Mexico in this matter would be to bring those documents into the light, to let the American people, in their impartial and unbiased judgment, rule on the question. If guilt is proved, then let us use the process of our democratic constitution and law to insure that justice shall be done. Such action, actually, is expected of us, not only in Mexico, but in every other country in the world in which we preach the high morals and integrity of our democratic process of Government.

In this particular case, the true story of what has happened to the United States Government's efforts to reach a bilateral agreement with Mexico over the past 11 years is far better known in Mexico City than it is in Washington.

The Mexican people, on many occasions in the past, have questioned why this Government condones such activities on the part of Pan American World Airways—why our Government, which so powerfully preaches morality in all other things, permits such activities to continue, as a weak father excuses and condones the deliberate and willful acts of a spoiled and irresponsible child.

Mr. President, as I have said, I have made a formal request to the Civil Aeronautics Board to produce those documents for the open record. They are an essential and controlling element of the case which the Civil Aeronautics Board must shortly present to the President of the United States. The President cannot conceivably make a proper decision in this matter unless he has all of the facts available, and particularly the contents of these carefully hidden reports of officials and representatives of this Government who charged that they were blocked in their efforts to perform their assigned duty to the United States, by the willful interference of Pan American World Airways. Unless those documents are brought out into the open and made available to the public, I have the most serious doubts that they will, in full and unexpurgated form, ever reach the desk of the President.

Mr. LONG. Mr. President, will my colleague yield?

Mr. ELLENDER. I yield.

Mr. LONG. My colleague undoubtedly knows that Pan American World Airways owns 21 percent of the stock of Aeronaves and 42 percent of the stock of CMA, the two major Mexican airlines. Therefore, Pan American World Airways, if it cares to do so, is in a position at all times to use its influence behind the scenes, not necessarily through Americans, but through Mexicans who are associated with Pan American because of Pan American's major stock ownership in those two corporations.

Mr. ELLENDER. The Senator is correct. I wish to make this further point, that Pan American might be competing with itself if perchance these same companies were competing with Pan American between New York and Mexico City.

Mr. LONG. That is correct.

Mr. ELLENDER. That is entirely possible.

Mr. President, I ask unanimous consent to have printed in the RECORD, as a part of my remarks, a copy of a letter dated May 20, 1957, written by me to James R. Durfee, Chairman of the Civil Aeronautics Board, and his reply to me, dated May 29, 1957, in response to my letter.

There being no objection, the correspondence was ordered to be printed in the RECORD, as follows:

CIVIL AERONAUTICS BOARD,
Washington, D. C., May 29, 1957.

Hon. ALLEN J. ELLENDER,
Chairman, Committee on Agriculture and Forestry, United States Senate, Washington, D. C.

DEAR SENATOR ELLENDER: This will acknowledge receipt of your letter of May 20, 1957, requesting that the Board make available to the public the documents contained in the confidential portions of the record in the New York-Mexico City nonstop case, docket No. 2909 et al., which is presently pending before the Board.

The confidential portions of the record are directed to the issue of whether any of the applicants in the Board proceeding have in the past improperly obstructed or improperly interfered with prior United States-Mexico negotiations looking toward the conclusion of a bilateral air transport agreement. The particular material furnished for the record came from the files of both the Board and the Department of State, most of the information contained therein is classified and, although taken from the files of two separate agencies, is substantially intertwined in factual content. In determining what particular information could be furnished for the record, it was the responsibility of the Board and the De-

partment of State under Executive Order No. 10501 to determine the extent to which classified information originating with each agency could be declassified. As indicated in Board Order No. E-11109, dated March 11, 1957, the Board and the Department of State concluded that the material furnished should be declassified only for the purpose of this proceeding, and under the restrictions noted in the Board's order.

Thus, as you are aware, the documents to which you refer are not presently public information. The Board will, however, give consideration to your request and, in this connection, we are also asking the Department of State whether material in the confidential record which originated with the Department can now be publicly released. The Board will advise you further as soon as possible after the Board and the Department have reached a decision in the matter.

For your information there are enclosed copies of (1) Order No. E-9030, dated March 22, 1955, pursuant to which the information was furnished for the record; and (2) Order No. E-11109, dated March 11, 1957, describing the nature of the information and the present restrictions on its use.

Sincerely yours,

JAMES R. DUFREE,
Chairman.

MAY 20, 1957.

Hon. JAMES R. DURFEE,
Chairman, Civil Aeronautics Board,
Department of Commerce Building,
Washington, D. C.

MY DEAR MR. CHAIRMAN: As you know, I have had an active and long-standing interest in securing proper implementation of the air transportation services which the Civil Aeronautics Board and the President of the United States, in 1946, authorized Eastern Air Lines to extend to our neighboring Republic of Mexico.

Recently, several instances of criticism of the position I have held and misleading statements to the press and in other quarters bearing on the fitness and qualifications of Pan American World Airways with respect to the New York-Washington-Mexico City aspects of this case have been brought to my attention.

Specifically, this criticism and these statements stem from quotation, by representatives of Pan American World Airways, of the conclusion by the Board's trial examiner that "Pan American World Airways and/or representatives of that carrier did not, at any time, improperly obstruct and interfere with the implementation of the United States air route program established in the Latin American decision of 1946."

My knowledge of the contents of certain classified documents from the Civil Aeronautics Board's files which have been, from time to time, produced for the confidential information of members of the committees of the United States Senate, and which are the same documents on which the examiner was required to base his judgment, support quite a contrary conclusion.

If the examiner's opinion, as it is being quoted by representatives of Pan American World Airways in the public press and elsewhere, is in harmony with the facts contained in those classified documents, then certainly no possible harm can result from making those documents a matter of public record.

In a matter of such importance to the national aeronautical interests of the United States and to the future relations of this country with our good neighbor, Mexico, I am sure you agree that the people of the United States, whose welfare is not directly affected, and the President of the United States, upon whom rests responsibility for the final decision in this matter, are entitled to have those facts brought out into the open, so that the record may be completely clear.

Therefore, because of the grave implications involved in this case and since the Board's trial examiner has now given his opinion that Pan American World Airways is not guilty of the serious charges made, it is urgently requested that the Board make these classified documents promptly available to the public and before a final decision is rendered in this case.

Respectfully submitted.

ALLEN J. ELLENDER,
United States Senator.

Mr. LONG. Mr. President, will my colleague yield?

Mr. ELLENDER. I yield.

Mr. LONG. I quite agree with my colleague that before the President and the Board finally decide upon the matter, both the Board and the President should take a look at these documents, which can easily be separated from the bulk of the file. They reflect the views of those who returned unsuccessfully from Mexico after trying to negotiate a bilateral arrangement for better air service for the citizens of the two countries, and who expressed their opinions as to why they were unsuccessful, during 11 years, in obtaining better air service for the people of this Nation and the people of Mexico.

Mr. ELLENDER. I think the documents will speak for themselves. That is why I am anxious that they be made public and particularly that they be placed in the hands of the President, because I do not believe the President knows anything about them at the moment. I hope and pray that before he makes his decision, they will be brought to his attention, so that he may have all the facts.

Mr. LONG. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. FULBRIGHT. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

TRADE WITH RED CHINA

Mr. FULBRIGHT. Mr. President, a transcript of the President's press conference on June 5, 1957, as published on page 14 of the New York Times of June 6, 1957, contains the following statement:

With respect to the trade—

With Communist China—

there is a law on the books, I believe, preventing all shipments of American property to Red China. So long as that law is on the books, of course, that is that.

Later in his statement the President said:

Now, frankly, I am personally of the school that believes that trade, in the long run, cannot be stopped. You are going to have either just authorized trade or you are going to have clandestine trade. You can stop the shipments from here, that is the law, and that will be continued as long as it is on the books.

I submit, Mr. President, there must be some confusion about what the law is, because I know of no law which prohibits the shipment of American property to Red China in the broad sense in which the President's statement would indicate there is such a law. The Export Control Act of 1949 authorizes the President to prohibit or curtail exports from the United States. I emphasize: It merely authorizes the President; it does not direct or require the President to prohibit or curtail such exports. That law authorizes the President "to the extent necessary (a) to protect the domestic economy from the excessive drain of scarce materials and to reduce the inflationary impact of abnormal foreign demand; (b) to further the foreign policy of the United States and to aid in fulfilling its international responsibilities; and (c) to exercise the necessary vigilance over exports from the standpoint of their significance to the national security."

Under this law, an embargo was placed on all shipments from the United States to Communist China and Northern Korea immediately after the Chinese intervention in Korea in December 1950.

At the same time, financial transactions with Communist China were prohibited under the authority of the Trading With the Enemy Act, and American ships and planes were forbidden to go to Communist China or North Korea or to carry goods destined to those areas, whatever the origin of the goods, under the authority of the Defense Production Act of 1950.

All these actions were taken on the orders of President Truman, under the discretionary authority conferred on him by these acts. In no case did the act itself require that the action be taken.

Positive restrictions on trade with the entire Communist bloc are imposed by the Mutual Defense Assistance Control Act—sometimes called the Battle Act. However, these restrictions do not apply to shipments from the United States. Title I of the Battle Act requires the immediate termination of all military, economic, or financial assistance to any foreign nation which knowingly permits the shipment of war materials—"arms, ammunition, and implements of war, atomic energy materials, petroleum, transportation material of strategic value, and items of strategic significance used in the production of arms, ammunition and implements of war"—to the Soviet bloc, including Communist China. Title II of the Battle Act requires the termination of such assistance to any nation which does not cooperate in restricting shipments to the Soviet bloc, including Communist China, of materials not embargoed under title I but which should be controlled or restricted.

It would clearly be unreasonable to administer the Export Control Act and the other related statutes so as to permit shipment from the United States to Communist China or any other part of the Soviet bloc of war materials covered by title I of the Battle Act. In this sense, it can be said that the Battle Act restricts the President's discretion under the Export Control Act, even though the Battle Act does not directly apply to shipments from the United States.

In the case of materials not covered by title I of the Battle Act—they are the strategic materials—the President is not compelled by any statutory compulsion, however indirect, to maintain the embargo which has been imposed under the Export Control Act, the Trading With the Enemy Act, and the Defense Production Act.

I bring this to the attention of the Senate and of the country simply to clarify what I believe to be confusion in the mind of the Chief Executive as to his present powers. I think there is no law on the books requiring him to continue an embargo upon general trade with China, except as to strategic materials.

Mr. ANDERSON. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. ERVIN in the chair). Without objection, it is so ordered.

SPEECH BY BOBBY MORROW TO THE TEXAS STATE LEGISLATURE

Mr. YARBOROUGH. Mr. President, I ask unanimous consent to have printed in the RECORD a speech on Christian living, delivered to a joint session of the Texas Legislature by Bobby Morrow, the winner of three gold medals at the Olympic Games held last year in Australia.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

SPEECH BY BOBBY MORROW TO TEXAS STATE LEGISLATURE

Mr. President, Mr. Speaker, Mr. Bishop, and members of the joint session, I feel deeply honored by your invitation to speak briefly to you who provide the leadership for our great State.

As Texans, you share with thousands of others the reputation around the world of being the friendliest people in America.

I am sure that the Texas smiles and the Texas handshakes which Eddie Southern and I took with us to Melbourne, Australia, created more news stories than all of our running efforts combined.

Almost without exception, the foreign newsmen covering the Olympic games asked first about the big State of Texas and then asked us about the United States.

And let me say here that I sincerely appreciate the interest and consideration which the sportswriters, sportscasters, radio, and TV newsmen have taken in track and field activities. For it is through their efforts that the opinions of millions of people have been formed.

It was perhaps the greatest thrill of my life to represent Abilene Christian College and the people of Texas in the world's greatest sports event and to compete with so many fine athletes not only from America, but also from 67 other countries of the world.

Though marred in several instances by political differences, the games were characterized by the finest kind of wholesome competition and sportsmanship.

Regardless of natural origin, every Olympic athlete participated under the same set of rules.

I believe the greatest moment for me at the Olympic games occurred when I was privileged to take the No. 1 spot on the victory stand after the 100-meter competition.

I cannot describe the feeling, but I do remember that chills ran up and down my spine when I heard the Star Spangled Banner and saw Old Glory rise to the uppermost spot of the ceremonial stand.

At that moment, I thought of all the individuals who had helped me through the years to accomplish the victory which had just occurred.

I thought of my high school coach, Jake Watson, and the start which he gave me in track.

I remembered the words of my high school principal, Mr. Jim Barnes, who told me early in my track endeavors at San Benito that I would run in the 1956 Olympics. It sounded almost unbelievable to me then. But for the keen instruction and encouragement which I received from my ACC track coach, Oliver Jackson, especially in Melbourne, I would not have the three gold medals which were awarded me. I have said it before and I say it to all of you—Oliver Jackson is the greatest track coach in the world.

But uppermost in my mind was the deep sense of gratitude which I owe my Maker who gave me whatever natural ability I possess, along with a strong, healthy body.

Realizing that my body is the temple of God, I have always tried to keep it swept clean for Him.

For this belief and determined conviction, I pay tribute to my mother and father, who from my childhood have guided my feet in the way.

To my lovely wife, Jo Ann, who has inspired my every effort, and who is building a Christian home with me, I owe my all.

My decision to receive a Christian education came after I realized that I wanted more from college than book learning and track success.

Practically every member of our United States team came by my room at the Olympic Village to see the 71½-foot-long telegram signed by some 1,079 fellow students from Abilene Christian College.

After reading the sincere wishes of my fellow students, who supported me even when I was losing, many members of our team remarked, "I wish I could go to a school like that."

Upon our return to the United States, we received a heartwarming welcome home at Los Angeles, Abilene, and San Benito, and as I thrilled on these occasions, I thought to myself how fortunate we are to return to the land of the free.

I am proud to be a member of the church, a student at Abilene Christian College, and a citizen of the great State of Texas.

I sincerely believe that my greatest race, the Christian race, is the most important of them all and is yet to be won. Thank you.

AID TO CENTRAL AMERICAN AND SOUTH AMERICAN COUNTRIES

Mr. SMATHERS. Mr. President, the Senate Foreign Relations Committee is at the present time marking up the foreign-aid authorization bill. I am most hopeful that the committee will see fit to include in the bill the amendment I have submitted, which would increase aid to Central American and South American countries. That area of the world means a great deal to us politically, socially, and economically; but those countries feel that up to the present time we have not given them the attention which is their due.

I ask unanimous consent to have printed at this point in the RECORD, as a part of my remarks, an article entitled "Latins Hit United States Indifference," which was written by Edward Tomlinson, and was published in the Washington Daily News and also an article entitled "Importance of Pan Americanism," which incorporates a speech made by Mr. Marcos Kohly, who is the head of the Latin American department of the city of Miami Beach News Bureau.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Daily News of February 25, 1957]

LATINS HIT UNITED STATES INDIFFERENCE

(By Edward Tomlinson)

The usual smoldering impatience among Latin American politicians over what many of them feel is topflight official Washington's indifference to inter-American problems has increased lately, if the tone of Latin American newspapers is used as a gage.

They watch with no little envy what one outstanding South American publisher calls, "the procession of European political big wigs and neutralist, not to say antiwestern, potentates from Asia and the Middle East that marches on the North American capital to receive red-carpet treatment."

NO PERILOUS ISSUES

There is no general criticism of the ability of our professional diplomats. Thanks largely to them, there are no dangerous issues confronting us in Latin America at the moment.

Whatever we may thing about it, our neighbors cannot understand why friendly, free nations as big, rich, and populous as Mexico or Brazil, Venezuela or Chile, should not receive at least as much high official as well as public attention as the tiny, one-man kingdoms and principalities of Africa and the Middle East.

We have more investments in the 20 republics to the south than in all other parts of the world put together, Canada excepted.

FIGURES FINPOINTED

In World War II, 75 percent of all imported food products and 40 percent of strategic minerals and metals came from the other Americas.

Today 34 of the critical raw materials we are stockpiling come from these sources.

Our peacetime uses are proportionately as great.

Today competition for their commerce and economic resources is at a peak. Not only Western European nations and Japan, but Communist Russia and Red China are negotiating for South American markets.

Communist agents and propagandists are spending enormous sums of money to build up anti-United States feeling among labor unions, and to inflame students, small time politicians and extreme nationalists against us. They spare no effort to discredit United States investment and industrial enterprises from Mexico to Argentina, and simultaneously harp on Yankee neglect of Latin America.

Because of this situation, the Latins want to feel that the head men in our Government also have them very much on their minds. It is not only human for them to feel this way, but it is vital to us.

[From the Miami Springs (Fla.) Americas Daily of April 19, 1957]

IMPORTANCE OF PAN-AMERICANISM: LATIN AMERICANS BUY OVER 3 BILLION FROM UNITED STATES OF AMERICA—RESIDENTS AND VISITORS CONTRIBUTE OVER 89 MILLION TO DADE ECONOMY

Speaking to a PTA meeting of the Ada Merritt Junior High School, Mr. Marcos Kohly, head of the Latin American Depart-

ment of the City of Miami Beach News Bureau, stressed the great importance of United States trade with the Latin American countries, as well as the substantial economic contribution to Dade County made by the 90,000 residents of Latin American origin, Mr. Kohly said:

"We are gathered here tonight to observe the 67th annual Pan American Week to discuss its meaning and importance and to at the same time show to the neighboring sister republics of Latin America, that we have not forgotten them.

"Many of you are smiling at my last remark, and I wish to state quite frankly, that I have intentionally chosen those words, because unfortunately, ladies and gentlemen, the annual observance of this important week has become more or less a routine affair, that year in, year out, is carried out in the schools, civic and social clubs, the State, municipal, and local authorities, the press, radio, and TV.

"I am complaining about its routine observance; just as one hears the rain drops during a spring shower.

Pan Americanism is a living thing, of great importance to each and everyone of you, sitting here tonight. It affects you in more ways than you can imagine. Have you ever stopped to consider what it represents to the overall economy of this Nation and particularly to Florida, and south Florida?

"Let me put it this way: If the countries of Latin America were tomorrow to cut off importing from the United States the hundreds of commodities, semimanufactured and manufactured goods and foodstuffs, the results would be such a staggering blow to the economy of the United States that it would make the 1929 stock market crash to become inperceptible, every phase of human endeavor and enterprise in the United States would be directly affected, steel mills, heavy industry, railroads, and transportation, farmers and banks all would feel it and of course you too would be affected by it in your take-home moneys.

"When you stop to consider that Latin America accounted for a total of $4,771,000,000 in 1955 with sales of $4,946,000,000 you can realize its importance. In 1956, Latin America's trade with the United States amounted to $3,645,000,000 in imports from United States. Over 300 United States companies, branches, and subsidiaries are at present operating in Latin America with more than $9 billion invested.

"But let us not deal in these astronomical figures and look locally here at its importance:

"Over 90,000 persons of Latin American origin reside in Dade County and they contribute $89,760,000 to our local economy, in sales, purchases, taxes and investments here annually. If we were to take a conservative ratio figure of 5 persons that they know in their respective countries, we find that this is increased to 450,000 families that are conscious of Dade County and Miami (metropolitan).

"We here in Dade County feel justifiedly proud of the growth and development of our airport and its business, which has made it one of the Nation's top. Stop and consider that the greatest asset of same is its trade with Latin America. Consider also the great volume of passengers that pass through our airport to and from Latin America, the thousands of workers that are employed in and around aviation. Also the movement of trade among our growing industries, locally and from outside the State of Florida. Can we, therefore, treat Latin America as something routine? To do so would be committing suicide, at least economically.

"How can we remedy this? by preparing ourselves to truthfully making of Dade County and Greater Miami the gateway to Latin America, but this requires some effort by all of us. We must live and believe in pan-Americanism, not only once a year during Pan-American Week, but every one of the 365 days of the year.

"We are linked to Latin America, economically, historically, and socially, and there does exist a cultural phase to our everyday social life. The Spanish language is widely spoken locally and in other parts of the State. Our children are being taught the Spanish language in school in their elementary grades, thus preparing them for the immediate future, we must selfishly think of today as well as tomorrow for you and you, Mr. and Mrs. Floridians. Do you have an interest in Latin America, whether it is direct or indirect? More and more industries are being attracted to this market, not only for the climate and other facilities but also for Florida and Dade County's proximity to the Latin American market.

"Are we going to miss the golden opportunity which lies at our very feet, because we cannot see it? Other cities and communities that are thousands of miles away are doing their utmost to capture the Latin American market and trade, whilst we here in south Florida talk and play the Latin American theme song, but sit back and wait for the mountain to come to us, instead of going forward to seek it and retain it for ourselves and our posterity.

"Ladies and gentlemen, the responsibility lies upon our shoulders, we can and must accept the challenge, think of these words and talk them over with others and I am certain that we will very soon demand more action regarding them. If we are really desirous of being known as the 'gateway,' then let's start building it upon solid foundations of everyday practice."

ORDER FOR ADJOURNMENT FROM MONDAY TO 9:30 A. M. ON TUESDAY, JUNE 11, 1957

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that when the Senate concludes its deliberations on Monday, June 10, it stand in adjournment until 9:30 a. m. on Tuesday, June 11.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE PROGRAM—ADJOURNMENT TO MONDAY

Mr. JOHNSON of Texas. Mr. President, again I should like to remind all Senators that the Senate will meet early and sit late all next week, and I expect the Senate to be in session every day, if the Appropriations Committee adheres to its schedule, and reports on tomorrow and Monday the five bills on which it is scheduled to act.

Mr. President, I serve notice that, in accordance with the order which has been entered, following the session on Monday, the Senate will convene at 9: 30 a. m. on Tuesday, will have the morning hour, and then will proceed to the consideration of the District of Columbia appropriation bill, which will be followed by consideration of the Department of Agriculture appropriation bill, in the event that bill is reported—as planned—on tomorrow.

As soon as the mutual aid authorization bill comes from the committee, and also the atomic energy treaty and the other previously mentioned appropriation bills, they will be considered as priority measures.

I should also like to give notice of the possibility of holding late evening sessions, as well as a Saturday session, next week.

Mr. President, pursuant to the order previously entered, and in order that the committees may have Friday and Saturday in which to carry on their work, I now move that the Senate stand in adjournment until Monday, at noon.

The motion was agreed to; and (at 4 o'clock and 5 minutes p. m.) the Senate adjourned, the adjournment being, under the order previously entered, until Monday, June 10, 1957, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate June 6, 1957:

UNITED STATES DISTRICT JUDGE

Clifford O'Sullivan, of Michigan, to be United States district judge for the eastern district of Michigan vice Arthur A. Koscinski, retired.

UNITED STATES ATTORNEY

Lester Shields Parsons, Jr., of Virginia, to be United States attorney for the eastern district of Virginia for a term of 4 years. He is now serving in this office under an appointment which expires June 9, 1957.

UNITED STATES MARSHAL

Harry Jennings, of Michigan, to be United States marshal for the western district of Michigan for a term of 4 years. He is now serving in this office under an appointment which expires July 31, 1957.

COAST AND GEODETIC SURVEY

The following for permanent appointment to the grade indicated in the Coast and Geodetic Survey:

To be ensigns

Bernard R. Berson	John J. McCoy
John D. Daly	Sidney C. Miller
Roy W. Entz	Philip L. Rotondo
Robert W. Franklin	Loyd D. Thurman
Duane F. Georgeson	James N. White
Leon W. Heidebrecht	Bobby S. Woodruff
Wesley P. James	Ben Frank Worsham, III
Bobby W. Jester	
Vello Kiisk	

WITHDRAWAL

Executive nomination withdrawn from the Senate June 6, 1957:

POSTMASTER

William E. Barmore at Donalds, S. C.

HOUSE OF REPRESENTATIVES

THURSDAY, JUNE 6, 1957

The House met at 12 o'clock noon.

The Chaplain, Rev. Bernard Braskamp, D. D., offered the following prayer:

Almighty God, we call Thee Father for Thou art no respecter of persons. All are the children of Thy household and the sons and daughters of Thy love and care.

We thank Thee for our beloved country which affords men of every color and creed, tongue and tradition, the opportunity, the privilege, and the joy of living and laboring together in the spirit of mutual respect and mutual confidence.

Show us how, as fellow citizens, under the protection of the Stars and Stripes,

we may develop our capacities to live a happy and helpful life.

Grant that in seeking to find the righteous and just solution to the problems of human relationships may we always be charitable in our attitude toward all who may have differing convictions and points of view.

Help us to hasten the coming of that golden age of brotherhood when the strong shall bear the burdens of the weak and righteousness and peace shall cover the earth as the waters cover the sea.

Hear us in the name of the Prince of Peace. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. McBride, one of its clerks, announced that the Senate had passed without amendment bills of the House of the following titles:

H. R. 790. An act to amend the Legislative Appropriation Act, 1955, with reference to official office expenses of Members of Congress;

H. R. 2493. An act to authorize the Secretary of the Interior to permit the construction of a bridge and road across Chincoteague National Wildlife Refuge, and for other purposes;

H. R. 4136. An act to extend the period within which Export-Import Bank of Washington may make loans;

H. R. 5110. An act to amend the Federal Property and Administrative Services Act of 1949, as amended, and for other purposes; and

H. R. 7234. An act to fix the responsibilities of certifying officers and disbursing officer of the Library of Congress.

The message also announced that the Senate had passed bills and a concurrent resolution of the following titles, in which the concurrence of the House is requested:

S. 434. An act to provide for improved methods of stating budget estimates and estimates for deficiency and supplemental appropriations;

S. 695. An act providing for the revision and printing of a compilation of Federal laws relating to the regulation of carriers subject to the Interstate Commerce Act;

S. 806. An act to authorize the Administrator of General Services to quitclaim all interest of the United States in and to a certain parcel of land in Indiana to the board of trustees for the Vincennes University, Vincennes, Ind.;

S. 1027. An act to authorize the Secretary of Commerce to prescribe seals for bureaus and offices of the Department of Commerce, and for other purposes;

S. 1366. An act to amend the act entitled "An act to authorize the construction, protection, operation, and maintenance of public airports in the Territory of Alaska," as amended;

S. 1791. An act to further amend the Reorganization Act of 1949, as amended, so that such act will apply to reorganization plans transmitted to the Congress at any time before June 1, 1959;

S. 1941. An act to authorize the payment by the Bureau of Public Roads of transportation and substance costs to temporary employees on direct Federal highway projects; and

S. Con. Res. 30. Concurrent resolution to print a compilation of studies and reports on the foreign aid program.

CIVIL RIGHTS ACT OF 1957

Mr. COLMER. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. The Chair understood that the gentleman from New York wanted to propound a unanimous consent request.

Mr. COLMER. Mr. Speaker, I withhold my point of order until the gentleman has made his unanimous-consent request.

Mr. CELLER. Mr. Speaker, I ask unanimous consent that when the House adjourns on Friday, tomorrow, it stand adjourned until Monday next; that instead of having 4 days' general debate on the bill H. R. 6127 the debate be limited to 3 days, that we will then start reading the bill under the 5-minute rule on Tuesday; that when the House adjourns on Tuesday evening it stand adjourned until Thursday. The House, therefore, will be in recess on Wednesday in order to enable Members of the House who wish to do so to see the maneuvers off Portsmouth. On Thursday the Committee of the Whole will then resume reading of the bill under the 5-minute rule until conclusion of consideration of that bill.

The SPEAKER. Is there objection to the request of the gentleman from New York [Mr. CELLER]?

Mr. MARTIN. Mr. Speaker, reserving the right to object, the gentleman has covered the matter pretty fully, but does the gentleman specify when we shall vote on the measure itself?

Mr. CELLER. Well, I have no way of determining that.

Mr. MARTIN. Well, why not make it all-embrasive, then, and say that on Thursday of next week we will vote.

Mr. CELLER. Well, we will continue the reading of the bill on Thursday so that we may conclude on Thursday. I think there is evidence made manifest that it is the desire to conclude on Thursday, but I do not think it would be possible to get an ironclad agreement on it.

Mr. MARTIN. The ironclad agreement is to give you a day off on Wednesday, but probably very few of the Members of the House will attend the maneuvers.

Mr. CELLER. Well, I am making the request. I thought we had received the approval of those interested on your side, and those on this side are ready to concur. I do hope the gentleman will not object to the unanimous consent request.

Mr. MARTIN. Well, I, of course, knew what the request was going to be, but I really think we have got to commence and do some work if we are ever going to get through this year.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

AGRICULTURAL TRADE DEVELOPMENT AND ASSISTANCE ACT OF 1954

Mr. MADDEN, from the Committee on Rules, reported the following privileged resolution (H. Res. 274, Rept. No. 538), which was referred to the House Calendar and ordered to be printed:

Resolved, That during the consideration of the bill (H. R. 6974) to extend the Agricultural Trade Development and Assistance Act of 1954, and for other purposes, all points of order against the bill are hereby waived.

ONE HUNDRED TWENTY-EIGHTH ANNIVERSARY OF THE BROOKLYN SUNDAY SCHOOL UNION

Mr. KEOGH. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. KEOGH. Mr. Speaker, today a solemn and inspiring event is taking place in Brooklyn. In every section of the borough there will be marching Sunday school children with their adult leaders, officers, and teachers in observance of the 128th anniversary of the Brooklyn Sunday School Union.

In 1829, there were four churches participating in the first parade. Today, there will be 26 divisions representing the Bible schools of over 450 Protestant churches in Brooklyn. Special floats have been entered centering on the theme "Christ, the Prince of Peace," and in some divisions prizes will be offered for the best interpretation of the theme. All of the marchers will wear parade shoulder bands with the theme inscribed.

Mr. William A. Gatehouse, president of the Brooklyn Sunday School Union, chief marshal of the 1957 parade, and a trustee of the Andrews Methodist Church of Cypress Hills, has predicted that over 120,000 will be marching in this great spiritual undertaking.

Today's event may best be described in the words of the Brooklyn division of the Protestant Council:

> More than a mere parade, anniversary day is a living symbol of a community's faith in religious values, and it might very well be called a "children's crusade in modern dress."

4-H CLUBS IN KENTUCKY CONTRIBUTE TO GOOD CITIZENSHIP

Mr. NATCHER. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

Mr. NATCHER. Mr. Speaker, the contributions made by the members of our 4-H Clubs in Kentucky, and throughout America, have been of tremendous value, not only in connection with agriculture and home economics, but in improving community living by way of efforts toward the betterment of schools and churches in respective localities. When we consider that the 4-H Club movement was only started at the turn of this century, while cooperative extension work in agriculture and home economics was only provided for by the Congress in 1914, we can understand the remarkable strides that can be attributed to these young people.

An example of outstanding 4-H Club work can well be illustrated by the achievements of two of the members from the Second Congressional District of Kentucky—Helen Stinnett, of Hopkins County, and Harold Smith, from my home county of Warren. This young lady and young gentleman are 2 of the 4 holders of this year's top award in 4-H Club work in Kentucky who will attend the 27th National 4-H Conference to be held in Washington, D. C., June 15 to June 21. They have also won trips to the National 4-H Club Congress in Chicago for superior project work. Miss Stinnett, 17 years of age, and State records champion, has completed about 50 projects in home economics, leadership, electricity, dairying, gardening, and food preservation. In order to interest young people, she has made more than 50 talks on 4-H Club work. Mr. Smith, 18 years of age, and State dairy winner, started with two Guernsey heifers in 1949. He now has 21 heifers, 7 of which are producing. He has won honors in exhibiting, showmanship, and judging of animals. Harold Smith has been a junior leader and five times was president of his club.

The accomplishments of Helen Stinnett and Harold Smith clearly demonstrate the value of 4-H Club training. The activities engaged in by these public-spirited youths of today can but insure character development and good citizenship. They will be our leaders of tomorrow, and to them we can look for advancement in agriculture, improvement in home conditions, as well as to strengthening the forces of right and justice in our Nation. It is not only upon material resources that the United States of America should depend, but also upon human resources. I am convinced that the boys and girls connected with the 4-H Club program will be capable and ready to assume responsibilities of leadership in the years to come.

SWEDEN'S CONSTITUTION AND FLAG DAY

Mr. O'HARA of Illinois. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. O'HARA of Illinois. Mr. Speaker, today here in the House of Representatives of the Congress of the United States we pause in our deliberations to note that this is Sweden's Constitution and Flag Day, and on this glad anniversary occasion our thoughts abide with the proud and friendly people of the Scandinavian land whose sons and daughters from earliest days have contributed so mightily to the building of our United States. I am happy that in the district that I have the honor to represent are many men and women of Swedish blood. In the professions and the trades, in the activities of business, in religion, in education, and in the arts, in cultural and civic participation, they have been pillars in upholding the highest standards of personal deportment and citizen responsibility. I would feel remiss in my duty as their representative if I permitted the 148th anniversary of the adoption of the Swedish Constitution to pass unnoticed.

Although Sweden's Constitution and Flag Day dates from 1809, this date is a comparatively recent one in Sweden's renowned history. Various clauses in the democratic constitution which was adopted on June 6, 1809, bespeak the character of that admirable country and indicate the antiquity of the standards of happiness and independence, of justice and truth which it sets forth. Article 114 declares that:

> The ancient privileges, advantages, rights, and liberties of the estates of the kingdom shall remain in force.

Nor are these principles, which were promulgated "with deepest emotion and loving participation in the fortunes of the people," as the preamble states, glorified on paper only. In actuality Sweden has typified for many generations an ideal among nations. All the people take part in a truly democratic life, a representative government, a society concerned with the welfare of the nation as a whole and as composed of individuals, each with his own necessity for social security, for good housing, for recreation, for education, for culture, for the comforts of life, and the attributes of better living.

Sweden is one of the few countries of the world where the national wealth is fairly evenly distributed. The national savings in the banks compare very favorably with those of other countries. Swedes drink more coffee than any other people in the world. Every second person owns a bicycle; every home a radio. Yet the Swedish people are great readers too. Of the large number of books published annually in Sweden, one-third are of a literary character. The newspaper circulation in Sweden is greater per capita than anywhere else in the world. One of the oldest periodicals in the world, the official newspaper of Sweden, was founded in 1645.

We in America have been enriched both by the influence and by the very real accomplishments of her sons and daughters who have settled here. They brought with them their newspapermen, who pioneered in foreign-language newspapers. They brought their great farmers, lumberjacks, scientists, authors, educators, men of religion, and other contributors to our American civilization.

In our own State of Illinois, at Rock Island, there is today Augustana College, the oldest remaining of the many colleges and academies founded in America by the Swedish settlers.

Leaders in various fields at home and abroad, the Scandinavian people have led the world in social security and labor legislation. A Swede, Karl von Linné—or Carolus Linnaeus—led the world in botany. Among all the famous names which the thought of Sweden conjures up, perhaps that of Nobel is the best known internationally. Donor of the fortune which has furnished the Nobel prizes annually awarded in the fields of physics, chemistry, medicine, literature, and the promotion of peace, Alfred Nobel was the inventor of, among other things, dynamite. A bit wistfully—and grimly—we of the nuclear weapon age read, about 100 years later, of his hope that his invention was so frightful and so destructive that it would bring an end to war.

It is to Sweden's leadership of a constitutional nature that we in the United States owe one of our great debts of gratitude. We cherish it as a memory, too, that it was Sweden who first—and unsolicited—recognized the United States as a nation. Before the peace had been signed with England acknowledging our independence, Sweden's King had directed his Minister in Paris to call on Benjamin Franklin there to discuss the possibility of a Swedish-American treaty—which was to follow in 1783. As one author has put it, "Sweden was the first neutral nation to recognize the United States."

It is significant that Sweden, renowned especially for her freedom, her independence, her respect for individuality, and her neutrality, should have been the first to recognize us. For we have in common so many rich traditions. And it is with pleasure in her accomplishments and pride in our analogies that we salute today Sweden's flag and her constitution which reads in part:

> Our and our subjects' mutual rights and obligations are so clearly laid down in the new constitution that they incorporate the Swedish nation's liberty as by law established.

"THE TROUBLE WITH AMERICAN MORALS"

Mr. FINO. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. FINO. Mr. Speaker, in the July issue of Esquire magazine, which goes on sale today, there appears a very interesting article written by Tallulah Bankhead entitled "The Trouble With American Morals." I urge each and every Member of this House to read it.

Miss Bankhead, one of America's greatest ladies of the stage, gives her own frank and straight-from-the shoulder opinion on various phases of moral standards.

Of particular interest are her outspoken thoughts on the subject of gambling.

She says:

> Some think gambling a vice, others a disease. Most States call it just plain illegal. Well, I think gambling is a man's prerogative. I say gambling is natural to life, and, admit or not, we all enjoy it. A broker buying and selling new stock, an actress opening a play, a jockey leaving the starting gate, all of us take our chances against odds every day. Yet, we have stringent laws against gambling with money. It's like putting blinders over our eyes so that we can pretend the rest of the world isn't there.
>
> You can't legislate a fact of life out of existence. All our experience proves it.

Because of my keen interest in the establishment of a national lottery, I was favorably impressed with Miss Bankhead's thoughts on this subject.

She says:

> I think we should have a national lottery. What harm could a dollar or two-fifty ticket possibly do? The country is flooded with

black-market lotteries anyway. If lotteries were legalized, they might satisfy the great American craving to bet a little lettuce from time to time. Consider how many hospitals and schools could benefit. There might even be a way to help the income-tax situation or inflation with a lottery.

Let me assure the Members of this House that the views expressed by Miss Bankhead on legalized lotteries are shared by 59 percent of the American people in this country. The recent Trendex News Poll shows that most Americans in every section of the country and in every income bracket favor a Federal lottery to reduce taxes.

Does not the will of a majority of the people have any affect? Must we continue to allow hypocrisy to blind us from the obvious? Will we ever have the intestinal courage to banish hypocrisy and make this tax-relief dream a reality? A majority of the American people deserve honest answers to these questions. It is our responsibility to furnish them with immediate action on my bill H. R. 3520.

LEGISLATIVE PROGRAM FOR NEXT WEEK

Mr. HOFFMAN. Mr. Speaker, my understanding of the legislative program for next week was not quite complete. Was there anything in that understanding which would permit the suspension of the rule as to a quorum during general debate?

The SPEAKER. That would not be the proper thing to do.

PERSONAL ANNOUNCEMENT

Mr. DAVIS of Tennessee. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. DAVIS of Tennessee. Mr. Speaker, because of illness, it was impossible for me to be on the floor Thursday, April 4, 1957. Had I been present, I would have voted aye on rollcalls Nos. 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, and 50.

CALL OF THE HOUSE

Mr. COLMER. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Mr. McCORMACK. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 97]

Ashley	Gregory	O'Konski
Ayres	Gwinn	Poage
Barrett	Harrison, Nebr.	Powell
Beamer	Holtzman	Prouty
Blatnik	James	Radwan
Bowler	Kearney	Sadlak
Buckley	Keeney	Taylor
Cederberg	Kilday	Thompson, Tex.
Dawson, Ill.	Krueger	Utt
Engle	McConnell	Wilson, Ind.
Fallon	McGovern	Withrow
Garmatz	Miller, Md.	Wolverton
Green, Oreg.	O'Brien, Ill.	Zelenko

The SPEAKER. On this rollcall 392 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

CIVIL RIGHTS ACT OF 1957

Mr. CELLER. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 6127) to provide means of further securing and protecting the civil rights of persons within the jurisdiction of the United States.

Mr. SMITH of Virginia. Mr. Speaker, I make a point of order against the bill.

The SPEAKER. The gentleman will state his point of order.

Mr. SMITH of Virginia. Mr. Speaker, I make the point of order that the report on the bill does not comply with the provisions of the Ramseyer rule, which is rule XIII, clause 3.

I call the Speaker's attention to the provision of the bill appearing on page 7, line 12, which reads as follows:

> Members of the Commission, voluntary and uncompensated personnel whose services are accepted pursuant to subsection (b) of this section, and members of advisory committees constituted pursuant to subsection (c) of this section, shall be exempt from the operation of sections 281, 283, 284, 434, and 1914 of title 18 of the United States Code, and section 190 of the Revised Statutes.

Now, Mr. Speaker, I also call attention to the provision of the bill providing on page 9, line 8, for the appointment of another and additional Assistant Attorney General, which changes existing law and which fixes the number of Assistant Attorneys General and which changes the provision of existing law that fixes the qualification of Assistant Attorneys General in that it omits the requirement that an Assistant Attorney General must be a member of the legal profession.

Mr. Speaker, I am prepared to discuss the matter in some detail unless the gentleman from New York is prepared to concede the point of order.

Mr. CELLER. Mr. Speaker, the gentleman is not prepared to concede anything.

The point of order is not well taken. With reference to the statement referring to the members of the Commission, the gentleman called attention to page 7, lines 12 to 19. That is a waiver of the conflict-of-interest statutes which involves no change whatsoever in those statutes. It simply provides for the waiver of the statutes. That is very frequently done. The Committee on the Judiciary has jurisdiction over matters of that sort; namely, the waiver of conflict-of-interest statutes.

With reference to the gentleman's opinion concerning the part II provision for an additional Assistant Attorney General, lines 6 to 14 on page 9, I wish to state that no law is amended. We simply provide for an additional Assistant Attorney General.

Mr. KEATING. Mr. Speaker, will the gentleman yield?

Mr. CELLER. I yield to the gentleman from New York.

Mr. KEATING. I agree with the gentleman in what he has just said, but I would like to add that the reference to these sections in lines 12 to 19 in no way changes the section. It is simply a reference to it, which we frequently find in legislation.

Mr. SMITH of Virginia. Mr. Speaker, I would like to discuss some of the precedents on this subject.

Now, on the matter of waiver of the conflict of interest statute, in that case this bill in effect puts a proviso on each one of those sections: *Provided*, That this bill shall not be applicable to employees under this act. Now, there are 6 or 7 of those statutes that are amended. There is no question or doubt but that it is just the same as if there was a proviso in the bill that this statute shall not apply to A, B, and C. There can be no question about that now. That question has been raised in past decisions. The only cases in which the Chair has overruled a point of order in all the long line of decisions that I have examined are cases where there was no law shown that was amended.

Now, in this case it is perfectly apparent that they all are. For instance, on the matter of the Assistant Attorney General. The present statute provides that there shall be in the Department of Justice 7 officers. That is section 295 of title V: There shall be in the Department of Justice 7 officers learned in the law. Now, this is the first time I have ever heard of an Assistant Attorney General being appointed or being authorized that was not required to be learned in the law. That is a technical phrase used for a person being an attorney-at-law. I do not know why that was left out. It must have been left out by design, because otherwise this bill generally follows the language of the existing law. As to the seven Assistant Attorneys General, under this provision a nonlawyer can be appointed Assistant Attorney General.

Now, what was the purpose of the Ramseyer rule? The purpose of the Ramseyer rule was to cover just such a situation as here presented. Unless you go back and look up all the sections of the code, which I have done, here is a law which drastically changes the qualifications of Assistant Attorneys General, and the House might not want to say that an Assistant Attorney General should be other than an officer learned in the law. That was the purpose of the Ramseyer rule, and it is so stated in all the decisions laid out here; that the purpose of the Ramseyer rule is that the committee shall find out what changes they are making in the law and that the changes shall be specified in the report to the House, so that all members of the House may know what is proposed in the way of changes in the law.

The most notable case that I think of is the case of the revision of the patent laws, copyright laws. It was just a general provision that all laws in conflict with the bill are hereby repealed or amended, as the case may be. There was no reference to any law that was being

amended or repealed. The point of order was raised and discussed on the floor of the House. The contention was that in order to comply with the Ramseyer rule it would be necessary to write a volume. The Chair said that that was the very purpose of the Ramseyer rule, so that Members of Congress may know, without having to look up all these laws, what they are voting on; so that they may know whether they are voting to give the Attorney General the power to appoint an Assistant Attorney General who does not have the qualifications of a lawyer; so that they may know that under this bill, the whole system of conflict-of-interest statutes, 7 of them in number, 7 acts, are amended which will permit this Commission to hire people who are in the employ, for instance, of the NAACP. That is the reason it is put in there. There could be no other reason.

The reason for this rule is that the House and the Members of the House may know that that is what is being done in this bill; that this Commission that is being appointed is given authority by amendment to the conflict-of-interest statutes, to hire employees of the NAACP, put them on their salary roll, to administer this proposed act.

Is that what the Members of the House want to do? I do not know, but certainly they are entitled to know what they are doing. That is what the Ramseyer rule is all about. I want to read what the presiding officer said in response to the claim that to comply with the rule would require the writing of a whole volume of statutes. Here is what the Speaker said:

> The gentleman from Indiana well argues that it would be a task of considerable magnitude to do what is proposed here, and yet that seems to be the purpose of the rule, that the Member making the report of the committee shall do the work of investigation and submit to the House information as to what statutes are repealed.

That is the purpose of the rule, namely: that every Member of the House is entitled to know what the Committee on the Judiciary is proposing in the way of changes in the law. I would venture the assertion that there is not a Member of this House, outside of the members of the Committee on the Judiciary and perhaps myself, because I have made some investigation of the subject, who knows what is being done in the matter of changes of the existing law. And there is no way for them to know unless they examine each individual statute and each individual provision of the United States Code that relates to these subjects. Mr. Speaker, how in the world can we get along with the Ramseyer Rule, what purpose would it have, what would be the effect of it, if merely by not mentioning that we are amending the law we were to go ahead and amend it? That is the argument that is being made here.

That is, the Ramseyer rule does not mean anything if we merely omit to tell the House the truth, that we are amending the law. Is that the kind of rule we are going to live under?

I am interested in the integrity of the rules of this House. If this House does not want such a rule, they do not have to have it. But certainly if the rule means anything at all, it must mean that a committee cannot bring a bill in here and evade the rule completely by simply not mentioning the fact that we are amending it.

Does anybody doubt that we are amending the law? Here is the law. Here are the statutes. I could read every one of them. I can tell you what each one of them means; I have a memorandum here. But the effect of this bill as written is to put a proviso on each one of those statutes saying that this statute shall not apply to persons employed under this act. If that is not an amendment to the law, then I do not know what an amendment to the law is. The same applies to the provision which changes the number and the qualifications of assistant attorneys general.

I wonder how many Members of this House, if they were advised as they should have been advised by the report of the committee that they were to vote to give the Attorney General the power to appoint an Assistant Attorney General who was not a lawyer, would have voted for it. Yet you are left completely in the dark. You are given no intimation by the committee.

I would say, Mr. Speaker, that to do that is really a worse offense then if you mentioned the amendment, because then Members would know something about it. But here we amend the law in a roundabout way, I might say, almost in effect surreptitiously, although I do not mean to reflect on the committee. It was done inadvertently. If they had thought about it, they probably would have corrected it. But here is a situation where they have obviously deviated from the rule, where they have obviously violated the rule.

Mr. WILLIS. Mr. Speaker, will the gentleman yield?

Mr. SMITH of Virginia. I yield to the gentleman from Louisiana.

Mr. WILLIS. Is not the purpose of the Ramseyer rule to inform Members what they are voting on? That is certainly my understanding of it. On page 7, starting at line 12, there is language to the effect that the members of the Commission shall be exempt from the operation of named sections of law. If I understand the gentleman correctly, from a reading of the bill we do not know what this is and there is nothing in the report from which we can find out what it is.

Mr. SMITH of Virginia. I venture the assertion that not one Member of the House outside of the Judiciary Committee knew until this discussion took place what amendments would be made to the law.

Mr. ROGERS of Colorado. Mr. Speaker, will the gentleman yield?

Mr. SMITH of Virginia. I yield.

Mr. ROGERS of Colorado. Do I correctly understand it is the gentleman's contention that the part on page 7, running from lines 12 to 19, does not comply with the Ramseyer rule due to the fact that the failure of the committee to set forth sections 281, 283, 284, 434, and 1914 of title 18 of the United States Code, and section 190 of the Revised Statutes (5 U. S. C. 99), is in violation of the Ramseyer rule? Is that the gentleman's contention?

Mr. SMITH of Virginia. That is my assertion.

Mr. ROGERS of Colorado. Does the gentleman construe the Ramseyer rule, then, to mean that whenever any reference is made to any other statute it is the duty of the committee to set forth that statute in detail?

Mr. SMITH of Virginia. No; it is not my contention, it is my assertion, based upon the decisions of the Chair that establish the interpretation of the rule. The gentleman perhaps was not listening. That is what I have been talking about for the last 15 minutes.

Mr. ROGERS of Colorado. The point I am making is, Does the gentleman feel that in connection with every bill we consider it is the duty of the committee to set forth in detail in its report that statute, otherwise this committee cannot consider the legislation? Is that the gentleman's contention?

Mr. SMITH of Virginia. No. I hope the Chair will be patient with me, but the gentleman evidently does not understand what has been going on today. The Ramseyer Rule provides that whenever there is proposed a change in existing law it shall be set out by such typographical devices or otherwise as may be required, to inform the House what changes are proposed to existing law. For instance, a case came up here where the bill added a proviso to an act. The committee proposed a proviso to an existing law. That is exactly what these gentlemen are doing. They are proposing a proviso to seven different laws providing that this act shall not apply to the employees employed by the Government under this bill. After discussion, the Chair ruled that they had to print the whole law that preceded that proviso. Why did the Chair rule that? The Chair ruled that so that Members of the House would know what was going on and would be informed. I hope the Chair will bear with me when, for the benefit of the gentleman from Colorado, I read again what the Chair said in the copyright case which I have just referred to. It said:

> The gentleman from Indiana well argues that it would be a task of considerable magnitude to do what is proposed here. And, yet, that seems to be the purpose of the rule, that the Member making the report of the committee shall do the work of investigation.

That is what it says he must do. You must do the work of investigation and find out how many of these laws you are changing; what the changes are; and submit to the House information of what statutes are to be repealed and what is proposed to be amended.

The Speaker in that case further said:

> On March 17, 1930, a point of order was made against a bill in very much the same situation as this bill on the ground that it did not conform with section 3, rule 13. In that case the Speaker pro tempore happened to be the gentleman from New York, Mr. Snell. The chairman of the Committee on Rules had reported this rule, and the Chair sustained the point of order.
>
> It seems clear to the Chair that the ruling then made was correct. No other ruling can

be made here other than to sustain the point of order.

Mr. CELLER. Mr. Speaker, will the gentleman yield?

Mr. SMITH of Virginia. I yield.

Mr. CELLER. I want to say to the gentleman that I have been a member of the Committee on the Judiciary for many years. We have on innumerable occasions waived the conflict of interest statutes and we have used the format used in the pending bill. There has never been a point of order raised to any of these bills in the sense that there was a violation of the Ramseyer rule, and for the simple reason when you waive the provisions of a statute, you do not change the provisions of that statute and you do not amend the provisions of that statute. The Ramseyer rule provides that if you do provide for language that is amendatory, then you must set forth the manner in which the provision added is amendatory. As in the case here, with reference to the Assistant Attorney General, there again we do not amend any statute at all. We are simply adding an Attorney General. If the gentleman from Virginia wishes to address himself to the merits of that provision—section 114—certainly, his parliamentary maneuver must fail for the reason that there is nothing in the nature of amending any kind of bill. We simply add to the statutes that there shall be an additional Attorney General. Now the question as to whether he shall be learned in the law goes to the merits, and if the gentleman from Virginia feels that the provision is not meritorious because there is no provision there for the appointee to be learned in the law or be a lawyer, then he can vote down that provision or make a suitable amendment when we reach that stage under the 5-minute rule.

Mr. SMITH of Virginia. May I say in reply to the gentleman that he misses the point entirely. Of course, you can offer an amendment to the bill. That has nothing to do with the Ramseyer rule. The Ramseyer rule says that the committee reporting a bill must tell the membership of the House what is proposed to be done. After the committee has told the membership what is proposed to be done, then there comes into play the question which the gentleman raises and then the House, if it wishes, can strike it out or the House can say the appointee shall be learned in the law.

Mr. COOPER. Mr. Speaker, will the gentleman yield?

Mr. SMITH of Virginia. I yield.

Mr. COOPER. Mr. Speaker, I desire to concur in the point of order made by the gentleman from Virginia and I concur in the very able arguments presented by him in support of his point of order. I would invite the attention of the Chair to the fact that there can be no question the pending bill seeks to amend existing law in many particulars and in many respects. By an examination of the report accompanying the pending bill, it is readily apparent that the Ramseyer rule is not complied with with respect to those changes sought to be made in existing law by the enactment of the pending bill.

I would especially emphasize the point raised by the distinguished gentleman from Virginia, Mr. SMITH, chairman of the Committee on Rules, that on page 7 the language referred to by him certainly changes existing law, in that the members of this Commission have the conflict of interest statute waived as to them. Certainly if there was no change in existing law there would be no logic in including this provision in the bill.

It is well recognized, Mr. Speaker, that on page 9 the language to which reference has been made certainly changes existing law, in that certain provisions are now required with respect to the qualifications of an Assistant Attorney General. There is no effort made in the report accompanying the bill to set out the provisions of existing law that are sought to be changed by this provision of the pending bill.

I submit most respectfully, Mr. Speaker, that the argument presented by the gentleman from Virginia [Mr. SMITH] is sound, and that the point of order presented by him is sound.

Mr. SMITH of Virginia. Mr. Speaker, I thank the distinguished gentleman from Tennessee for his contribution, which is so valuable, because he is known as perhaps the best parliamentarian in this House. I want to propound a question to the gentleman, if I may. I know he is interested in maintaining the integrity of the Rules of the House under which we operate. I want to ask the gentleman from Tennessee [Mr. COOPER] if he concurs in my opinion that if this point of order is not sustained under these circumstances, does it not open the door for a complete nullification of the whole Ramseyer rule by simply not saying that this is an amendment, or printing it as an amendment, but by just mere reference to it you can abolish the Ramseyer rule. Am I correct in that?

Mr. COOPER. Mr. Speaker, I agree with the statement made by the gentleman, and I also invite attention to the fact that, as he well knows, it has been my privilege to appear on many occasions before his great Committee on Rules with respect to legislation reported from the Committee on Ways and Means, of which I have the honor to be chairman. We have always requested a waiving of points of order on legislation of that type, for the very reason that if points of order were not waived with respect to the application of the Ramseyer Rule, we would have to print the entire Internal Revenue Code in the committee report on a tax bill that was being reported to the House.

Mr. Speaker, I feel that the distinguished gentleman from Virginia [Mr. SMITH] is correct in the position he has taken.

Mr. KEATING. Mr. Speaker, may I be heard on the point of order?

The SPEAKER. The gentleman from New York is recognized.

Mr. KEATING. With reference to the Internal Revenue Code, which has just been given as an illustration, it seems to me that points up what the Ramseyer rule really is intended to accomplish. In the case just cited, it is the Internal Revenue Code which we are amending, and the Ramseyer rule says "whenever a committee reports a bill or joint resolution repealing or amending any statute or part thereof, it shall include"—and then, correctly reported by the gentleman from Virginia, "a print of the original law."

There are certain statutes amended by this law, and the committee has reported a bill amending certain provisions of the law.

But now I refer to the provisions on page 7, lines 8 to 19. This is not any part of any of these laws which are sought to be amended by this bill. Therefore, it does not fall within the Ramseyer rule.

As to the additional Attorney General, there are a great many statutes in which we have added now one and now another Attorney General. We are not in any way changing those statutes; we are simply providing for an additional Attorney General.

It seems to me, Mr. Speaker, significant that the chairman of the Committee on Rules who had before him this report prepared by our colleague the gentleman from New Jersey [Mr. RODINO], and before whom a lengthy debate took place, he did not in the Rules Committee raise any question about the insufficiency of the report. It strikes me that the gentleman from Virginia [Mr. SMITH]——

Mr. SMITH of Virginia. Mr. Speaker, will the gentleman yield? He has mentioned my name. Will he permit me to interrupt at that point?

Mr. KEATING. I yield to the gentleman.

Mr. SMITH of Virginia. I would like to say to the gentleman that neither at that time nor any other time have I been willing or anxious to extend any aid to the passage of this measure.

Mr. KEATING. I rest my case on that, Mr. Speaker.

The SPEAKER. The Chair will hear the gentleman from Massachusetts [Mr. MCCORMACK].

Mr. MCCORMACK. Briefly, Mr. Speaker, on the point of order and the Ramseyer rule, it seems to me my friend the gentleman from Virginia [Mr. SMITH] is talking about a noncompliance. An examination of the report shows a compliance with the rule, because all through the report of the majority reference is made to changes in the law.

There is a difference between strict noncompliance and compliance with the rule.

It seems to me the report taken as a body and as a whole must be considered as being in compliance with the rule.

Mr. COLMER. May I be heard on the point of order, Mr. Speaker?

The SPEAKER. The Chair will hear the gentleman.

Mr. COLMER. Mr. Speaker, I had not intended to say anything on this, but if the Chair will bear with me very briefly, the gentleman from Massachusetts who is usually very profound and accurate in his statements was never more wrong in his life than he was in the statement he just made. I wish to read from Cannon's Precedents, but before I do let me call the attention of the gentleman from Massachustts to the fact that there are references and attempts to comply with

the Ramseyer rule in some cases, but in the particular cases to which the point of order has been made there has been no attempt to comply with the rule. Cannon's Precedents states:

Although a bill proposed but one minor and obvious change in existing law, the failure of the report on the bill to indicate this change by typographical device was held to be a violation of the rule.

Mr. DAVIS of Georgia. Mr. Speaker, may I be heard on the point of order?

The SPEAKER. The Chair is prepared to rule, but the Chair will hear the gentleman from Georgia.

Mr. DAVIS of Georgia. I thank the Speaker. I will not trespass on the time of the House longer than to speak directly to the statement made by the distinguished gentleman from Massachusetts [Mr. MACCORMACK].

I refer the Chair to one bill, H. R. 8156, in the 71st Congress, 2d session. The principle involved in that ruling is set out in Cannon's Precedents, volume 8, section 2236, in this language:

Although a bill proposed but one minor and obvious change in existing law, the failure of the report on the bill to indicate this change by typographical device was held to be a violation of the rule.

This bill, Mr. Speaker, consisted of only a few lines. I will read them:

Be it enacted, etc., That the limit of cost fixed in the act approved February 16, 1929, entitled "An act to provide for the acquisition of a site and the construction thereon and equipment of buildings and appurtenances in the Coast Guard Academy," is hereby increased from $1,750,000 to $2,500,000.

That is all that was in the bill.

The gentleman in charge of the bill argued in opposition to the point of order that the bill in that case conformed to the spirit of the rule.

He said "Nobody can have any question about the meaning and purpose of this bill."

The Speaker ruled as follows, and this is his language:

It is perfectly apparent to anyone reading the bill that its language is not exactly in the form prescribed by the Ramseyer rule which provides that—

And he quoted the sections of the Ramseyer rule.

The Chair further said:

The Chair does not think that that rule has been complied with. What is required under the second part has not been done.

May I say to the Speaker that case presented a much weaker point for sustaining the point of order than the present bill offers. In the case of the Coast Guard Academy bill no one could read the language of the bill itself and fail to understand the one simple change that the bill purported to make. Yet the bill designated the act which was to be changed in one simple particular. The report failed to quote the act which was to be modified as required by the Ramseyer rule and failed to point out the change to be made. The Chair said in that respect:

The Chair does not think that that rule has been complied with. What is required under the second part has not been done. Of course, the rule is intended to make it evident just what change in a bill or resolution is intended. It is to make this change apparent to anybody without consulting the statutes which it is intended to amend.

Mr. Speaker, addressing my remarks specifically to section 105 (d), lines 12 through 19 on page 7 of the bill, this section provides:

Members of the Commission, voluntary and uncompensated personel whose services are accepted pursuant to subsection (b) of this section, and members of advisory committees constituted pursuant to subsection (c) of this section, shall be exempt from the operation of sections 281, 283, 284, 434, and 1914 of title 18 of the United States Code, and section 190 of the Revised Statutes.

I call the attention of the Chair to these facts, then I am through:

Six existing statutes are designated in this section of the bill.

Each of these designated sections is modified and amended by this paragraph of the bill, in that each of said sections is nullified and rendered inoperative as to all of the officials, committees, and personnel who are mentioned in this paragraph of the bill.

It is not possible by reading the bill or the report, or both, to know from what requirements, restrictions, or provisions of law these named members of the Commission, committees, and personnel will be exempted under the terms of this bill.

The only way to determine that is to read the five sections of the United States Code, and the one section of the Revised Statutes which are designated in the paragraph of the bill.

The purpose of the Ramseyer rule, and the reason for its adoption and retention by the House, is to relieve the member from the burden of searching out the statutes or existing law which the bill undertakes to repeal or modify.

These statutes are not carried in the committee report, and it is not possible to read the bill or the report and ascertain what the meaning of this bill is, or what the legal effect of this section would be if enacted.

The SPEAKER. The Chair is prepared to rule.

This question, or parallel questions, has been raised many times. The rulings of the Chair have been uniform.

The Chair might read the so-called Ramseyer rule:

Whenever a committee reports a bill or a joint resolution repealing or amending any statute or part thereof, it shall include in its report or in accompanying document—

(1) the text of the statute or part thereof which is proposed to be repealed; and

(2) a comparative print of that part of the bill or joint resolution making the amendment and of the statute or part thereof proposed to be amended, showing by stricken-through type and italic, parallel columns, or other appropriate typographical devices, the omissions and insertions proposed to be made.

Turning to the first part of the bill on page 7, paragraph (d), which reads as follows: "(d) Members of the Commission, voluntary and uncompensated personnel whose services are accepted pursuant to subsection (b) of this section, and members of advisory committees constituted pursuant to subsection (c) of this section, shall be exempt from the operation of sections 281, 283, 284, 434, and 1914 of title 18 of the United States Code, and section 190 of the Revised Statutes (5 U. S. C. 99)," the Chair holds that that is simply a waiver of the statute and not a specific amendment to any existing law. Therefore, the Chair overrules the point of order with respect to that.

Section 111, page 9, which reads as follows: "SEC. 111. There shall be in the Department of Justice one additional Assistant Attorney General, who shall be appointed by the President, by and with the advice and consent of the Senate, who shall assist the Attorney General in the performance of his duties, and who shall receive compensation at the rate prescribed by law for other Assistant Attorneys General," does not amend any specific law, because it does not refer to any. Congress has the right at any time it pleases, the Chair thinks, to provide for an additional Assistant Attorney General or an additional assistant in any other department.

Now then, we come to the part of the bill where specific statutes are amended. And, the Chair might say here that Mr. Snell, Speaker pro tem on February 7, 1931—Cannon's Precedents, volume VIII, section 2235—made this ruling: In order to fall within the purview of the rule requiring indication of proposed changes in existing law by a typographical device, a bill must repeal or amend the statute in terms, and general reference to the subject treated in a statute without proposing specific amendment is not sufficient.

Mr. O'Connor of Nev. York on April 13, 1932—Cannon's Precedents, volume VIII, section 2240—made a ruling on this specific question, and the gist of that is that the bill is not subject to the rule requiring comparative prints unless it specifically amends existing law.

Now, the gentleman from Tennessee [Mr. COOPER]on April 15, 1940, as Speaker pro tempore, went just a little further than that. The substance of his ruling was: In determining whether or not a committee in reporting a bill has complied with the Ramseyer rule, the duty does not devolve upon the Chair of analyzing every word of existing law and the changes sought to be made. Hence, Mr. COOPER held that an effort to substantially comply with the rule only was necessary.

Now, let the Chair read portions of part III and part IV of the bill, where specific law is specifically amended:

PART III—TO STRENGTHEN THE CIVIL RIGHTS STATUTES, AND FOR OTHER PURPOSES

SEC. 121. Section 1980 ,of the Revised Statutes (42 U. S. C. 1985) is amended by adding thereto two paragraphs to be designated "Fourth" and "Fifth" and to read as follows:

"Fourth. Whenever any persons have engaged or there are reasonable grounds to believe that any persons are about to engage in any acts or practices which would give rise to a cause of action pursuant to paragraphs First, Second, or Third, the Attorney General may institute for the United States, or in the name of the United States, a civil action or other proper proceeding for preventive relief, including an application for a permanent or temporary injunction, restraining order, or other order. In any proceeding hereunder

the United States shall be liable for costs the same as a private person."

* * * * *

SEC. 122. Section 1343 of title 28, United States Code, is amended as follows:

(a) Amend the catchline of said section to read:

"§ 1343. Civil rights and elective franchise"

* * * * *

PART IV—TO PROVIDE MEANS OF FURTHER SECURING AND PROTECTING THE RIGHT TO VOTE

SEC. 131. Section 2004 of the Revised Statutes (42 U. S. C. 1971), is amended as follows:

(a) Amend the catchline of said section to read, "Voting rights."

(b) Designate its present text with the subsection symbol "(a)."

Remembering what has gone before, the Chair finds on page 16 of the committee report changes in existing law set forth as follows:

In compliance with clause 3 of rule XIII of the House of Representatives, there is printed below in roman existing law in which no change is proposed by enactment of the bill as here reported; matter proposed to be stricken by the bill as here reported is here enclosed in black brackets; new language proposed by the bill as here reported is printed in italic.

And there follows then the existing law proposed to be amended.

The Chair has examined this bill carefully and has examined this committee report very carefully, and must hold that the committee did comply in substance and in fact with clause 3 of rule XIII.

Therefore, the Chair overrules the point of order.

Mr. CELLER. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 6127) to provide means of further securing and protecting the civil rights of persons within the jurisdiction of the United States.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H. R. 6127, with Mr. FORAND in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

Mr. CELLER. I yield myself such time as I may consume.

Mr. Chairman, at the outset I wish to state that I made the unanimous-consent request concerning adjournment from Tuesday over to Thursday primarily because the Secretary of the Navy, Mr. Gates, sought some arrangement with this Chamber whereby a goodly number of Members might have the opportunity to attend the naval maneuvers off Portsmouth, Va., on Wednesday. The unanimous-consent request was made so that Members could thus be accommodated.

I understand that the Secretary of the Navy had had conversations with the Speaker of the House, the majority leader, and others, making a request concerning the convenience of the Members so that they could attend these maneuvers. And it was in that spirit that I made my unanimous-consent request this morning.

I pointedly make this statement because of the colloquy that I had with the genial and able and distinguished gentleman from Massachusetts, the minority leader [Mr. MARTIN].

Mr. Chairman, I yield such time as he may consume to the gentleman from Pennsylvania [Mr. CHUDOFF].

Mr. CHUDOFF. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. CHUDOFF. Mr. Chairman, the enactment of the civil-rights bill now being considered by the House of Representatives is essential to the welfare of our Nation.

As all of you know, I believe that the highest duty of Government is to protect and strengthen the civil rights of its citizens. For by protecting the rights of each of its citizens the Government strengthens the Nation as a whole.

I wish that H. R. 6127 were broader: I wish it included provisions dealing with the problems of discrimination in employment, and in housing, which adversely affect the lives of millions of our people throughout the country. I wish that it included provisions to strengthen our Federal criminal laws which are at present inadequate to deal with the growing threat to law and order that is arising in our country as a result of the opposition in some localities to the Supreme Court's decision in the school segregation cases.

Nevertheless, I think that H. R. 6127 represents a basic minimum standard. It is a standard also upon which all Congressmen can and should agree, if they will only approach it with the sense of responsibility that rests on each of us as Members of a legislative body which legislates for our entire Nation

This bill would provide for investigating the condition of civil rights in this country. Certainly it is necessary to find out what the facts are in this controversy about civil rights. Secondly, the bill would strengthen the legal powers of the Department of Justice to safeguard the civil rights of our people in connection with the security of their persons and their right to vote.

These are certainly mild proposals. They relate to the elemental prerequisites for the maintenance of citizenship and the right to life, liberty, and happiness. How can any decent-minded American oppose these objectives?

The assertion that the provision for civil action and injunctive procedure by the Attorney General would deprive the voting registrars who now disenfranchise Negro citizens of their constitutional right to a trial by jury is a bogus argument. It is a pseudolegalistic effort to perpetuate racial discrimination. The legal brief which Senator PAUL DOUGLAS inserted into the CONGRESSIONAL RECORD of April 18, 1957, shows conclusively that the jury-trial proposal not only lacks any precedent, either in the Constitution or the statutes of Congress, but also that the proposal would itself be contrary to the Constitution.

The truth is that the bill would not deprive anyone of any constitutional right. The constitutional right to a jury trial in a criminal action would still remain unchanged. There has never been a constitutional right to a jury trial in a civil action.

Nor would anybody be denied his right to due process of law. No injunction would be issued without a hearing before a judge, with full right to counsel and the right to cross-examine. Any such injunction, as well as any order of contempt that might be issued if the injunction is disobeyed, would be subject to the right of appeal.

This procedure has been approved by Congress and is used as a regular course in some 28 statutes. There is nothing wrong with it. It is part of our American system of justice, and it will work in the field of civil rights also, with full protection to the rights of any defendant.

The sole purpose of the jury-trial argument would be to perpetuate the disfranchisement of Negro citizens in the South, a situation that is a scandal in a society which pretends to democratic political principles. It should be rejected as unworthy of our American heritage and tradition of fair play and equal opportunity.

Mr. CELLER. Mr. Chairman, I yield such time as he may consume to the gentleman from Michigan [Mr. MACHROWICZ].

Mr. MACHROWICZ. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. MACHROWICZ. Mr. Chairman, I regret exceedingly that official duties will require my absence from the country when the vote will be taken on this bill. I have, however, made arrangements to have my vote recorded in favor of its adoption.

This is indeed a moderate civil-rights bill. It contains a mere minimum of what is most certainly required from us as representatives of a democratic people in this great democracy of ours. It does not contain some provisions which we should enact, but which were eliminated in the interest of harmony and united action. It has the endorsement of the leadership of both parties. Its features were contained in the platforms of both parties. It is based upon recommendations of President Eisenhower and former President Truman. There is nothing in the bill that any person, believing in the Bill of Rights and in justice, could possibly object to. A unanimous, or nearly unanimous, approval by Congress would do more to build the prestige of our Nation among the free people of the world than anything I can think of.

I am not so naive as to think that our action will be unanimous, but I certainly hope that those who do not believe in civil rights will express their convictions by voting against the bill rather than by trying to cripple it with amendments which are designed to make it objectionable to certain groups and have nothing to do with the bill's basic purposes.

Frequently we call upon the Communist world leaders to prove their sincerity by action rather than words. Here indeed is an opportunity for us to prove to the world by our action that the principle of equality to all men is not a mere slogan to us, but a living fact. I trust, also, that the debate on the bill will be maintained at a high level, and that an overwhelming vote for the bill, as reported by the committee, will stand as our proof of America's moral leadership in the Free World today.

Mr. CELLER. Mr. Chairman, as we begin debate on this bill before us, it is imperative that we keep paramount in our minds the purpose of this bill, which is, and I emphasize, the preservation and the fulfillment of the provisions of the Constitution. The Constitution states bluntly and incisively that Congress shall have the power

> To make all laws that are necessary and proper for carrying into execution the foregoing powers, and all other powers vested by this Constitution in the Government of the United States, or in any department or officer thereof.

Hence, when there is a denial of constitutional rights to any person or to any segment of our society, it is the duty of Congress a duty which it has shirked much too long, to provide the remedy.

What we have before us is not a question of conscience, ethics, morality, or custom. What we have before us is a matter of rights, rights guaranteed by the Constitution, rights that have been withheld and, as a consequence, we have done a singular dishonor to our Constitution.

This is not to say that the acceptance of the proposals before us will be a simple matter, that the acceptance will not be painful to many in our country who have absorbed uncritically a regional way of life. The breaking of a pattern is never easy but we, the Congress of these United States, cannot permit any longer constitutional guarantees to be submerged and drowned by a pattern which has been permitted to harden and encrust the basic values of democracy.

While the argument of States rights has its validity, a validity based on the Constitution, which we seek here to protect, we must keep first and foremost in our minds that what we are discussing here are constitutionally guaranteed rights, particularly by the amendments to the Constitution. These are not the rights that grew out of the reserved powers of the States, these are the rights guaranteed by the Federal Government. Hence the responsibility rests upon the Federal Government to guarantee these rights, rights like equality before the law, due process, equality in education, nondiscrimination in voting, transportation, and the like. This is the warranty given by the Constitution.

I personally deplore the necessity for engaging in argument which must necessarily bring pain to many Members of the House who represent a Southern constituency, but if the espousal of the bill that bears my name touches the raw nerves of those so deeply and emotionally involved, I cannot retreat. It is not that I have any less affection for my colleagues from the South but rather it is I have a compelling adherence to the Constitution and to its guaranty of civil rights to all the people, regardless of race, color, or creed. To have the color of one's skin determine whether the Constitution governs him or not is a thesis for which I can have no stomach.

I realize the sectional differences obtaining in these fair United States. We have always had dissidence to contend with from our very beginning, when we were a mere confederation of States, but we soon learned that each section cannot have its own measuring rod. That leads along an endless trail of absurdity and confusion, which leads to national ossification. We cannot have the Constitution meaning one thing to one section and another thing to another section. Our Constitution must be one thing to all men—not many things to many men. Otherwise, we belie our history. Indeed, we cannot be troglodytes who live in caves nor ostriches who bury their heads in the sands. We must recognize the great changes that have come upon us—transitions that may demand the change of opinions and changing patterns. I hope that in that spirit we will consider the bill. The remedy proposed today is long overdue. The past history in a number of States, I fear me, and I regret to state, is not a creditable one as far as civil rights is concerned. The past gnaws at the future of these States. The past, however, forces a remedy that brings in its train great discomfiture—and as I said before great pain. That suffering is the price that must be paid for the prevention and the cure. We cannot change this past, but we can mold the future. This we can no longer do—preserve segregation against the tide of history. We cannot any longer accept separate but equal against the imperatives of the law, against the Supreme Court's decision. Indeed, I might say, the bill re-echoes the advice of Leviticus enshrined on the Liberty Bell in Philadelphia: "Proclaim liberty throughout the land—to all the inhabitants thereof."

See how wise they were in those days. They did not just say "proclaim liberty throughout the land." They added—they nailed it down—and they said "to all the inhabitants thereof."

I admit that the discovery that colored people are members of the human race and citizens of the United States—and that is the essence of a now famous decision of the Supreme Court—came to many as an infuriating shock. It was hard for many to believe—but believe they must.

I am a civil libertarian, anxious to protect—not reduce or cancel out any civil rights. If this bill involved any deprivation of any civil rights or any existing right, I would be against it. We are told that because we did not provide in certain respects trial by jury that we are depriving certain people of their civil rights. The right to trial by jury in a contempt case, I will say, never existed in common law or by statute. The Clayton Act in 1914 first granted it in a very limited fashion. I want to say, generally, it is only granted, if at all, as a matter of grace and not as a matter of right. There is no constitutional right of trial by jury to any contemnor. Thus, one cannot take away that which never existed, for example, the right to trial by jury in civil rights cases and especially where the Government is a party.

I repeat there is no constitutional right to a trial by jury in a civil or criminal contempt case. As long ago as 1890, the United States Supreme Court said:

> It has always been one of the attributes, one of the powers necessarily incident to a court of justice that it should have this power of vindicating its dignity, and of enforcing its orders, or protecting itself from insult without the necessity of calling upon a jury to assist it in the exercise of this power.

I am aware of neither State nor Federal legislation canceling out that decision. The argument of lack of trial by jury in my opinion is just a draping of a sectional cause of intransigence in a matter of constitutional frame. It is just a facade to hide obstructive and dilatory tactics. The lofty language used to defend the historical right of trial by jury contrasts mightly with the stony silence when contempt citations are issued against the National Association for the Advancement of Colored People, with no jury trials. In Alabama, Georgia, Louisiana, and Texas the failure of the National Association for the Advancement of Colored People to register was made the basis of an attack to outlaw the organization because it refused to turn over complete membership lists. There was no possibility of trial by jury. Court injunctions were obtained barring all activity of the Association for the Advancement of Colored People until all of its records were turned over to the State.

In Alabama, a clearly excessive fine of $100,000 was imposed upon that organization, without trial by jury, for so-called violation of an injunction requiring them to divulge membership lists.

I could go on and on and illustrate that in certain of these areas whence came these cries of "How dare you take away our trial by jury?" from the contemnor. I could cite these cases in these various areas where when the shoe is on the other foot there is no outcry. But, as I said before, all we have there is stony silence.

I remember during the era of prohibition 42,000 places were padlocked as a result of so-called violation of injunctions issued by United States District Judges on the score that they violated the order of the courts, and were guilty of contempt. I heard nobody make any outcry against such actions. No one lamented lack of jury.

I would say that the tears that are being shed now in that regard are just crocodile tears. Beyond that there is a serious question whether the Congress or a State legislature has the right, under the separation of powers, to grant a jury trial to a contemnor, when guilty of a violation of an order of the court.

Mr. HYDE. Mr. Chairman, will the gentleman yield?

Mr. CELLER. I yield.

Mr. HYDE. May I ask the distinguished chairman of the Committee on the Judiciary if it is not the purpose of

the so-called jury trial provision in this bill to try the subject matter of these constitutional rights before the courts rather than before a jury?

Mr. CELLER. There is no jury provision in this bill at all.

Mr. HYDE. No. But is it not the purpose of the provisions of this bill under section 121 and section 131, is it not the purpose of those provisions to try the issue involved before a judge, rather than before a jury?

Mr. CELLER. No; I do not think that is the case.

Mr. HYDE. Is that not what it does?

Mr. CELLER. No; I do not think so. I think if the gentleman will read it carefully and read the record, he will find that it is a little different.

But may I go on with my thought. Numerous decisions in State courts have held that the legislature has no power so to restrict the authority of the courts by requiring jury trials in contempt proceedings as to render judicial authority ineffective.

The four earlier authoritative decisions of State courts which reject legislative power to impair the inherent authority of courts to punish contempt are—and let me say in these cases are decided: *Carters* case (96 Va. p. 791); *Bradley* v. *the State* (111 Ga. p. 168); *Ex parte McKeon* (139 N. C., 1905).

Those are the States that have sent their distinguished representatives to this chamber who have made outcry. I would say they should go back to their own States and make outcry there before they come here. Before they take the beam out of my eye let them look to the mote in their own.

Mr. WILLIS. Mr. Chairman, will the gentleman yield?

Mr. CELLER. I yield to the gentleman.

Mr. WILLIS. I ask the gentleman whether or not that those cases referred to civil contempt?

Mr. CELLER. No; they refer in general to civil and criminal contempt.

Mr. SMITH of Virginia. Mr. Chairman, will the gentleman yield?

Mr. CELLER. I yield to the gentleman from Virginia.

Mr. SMITH of Virginia. The gentleman reprimanded my State. I would like to look at it. Can the gentleman tell me the citation?

Mr. CELLER. I shall be very happy to. I hope the gentleman gets much enlightenment from it. *Carters* case, (96 Va. 791, 32 S. E. Rep. 780, 1899). Let me read from the Carters case and the Mississippi case. In Carters case the Supreme Court of Virginia gives a full and cogent analysis, which has been relied on universally in States where the legislature has attempted to require jury trials in contempt proceedings.

There is probably no more concise statement of the constitutional reasons for retaining summary enforcement power in the judiciary than that given by the Supreme Court of Mississippi in the case of Watson against Williams. I quote from that decision:

> The power to fine and imprison for contempt from the earliest history of jurisprudence has been regarded as a necessary incident and attribute of a court without which it could no more exist than without a judge. It is a power inherent in all courts of record and coexisting with them by the wise provisions of the common law. A court without the power effectively to protect itself against the assaults of the lawless or to enforce its orders, judgments, or decrees against the recusant parties before it would be a disgrace to the legislation and a stigma upon the age which invented it.

I will set forth some of these other cases when I revise and extend my remarks, and ask that permission, Mr. Chairman.

The CHAIRMAN. Is the gentleman asking to insert extraneous material?

Mr. CELLER. No; a further explanation of these other cases to which I have adverted.

The CHAIRMAN. If it is the gentleman's explanation he may do so.

Mr. CELLER. Recently we were told about a case where there was a jury trial. That case I think could be deemed typical of what could happen where there are jury trials where the population and the milieu where the trial is held has been inflamed and whipscourged into excitement and into a highly emotional state by these—shall I say—demogogs on the other side: On May 30 last, last Thursday, an all-white jury in Montgomery, Ala., after exactly 95 minutes of alleged deliberation acquitted 2 white men of charges that they had bombed a Negro Baptist church. Reports of the proceedings indicate that the guilt of the defendants apparently was hardly in doubt or in dispute.

The issue that the defense attorney made clear was whether their act should be considered a crime in these days of Alabama's last desperate stand against desegregation. Without remonstrance from the presiding judge, the defense lawyer cried "We must show the Negro race that the white race will not give one inch more in its fight to prevent the downfall of our tradition."

The defense attorney appealed for a verdict that would give encouragement to "every white man, every white woman, every white child, in the South who is looking to you members of the jury to preserve our sacred conditions."

Mr. Chairman, this is an illustration of the failure of criminal prosecutions against white defendants in these charged race tensions. That is why we bring in this bill to get away, if we can, from criminal prosecutions which bring in their train these horrible conditions, because our bill provides for a civil remedy, that the Attorney General shall go into equity and seek an injunction to prevent the wrong or the evil before it starts and before it spreads. Criminal prosecutions under the conditions that I have mentioned stir up still further ill feelings, strife, and danger. That case, if it can be cited for anything at all, points up the need to pass the bill before us.

State officials are then not subject to the indignity of insult and possible bodily harm from an aroused mob because they do their duty and prosecute to the full extent of the law. The Montgomery case is another case where racial animosities and excitement preclude a petit jury from rendering a just verdict.

With reference to trial by jury, it is interesting to note that we passed in this House in the last few decades some 28 or 29 specific measures of great importance in gravity where there is provided the right of the court or the judges to issue injunctions and if those injunctions are violated the judge can mete out punishment by virtue of inflicting a jail sentence or a money penalty without trial by jury.

Let me name you some of those statutes. All of the antitrust laws provide for restraining violations under direction of the district court without trial by jury. Associations engaged in the marketing of acquatic products, the association of producers of agricultural products that may be restraining trade, also the Atomic Energy Act, the bill providing for bridges over navigable rivers. Injunctions are provided there with no right of trial by jury. The Clayton Act, the Utility Companies Act, the False Advertisement Act, the Freight Forwarders Act, the Fur Products Labeling Act, the enclosure of Public Lands Act, all the various acts involving the Securities and Exchange Commission. In all of these very important acts the district court has a right to issue injunctions for violations of its order and the violator or contemner can go to jail.

Never have I heard a word of protest when we passed all these SEC acts. Where were those gentlemen who now come forward and who indicate grave anxiety here about the protection of civil rights when we were passing those bills?

Then we have the Fair Labor Standards Act, providing for injunctions against labor; the Longshoremen's and Harbor Workers Act; the Import Trade Act; the Wool Products Act; the Stockyards Act; the Submarine Cables Act; the Sugar Quota Act; Water Carriers in Interstate and Foreign Commerce Act; the Flammable Fabrics Act; the National Housing Act.

Now, those are highly important acts, yet the district court has the right to issue an injunction for the violation of which the court can, in addition, put a man in jail or inflict the sanction of fines.

Mr. BASS of Tennessee. Mr. Chairman, will the gentleman yield?

Mr. CELLER. I yield to the gentleman from Tennessee.

Mr. BASS of Tennessee. I would like to point out and to also remind the gentleman that all of those acts which he has mentioned deal with the business activity of the individual instead of the personal or social activity of the individual, do they not?

Mr. CELLER. No. Would you say the Longshoremen's and Harbor Workers Act is a matter appertaining only to industry? There are humans involved there.

Mr. BASS of Tennessee. There are humans involved in all business activity, but that is an act which deals with a specific business operation.

Mr. CELLER. It refers to the laboring man, the workingman.

Mr. BASS of Tennessee. The gentleman also mentioned the Labor Act, and I would remind the gentleman of the

Norris-La Guardia Act, which guarantees a trial by jury in the case of injunction where strikes are involved——

Mr. CELLER. You can find no case under the Norris-La Guardia Act where the Government was a party and there was a trial by jury in a contempt case.

Mr. BASS of Tennessee. It is a part of this, though, where they would not ordinarily be.

Mr. CELLER. No; I do not agree with the gentleman on that.

Mr. WILLIS. Mr. Chairman, will the gentleman yield?

Mr. CELLER. I yield to the gentleman from Louisiana.

Mr. WILLIS. The Norris-La Guardia Act provides that a right of trial by jury is available in all cases arising under the act.

Mr. CELLER. Under the act, but it is limited to the act itself. But, I can tell the gentleman that subsequent acts like the National Labor Relations Act, the Wagner Act, the Taft-Hartley Act, waive those provisions of the trial by jury, so that it would be as hard as finding a needle in a haystack to find any case under these acts where there was a trial by jury.

Mr. WILLIS. As a matter of fact, the Taft-Hartley law does not, in terms, repeal the Norris-La Guardia Act, is that not correct?

Mr. CELLER. I am not going to enter into a discussion of that act now.

Mr. WILLIS. And it does not use the word "waive," either, does it?

Mr. CELLER. I must disagree with the gentleman. It does not repeal, but it does waive the act.

Mr. WILLIS. Does it say that, waive the act?

Mr. CELLER. The words used are "shall not be applicable."

Mr. WILLIS. The jurisdiction of the court should not be limited to the provisions of the Norris-La Guardia Act.

Mr. CELLER. Well, I do not want to get into an argument on the semantics of this question.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. CELLER. I yield to the gentleman from Illinois.

Mr. YATES. Does the Taft-Hartley Act not permit a court to issue an injunction without a jury trial?

Mr. CELLER. Yes; it does.

Mr. BASS of Tennessee. Mr. Chairman, if the gentleman will yield further, but the gentleman has not pointed out one single case where an individual, accused of an infraction of the law in dealing with his fellow man, from a human relation standpoint, has not been afforded the protection of a right of trial by jury.

Mr. CELLER. If any man is guilty of an infraction of the law, he is guilty of a crime, and he is entitled to a trial by jury. This is not a case of infraction of law; we are speaking of the case of violation of an injunction. It might be interesting to point out that there are many cases of injunction where there is no trial by jury. You have them in your everyday life. If a man makes an agreement for the purchase of real estate, for example, and the purchaser of the real estate finds that the seller, at the closing date, refuses to pass title or sign the deed, he goes into court and he demands specific performance. The court says to the vendor: "You must give a deed; you must comply with the terms of the contract," and if the vendor refuses to comply with the order of the court, he is guilty of contempt. There is no jury trial. We never have a jury trial in a case like that.

In the case of payment of alimony, a man may refuse to pay alimony to his wife, who goes into court and the court orders the guilty husband to pay the alimony. If he does not pay, the judge may send him to jail until he pays. Of course, he holds the key to the jail in his own hands. He can open the gate of the jail by paying the alimony. But there is no jury trial. So it is in cases of the custody of children; so it is in the question of divorce and divestiture by order of the court in antitrust proceedings. Even in a Federal tort claim, where one sues the Government for a Federal tort, there is no trial by jury, whereas you may have a trial by jury involving anybody else or any other entity. But I have never heard any remonstrance when we brought out the Federal Tort Claims Act, that the bill was faulty because it lacked trial by jury. There are many other instances where we do not have trial by jury.

H. R. 6127 was piloted through the Committee on the Judiciary with considerable difficulty. We finally got it past the shoals and the reefs. There had been a concerted effort to batter it beyond recognition. We have it now before us almost undamaged.

I say that the proposals are moderate. The bill consists of four major parts. The first establishes a Commission on Civil Rights. The second provides for the appointment of an additional Assistant Attorney General. The third strengthens the existing civil-rights statutes. The fourth provides means of further securing and protecting the right to vote.

The bill before us is substantially similar to the bill, H. R. 627, which passed the House in the second session of the 84th Congress. That bill contained four provisions similar to the ones I have just referred to. There are, however, certain differences of a substantive nature between the two bills. These major differences relate to the rules of procedure of the Commission; the limitation on the subpena power of the Commission; the restraint and penal provisions for the wrongful disclosure of evidence obtained by the Commission in an executive session.

H. R. 6127 does not impose upon the Commission the duty to investigate allegations of unwarranted economic pressure, as did the previous bill. Under the bill before us the allegations of complaint must be in writing verified.

Among the duties placed upon the Commission is the duty to study the legal developments which constitute denial of equal protection of the laws, but this duty does not include the economic and social aspects of that subject, as did the bill that was passed in the last Congress.

The bill now under consideration differs from the one of last year in that H. R. 6127 restricts the utilization by the Commission of voluntary and uncompensated personnel and limits the number of such personnel to be utilized at any one time to 15. You may recall that last year's bill contained no such restriction.

And finally, another major difference between the two bills is that the instant bill restricts the authority of the Attorney General as set forth in parts 3 and 4 to institute civil actions in certain cases for equitable relief only. Under the old bill, the Attorney General could also bring an action at law to recover damages for the benefit of the real party in interest. H. R. 627, the act which was passed in the last Congress had a provision that the written request of the aggrieved party was necessary. But that provision is not required in the bill now under consideration.

The instant bill contains a 6-man bipartisan Commission on Civil Rights whose members are to be appointed by the President and confirmed by the Senate. Its Chairman and Vice Chairman would be designated by the President and its quorum is fixed at four members. The Commission is a temporary one and will expire 2 years from the date of enactment of the bill.

The rules of procedure of the Commission are the same as those which govern the committees of the House. For example, the chairman is required to make an opening statement as to the subject of the hearing. Witnesses are furnished with a copy of the Commission's rules and may be accompanied by counsel. The chairman is authorized to punish breaches of order by censure and exclusion. Protection is furnished to witnesses when it appears that a person may be the subject of derogatory information by requiring such evidence to be received in executive session, and affording the person affected the right to appear and testify, and further to submit a request for subpena of additional witnesses.

Mr. ABERNETHY. Mr. Chairman, will the gentleman yield?

Mr. CELLER. I yield to the gentleman from Mississippi.

Mr. ABERNETHY. Would the gentleman take some time and give us some idea of what the Commission is expected to do and what it is supposed to investigate? From listening to the gentleman's speech, and I do not say this in any criticism, I assure the gentleman, the findings have already been made by the gentleman himself and I assume that they have been made by a majority of the members who voted to report the bill. What I am trying to find out is, What is the necessity for the Commission? What is the Commission going to do? To follow the gentleman's speech, I would conclude that the verdict is rendered.

Mr. CELLER. The gentleman has not asked a question, he has given me a self-serving declaration.

Mr. ABERNETHY. I am seeking information.

Mr. CELLER. I understand that, and I respect the gentleman, but if the gentleman would be good enough to read

pages 5 and 6, starting at line 18, he there would see the duties of the Commission very carefully stated. They are to "investigate allegations in writing under oath or affirmation that certain citizens of the United States are being deprived of their right to vote by reason of their color, race, religion, or national origin; which writing, under oath or affirmation, shall set forth the facts upon which such belief or beliefs are based; study and collect information concerning legal developments constituting a denial of equal protection of the laws under the Constitution; and appraise the laws and policies of the Federal Government with respect to equal protection of the laws under the Constitution."

The Commission shall submit interim reports, and then shall terminate its activities after making a final report at the conclusion of 2 years.

Mr. ABERNETHY. I read that, but I should like to ask the gentleman some questions about these duties, and what the testimony was before the committee. On page 5, line 19, I read these words:

> The Commission shall investigate allegations in writing under oath or affirmation that certain citizens of the United States are being deprived of their right to vote by reason of their color, race, religion, or national origin.

I presume that when the gentleman presented his bill he had testimony to the effect that people had been deprived of their right. I endeavored to find out yesterday what faith is there in the United States, or religion, or what people of what faith are being denied their right to vote because of their faith.

Mr. CELLER. I read from the hearings before the Senate.

Mr. ABERNETHY. What testimony did the gentleman's committee have on that?

Mr. CELLER. We had testimony, not exactly like it, but of similar import:

> Mr. BROWNELL. We have hundreds of complaints based on deprivation of the right to vote based on color.
>
> We have not had any complaints at all in the 4 years that I have been there that anybody was denied the right to vote because he was or was not a member of a labor union.
>
> Senator HRUSKA. And yet if it did arise and did occur, if there is anything of that kind, would not this Commission be interested in it?
>
> Would you as the administrator of the Department of Justice be very interested in it?
>
> Mr. BROWNELL. I believe we could take care of that under existing law. I have never heard of a case arising. We have to take first things first. The problem here seems to be the one as to which we get complaints practically every day, that there is discrimination on account of color in this area.
>
> As I say, if Congress after its study decides that that is an important issue that should be studied, I believe it should be separately studied. I believe it should be studied by people who are experts in the field of labor and labor relations.
>
> Senator HRUSKA. How many complaints does your Department have with reference to deprivation of the vote on the ground of religion?
>
> Mr. BROWNELL. We have some.
>
> Senator HRUSKA. How many?
>
> Mr. BROWNELL. I could not give you the exact number, but it is substantial enough to make us feel there is a serious problem there.

Mr. ABERNETHY. Who asked that question?

Mr. CELLER. The questions were asked by Senator HRUSKA.

Mr. ABERNETHY. When was that question propounded of the Attorney General?

Mr. CELLER. The date of the hearings?

Mr. ABERNETHY. Yes; what date was it?

Mr. CELLER. If the gentleman will bear with us a moment, the hearings were so long, we have to thumb through the pages.

Mr. ABERNETHY. I would like to know. It is important.

Mr. CELLER. It was on Saturday, February 16, 1957.

Mr. ABERNETHY. The gentleman's bill was reported on April 1, 1957. I am assuming, although the gentleman did not cite that information on yesterday when I asked this question, that he had that information yesterday when I propounded the question. If the gentleman had the information also before April 1, when he reported this bill, why did not the gentleman interrogate the Attorney General on that matter when he was before the gentleman's committee?

Mr. CELLER. In the first place, this is not the first bill that we have had. We had a bill 2 years ago. That bill contained the word "religion" in it. We had information in the hearings with reference to it.

Mr. ABERNETHY. Will the gentleman cite me one question propounded by the members of his committee or his subcommittee inquiring of the Attorney General what people of what religious faith in the United States are being denied the right to vote because of their religion?

Mr. CELLER. I am not going to argue with the gentleman that people were discriminated against because of their faith. I just read the gentleman some testimony concerning voting and that the Attorney General indicated they had a number of complaints on discrimination against people voting because of their faith.

Mr. ABERNETHY. Well, what faith? Let the House know what faith. That is what we want to know.

Mr. CELLER. I am sorry I cannot tell you what faith. I am resting upon the assertion of the Attorney General, and I believe the Attorney General. Therefore, on the basis of what the Attorney General said for the commission to be set up to investigate this matter.

Mr. ABERNETHY. May I ask the gentleman another question. And I assure the gentleman I am not trying to embarrass him nor is it my purpose to delay.

Mr. CELLER. Just a moment. The gentleman said I did not state certain things to him yesterday. If the gentleman will look at page 8410 of the CONGRESSIONAL RECORD.

Mr. ABERNETHY. I assure the gentleman I heard what he said yesterday.

Mr. CELLER. May I remind the gentleman that I have the floor and the gentleman will have to listen. As I said, referring to the RECORD at page 8410, it reads as follows:

> Mr. CELLER. Mr. Speaker, will the gentleman yield further?
>
> Mr. SCOTT of Pennsylvania. I yield.
>
> Mr. CELLER. Attorney General Brownell testified that he had received complaints of discrimination concerning voting, based upon religion. The Attorney General did so testify.

Mr. ABERNETHY. I do not dispute that. The gentleman did very definitely state that. What I said was that the gentleman has just cited testimony from the Senate hearings. I interpreted what the gentleman had to say just now and on yesterday that he was speaking of his own hearings. Let me ask the gentleman another question, and I ask this in all seriousness. Does the gentleman know of any person who is being denied the right to vote or anyone who is endeavoring to deny any person of the right to vote because of the religious faith of that particular person? If he does, let us have the details and then there will be some reason for this authority to investigate being included in the bill.

Mr. CELLER. I personally do not know of any, but I would suggest the gentleman take time out to read a very illuminating article that appeared in "Look" a few weeks ago.

Mr. ABERNETHY. The magazine "Look" is not an authority. This committee is the authority for reporting this bill.

Mr. CELLER. If the gentleman is willing to listen, I can answer him, otherwise, I cannot answer the gentleman. There is a very illuminating article in Look magazine entitled "Klan Brings New Terror to the South." And there is unfolded in that very illuminating article by chapter and verse many of the excesses being practiced by the Klu Klux Klan in various States in the South resulting in discriminations and resulting in the corrosion of certain civil rights of certain peoples. I think we have the right to take legislative cognizance of that article and other similar articles that appear in the daily prints. I think it is incumbent upon this Commission, when it is formed, to check on these articles and to summon before it the writers of these articles and to question them and get on the record the complete story. If the gentleman is anxious to combat any conclusions reached by those authors and those investigators, I am sure that the Commission would be glad to welcome the gentleman from Mississippi and hear him at length.

Mr. ABERNETHY. I appreciate the gentleman's suggestion. Of course, when the Commission begins its investigation I shall be happy to appear.

May I ask the gentleman one final question?

Mr. CELLER. I am always happy to yield to the distinguished gentleman from Mississippi.

Mr. ABERNETHY. Did the Look magazine article, which the gentleman just cited, cite instances of any particular religious faith which was being

denied the right to vote because of their faith?

Mr. CELLER. I will be glad to put this article in the RECORD.

Mr. ABERNETHY. Will the gentleman answer the question?

Mr. CELLER. Yes. If you will read it carefully. I will put this article in the RECORD, and you can read it at your leisure.

Mr. ABERNETHY. I am a member of the Methodist church. Are any Methodists complaining that they are being denied the right to vote because they are Methodists or Protestants?

Mr. CELLER. I refuse to answer that. I do not know what church is doing it. I am simply saying that the Ku Klux Klan is doing it.

Mr. ABERNETHY. Who is the author of the article? Is he complaining?

Mr. CELLER. Is he complaining what?

Mr. ABERNETHY. That he is being discriminated against or denied the right to vote.

Mr. CELLER. No. He is just making a factual report. He is putting it in a responsible publication called "Look magazine."

Mr. ABERNETHY. Did he come before the committee voluntarily and give you this information?

Mr. CELLER. I think these questions are incompetent, irrelevant, and immaterial. They have no bearing on this matter at all. I am sorry I have to say that.

Mr. ABERNETHY. I would like to say one other thing. I think, in all fairness to the Members of this House, that since the hearings do not disclose the object of this authority conferred upon the Commission, that those who support the bill certainly ought to disclose to the Members of the House the object of conferring the authority upon the Commission, and cite us some instances for the necessity of so doing. I think that would be fair.

Mr. CELLER. I think the Members will take deeply into consideration the admonitions of the gentleman from Mississippi.

Mr. DIES. Mr. Chairman, will the gentleman yield?

Mr. CELLER. I yield to the gentleman from Texas.

Mr. DIES. The gentleman has studied this bill and is familiar with it. Under the terms of the bill, if enacted, will the gentleman answer this question: Let us assume that certain persons have been deprived of the right to vote. Now those persons can come before the Commission and have the matter investigated, or they can go to the Attorney General and have the guilty persons prosecuted, or they can have an injunction issued to prevent it in the future. Is that true?

Mr. CELLER. No; I do not think that is true. It may be that under the old Ku Klux Klan statutes, which were passed in 1871, where there is a conspiracy to deprive an individual of his right to vote—that means more than one individual is involved—he has the right to proceed for damages or by injunction, individually. But unfortunately those individuals in those States know nothing about the statute. They are either too ignorant to know what those statutes are, or if they do know what those rights are they cannot hire lawyers so that they can protect their rights, so that they could go into court. I would say that those statutes have gone into a sort of, shall I say, innocuous desuetude; they are unused.

But we say here in order to give that individual the right to vote we must give him a speedy remedy. If he goes to the Commission he simply places the complaint. The Commission cannot compel the registrar or the board of elections to accord him the right to vote.

But in the last section of this bill we say to the Attorney General that he shall have the right on behalf of the individual aggrieved to compel the board of registration or board of elections, or whatever you may call it, to allow this man to vote. If his name has been stricken from the roll an injunction may be issued by the court to put his name back on the list, and if the registrar, superintendent of elections, or whatever his name may be, refuses to obey the order of the court then he has to suffer the consequences.

Mr. DIES. The gentleman has not answered my question.

Mr. CELLER. I think I have.

Mr. DIES. Let us see if we can understand each other. Let us assume that there are certain persons who have been deprived of the right to vote; they can go to the Commission and on written application have it investigated.

Mr. CELLER. Yes; but by the time the Commission makes its investigation the election will be over. It is an abortive right.

Mr. DIES. I am not arguing the merits; I am simply trying to understand.

Mr. CELLER. I do not want improper inferences gathered from our colloquy here and I want to explain that by the time the Commission would act the election would be over.

This remedy must be speedy. All the Commission can do is to collect facts, examine into the facts and circumstances, and check the complaints, then come to a general conclusion and refer that conclusion to the President. That is all the Commission does. Then the President probably makes a recommendation to the Congress. But we go further than that, I want the gentleman to know.

Mr. DIES. Let us see if we can go back now to this question and get an answer. All I am asking the gentleman is if certain persons were deprived of the right to vote they could go before the Commission and they could make complaint. Is not that true?

Mr. CELLER. That is right; there is no question about that.

Mr. DIES. All right. Now, the same person could go to the Attorney General, and if he had been deprived of the right to vote, under the terms of this act, the Attorney General could proceed against the guilty party.

Mr. CELLER. If we pass this bill; yes.

Mr. DIES. That is what I am assuming. So the aggrieved persons have two choices; they can go either to the Commission——

Mr. CELLER. Or both.

Mr. DIES. Or to the Attorney General, or both; and if the act has already been committed, the Attorney General can prosecute them criminally. Is that right?

Mr. CELLER. It is a question; I do not know whether there can be a criminal prosecution unless there is a prima facie case of a penal violation.

Mr. DIES. If more than one person is involved, it would be a conspiracy.

Mr. CELLER. Yes.

Mr. DIES. Let us assume there is a conspiracy.

Mr. YATES. They could not be prosecuted under this.

Mr. CELLER. No; there is no criminal prosecution in this act at all.

Mr. DIES. What could the Attorney General do if the aggrieved person went to him instead of going to the Commission?

Mr. CELLER. The gentleman is assuming that this bill is passed.

Mr. DIES. I am assuming that the bill will pass.

Mr. CELLER. The Attorney General then would instruct one of his assistants in the particular area where the individual comes from and would examine into the facts. If he found that, for example, the name had been stricken from the voters' list, he would do some checking. Then he could ask that the voters' list be revised; and if it is not done, he could go into court, and the court could then say upon the petition of the Attorney General representing the United States and setting forth the facts and asking as relief that this man's name be reinstated on the election roll.

Mr. DIES. Since the Attorney General can do this, and it is his duty to do it, why have the Commission?

Mr. CELLER. The Commission's purpose is entirely different. The appeal to the Attorney General is for a remedy so that the man can have his rights immediately conserved. The purpose of the Commission is to make an overall study to get the complete picture throughout the Nation as to whether there is or is not discrimination or the corrosion of civil rights or of the right to vote or the effect on the economic life of the Nation.

Mr. DIES. Assuming that the Commission takes jurisdiction of a particular allegation and has a hearing and those hearings disclose that certain persons are being deprived of the right to vote, would it then not become the duty of the Attorney General to proceed against the guilty person?

Mr. CELLER. He could not under this bill because we provide no criminal remedies under this bill.

Mr. DIES. It is an application for an injunctive measure?

Mr. CELLER. This is not a criminal remedy. This is a civil remedy.

Mr. DIES. I understand that, but they can put him in jail.

Mr. CELLER. Or fined if he violates the injunction.

Mr. WILLIS. Mr. Chairman, will the gentleman yield?

Mr. CELLER. I yield to the gentleman from Louisiana.

Mr. WILLIS. Just two questions on the matter of jury trial. I wish the gentleman would pick up the hearings and refer to page 342. Page 342 is an appendix containing all of the civil rights criminal statutes on the books. I wish the gentleman would look at the middle of the page under the heading "Intimidation of voters" which is taken from section 594 of title 18 of the United States Code. Does the gentleman have that before him?

Mr. CELLER. Yes; I have.

The CHAIRMAN. The gentleman from New York has consumed 1 hour. Without objection, the gentleman from New York [Mr. CELLER] may proceed.

There was no objection.

Mr. CELLER. Mr. Chairman, I yield myself an additional 20 minutes.

Mr. WILLIS. I see the gentleman has read that section. I am sure he will take my word for it later, but I want him to read it. Will the gentleman please pick up the bill and refer to page 11 (b). I will ask the gentleman if I am not correct in saying—I have collated it 4 or 5 times—that the language of paragraph (b) is word for word the language of the criminal statute?

Mr. CELLER. But the language of the act is not criminal.

Mr. WILLIS. Let us get one thing at a time. We do understand each other on that?

Mr. CELLER. Yes. I have not compared it but I will take the gentleman's word it is substantially the same.

Mr. WILLIS. The gentleman may. But he did glance at both?

Mr. CELLER. I will accept that.

Mr. WILLIS. May I ask this of the gentleman: If an application for an injunction were filed in a civil suit pursuant to the language of paragraph 3, and if the allegations of the application for injunction are accepted for the purpose of this question to be true, is it not correct that the Attorney General could go right across the street independently or simultaneously and file an application for an indictment or a bill of information?

Mr. CELLER. No; because one is on the civil side and the other is on the criminal side.

Mr. WILLIS. I think the gentleman understands me. Could not the Attorney General go to the United States criminal district attorney?

Mr. CELLER. Oh, yes; but he would have to prove certain things.

Mr. WILLIS. I want to get this straight, because this is it on the question of jury trial. Is it not true that the allegations, if true, that would justify the application for an injunction in the civil courts, would likewise be also a crime——

Mr. CELLER. Now, you must make the distinction I tried to make.

Mr. WILLIS. I am making a distinction.

Mr. CELLER. Let me please answer.

Mr. WILLIS. I am sorry.

Mr. CELLER. In the case of a criminal statute—page 342—you could not get an indictment or conviction on an indictment unless the United States attorney would prove criminal intent and willfulness.

Mr. WILLIS. Here is the distinction.

Mr. CELLER. Wait, please. Whereas in the case of page 11, the section that you read with reference to the procuring of an injunction, you do not have to obtain all that evidence involving criminal intent or willful conduct.

Mr. WILLIS. Oh, how right the gentleman is, and that is what I am coming to. I thank the gentleman for anticipating what I had in mind.

Mr. CELLER. That makes a big difference.

Mr. WILLIS. It makes all the difference in the world. I know the gentleman is fair-minded and very keen and capable and one of the dearest friends I have, but is it not true, I repeat, that while the Attorney General is reciting facts and dictating a petition for an injunction, he could have an assistant, assuming the facts to be true, file a bill of information before the criminal court at the same time? I agree that the burden of proof is vastly different. That is exactly what I am leading up to.

Mr. CELLER. I would say again there is a big difference, because when he goes on the criminal side he can seek a punishment for that which has occurred, because the action has already occurred; a crime has been committed. When he goes on the other side, the civil side, he tries to prevent the commission of a crime, or he tries to prevent a series of future crimes; so that in the one case, on the civil side, he does not have to go as far in his proof as he does on the criminal side.

Mr. WILLIS. I thoroughly agree.

Mr. CELLER. He can do both, if he wishes.

Mr. WILLIS. Exactly. That is the point.

Mr. CELLER. If, for example, a crime has been committed, then he can go on the criminal side, but he could not go on the other side, because it would not do him any good, because the injunction would be abortive. Only in certain cases could he do both, but he could not do it where the crime has been committed already. It would be useless to get an injunction, because the act has been perpetrated. Does the gentleman follow me?

Mr. WILLIS. I am talking about a jury trial. Having admitted that, the Attorney General, if this bill is passed, can go either before the civil court or the criminal court.

Mr. CELLER. I did not admit that. Wait a minute. I did not admit to the extent the gentleman is saying at all. I said he could do it in certain cases, but he could not do it in a case where the crime had already been perpetrated, because it would be useless and abortive to go on the civil side to get an injunction.

Mr. WILLIS. I am not talking about an injunction.

Mr. CELLER. Then, my answer is not "Yes," as you say it is, because there is a limit here.

Mr. WILLIS. The gentleman knows perfectly well that under the law today, without this bill, if the Attorney General proceeded under this law, the defendant would be entitled to a trial by jury.

Mr. CELLER. Because he has committed a crime.

Mr. WILLIS. Let me ask the gentleman this question, then. Does not this bill take a criminal law that is on the books today and insert it in a civil law to be enforced by injunction and, the Government being a party, there would be no trial by jury. But under the law today, if proceeded against under this very worded bill, he would have a right to trial by jury?

Mr. CELLER. I do not agree with the gentleman because, as I said, in one case the crime has been committed, where they invoke section 243 of title 18 of the United States Code. In the other case there may not be a crime at all; there may be no crime, but there may be a suspicion of that a crime is about to be committed and the man may go into court and say to a judge, "We think there are the earmarks that a crime is about to be committed and we want to prevent that crime; we want an injunction." That is an entirely different proposition.

Mr. WILLIS. The gentleman wants to argue the merits of the case; in my hypothetical question I asked the gentleman to assume the facts to be true, provable beyond a reasonable doubt.

Mr. CELLER. I cannot assume those facts that the gentleman offers because they are not the facts that fit this case. I cannot do that. I wish I could. I would like to say "Yes," to the gentleman, but I must say "No." In one instance you speak of a criminal statute, which you can invoke only after the crime has been committed. In the other case, in this bill, you speak of trying to go into the equity side of the court to get an injunction to prevent a crime before the crime has been committed. You present an entirely different state of facts when you operate under this bill, if it pass, than if you operate under section 243, title 18 of the United States Code. I must stand on that.

Mr. WILLIS. Very well; I have two more questions and I hope we can get along better.

Mr. CELLER. The gentleman and I will always get along.

Mr. WILLIS. Why, surely. It is a fact, though, is it not, that the language of section B was taken from a criminal statute?

Mr. CELLER. That may be.

Mr. WILLIS. And it is true, also, therefore, that proceedings under this act resulting in contempt would be known in law as a criminal contempt?

Mr. CELLER. I am afraid I must disagree with that.

Mr. WILLIS. That is the essence and the wording of the Clayton Act.

Mr. CELLER. I am afraid the gentleman is misguided on that subject and I cannot agree with him; I am sorry, I wish I could.

Mr. HYDE. Mr. Chairman, will the gentleman yield?

Mr. CELLER. I yield to the gentleman.

Mr. HYDE. May I refer the gentleman to page 6 of the report and ask

whether it is not true that the proposition of the gentleman from Louisiana [Mr. WILLIS], is proven by this statement, where the majority says:

The provisions of the legislation, in fact, merely substitute civil proceedings for criminal proceedings in the already established field.

Is not that just the point that the gentleman from Louisiana made?

Mr. CELLER. No. He inferred quite different things from that. I tried to explain that and spent considerable time on it. One is a criminal statute and one is a civil statute. The wording may be the same, but the application is quite different. That is what we must take into consideration, the application of it.

Mr. FORRESTER. Mr. Chairman, will the gentleman yield to me?

Mr. CELLER. If the gentleman would please be brief.

Mr. FORRESTER. I certainly shall and I hope the gentleman will have the opportunity to complete his argument. I want to say here and now that the gentleman has been most kind and considerate and very fair in all of the committee hearings that we had on this measure. The gentleman said he did not know whether or not they were criminal prosecutions that could be applied in cases where a person was denied the right to cast his ballot, that he thought there had to be a conspiracy.

Mr. CELLER. No; I said under those old statutes, under the Ku Klux statutes. They are conspiracy statutes, which we are trying to amend by this bill.

Mr. FORRESTER. Yes, but what I want to ask my distinguished chairman now is, Is it not possibly true that the gentleman forgot the case of *U. S.* v. *Classic* (313 U. S. Supreme Court Reports), where it said this on page 315:

Obviously included within the right to choose, secured by the Constitution, is the right of qualified voters within a State to cast their ballots and have them counted at Congressional elections. This Court has consistently held that this is a right secured by the Constitution.

It cited several cases, then it said:

Since the constitutional command is without restriction or limitation, the right, unlike those guaranteed by the 14th and 15th amendments, is secured against the action of individuals as well as States.

Was not that particular case an indictment on the criminal side of the court in Louisiana, where the point was made by demurrer that the indictment was not valid because it was descending to individuals? The United States Supreme Court in this case held that the indictment was good and the Court erred in sustaining the demurrer.

Mr. CELLER. I always thought the Classic case referred to Federal elections and primary elections, and that is what the main purpose of that case was.

Mr. FORRESTER. It could not be dicta because that very ruling is the very thing the Court sent it back on, and to try the defendant under the criminal indictment.

Mr. CELLER. So what?

Mr. FORRESTER. It charged him with denying certain persons the right to vote and to have the vote counted. There were two counts. The trial court sustained the demurrer, but the United States Supreme Court reversed it and cited several cases. This 313th United States Supreme Court Report is to some extent an old case, probably 15 or 20 years of age.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. CELLER. I yield to the gentleman from Illinois.

Mr. YATES. The gentleman from Maryland made a point with reference to the first paragraph on page 6. He spoke about the last sentence:

The provisions of the legislation, in fact, merely substitute civil proceedings for criminal proceedings in the already-established field.

Should not that sentence be interpreted to mean that the provisions of this legislation merely provide for civil proceedings in addition to criminal proceedings in the already-established field, rather than in substitution thereof?

Mr. CELLER. I think the gentleman's interpretation is correct.

Mr. GREEN of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. CELLER. I yield.

Mr. GREEN of Pennsylvania. Referring to part IV, "To provide means for further securing and protecting the right to vote," in the colloquy the gentleman had with the gentleman from Texas [Mr. DIES], he proceeded to show where there were two ways this matter could be approached. One was by application to the Commission and the other by proceeding before the Attorney General. In discussing it with him, the gentleman said the trouble would be the election would be over and the man would not have an opportunity to vote. Can the gentleman explain to me the practical application of this provision providing that the people have a right to vote? Let us suppose that a man goes into a polling place on election day and finds he is stricken from the list.

Mr. CELLER. If the gentleman will read paragraph 4 on page 11, we first say that no person shall be guilty of intimidation, threatening or coercion or attempt to do that by way of depriving another of his right to vote and whenever that happens or there is reasonable ground to believe that a person is engaging in or is about to engage in that practice, then the Attorney General may institute in the name of the United States a civil proceeding for preventive relief.

Mr. GREEN of Pennsylvania. Suppose that happens on election day?

Mr. CELLER. If I may finish.

Then the Attorney General may institute in the name of the United States a civil proceeding for preventive relief or application for a permanent or temporary injunction or restraining order or other order.

Yes; that could happen on election day even. We have in New York cases where people have been deprived of the right to vote. The attorney general has special agents and they hear these pleas. They rush right into court in all counties. Usually in the metropolitan area there is an especially assigned supreme court judge ready to issue these injunctions to the various election boards and various precincts so that we get speedy relief in New York and that practice could be followed in the district courts.

Mr. GREEN of Pennsylvania. I am not asking the gentleman if the practice can be followed. I am asking the gentleman if that is the practice that is going to be followed because if it happens on election day, the only way a man can actually be given the right to vote is to have a Federal judge sitting there in the Federal court and directing the election board to allow the man to vote.

Mr. CELLER. I imagine that is what would happen. I cannot foretell exactly what the procedure will be. I think we have to allow the Attorney General some leeway and some liberality in that regard. He will probably promulgate rules of procedure to govern him so that the public will know exactly how he will proceed.

Mr. GREEN of Pennsylvania. What I am trying to determine, Mr. Chairman, is if a man is entitled to vote and he goes into an election place on election day and is stricken off the list for some reason, will he be able to vote?

Mr. CELLER. I hope he will be able to vote under this bill. He will be able to get his name reinstated, for example, and I think he would get suitable remedies in that regard.

Mr. GREEN of Pennsylvania. In that case, you would have to have a Federal judge sitting on election day in every county.

Mr. CELLER. Maybe foresight would be the better procedure.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. CELLER. I yield.

Mr. YATES. With reference to the question of the gentleman from Pennsylvania, no distinction should be drawn between the case of a person who is not on the voting list and the person whose name is on the voting list and whose name has been stricken off the list. I think with respect to the right of a Federal court to enjoin action, the Federal court would have the right to protect all persons who are entitled to vote. If a person is entitled to vote, the court would have the right to compel the board to put the person's name on a voting list; is that correct?

Mr. CELLER. I think the gentleman is correct.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. CELLER. Mr. Chairman, I ask unanimous consent to revise and extend my remarks so as to include a more mature and detailed explanation of the bill, and then I want to read this brief statement.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

Mr. LAIRD. Mr. Chairman, reserving the right to object. I would like to know just how the time is being divided here. I have been waiting for an hour

and a half to hear the able and distinguished ranking minority member of the Committee on the Judiciary speak on this bill and thus far we have not been able to hear a Member on this side of the aisle. I wonder how the time is being divided.

Mr. CELLER. I will be finished in a few minutes provided, of course, I am not guilty of being rude to Members who are asking me questions and not replying to them. I do not want to be rude.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. CELLER. Mr. Chairman, I yield myself 5 additional minutes.

Mr. Chairman, the statement I want to read is as follows:

"Men and women too long denied their rights become less of models of patience and tolerance. We court far greater dangers by ignoring the denial of constitutionally guaranteed rights than by the passage of moderate legislation permitting the ballot box to rule rather than pent-up emotions of men and women long denied their rights as citizens of a free country. Both in the 84th and 85th Congresses, exhaustive hearings were held. Nobody was denied an opportunity to be heard. Consideration of the bill in full committee was earnest and searching. Each one was permitted to have his say without hindrance. Now the bill finally is before the House. The hearings are printed. The facts, the theories, the fancies, the passions are all before this body. The House has before it this opportunity to work its will. The House has before it this opportunity to say whether the Constitution reflects its adherence to the dignity and equality of opportunity for all people whose shield it is and whether these principles shall be reaffirmed and the precious gift of life shall be honored.

Mr. HARRIS. Mr. Chairman, will the gentleman yield?

Mr. CELLER. I yield.

Mr. HARRIS. I thank the gentleman for yielding, and I join with others in thanking the gentleman for his generosity in yielding. I want to refer back to the question which the gentleman from Illinois [Mr. YATES] brought up a few moments ago, which I think is an important question. That is with reference to the authority this bill extends on election day. In our State we have what is referred to as county commissioners—three in each county. They have supervisory control over elections on that day. When any question comes up it is carried to that board for regulating and guidance. We also have in our State a provision of State law for absentee voting. On many occasions a particular ballot will come in for an absentee vote and a question will arise as to whether or not it complies with the State law. That question is then referred to the county board for decision. Do I understand from the chairman of this great Committee on the Judiciary, who knows this subject so well, that this bill would in fact supersede the State laws and the authority of the county commissioners on a particular problem of that kind?

Mr. CELLER. I would not say that. I would say if the facts are as you state them, I hardly think any United States attorney would interfere in such case. Your facts do not meet the provisions set forth in the bill.

Mr. HARRIS. But, under the provisions of this bill, could he?

Mr. CELLER. There is a provision that a party aggrieved may not exhaust his State remedies, but under your facts the provisions in the bill do not apply, there is no intimidation or coercion.

Mr. HARRIS. I understood you to say that that situation could prevail and you could go right into a court on election day and file proceedings and the judge would render a decision then.

Mr. CELLER. Only where the occasion fits this language on page 11, line 11 and following:

No person, whether acting under color of law or otherwise, shall intimidate, threaten, coerce, or attempt to intimidate, threaten, or coerce any other person.

If he does that, then I think this law can be invoked.

Mr. SMITH of Virginia. Mr. Chairman, will the gentleman yield to me for a moment?

Mr. CELLER. I yield.

Mr. SMITH of Virginia. I being from one of those so-called backward States, Virginia——

Mr. CELLER. I do not want to have it inferred that I said Virgina was a backward State.

Mr. SMITH of Virginia. Before coming here I was a State judge, and it was a habit of the State judges then, and it is now, that on election day they sat in chambers informally. Anybody who had any question about voting or who was refused the right to vote, could go into the judge's chamber, and he would hear the case informally and decide it just that quickly. If you are going to take that out of the hands of our judges, I am sure they will all go fishing on election day.

Mr. CELLER. I did not say that, sir.

The CHAIRMAN. The time of the gentleman from New York has again expired.

(By unanimous consent, Mr. CELLER asked for and was granted 2 additional minutes.)

Mr. CELLER. I do not say that to the gentleman; I say that if the action is that which can come under the words which I read, "intimidation, threatening, coercion," then the provisions of this act can be invoked. It must cover those points; if it does not then it is perfectly all right.

Mr. SMITH of Virginia. The gentleman has been very patient. He knows I have wanted to discuss with him on the floor and we have had several agreements as to when we were going to debate it, that is, the question of whether the Norris-LaGuardia Act had been repealed or revised, whether the right of trial by jury of labor unions had been taken away from them. Will the gentleman fix the hour?

Mr. CELLER. That is going to be a very abstruse and difficult technical subject.

Mr. SMITH of Virginia. Not at all.

Mr. CELLER. I would be glad to, shall I say, fence with the gentleman and meet him in the field of combat on that subject, say on Monday. I do not want to take any more time now.

Mr. SMITH of Virginia. No. The gentleman has been very patient. There are a number of questions I would like to ask him.

Mr. CELLER. Would Monday be all right?

Mr. SMITH of Virginia. I think so, but I want some time.

Mr. CELLER. Mr. Chairman, I will not consume any more time now.

The CHAIRMAN. The gentleman from New York [Mr. CELLER] has consumed 1 hour and 27 minutes.

The gentleman from New York [Mr. KEATING] is recognized.

Mr. KEATING. Mr. Chairman, I yield myself 25 minutes.

Mr. Chairman, in the interest of orderly procedure I ask that I be not interrupted, because I want to explain the provisions of this bill. I will then yield the floor and allow others who have been pressing me for time to be heard; and I give you my word that later today, or tomorrow, or Monday, I will return to the floor for the purpose of being interrogated as much as any Member wishes to interrogate within reason.

Mr. Chairman, almost 100 years have passed since the Great Emancipator, Abraham Lincoln, issued his proclamation. And it is almost that long ago that Congress enacted, and the States ratified, amendments to the Constitution guaranteeing the rights and privileges of American citizens against State or Federal action.

The Negro race has come a long way since 1863. Many of our leading citizens today are members of that race. In many sections of this country the Negro now has the same economic opportunities, the same educational opportunities, and the same political opportunities as white members of his community.

These opportunities have become a reality only through the gradual acceptance on the part of the people of one change after another. The process has been a slow one. The rate of progress may have been at times frustrating to many of those directly involved. But the problem has been so fraught with emotion that any attempt at revolutionary advances would not only have been unsuccessful, but unwise.

Those advances that have been made, have been spurred on, in many instances, by legislation and court action. There has always been an initial reaction against any advance, but acceptance has just as always followed in good time.

But there are today some places in this country, both in the North and in the South, where all our citizens have not been accorded equal treatment under the laws and where attempts have been made by one means or another to deprive them of their right to vote.

Both the Republican and the Democratic Parties have pledged themselves to take action to correct this situation. H. R. 6127, now before you, is the proposal which President Eisenhower recommends and supports.

Let me explain the provisions of that proposal. It is substantially similar to the bill which was passed by the House on July 23 of last year by a vote of more than 2 to 1. Since then, however, so

much has been written and spoken about this measure that there is little wonder many have lost sight of what the bill actually provides. For that reason, before debating its merits, we should examine closely all of its provisions.

I. COMMISSION ON CIVIL RIGHTS

Part I establishes a six-member bipartisan Commission on Civil Rights appointed by the President with the advice and consent of the Senate. The President is to designate the Chairman and Vice Chairman, and four members of the Commission will constitute a quorum.

Members of the Commission not in the service of the Federal Government will be paid $50 for each day of work devoted to the Commission, plus travel expenses and subsistence.

The Commission is empowered only to study and investigate. It will not have power to prosecute, nor, of course, any power to legislate. The purpose of the Commission is primarily to determine whether there is need for further legislation in the field of civil rights. It is to complete its work in 2 years.

Investigations by the Commission will be bound by rules of procedure modeled after those applicable to congressional committees. A copy of these rules must be made available to every witness who appears before the Commission.

Witnesses before the Commission have the right to counsel, and the Chairman has the power to punish breaches of order and decorum on the part of counsel by censure and exclusion from the hearings.

If it should find that evidence or testimony about to be adduced at any hearing might defame or incriminate any person, the Commission must receive it in executive session and must afford the person involved an opportunity to appear voluntarily as a witness. In addition, the person involved may, through the Commission, subpena additional witnesses in his own behalf.

Brief and pertinent sworn statements in writing may be submitted by witnesses and included in the record at the discretion of the Commission.

For the further protection of persons who may be affected by investigations conducted by the Commission, we have inserted another provision, which is not found in the rules of the House pertaining to Congressional hearings. The bill makes the unauthorized release or use of evidence or testimony taken in executive session punishable by a fine of $1,000 or imprisonment for not more than 1 year.

To avoid the necessity of extensive travel on the part of witnesses, the Commission may not issue a subpena for the attendance of any witness at a hearing to be held outside the judicial circuit in which the witness is either found, resides or transacts business. Witnesses are entitled to the usual fees for mileage, attendance and subsistence.

The Commission is to investigate allegations that persons are being deprived of the right to vote by reason of race, color, religion or national origin.

To avoid the Commission's instituting unwarranted investigations, all allegations must be in writing, under oath or affirmation, and must set forth the facts upon which they are based.

The Commission is also to collect information about any legal developments which it is claimed might constitute a denial of equal protection of the laws under the Constitution, and to appraise not only the laws but also the policies of the Federal Government with respect to this problem.

In addition to interim reports, the Commission must submit to the President a final report, with recommendations, not later than 2 years from the date of the act. Sixty days after submission of the final report, the Commission will cease to exist.

The Commission is authorized to appoint a staff and to utilize the services of voluntary, uncompensated personnel, not in excess of 15 at any one time. It is also given the power to constitute advisory committees and to consult with such representatives of State and local governments and of private organizations as it may deem advisable. As to members of the Commission and uncompensated personnel, the conflict-of-interest statutes are waived, as is usual in such cases.

The Commission, or any subcommittee authorized by the Commission, may hold hearings and may issue subpenas for the attendance and testimony of witnesses or the production of written or other evidence in accordance with its rules of procedure. If any witness should refuse to obey a subpena, or refuse to testify, the Attorney General may apply to the Federal district court within the jurisdiction of which the witness is found, resides or transacts business, to issue an order requiring the witness to appear and give testimony on the matter under investigation. If the witness fails to obey the court order, he may be punished for contempt.

II. ADDITIONAL ASSISTANT ATTORNEY GENERAL

Part II of the bill establishes in the Justice Department one additional Assistant Attorney General, who is to be responsible for the enforcement of any criminal or civil statutes relating to civil rights. At present, there is, in the Justice Department, a section of the Criminal Division known as the Civil Rights Section. One of its purposes has been to conduct prosecutions of violations of Federal laws enacted for the protection of civil rights. But it is also charged with other functions and duties.

The problems involved in civil rights legislation and litigation, however, require the attention of personnel trained especially in this field. Moreover, if the proposed bill becomes law, there will be involved not so much criminal prosecutions as civil remedies. For these reasons a separate Division on Civil Rights should be established, separate and apart from the Criminal Division.

III AND IV. AMENDMENTS TO EXISTING LAW

Parts III and IV of the bill propose amendments to existing statutes designed to strengthen civil rights laws and to further secure and protect the right of citizens to vote. These amendments would not create any new rights but would provide a remedy hitherto unavailable.

Section 1985 of title 42 of the United States Code, often referred to as the Ku Klux Act, at present gives a right to recover damages to one injured or deprived of his rights as a result of certain conspiracies described in the section. There must be a conspiracy. There is no right of action against one who has acted alone.

The first subsection of section 1985 is directed at those who conspire to interfere with an officer of the United States in the discharge of his official duties. The second subsection relates to conspiracies to obstruct justice through the intimidation of parties, witnesses or jurors. The third subsection is directed against those who conspire by force, threat, or intimidation, to deprive another of equal protection of the laws, of equal privileges and immunities under the laws, or of the right to vote in Federal elections.

Part III of the bill before us now would add to section 1985 two additional subsections. The first subsection creates a new remedy by authorizing the Attorney General to bring a proceeding for preventive relief whenever any persons have engaged in, or are about to engage in, any of the acts now prohibited under the statute. Any such proceeding would be instituted for, or in the name of, the United States, and the United States would be liable for costs the same as a private individual.

While this new subsection would create a remedy designed more effectively to accomplish the purposes of the present law, it is certainly a moderate change. It does not proscribe conduct not already prohibited by the law, and there still must be a conspiracy of one or more persons to give rise to an action.

A further fact to bear in mind is that where the Attorney General seeks to enjoin threatened acts, he must establish that there are reasonable grounds to believe that a threat exists. So much has been said about this so-called unlimited power we are putting into the hands of the Attorney General that many may have lost sight of the fact that the Government has the burden of proving that there are grounds for injunctive relief. An impartial court must rule on that question after a trial at which the defendant will have full opportunity to present any evidence to meet the Government's case.

Unless the court is satisfied that unlawful acts are being committed or are threatened, no injunction will or can be granted. And without an injunction there can, of course, be no contempt proceedings. If the court has acted arbitrarily or on insufficient evidence or has committed error of any kind, the defendant has the usual right to have the case reviewed on appeal. So it is the court, and not the Attorney General, that will have the power in these cases.

The second new subsection to be added to section 1985 confers upon Federal district courts jurisdiction over proceedings instituted by the Attorney General, regardless of whether the injured party has exhausted State administrative or other remedies.

Since the whole purpose of adding this new remedy is to afford a person whose rights are threatened adequate and speedy relief, to require him to exhaust State judicial and administrative remedies would be to defeat that purpose.

Actually, insofar as the exhaustion of judicial remedies is concerned, the Supreme Court has ruled, in *Lane* v. *Wilson* (307 U. S. 268 (1939)), that a party need not exhaust State judicial remedies before resorting to a Federal court for relief under Federal civil-rights statutes.

On the other hand, the proposed amendment to section 1985 would change existing case law with respect to the exhaustion of State administrative remedies. Nevertheless, if it were necessary for complainants to resort to State administrative remedies prior to seeking injunctive relief in Federal courts, there is little doubt that the harm threatened would in most instances be suffered or the opportunity to vote would pass before relief could be made available. Furthermore, the door would be left open to the creation of all sorts of administrative procedures to block effective relief under this bill.

While part III of the civil-rights bill attempts to strengthen statutes which have been enacted for the protection of civil rights in general, part IV is directed specifically at the right to vote. It amends section 1971 of title 42.

The present section provides that every citizen who is otherwise qualified to vote in any election shall not be deprived of the right to vote by reason of his race or color, regardless of any constitution, law or custom. This section presently declares a right without providing a remedy for its violation.

The proposed bill would add three new subsections to section 1971. The first would make it unlawful for a person, whether acting under color of law or otherwise, to interfere, or attempt to interfere, with the right of any other person to vote for any candidate for Federal office at a general, special, or primary election. The law now provides that a person guilty of such conduct shall be liable to the party injured in an action at law or a suit in equity. The proposed amendment to section 1971 would authorize the Attorney General to bring the action which at present can only be brought by the injured party.

The need for such a provision is quite obvious. There are many cases in which the individual deprived of the right to vote either does not realize that he has a remedy or is reluctant to pursue it. While to the individual the right to vote may not be worth the expense and, in some cases, the hazard of enforcing it, when whole groups of individuals cannot exercise that right, the public interest becomes affected. The remedy is proposed, therefore, as much for the protection of the public as for that of the individual.

I cannot foresee the probability of the Attorney General's acting in behalf of one or only a few citizens. He can be expected to step in for the most part where a number of citizens find themselves unable to vote through one device or another employed by voting officials.

Those are the provisions of the civil-rights bill recommended and supported by the President. It is a bill to insure to all citizens of this Nation the rights, privileges and immunities and equal protection of the laws, all of which are guaranteed by the Constitution.

It is a moderate proposal. It imposes no harsh penalties. It creates no new rights. It simply affords new remedies designed to strengthen and protect existing rights.

As a matter of fact, H. R. 6127 is, in many respects, a "watered down" version of the civil-rights bill which the House passed in the 84th Congress. In the first place, the powers of the Commission have been restricted with the addition of provisions designed specifically to protect citizens who appear before it.

The subpena power of the Commission is now limited to the judicial circuit in which the witness is found, resides or transacts business. Moreover, the willful and unauthorized disclosure of evidence adduced at an executive session of the commission has been made punishable offense.

The scope of the Commission's investigations has been substantially reduced in this year's bill. Last year we authorized the Commission to investigate allegations of unwarranted economic pressure applied to persons because of their color, race, religion, or national origin. That phrase, "unwarranted economic pressure," has been stricken in the bill before us.

Complaints filed with the Commission must now be not only in writing but also verified.

Even the field of study to be conducted by the Commission has been limited. While the bill last year provided for the study of economic and social developments constituting a denial of equal protection of the laws, the present bill authorizes the Commission to study and collect information only on legal developments.

When we reported the bill from our committee last year, it contained no rules of procedure to govern the Commission. This year we have inserted the same rules as those provided in our House rules to safeguard the rights of citizens appearing before Congressional committees.

The nature of the remedy created by the bill has also been limited. The bill which passed the House in the 84th Congress authorized the Attorney General to bring a civil action in the name of the United States, but for the benefit of the real party in interest, to recover damages as well as to obtain preventive relief for the deprivation of certain civil rights and voting rights. The present bill has limited the authority of the Attorney General to the bringing of an action for injunctive relief only.

H. R. 6127 is, therefore, certainly not a revolutionary measure. If this bill is revolutionary at all, it is so only in the sense that it may breathe new life into our existing civil rights statutes and, indeed, into the Constitution itself.

This bill is by no means a cure-all for all racial discrimination. Many would go much further on the legislative front. Far more drastic and punitive proposals were presented to our committee. They were rejected.

Before us today is the bare minimum which is needed to redeem the solemn promises of our political platforms. But perhaps even more important, the bare minimum to make our statutes and our Constitution meaningful.

Mr. PELLY. Mr. Chairman, will the gentleman yield?

Mr. KEATING. I yield.

Mr. PELLY. Would not the gentleman from New York agree with me that it is greatly to be regretted that his colleague from New York [Mr. POWELL] is prevented from being here due to illness? I know that the gentleman and I worked with the gentleman from New York [Mr. POWELL] toward the consummation of legislation along the lines of this bill. We know of Mr. POWELL's interest and we know that his interest transcended party lines and that he supported President Eisenhower because he was so much interested in the passage of this bill.

Mr. KEATING. I certainly do share in regret at his illness and his inability to be here.

Mr. RODINO. Mr. Chairman, will the gentleman yield?

Mr. KEATING. I yield.

Mr. RODINO. Mr. Chairman, "we hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable rights, that among these are life, liberty, and the pursuit of happiness." Strong words, they are, and words that moved an entire generation of Americans to fight for freedom and independence. Those words inspired our forefathers to create a firm, yet flexible constitution to guarantee those unalienable rights within an ordered framework of government. Those words moved a later generation to fight, bleed, and die so that human rights and human dignities could not be denied to any man simply because of the color of his skin.

The words are very familiar today. But their meaning has in some areas become meaningless. The intent of America's founders is most surely being thwarted in every State where citizens are denied or restricted in the franchise, in every community where housing facilities are not freely available to all who can pay the standard price, in every town where the money that was taxed equally from all is used to supply good schools for white children but inadequate schools for others, and in every district where the equal protection of the laws has been interpreted to provide only justice for one race, one sex, or one economic class. America is in danger of becoming a nation of hypocrites if we permit these conditions to exist under a constitution which specifically states that its purpose is to "secure the blessings of liberty to ourselves and our posterity."

The civil-rights bill of 1957, H. R. 6127, which I am supporting, represents a sincere, serious, and above all moderate approach to these blatant violations of constitutional rights. This bill does not,

I wish to emphasize, create, or define any new offenses; it does not provide any more severe penalties for previously described crimes; it does not threaten any person who is not engaging in activities that have already been prohibited by the Constitution and the Federal statutes for almost 100 years.

The scope of this bill is limited. Personally, I would prefer to have seen a more comprehensive measure that would have recognized that discrimination takes many and interrelated forms and that would have attempted to check economic pressures as well as purely political ones. But it is necessary to make a start in this field. Too long now, we have been urging legislation of this sort with no results. This measure, essentially so reasonable, so moderate, cannot honestly be opposed by anyine who remains true to the ideals of Christianity and of democracy.

What exactly does this bill provide? First of all, it sets up a commission to investigate the area of civil rights, to hold hearings upon allegations that civil rights are being denied, and in general to publicize throughout the Nation the problems that are involved in insuring to all citizens the equal protection of the laws. The rules and procedure of the Commission are clearly outlined; no one will be summoned before it unless a discriminatory practice has been uncovered; expenses will be paid to all who are summoned. It is an interesting fact that some of those who have protested most loudly against the Commission as a new extension of bureaucracy at the same time attempted to include the whole field of labor activities within the Commission's investigating power. That move unmistakably indicates that the whole opposition to the Commission is not based upon a general objection to extending Government activities but rather upon a very specific objection to investigations in a field where violations upon the State level have been so flagrant. The work of the Commission is very necessary to illustrate to the country as a whole the need for a genuine enforcement of civil rights; it will also point the way for Federal prosecutions where they are warranted; and above all, its activities will strengthen all those conscientious citizens who are trying to be fair and will weaken those lawless elements who show no respect for any others at all.

The bill also provides for an Assistant Attorney General to head a Civil Rights Division in the Department of Justice. It is no longer advisable or appropriate that civil-rights questions be handled by a small sector of the Criminal Division. First, as I am going to point out, civil-rights offenses are not necessarily all criminal ones. And, second, the area is a large and complicated one. It cannot be effectively handled as an adjunct to another division.

In the final sections of the bill are found the most effective measures for coping directly with civil-rights violations. Here it is provided that the Attorney General may institute for the United States a civil or other action for preventive relief on behalf of anyone who is being deprived of his civil rights. In other words, if a person feels that any of his rights as a citizen of the United States are being threatened by a conspiracy of persons with or without the connivance of local officials, he may apply to the Department of Justice to protect him. The need for the Justice Department to take this active role is very apparent when one considers that many of those who suffer most from discrimination are poor and unable to undertake a legal action themselves. Their economic status is deliberately being used to deprive them of legal rights. The only way to remedy this abuse is to permit the Justice Department to step in and preserve the privileges and immunities which are threatened as much by the indifference of local enforcement agencies as by the lawlessness of civil-rights violators.

The final sections of the bill are aimed at stopping intimidation, threats, and coercion designed to prevent or influence voting. The Attorney General is empowered to bring suits where the right to vote is actually denied, or where there are reasonable grounds for believing that it will be denied. In these cases it is necessary to provide prompt relief or the opportunity to vote will be lost. Surely there can be no honest grounds for asserting that government by injunction is a violation of individual rights when the only other kind of justice that has been offered must wait until the defendant's heirs come of age.

The right to vote is the cornerstone of a free and democratic government. One of the main reasons for the American War of Independence was to abolish the hateful custom of taxation without representation. One of the main aspirations of our foreign policy today is to work for the day when all nations will have the right to hold free national elections. These truths, which no one would dare to deny outright, are nevertheless being denied subtly by those who are not willing to protect them with reasonable legislation here in this country today.

I must confess that I do not understand how people can profess a respect for American ideals, for the Declaration of Independence, for the American Constitution, and at the same time assert that it is unconstitutional or unwise to pass a law to guarantee those principles. In place of the right to vote, other new or wholly irrelevant rights are being produced and dragged like red herrings across the trail of real freedom. The right to trial by jury is a genuine right in criminal cases; but it is not a right that applies where a judge is simply trying to keep order and insure a proper respect for the dignity and independence of the courts. The right to work sounds very fine too, but it is not a right that should be used to nullify the equally important right of an individual to join a union. And it certainly has no place in a bill to protect civil rights. States rights constitute a very valuable field, too, but when they turn out to be the right of a State to deprive United States citizens of the privileges and immunities of United States citizenship, no amount of 18th-century reasoning can justify their existence in 20th-century America.

States rights are all important, and valuable too, in their place. But they are not and never can be substitutes for the right to vote. When a substantial number of American citizens with an intent and desire to vote are frustrated by individual administrators aided and abetted by State negligence, then the existing law has been broken both in letter and in spirit. Its violation cannot be distorted by a defense of States rights or any other kind of rights, for there are no other kinds of rights that will condone the breach of law and even of morality that has occurred.

Gentlemen, do not be misled by an apparent concern for the right of trial by jury or the right of a State to regulate elections. Society is a constant intermeshing of rights and duties. For every right there is a duty; in other words, for every right that I have to do something, I have a duty to do it well and conscientiously, whether it is voting, or just driving down the highway. And every right that I have, I also share with every other citizen. But, to take a very obvious example, if I choose to exercise my right to drive by roaring through Washington on the left side of the street, I would soon find that my right would have to be sacrificed to the rights of other Washingtonians to drive and walk safely themselves. Every right is valid only in relation to the rights of other individuals in society. All those who would affirm that the right to trial by jury in contempt of court cases, the right to work, and the right of a State to run elections to the exclusion of almost half the electorate are more important than the simple right of the citizen to vote are in effect arguing that they do have the right to drive through Washington and indeed through the whole Nation on the wrong side of the road.

Let me make one more point in concluding. You are all perfectly aware, I know, of the peculiarly and dangerously divided world in which we live. You are all aware that over a third of the world has been conquered by a power that has no respect for the individual human beings or for the impartial rule of law. You are aware also of the flood of propaganda that spews forth from that nation, a continual proclamation of people's democracy, of peaceful growth, of welfare for all. That proclamation is contradicted only by the facts. And it is becoming increasingly clear that the Free World is more impressed by the facts of Russian behavior than by the words of Russian propaganda.

Let us, here in America, the leader of the Free World, take note. Let us not fall into the same trap of believing that all we have to do is talk about freedom and democracy. American praise of justice and equality will have precious little effect abroad as long as everyone can see that individuals here are being deprived of their basic rights of citizenship. Let us make it perfectly clear to Russia, to the world, and to ourselves that we praise freedom because we really believe in it and because we are willing to go to great lengths to preserve it. Let us take care when we speak of the rights of the individual that

we really mean what we are saying and that we really are concerned about those rights.

I sincerely believe that the bill, H. R. 6127, has been drawn up as a result of a deep and serious concern with individual rights. I believe that if it is passed it will contribute effectively to the preservation and protection of the civil rights which have been guaranteed to all Americans by the Constitution.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. KEATING. I yield.

Mr. YATES. As part of the gentleman's remarks, he made the point that he did not envision the Attorney General filing an injunction for the relief of 1 or 2 or 3 individuals, but rather that the Attorney General would use the injunctive process or would inaugurate the injunctive process only where substantial groups of people were involved. The gentleman did not mean to indicate by that remark that the Attorney General was to be proscribed from filing an appropriate suit in order to protect the rights of any individual; did he?

Mr. KEATING. Oh, not at all. I am glad the gentleman brought that up. What I meant to say was that as I envisioned the future under this bill, it would be unusual for him to bring an action on behalf of one individual. Most of the cases that I could envision under it would be, as some of our evidence indicated where a whole group was disenfranchised. Under the bill he could bring an action in any case where a single individual was denied the right to vote.

Mr. YATES. But does not the gentleman agree with me that this right to vote is of paramount importance in this bill, and the Attorney General should be ready on election days to protect the rights of individuals whether they are in small numbers or in large numbers to make sure that they are given the right to vote by preparing proceedings which would permit him to go before a Federal court and assure those individuals of the right to vote on election day?

Mr. KEATING. I think so. But, I think this. In the cases where that need would arise there would be normally a considerable number involved. There would be instances where a single person would be involved, but I would think that would be an exception rather than a rule.

Mr. YATES. I wish the gentleman would take just a little more time so that we may clear this question up. I think the disagreement I have with the gentleman and it is only on this point that I disagree with the gentleman's very excellent statement is in the use of the term "considerable numbers." Admittedly, this is a relative term. I would not want the RECORD to show, and I would not want the gentleman to leave the floor with the RECORD showing that the gentleman believes the only time the Attorney General could undertake an action would be when considerable numbers were involved.

Mr. KEATING. No.

Mr. YATES. Because this term is so ambiguous.

Mr. KEATING. In my remarks I was only referring to what I could envision as the likely thing that would happen in the future. There would undoubtedly be cases where one person would be involved where he should act and he could act under this bill. As I would look forward in the light of the evidence which the committee had, I would expect that in most of those cases it would be a considerable number that would be involved, but he would not be precluded from bringing an action on behalf of one individual or a small number.

The CHAIRMAN. The time of the gentleman has expired.

Mr. KEATING. Mr. Chairman, I yield 1 minute to the gentlewoman from Illinois [Mrs. CHURCH].

Mrs. CHURCH. Mr. Chairman, I merely wish to take this short minute to express to the gentleman from New York the admiration of those of us who fight this battle with him. We recognize and acclaim the understanding and skill with which he has handled this problem, and the patience which he has exhibited in trying to find a sound and fair solution of what certainly is one of the greatest and most shocking problems of our day and of our country.

Mr. KEATING. I appreciate the gentlewoman's remarks.

The CHAIRMAN. The time of the gentlewoman from Illinois has expired.

Mr. KEATING. Mr. Chairman, I yield 20 minutes to the gentleman from Maryland, Mr. HYDE.

Mr. HYDE. Mr. Chairman, I am going to address myself merely to one phase of this bill. I am not opposed to the bill in its entirety. As a matter of fact, I think much good might come out of the bill, but I am going to address myself to an amendment which will be offered under the 5-minute rule, which will preserve the right of a jury trial in cases of criminal contempt. That is the point to which I want to address my remarks.

The gentleman from New York, the chairman of this great committee [Mr. CELLER], when he opened his statement on this bill, said that its primary purpose, the real thing to keep your eye on, was the preservation of the Constitution. That is what he and his supporters of this legislation were seeking to do.

I want to remind the gentleman from New York that nothing is more dangerous than to look only at the end and to neglect the means. So it is to the means, or at least to one of the means for accomplishing this purpose, namely the preservation of the Constitution, to which I want to address myself this afternoon.

This is not a pleasant task. I say it is not a pleasant task because it is not pleasant to oppose my President on such an important issue, and it is certainly not pleasant to find it necessary to debate the right to a trial by jury of a citizen of the United States charged with a crime. It is because I do not want the Members to be misled that I put the issue exactly in that way. That is the issue here with respect to this amendment about which I am going to address myself, the right to a jury trial of a person charged with the crime of violating the civil rights of a citizen of the United States.

Mr. FORRESTER. Mr. Chairman, will the gentleman yield?

Mr. HYDE. I would appreciate it if the gentleman would wait until I finish my statement.

Mr. FORRESTER. Mr. Chairman, a point of order. This is a very important discussion, and I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count. [After counting.] Seventy-eight Members are present, not a quorum.

The Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 98]

Ayres	Harden	O'Konski
Baldwin	Harrison, Nebr.	Poage
Barden	Hays, Ark.	Powell
Barrett	Healey	Prouty
Beamer	Hillings	Radwan
Blatnik	Holifield	Reece, Tenn.
Boggs	Holtzman	Rhodes, Pa.
Bowler	James	Rogers, Colo.
Buckley	Kearney	Sadlak
Cederberg	Keeney	Scrivner
Chiperfield	Kilburn	Simpson, Pa.
Christopher	Kilday	Smith, Wis.
Dawson, Ill.	McConnell	Spence
Durham	McGovern	Springer
Eberharter	Machrowicz	Taylor
Fallon	Michel	Thompson, Tex.
Fino	Miller, Md.	Utt
Fogarty	Miller, N. Y.	Wilson, Ind.
Garmatz	Montoya	Withrow
Gregory	Morano	Wolverton
Gwinn	O'Brien, Ill.	Zelenko

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. FORAND, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee having had under consideration the bill H. R. 6127, and finding itself without a quorum, he had directed the roll to be called, when 367 Members responded to their names, a quorum, and he submitted herewith the names of the absentees to be spread upon the Journal.

The Committee resumed its sitting.

The CHAIRMAN. The Chair recognizes the gentleman from Maryland [Mr. HYDE].

Mr. HYDE. Mr. Chairman, may I repeat just a few words of what I said before the rollcall?

The chairman of our committee has said that the purpose of this bill was to preserve the Constitution. I want to remind the House, Mr. Chairman, that in doing this it must be remembered that nothing is more dangerous than to look only at the ends we seek to accomplish and to neglect the means by which we are seeking to accomplish these ends. In these days and times, when the important fight is on an ideological level, the means with which we seek our ends is of the utmost importance.

The issue to which I wish to address myself is the right to a jury trial of a citizen of the United States charged with a crime. I am not opposing the entire bill. I think there is much good in most of the bill. But, I am addressing myself only to the so-called jury provision. And I am in favor of an amendment which will be offered under the 5-minute rule, which will provide, in effect, that in all cases of criminal con-

tempt arising in any proceeding under this act, the accused shall enjoy the right to a speedy and public trial by an impartial jury. I submit, Mr. Chairman, that the majority report bears out what I have said about the real issue in this jury trial question. That is the issue of the right of a citizen to a jury trial when he is charged with a crime. I point to that sentence on the top of page 6 of the majority report in which they say:

> The provisions of the legislation, in fact, merely substitute civil proceedings for criminal proceedings in the already established field.

In other words, the majority admits what they are doing here is substituting a proceedings, but the substance of the offense for which the man is being tried stays the same. Let us look at exactly what happens here and what we have before us. Under title 18 of the Federal Code you have the criminal section dealing with civil rights. It is a crime for anyone to deprive any inhabitant of the United States of any rights secured by the Constitution under section 242 of title 18. It is a crime to disqualify any person from serving on a jury because of race or color under section 243. So you have the civil rights of citizens of this Nation protected by the criminal statute under title 18, and under those statutes you are entitled to a jury trial if you are charged with their violation. Then under title 42 of the United States Code, you have civil proceedings whereby any citizen who is aggrieved or who feels he has been damaged by a denial of his civil rights can sue the person who has committed the offense against him for such damages as he can prove he has sustained. So that is the present posture of the law—criminal procedure under title 18 and civil procedure under title 42—and the language in both the civil and the criminal procedure is almost the same. It is somewhat the same as if a person should strike you. That person would be subject to criminal prosecution and you would also have the right of civil action for damages against that person. What has been done here? They have added to the civil section under title 42 these provisions in this bill which provide an additional proceeding. They say that if anyone is violating someone's civil rights the Attorney General may enjoin him from doing that. Then they have provided that in those cases the United States may be a party. Under the United States Code it is that language which deprives a person of the right of a jury trial in a contempt proceedings which might arise out of any injunction issued.

You see what has been done. The substance of the offense throughout is the same, but they have provided another proceeding under which a citizen is deprived of a jury trial. It has been argued at great length on this floor and in the press and up and down the country that you are not entitled to a jury trial, and never have been, in a contempt proceeding. My answer to that is that they are absolutely right, but it is beside the point. As the gentleman from New York [Mr. CELLER] said in answer to somebody earlier today, it is incompetent, irrelevant, and immaterial, and of no consequence. It is beside the point. I will admit you are not entitled to a jury trial in contempt proceedings, but do you not see what is being done? Sure, it is a contempt proceeding, but you have transferred this offense of a violation of civil rights from the criminal section, and from certain sections of the civil code, and you have put it under a new procedure. That is all. The procedure is different. The substance is the same. Now this has been done before in history. There is nothing new about this sort of thing. The King of England tried the same thing on the colonists when they would not enforce certain of his laws. He transferred jurisdiction to try those cases from the criminal court to the admiralty court. Why? Because under the admiralty court there was no traditional right of jury trial. Hence, you would deprive a man charged with a crime of the right of a jury trial. When a colonist complained, he could argue, just as is being argued today, there is no traditional right to trial by jury in admiralty cases. What are you complaining about? That is exactly what is being argued here. But that is a smokescreen. If you will see exactly what is taking place; namely, they are taking these offenses that are now under the criminal section and under the civil section in certain cases, in either case of which he has a right to trial by jury, and they are putting that in the equity branch of the civil court, where you can get an injunction, and they are doing it for one purpose only. I do not know why they argue about it. There is no question but that they are doing it for the purpose of taking it away from a jury. There is no question about it. Otherwise, why have this procedure?

Mr. KEATING. Mr. Chairman, will the gentleman yield?

Mr. HYDE. I will yield later if you will permit me, please.

That is the reason it is being done. Bear in mind what I am arguing for here is simply the right to a jury trial in cases of criminal contempt. There is nothing in the amendment for which I am arguing that will prevent a judge from issuing a preliminary injunction in case someone is being kept from voting in a particular election, and on that hearing there may be no jury. This will not give any right to a jury trial there. There need be no delay whatever. But when a man is charged with violating an order of the court, not carrying out its order, and that is part of it, he can be put in jail; and bear in mind, when you are tried for criminal contempt, the punishment is a jail punishment. When a man is in jail, he is in jail just as much under contempt as if it were under a criminal prosecution.

The proponents of this antijury provision surely have for their use, the weapon of emotion. Those of us who oppose it, I submit, have only the weapon of reason.

Emotion is swift, sharp, painful, but usually transient in its effect. Reason is slow, blunt, but generally deadly if it can be brought to bear before emotion has done its fatal work. Mr. Chairman, I am appealing today to reason.

One of the great foundation stones of this Nation which makes it possible for us to preserve civil rights, which makes it possible, for example, even to get up and argue that civil rights are not being preserved, one of the basic civil rights, is the right of a jury trial in cases of crime.

So, Mr. Chairman, let us listen to reason. We must, in this bill, preserve the right to a trial by jury. Now I am glad to yield to the gentleman from New York.

Mr. KEATING. The gentleman concedes that there are many instances where a single act would give rise to a right for damages or injunctive right and a criminal action.

Mr. HYDE. That is right.

Mr. KEATING. This in that respect is no different from any other. The gentleman concedes also that in contempt cases——

Mr. HYDE. Oh, no; I do not concede that this case is no different from any other. I make no such contention; that is the gravamen of this whole thing; it is different.

Mr. KEATING. In the respect of difference I just could not figure it out.

Mr. HYDE. All right; I will give the gentleman the difference. The gentleman has asked me the question. The thing that makes this so serious is this: You are taking a criminal statute which is already on the books and for which you have a civil statute and a civil remedy, you are taking this means of providing another remedy, another form of procedure which, in effect, denies trial by jury; that is the difference.

Mr. KEATING. I will say to the gentleman that I was the author of this provision as it came to me from the Justice Department. I say to the gentleman categorically that, while it may be an admission of ignorance, it never entered my mind that I was taking away anybody's right to a jury trial when I introduced this measure or when I voted for it in committee and in the last Congress. Such a motive was never in my mind. I do not know whether it was in the mind of anyone else or not.

We had a similar bill up a year ago and adopted it and it was never, except in a cursory manner, brought up that that was the purpose. Certainly, if that had been the motivation someone among the brilliant lawyers in this body would have raised this point at that time.

The purpose in my mind was this: You do have now a criminal penalty, but in many of these cases, indeed, in most of them, the people involved are election officials, and generally respectable, fine citizens.

Mr. HYDE. May I use the rest of my time?

Mr. KEATING. I will yield the gentleman additional time.

A criminal prosecution is not the proper remedy. These people should not be branded as criminals under ordinary circumstances. What is sought to be accomplished is to safeguard the right to vote. A civil proceeding to prevent a denial of that right will usually be more effective and more fair to all concerned

than to visit upon the offender harsh criminal penalties after the event. That is the motive that actuated me and I believe actuated the gentleman from New York and others who sponsored this legislation.

Mr. HYDE. Now will the gentleman yield to me?

Mr. KEATING. I yield the gentleman 2 additional minutes.

Mr. CELLER. Mr. Chairman, will the gentleman yield?

Mr. HYDE. I must first answer the gentleman from New York [Mr. KEATING].

With all due respect to my friend from New York, the gentleman knows that the whole argument and reason for the procedure in 121 and 131 of title 3 and title 4 of this bill was that juries in the South would not convict for these violations.

Mr. KEATING. Mr. Chairman, will the gentleman yield?

Mr. HYDE. I yield.

Mr. KEATING. The gentleman has never heard me make that statement on this floor and he never will.

The basis of my attack upon it is that it is an interference with the judicial system, and that is why in every State of this Nation and in our Federal jurisprudence you do not allow, after a court has made an order and a person seeks to defy it, you do not allow anyone to step in between the court and the offender and say that he can defy the court. Such a result would eventually lead to a breakdown of our judicial system.

Mr. HYDE. I must further answer the gentleman from New York. I cannot, of course, argue with the gentleman about his personal motives, his personal ideas and convictions. Only he can express that. But I simply leave it to the House and to the public as to why all the argument about this jury-trial provision and what it is all about and why they call it a crippling amendment. Why do they call it a crippling amendment? The reason is that if you have this amendment they say you will throw it to juries for consideration and there will be no conviction. There can be no doubt about my position on that. How they can argue is a mystery to me.

Mr. O'HARA of Minnesota. Mr. Chairman, will the gentleman yield?

Mr. HYDE. I yield to the gentleman from Minnesota.

Mr. O'HARA of Minnesota. The gentleman, I know, has lived with this so long he assumes all of us understand it. But is it not true that under the language of the bill which the gentleman has been talking about, if a person violates the law and is brought up for contempt charges, the court would under this bill be permitted to send him to jail, for how long? Two years?

Mr. HYDE. Almost as long as the court might see fit, but at least for the full period provided in the criminal section.

Mr. O'HARA of Minnesota. What is that?

Mr. HYDE. One year.

Mr. O'HARA of Minnesota. And a $10,000 fine or both?

Mr. HYDE. Yes.

Mr. O'HARA of Minnesota. That could be imposed under this procedure?

Mr. HYDE. Absolutely.

Mr. O'HARA of Minnesota. I thank the gentleman.

Mr. CELLER. Mr. Chairman, will the gentleman yield?

Mr. HYDE. I yield to the gentleman from New York.

Mr. CELLER. I want to say at the outset I agree with what the gentleman from New York [Mr. KEATING] said with reference to our motives. As I said before, I am a libertarian, and I would not want by any stretch of the imagination to take away any rights from anyone. I would like to ask the gentleman a question. The gentleman says that he wants to have a trial by jury for what he calls criminal contempt. Does he mean to limit that trial by jury to criminal contempts arising under the instant bill, or does he want to provide for trial by jury in all criminal-contempt proceedings where the Government is a party?

Mr. HYDE. The amendment will read:

> Notwithstanding any other provision of law or of the rules of procedure of the United States district courts, in all cases of criminal contempt arising in any proceeding under this act, the accused shall enjoy the right to a speedy and public trial by an impartial jury.

Mr. CELLER. Why limit it to trial by jury in that case and not apply it to all criminal-contempt proceedings?

Mr. HYDE. That is all I have had time to consider up to now.

Mr. CELLER. This is a serious situation. If you want to apply it to one, you have to apply it to all.

Mr. HYDE. If we can deal with this satisfactorily, we can deal with others later on.

Mr. CELLER. There are multitudes of them, and the gentleman will have his hands full if he is going to provide trial by jury in all criminal-contempt proceedings.

Mr. HYDE. I am trying to bring it within the provision of the existing sections of the code, and particularly the one with which the gentleman is so familiar and with which the gentleman had so much to do 18 or 20 years ago.

Mr. SMITH of Virginia. Mr. Chairman, will the gentleman yield?

Mr. HYDE. I yield to the gentleman from Virginia.

Mr. SMITH of Virginia. In view of the very careful, learned, and complete statement and exposition that the gentleman from Maryland has made about this jury-trial provision, and the fact that the ranking minority member of the committee says he does not mean to do that and the gentleman from New York, chairman of the Committee on the Judiciary, says he did not mean to do that, he did not realize that, and did not intend to do anything like that, I am wondering what all the argument is about? Why do we not say, Let us just put it in there?

Mr. HYDE. I am as puzzled as is the gentleman from Virginia on that point.

Mr. CELLER. I yield such time as he may desire to the gentleman from Mississippi [Mr. WINSTEAD].

Mr. WINSTEAD. Mr. Chairman, at the last session of the Congress, when I rose in opposition to the so-called civil-rights bill then under consideration, I said that never during my 14 years in the House had I seen a more vindictive, a more unnecessary, a more politically inspired, or a more unconstitutional bill reach this floor for action. I thought it highly improbable that a bill more repugnant to my political philosophy would ever be considered by the House of Representatives. However, members of both political parties who are so intent on currying the favor of the Negro and left-wing voters have succeeded in bringing to this floor H. R. 6127, a bill which is even more reprehensible. H. R. 6127 is obviously designed to heap vindictiveness upon the Southern States, and yet I do not believe that even the South-hating Thaddeus Stevens would support it were he a Member of this body today. The enactment of this bill would mean the loss of a fundamental constitutional right to every American—the right of a trial by jury for grave offense.

This bill contains most of the evil provisions of last year's so-called civil-rights bill, plus an additional section which would empower the Attorney General of the United States to seek injunctions in the Federal district courts for the enforcement of alleged violations of civil-rights laws. These suits would be in the nature of civil actions and would be instituted by the Attorney General with or without the consent of the person or persons whose civil rights it is alleged have been, or are about to be, violated. These suits would be financed by and brought in the name of the United States Government.

The relief in these civil suits would be of a preventive nature in the form of applications for temporary or permanent injunctions, or a restraining or other order.

Under the provisions of this bill, any person accused of contempt of court for the violation of a court order would be tried by the judge of the court which issued the order allegedly violated. The accused would be tried by the judge without a jury. The presiding judge would act as prosecutor, judge, and jury. This clever provision of this bill, which would deny the accused the time-honored right of trial by jury, and would substitute therefor a trial by injunction and contempt, was spawned by Attorney General Brownell and is being nurtured by the NAACP, the American Civil Liberties Union, and other leftwing groups of the like ilk.

We find many of the national labor leaders in the forefront of those demanding the enactment of this legislation. They are demanding that this Government, in its trial of civil-rights-violation cases, return to the use of the very same procedure which the forces of labor once so vehemently condemned when it was being used in contempt trials in labor cases. They are demanding that persons charged in civil-rights-contempt cases be denied the very same right they once so strongly and diligently fought for and eventually received when

the Norris-La Guardia Act was passed in 1932.

Every student of our Federal system of government knows that the right of trial by jury for grave offenses is one of the cornerstones of our Constitution and of our political philosophy. It is a right which I never dreamed I would have to fight on this floor to protect. It is a right which we had every reason to believe would remain inviolate. It is a right which is expressly referred to three times in our Constitution. It is a right which I believe to be worth fighting to retain. This I shall continue to do with all my energy and ability.

To the Members of this body who will, by voting for this bill, surrender this basic and inherent right of trial by jury for potential Negro and leftwing support at the ballot boxes, I ask if you do not think the price of this surrender is rather high? I ask you, What more inherent and fundamental right has a citizen of this country than the right of trial by jury when he is charged with grave offense?

The influence of potential votes on the action of some of the Members of this body always amazes me. If this bill is passed in the House, it will not be because a majority of the Members believe in its merits, but it will be due, in my opinion, to their belief that to support it is politically expedient.

Many Members of the House of both political parties who are Representatives from districts in States outside the South were emphatic in their denunciation of the United States Supreme Court for some of its recent decisions which they thought constituted an invasion of the rights of the States they represent. There is little doubt but that many of those who were most profound in their criticism of that Court for its actions, will be found in the forefront of those waging a hue and cry for the enactment of this bill—a bill which would subvert the independence of the sovereign States of this Union to the Federal Government.

This bill would give the Attorney General of the United States the power to effect the actions of the State, county, and city boards of education, the school systems of the county and State and all the election officials in the various States. It would also provide him with a club to wave threateningly over the heads of all State law enforcement officials.

Its passage would make the States subservient to the whims of one man—the Attorney General of the United States. I say there is grave danger in giving any one executive official of this Government so much authority when there is a chance it may be arbitrarily, politically, or unscrupulously exercised by him.

Although this legislation is directed toward the people of the South, its far-reaching provisions make it a potential threat to the peace, security, and liberty of all the citizens of the States. Everyone in every State of this Union would become a possible target for an accusation by another having violated his civil rights. He would become the target of disgruntled persons, the Civil Rights Commission and the Attorney General. Under the provisions of this bill, a person would be forced to appear as a witness at a Commission hearing upon complaint that he had violated the civil rights of another person or persons. He would be required to attend such hearings as a witness if they were held in the same United States circuit court district where he was found, resided, or transacted business. To give you an idea of the possible distance a witness might have to travel to appear before this Commission, the United States circuit court, of which Mississippi is a part, is composed of Mississippi, Georgia, Alabama, Texas, and the Canal Zone.

Section 1 of this infamous bill provides for the establishment of a Government Commission on Civil Rights. It says that there shall be six Commissioners appointed by the President and subject to the approval of the Senate. This Commission would, among other things, be empowered to investigate allegations that persons are being deprived of their right to vote by reason of their color, race, religion, or national origin. Also, it would be empowered to hire a full-time staff director and other such personnel as it deems advisable. And it would have the authority to pay the expenses of not more than 15 persons at any one time to "snoop" for the Commission. You may rest assured that these 15 "snoopers" and the unlimited number of persons which this Commission would be authorized to hire as staff personnel would be recruited from the NAACP and other left-wing groups.

It is a foregone conclusion that the activities of these snoopers in the South would cause inestimable chaos, confusion, and unrest among its people and would greatly increase the tension and agitation between the races there.

This Commisison would have at its disposal any money in the Treasury not otherwise appropriated and it would have the authority to use as much as it thinks necessary to carry out the provisions of this bill.

This Commission besides doing this snooping would serve as a kind of grand jury for Mr. Brownell and the Department of Justice. It would have the investigative and subpena powers of a Federal grand jury but would not have the authority to issue indictments. However, this lack of authority by the Commission to issue indictments would not mean that the witnesses who testified at the hearings would escape possible prosecution. For the Attorney General would have the authority to use the testimony adduced at these Commission hearings as the bases for instituting injunctive proceedings against the person or persons allegedly guilty of the civil rights violations of others.

What this so-called civil-rights bill has the audacity to say to our States is that we in the South do not know what justice is and must have it forced upon us by the Federal Government from Washington. It says that our State courts, our State educational systems, our State law enforcement machinery, and our State election officials have no respect for the rights of every individual. This bill proclaims that the people in Mississippi, Alabama, Florida, Georgia, Louisiana, Virginia, and the Carolinas, hate our fellow man and deny him justice; that the Congress of the United States by this legislation proposes to make us treat him fairly. This bill is a gross insult to every public official and every citizen of these States.

In order to make us treat fairly those whom this legislation so wrongly says we mistreat, this obnoxious bill proposes to designate the Attorney General of the United States, along with the Civil Rights Commission and its "snoopers," as prosecutors to see that this is done.

The stipulations of this bill represent to me the vicious catalog of a legislative crime. Its greater destructive quality consists not so much in the stipulated power accorded in this way to the Attorney General, the Civil Rights Commission and the Federal district courts, which is a gross distortion of the Constitution and an invasion of States rights, as in the aura of justice for all and the cloak of pious Federal protection which invests this piece of legislation.

By being labeled falsely as a civil-rights bill, many decent and devout Christians have been deceived and deluded into fighting for a cause which they do not understand—the end result of which would deprive them of one of their basic constitutional rights. It has made a race-conscious people see indignity and mistreatment where none exists. It has given a paintbrush of smear and a pot of propaganda materials to the National Association for the Advancement of Colored People, an organization which is not so much an association for the advancement of colored people as it is an instrument for causing agitation between the races. In this role the NAACP is not only untrue to what its avowed functions are supposed to represent, but is a menace to law and order in the United States.

Let me reiterate some reasons and add other reasons why I am unequivocally opposed to this bill:

First. It is un-American fanaticism frozen into the dangerous language of a legislative proposal.

Second. It is a ruthless distortion of the true principle of civil rights.

Third. Its application may be national, but everybody knows that it is aimed definitely and primarily at the Southern States. The poison of its agitation is spreading to the North, Middle West, and West.

Fourth. It revives sectional animosities and drags up and modernizes the fading basic controversy of the War Between the States in a new, live, and irritating form.

Fifth. A hard core of sponsors of this measure are motivated solely by a cynical greed for capturing the votes of easily misled, highly sensitive, and often emotionally unstable minorities in their own areas.

Sixth. I am opposed to this so-called civil-rights bill because I believe it to be unconstitutional and an invasion of the rights of the States, and contrary to the efforts of those, like myself, who

seek decentralization in our Government for the sake of returning to the principles of our Founding Fathers.

Seventh. I am opposed to it also because it has intensified the feeling between the races in the South and has retarded adjustment that was taking place before it appeared on the scene.

Eighth. The bill's provisions are such that depending upon the political affiliation of the Attorney General and the members of the Civil Rights Commission, the pressure upon them, and their characters, there is room for endless executive abuses under it.

Ninth. Legislation should never be used like a club by one group of Americans to beat down the heads of another group.

Tenth. I am opposed to it because it is unnecessary. It is unnecessary because every person's civil rights are already adequately protected by existing Federal laws.

There are many other reasons, too numerous to mention, why this bill should be overwhelmingly defeated.

Mr. CELLER. Mr. Chairman, I yield such time as he may desire to the gentleman from New Jersey [Mr. ADDONIZIO].

Mr. ADDONIZIO. Mr. Chairman, on May 21, hardly a fortnight ago, the way was at last cleared for consideration of the civil rights bill by the entire House of Representatives. After testimony that seemingly never would end, first in a Judiciary subcommittee, then in the Rules Committee a moderate bill with a single purpose, the enhancement of human justice, has struggled onto the calendar. This is a bill which is as consistent with our basic religious teachings—"God hath made of one blood all nations of men"—as it is with our fundamental political teachings—all men are created equal and are endowed by their Creator with certain unalienable rights." The past failures of Congress to act on civil rights, and to act decisively, bear witness to man's inhumanity to man. For wherever we find denials of equal opportunity—in employment, in education, in housing, in public recreation, in health facilities, in transportation, in the right to vote, and even in our courts—we find violation of a fundamental principle of our democracy. This is the principle which holds that men are to be judged on their individual merits, not according to the accident of their membership in one race or another, not according to their choice of religious affiliation.

No devoted American would support a measure which sought blindly to achieve egalitarian results, a measure which sought to make all men equal by depriving from each man his last vestige of individuality. Such a measure would represent a flagrant abuse of the American manner, a brazen theft of liberty, a barbarian onslaught upon justice. Indeed, the American manner has room for the principle of aristocracy—in point of fact depends upon it for invention, for initiative, for ideas, for progress. But the type of aristocracy which true Americanism condones is the type which won the acclaim of our Founding Fathers, of the liberal Jefferson, of the conservative Adams. It is not an aristocracy based upon race or religion, or any other accident by birth. It is an aristocracy of merit, ability, and virtue. The civil rights bill now awaiting our appraisal represents a moderate step toward advancing the American brand of aristocracy. It does not propose all it might. Indeed, I regret that it leaves significant areas of discrimination and grievance untouched. However, it remains a commendable bill in that it narrows the field of bogus aristocracy and broadens the scope of equal opportunity.

The civil rights bill as submitted by the Judiciary Committee reflects several points of emphasis. Its chief point of emphasis, quite clearly, is protection and encouragement of the right to vote. This is a mission which I would hope no devoted American would criticize. History teaches us that the most effective method yet found for holding governors responsible for their deeds and misdeeds comes from granting free, universal suffrage to the governed. History demonstrates further that when in civil society a large number of problems and injustices exist, the most reasonable, the most moderate, the most lasting course of remedy results from obtaining greater protection or expansion of the right to vote. To this extent, not only is the measure before us perfectly consistent with democratic practice; it contributes, in addition, to a movement in American political life which is as old and as trusted as the Constitution itself—and, I may add, as fundamental.

The moderate approach to civil rights shortcomings which characterizes this bill has been termed in the favorable majority report a "necessary minimum." That indeed it is. Offered here is a long-range solution to problems, some of which are short-range in nature. But offered here is a bill on which persons from all sections of our land who are devoted to the free and meaningful franchise can find agreement.

Opponents of civil rights legislation have pointed out that we already have criminal statutes providing fines and imprisonment for persons convicted of depriving others of their rights to equal protection under the law—including the right to vote in Federal elections. They have asserted further that civil statutes exist under which a private citizen can file suit to protect his own civil rights. On both counts the critics are correct. What they have neglected to add, however, is that neither remedy is effective: The first is inadequate not only because criminal procedures are unavailable until after the harm has been done, but also because the harsh criminal penalties discourage both indictment and conviction. The second is inadequate because often the victim of voting interference is too poor, too preoccupied with the task of subsisting to engage adequate counsel to plead his cause before the time-consuming, vastly expensive machinery of local administrative agencies and State courts—and all these before his case even reaches the Federal courts.

Accordingly, the pending civil rights bill is aimed less at making major substantive changes in the civil rights laws than at offering new methods of enforcing laws already on the books. The new bill would bypass the administrative agencies and State courts and allow a civil rights plaintiff to take his case directly to the Federal courts. Moreover, it would empower the United States Attorney General to file civil suits whenever any persons have engaged or there are reasonable grounds to believe that any persons are about to engage in acts which would violate existing civil rights statutes.

Suppose under the proposed law a person complains to the Justice Department that he has been threatened with harm should he vote. In the name of the United States, but on behalf of the person threatened, the Attorney General would bring suit in the nearest Federal court. The burden of proof would fall on the Government. The defendant would have the usual rights to cross-examine, present witnesses, and appeal. Should the Federal judge decide that there were reasonable grounds to believe interference would be forthcoming, an injunction would be issued ordering the defendant to cease and desist from such activity. Now should the defendant cease and desist as ordered, the affair would end at that point. However, should he fail to do so, he could be held in civil contempt. At his contempt hearing, if found guilty of failing to heed the injunction, he could be jailed until he purged himself of the contempt by agreeing to obey the injunction.

In recent weeks this proposed series of procedures has been severely attacked, especially the provision which allows a Federal judge to declare a disobedient defendant guilty of contempt of his court. Critics of the provision vigorously assert that it involves abolition of trial by jury. Do we wish to sanction a measure, they ask, which repudiates a precious element of Anglo-American justice—the right to a jury trial? By fortifying their arguments with attractive platitudes and utterly misrepresenting both the letter and spirit of Anglo-American justice, the foes of civil rights have demonstrated the horrendous ends to which they will go to preserve conditions which are as outdated by enlightenment as they are outlawed by morality.

Let me briefly highlight the truth of the matter:

First. Jury trials in contempt cases have absolutely no basis in equity or constitutional law and precious little legislative sanction. With a single exception, trial by jury has never been required in contempt cases to which the United States Government was a party. The single exception, the Norris-La Guardia Act of 1932, required jury trials in contempt proceedings arising from labor disputes. This provision was virtually repealed, I might note, by the Taft-Hartley Act of 1947.

Second. The contempt citation is the judiciary's historic enforcement tool. Throughout the centuries it has been the chief weapon employed by judiciary agencies—whether at the State, Federal, or congressional level—to guarantee that its rulings are not ignored or its dignity besmirched.

Third. Were jury trials to be provided in civil rights contempt citations, the courts would be emasculated in performance of their duty, and the entire civil-rights program would be rendered effete.

Fourth. Under the new law, there certainly would not be wholesale harassment or displacement of voluntary and State activity, since the Attorney General could act only when existing civil rights statutes were about to be, or were violated.

Fifth. The entire contempt procedure could be easily avoided were there no interference with the right to vote or were such interference terminated once the court so ordered. It must be remembered that only when a person refuses to obey a court injunction ordering him not to deprive another of his voting right does the contempt procedure become operative.

In short, what the opponents of civil rights legislation are doing is advocating a radical, almost unprecedented innovation under the guise of traditional, established procedure. They are employing the respected verbiage of the democratic process to establish procedures which are antithetical to the healthy operation of a strong, workable judicial system. Wearing the wig and frock of the conservative, waving the shibbolethos of the custodian, they expouse a radical notion.

Should the new methods of enforcing our civil-rights laws, which also provide for an Assistant Attorney General to handle their prosecution, reveal certain shortcomings or imperfections, these will surely be noted by the proposed Civil Rights Commission. This 6-member bipartisan Commission has as its major assignment a careful study of the civil-rights situation over the next 2 years. It is especially commendable and symbolical, I think, that the Commission has bipartisan membership. For, surely, it is indisputable that the problems it must confront are bipartisan in nature. They are problems which distress us not only as a people but also as a leading member in the free-world community.

Mr. Chairman, we deplore, and rightly so, the Iron Curtain which separates the free from the oppressed. But many loyal Americans attest to the fact that the curtain separating the potential voter from the free ballot appears at times also to be made of iron. Mr. Chairman, we deplore, and rightly so, the wicked practice of jamming the Voice of America. But countless public-opinion polls, articles, letters, and, indeed, congressional votes reveal that the Voice of America will also be jammed should the civil-rights bill meet devastation or defeat.

This measure, the result of 3 years of intensive study, moderate, flexible, and just, merits the swift and unqualified approval of our Congress.

Mr. CELLER. Mr. Chairman, I yield 20 minutes to the gentleman from Louisiana [Mr. WILLIS].

Mr. WILLIS. Mr. Chairman, there has been so much discussion about the so-called jury trial amendment in the last few weeks appearing in the press almost every day, and it is so much on the people's minds that I, too, like my good friend from Maryland [Mr. HYDE] will use the time allotted now to a discussion of that subject. Later on during consideration of the bill under the 5-minute rule we, of course, will discuss other features of the bill.

The bill under consideration does not even mention trial by jury, but it does contain an adroit provision that would deprive the people of this precious civil right. How is that accomplished?

There is an old law which guarantees the right to a trial by jury in any and all contempt cases, except where the suit is brought "for the United States, or in the name of the United States." Now if you look at the top of page 10 of the bill, you will see that all suits will be brought by the Attorney General "for the United States, or in the name of the United States." The proponents of this legislation apparently believe that they can deprive people of their right to a trial by jury by this simple provision which would require the Government to be a party to all suits. In other words, not a single new right or cause of action is given to individuals who are supposed to be aggrieved. The bill does not require the aggrieved parties to give their consent to any suit, either in writing, orally, or otherwise. In fact, people may be involved in lawsuits against their neighbors without their consent and over their protest. And the reason for such an unheard of approach is this. If the suits were filed by the real parties who are supposed to be aggrieved all defendants would be entitled to a trial by jury in criminal contempt proceedings; and so, the proponents of this bill are trying to get around the right to trial by jury by the cynical device of requiring all suits to be brought by the Attorney General "for the United States, or in the name of the United States." I predict that they will not succeed in this effort.

We all know that it is when the might of the Federal Government is hurled at an individual that he really needs a trial before a jury of his peers. And I will show you that Congress never intended the waiver of a jury trial when the Government is a party to a suit as a wide-open loophole to send people to jail wholesale. I will prove by the words of the author of that old law, Mr. Clayton, himself, and the then Attorney General of the United States, Mr. Wickersham, that the purpose of the exception was to enable the Government to enforce our antitrust laws.

Now, under a special provision of the Norris-La Guardia Act of 1932 labor unions are entitled to a trial by jury in all contempt cases arising under the act, and even though the Government might be a party to the suit. We say that there is no reason to set labor unions apart as a separate class and that what is good for labor unions in labor disputes cases should be good for the people in general. Accordingly, we will propose an amendment to preserve the right to trial by jury in civil rights cases, even though the Government might be a party to the suits.

But before discussing the amendment itself, I want to explain why its adoption is necessary.

Our Constitution expressly provides that the judicial power of the United States shall extend to all cases, both at law and in equity. It draws a sharp distinction between a civil case and a criminal prosecution. When a man's liberty is at stake he is entitled to a trial by jury. An equity court has no jurisdiction over criminal prosecutions. The primary purpose of an injunction is to restrain. It was never intended that the power of injunction should be used as an instrument to convict. Yet that is exactly what some of the proponents of this bill are asking you to do. And they are asking you to do it openly, without blush or shame. You know it and I know it. We may as well face the problem squarely in the face before we vote.

We can start with Mr. Brownell himself, who testified before our committee.

Please understand that we already have two general laws on the subject of civil rights. One is a civil law under which the suits are to be instituted by individuals, and the other is a criminal law under which defendants are to be prosecuted by the Government. These laws cover every conceivable civil-rights violation. But what disturbs Mr. Brownell is that our predecessors had the effrontery to preserve the right to trial by jury under either law. Why? Well, if a criminal prosecution is filed by the Government, of course, the defendant is entitled to a jury trial; and if an individual applies for an injunction, and contempt proceedings result, the defendant is again entitled to a jury trial.

Mr. Brownell said that what he wanted was to strengthen the civil-rights laws. He was asked if he wanted to broaden and stiffen the criminal statute on the books. He said in effect, "Oh, no. Criminal prosecutions are too inflammatory, and besides it's too hard to convict."

Mr. Olney, chief of the criminal division, was also quoted in the press to the effect. The gentleman from New York [Mr. CELLER] also says that juries might not convict. The gentleman from California [Mr. ROOSEVELT] says the bill would be meaningless without a no-jury-trial gimmick. I am not saying they are insincere. I am simply taking them at their word: convict, convict, convict, that's their password.

No one that I know of is against punishing the guilty. I know I am not. In my book, however, only juries can make convicts out of people. But what do some of the proponents of this measure want you to do? They are asking you to convert or shall I say pervert equity or chancery courts into criminal tribunals.

Twice before in our history, and under similar historical circumstances, an effort was made to abuse the power of injunction, and on each occasion this Congress rebelled in righteous indignation. The first resulted in the Clayton Act of 1914, and the second in the Norris-La Guardia Act of 1932.

In testifying before the Rules Committee, the chairman of my own committee, my very good friend from New York [Mr. CELLER] described the conditions that brought about the Clayton Act

and the Norris-La Guardia Act. He said:

Those were the days of the so-called yellow-dog contracts, the so-called days of the sweatshop conditions, when judges were prone, more than prone, they were avid to issue injunctions, and there were wholesale injunctions issued and wholesale violations of the injunctions, and labor leaders went to jail for long stretches.

Accordingly, the Clayton Act did two things. In the first place it limited the very power and jurisdiction of the Federal courts to issue injunctions in labor disputes. And then it provided that a defendant charged with contempt for any alleged violation of any injunction decree is entitled to a trial by jury.

The contempt provisions of the Clayton Act of 1914 were the successful fruition of many years of effort by the Congress to curtail the abuse by the courts of their power to punish for contempt. The provisions contained in the Clayton Act relative to contempt of court were taken verbatim from the bill which had been passed by the House in 1912, and not acted upon by the Senate.

If there was one person in Congress who knew the purpose of the law, it was the author of the bill, Mr. Clayton. Here is what he said:

The courts have, under the guise of contempt of court, had men arrested and tried for crimes without the intervention of a jury. That is the reason why this legislation is necessary. This bill is not intended to and does not subtract one iota from the enforcement of any civil remedy or redress that any man has through the chancery court and through its power to punish for contempt, but it says that the chancery court which was never designed to be a court of criminal jurisdiction, which was never designed to try crimes, shall not be vested with criminal jurisdiction, except that when it does exercise jurisdiction in a criminal case the man charged with crime shall have the Anglo-Saxon, the American, right of being confronted by his accusers, to cross-examine his witnesses, and to be tried by a jury of his peers before his liberty shall be taken from him.

Following the custom of the time, the CONGRESSIONAL RECORD indicates that there was applause in this great body when Mr. Clayton uttered those noble and prophetic words in this very well of the House.

At that time chancery and equity courts were being used as criminal tribunals. The answer of Congress was to guarantee trial by jury. History is repeating itself today. Are we men of lesser stature? Is jury trial meaningless today? Are we afraid of jury trial today? Do we want to turn the clock back 45 years?

You must remember that the Clayton Act relative to contempt was tacked on as an amendment to the antitrust law in 1914. And as I have said, the act does contain a provision waiving jury trial when the suit is brought "for the United States, or in the name of the United States." Now, why was that provision inserted? Again, the man who knew the reason was Mr. Clayton, and here is his explanation:

The next objection that was made to it was that it would probably detract from the power of the courts to enforce their decrees of dissolution of combinations denounced by the antitrust law. I violate no confidence when I say that that was the criticism of the chief legal officer of the present administration, Attorney General Wickersham. We have met that objection by providing in this bill that it shall not apply in any case where the United States is the party complainant. Every man in this House knows that in all proceedings under the Sherman antitrust law the United States is necessarily, by the terms of the statute, the complainant. So we answered that criticism of this bill.

In the light of the history of the legislation, I say to you that in my opinion to use the Clayton Act as a vehicle to deprive persons of the right to a trial by jury would be in direct violation of its intent and purpose.

Events after 1914 convinced the Congress that the Clayton Act did not go far enough in connection with labor disputes. Accordingly, the Norris-La Guardia Act of 1932, as subsequently refined, went two steps further. It imposed additional limitation on the broad power and jurisdiction of the Federal courts to issue injunctions, in the first place, and, in the limited number of cases where the courts were permitted to issue injunctions in labor disputes, it provided that defendants charged with contempt of court would have the right to a trial by jury, even though the Government might be a party of the suit.

The amendment we will propose will tract the contempt provisions of the Norris-La Guardia Act word for word. The net effect of our amendment would be to preserve the right to trial by jury even though the actions under this bill will be brought for the United States, or in the name of the United States.

And I want to make one point perfectly clear. Our amendment would definitely not go as far as the Norris-La Guardia Act. Under that Act Federal courts are forbidden to issue injunctions in labor disputes, except in a limited number of situations. Under our amendment there would be no limitation on the broad powers of equity courts to issue injunctions in any and all civil rights cases. Under our proposal the judge could still punish for contempt committed in the presence of the court or so near thereto as to interfere with the administration of justice. We are only asking for a jury trial when a person is threatened with a jail sentence for events occurring after the trial of the injunction.

Remember also that we are not asking for any right that the people do not already enjoy. As I pointed out, under present law, if the Government prosecutes a criminal action for violation of alleged civil rights, the defendant, of course, is entitled to a trial by jury; and if criminal contempt results from a civil suit filed by an individual for alleged deprivation of his own civil rights, the defendant, again, is entitled to a trial by jury. But under the clever wording of the bill before us, which would make the Government a party to civil suits, the defendants would be deprived of their right to trial by jury. The purpose of our amendment is to offset this attempt to bypass jury trial, by requiring that such right will be preserved, even though the Government might be a party to the suit. The Clinton, Tenn., case, illustrates the status of the law today and what it would be tomorrow if this bill should be adopted without our amendment.

In that case certain colored persons requested a mandatory injunction to compel the local school board to admit them in a public school. The plaintiffs finally won out on appeal. The Federal judge accordingly ordered the school to be integrated and issued an injunction forbidding not only the school board but the people in general from violating "or in anywise interfering with the carrying out of the aforesaid order of this court either by words, or acts, or otherwise."

Later on the Department of Justice filed criminal contempt proceedings in the case, alleging that 16 persons in the community had violated the decree. These people were not even parties to the original injunction suit. They were total strangers to the original proceedings. They deny that they violated the injunction. Perhaps they did, and if they did, they should be punished. But the point is that they are being threatened with a jail sentence and never had their day in court. In any event, they asked for a jury trial and under the law as it stands today the Federal judge ruled that they are entitled to it.

Now, if this bill should be adopted without a jury trial amendment the right to a trial by jury would be completely wiped out not only in a situation such as was presented in the Tennessee case but in any and all conceivable contempt proceedings that might be filed "for the United States, or in the name of the United States."

And the Clinton, Tenn., case affords a typical illustration of the kind of blanket injunction decrees that will be issued in suits brought by the Attorney General "for the United States, or in the name of the United States." If anyone should tell you that this bill would not take away the present right of people to be tried before a jury of their peers, ask them this simple question: What about the Tennessee case?

So fundamental is the right to trial by jury that it is guaranteed not only in criminal prosecutions but in suits at common law where the value in controversy exceeds $20. Did you know that? Look at the seventh amendment in the Bill of Rights.

I remind you that we are only asking for a jury trial in contempt cases under circumstances where that right is guaranteed to members of labor unions. I remind you also that persons charged with contempt of Congress are entitled to a trial by jury. Known and hardcore Communists are entitled to a jury trial for contempt of this Congress itself.

Mr. COLMER. Mr. Chairman, will the gentleman yield to me briefly at that point?

Mr. WILLIS. I yield to the gentleman from Mississippi.

Mr. COLMER. Is it not also a fact that the Committee on the Judiciary which has reported out this bill under consideration now which would deny the right of trial by jury reported out a bill which would streamline this pro-

cedure to get these fifth amendment boys to the court; that that bill has never been reported to this House; that it is up in the Rules Committee today because it does not have the political appeal that this bill has, and that apparently nobody is pushing to get it out because it was brought out in the Rules Committee that that bill would deny these fifth amendment pleaders the right of a trial by jury?

Mr. WILLIS. The gentleman is absolutely correct; and on that score I will say two things: First, I protested against that bill, not only orally but also in writing, because I do not believe in bypassing traditional constitutional rights to trial by jury. I went on record against it. And, secondly, I will say to the gentleman, that I, too, predict that that bill will never see the light of day out of his committee.

Mr. KEATING. Mr. Chairman, will the gentleman yield?

Mr. WILLIS. I yield.

Mr. KEATING. The bill to which the gentleman refers is the one of which I am the author.

Our mutually good friend [Mr. WALTER] favors the bill. But I will say to the gentleman that last year it passed unanimously out of our committee. This year it passed unanimously out of our committee and never a word was raised in the discussion in committee on that bill and not until the furor rose in connection with the civil rights matter was any question raised about that.

Mr. WILLIS. Last year it slipped through, and I am blaming no one, by unanimous consent. I did not know about it, but I went and record against it.

Mr. KEATING. It was discussed at length in our committee last year.

Mr. WILLIS. I was not present.

Mr. KEATING. I do not know that the gentleman was present.

Mr. WILLIS. That is why I had to go on record.

I understand that the Attorney General has written a letter to certain Members of Congress in a last minute defense of his no-jury-trial gimmick. He says that our amendment would give a jury the right to review the original order of court. That statement is not only incorrect but it could be very misleading. Take the Clinton, Tenn., case for instance. The court ordered the school board to admit certain colored persons to the public school. I understand that these colored children are now attending the school. As I pointed out, the defendants are charged with contempt in connection with facts and events that occurred since the issuance of the injunction. The purpose of the jury trial there is not to review the original order of court. The purpose is to punish third parties to the original suit who never had their day in court. It is a brand-new trial, presenting brand new facts and circumstances.

I have heard reference made to the practice of punishing a husband who does not pay alimony to his wife or children without a trial by jury. If that argument is worthy of consideration, then I would suggest this to you. The defendant who fails to pay alimony had his day in court. He had the right to show his earning capacity as the basis upon which the judge arrived at the amount. If his financial circumstances change, he can ask the court for a reduction of the amount. Moreover, the suit is one at law and not in equity. There is and can be only one defendant in the case. Under the present proposal there would be numerous defendants, just like in an injunction against a labor union. If the judge in a divorce case would undertake to issue a decree not only against the single defendant but against all unfaithful and delinquent husbands, I imagine some people might be in a devil of a fix. But I would not know too much about this divorce business. I guess I am old timey—it happens that I was only married once for the last 28 years.

And practically the same argument is made in connection with injunctions issued under special acts of Congress. On reflection, however, you will find that these statutes were enacted pursuant to powers specifically delegated to the Congress by the Constitution. They involve such fields as interstate and foreign commerce, and the protection of our national security. In each case the injunction is issued to enforce a specific act of Congress and it does not have the broadside nature or effect as in cases involving labor unions and civil rights. For example, an injunction issued pursuant to the Sherman antitrust law has for its limited purpose the prevention of a monopoly or combination in restraint of trade, such as was recently presented in the $2 billion suit against the Du Pont Corp.

Again, under the Atomic Energy Act, the power to restrain by injunction is in the interest of our national security, such as the threatened violation of atomic-energy secrets.

But here the broad power of injunction is sought in the wide open field of the private rights of individuals. Under this bill the present, and future Attorneys General, would be the repository, the guardian, the Great White Father of all civil rights. This proposition is so novel and so far-reaching that it has never been thought about, much less tried, in our history. I say to you that if such powers are to be granted at all, they should be restricted at least to the point of preserving for the people their precious civil right to be tried before a jury of their peers.

And in conclusion let me suggest this to you. Attorneys General are political appointees. They come and they go. But the right to trial by jury is an institution that should be as permanent and eternal as the Government itself. I ask you not to be a party to its possible destruction. And in the name of the Great Emancipator himself, I ask you not be afraid of a government of the people, by the people, and for the people.

Mr. THOMPSON of Louisiana. Mr. Chairman, will the gentleman yield?

Mr. WILLIS. I gladly yield to my colleague.

Mr. HOFFMAN. Mr. Chairman, if the gentleman will yield, may I interrupt now before you go further with the debate to give a little advice to the gentlemen over there on the Democrat side? We have just listened, as far as I am concerned, to a wonderful, instructive, and convincing talk, but the gentleman has been talking to "believers." He did not have the opportunity to ask those opposing the bill to hit the sawdust trail. Why do you who oppose the bill not get out and let me make a point of no quorum so that some of those who do not now support the measure may be called in on a quorum call and perhaps become converts? No use calling upon "sinners" to come forward when they are not present to hear the call.

A mutual admiration society or group is enjoyable but it does not get votes.

Mr. THOMPSON of Louisiana. Mr. Chairman, I would like to associate myself with the remarks made by my learned friend and colleague, the gentleman from Louisiana [Mr. WILLIS], and to compliment him on a most brilliant dissertation. I hope everybody got as much out of it as I did.

It is gratifying to me that such convincing and crystal clear arguments, designed to illustrate to the intelligent and openminded people of this body, can be made on a basis of legal and constitutional rights of the people of America in every section without resort to emotional appeal as sometimes is wont to spur a legislative body into questionable action. The question of the right to trial by a jury in any criminal contempt action which is fundamental in our way of thinking, not only in the South but all over America, is not the only great principle involved in this consideration.

The matter of placing the Government and more specifically the office of Attorney General in the position of prosecution in behalf of American citizens who do not feel there should be action will, to say the least, be embarrassing and upsetting to any individual who, depending upon a whim of one delegated with the authority of the Attorney General, might be thrust in the midst of court action against his neighbors and friends. This entire subject matter indicates to me that it stems from those who were nurtured on the Hamiltonian theory of government with more and more centralized powers placed in the hands of the central government. As a matter of principle in government, I shall remain a believer of the Jeffersonian approach which recognizes the sovereignty of the individual State. Never will I accede to the embarrassment of the dignity of State processes such as this legislation implies. If there is doubt that juries, for instance, in certain areas of the country will not react properly in the name of justice in cases of violation of civil rights and injunctions, why then would the proponents of this measure not under their philosophy go further and place in the hands of Federal judges without benefit of trial by jury of murder trials which is the extreme in violation of civil rights? This legislation, ladies and gentlemen of the House, is not one to be debated as a matter of rectifying certain wrongs in cases where the rights of individuals have been infringed upon but rather one that, regardless of the motives of

its proponents, is the most far-reaching proposal to place more and more powers in the hands of appointed individuals of the Central Government for expediting in accomplishing the will or the whim of the few rather than the entire citizenry who under our Constitution are really our fundamental government. This Government, I hope, will remain one of law and not of man.

I have every confidence that the due processes of local and State law in my State of Louisiana will always reflect the highest ideals of true democracy as we in America enjoy. Preemption of local processes as this proposal, under the guise of civil-rights legislation will permit, would be the beginning of a crumbling of the sovereign rights of the States which all of us should fight to retain. I hold the same high regard for the processes in your State, and it is my sincere hope that will will join with us in preserving these fundamentals of our Government.

Mr. KEATING. Mr. Chairman, I yield 20 minutes to the gentleman from Virginia [Mr. POFF].

Mr. MASON. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count. [After counting.] Forty-eight Members are present, not a quorum. The Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 99]

Anderson, Mont.	Farbstein	O'Brien, Ill.
Arends	Fino	O'Konski
Avery	Fogarty	Philbin
Ayres	Forand	Poage
Bailey	Garmatz	Powell
Baker	George	Prouty
Barden	Gray	Radwan
Barrett	Gregory	Reed
Beamer	Gwinn	Rhodes, Pa.
Blatnik	Halleck	Rogers, Colo.
Boggs	Harrison, Nebr.	Sadlak
Bowler	Healey	Scrivner
Breeding	Hillings	Sieminski
Buckley	Holifield	Simpson, Pa.
Burleson	Holtzman	Smith, Wis.
Canfield	Horan	Spence
Cederberg	James	Staggers
Chamberlain	Keeney	Steed
Chiperfield	Kelley, Pa.	Taber
Christopher	Kilburn	Taylor
Clark	Kilday	Teller
Coudert	King	Thompson, Tex.
Cunningham, Nebr.	Kluczynski	Udall
Curtis, Mo.	Krueger	Utt
Dawson, Ill.	McConnell	Wharton
Dempsey	McGovern	Williams, N. Y.
Donohue	McIntire	Wilson, Calif.
Dorn, N. Y.	Machrowicz	Wilson, Ind.
Eberharter	Miller, Calif.	Withrow
Engle	Miller, Md.	Wolverton
Fallon	Miller, N. Y	Zelenko
	Morano	
	Multer	

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. ALBERT, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill H. R. 6127, and finding itself without a quorum, he had directed the roll to be called, when 331 Members responded to their names, a quorum, and he submitted the names of the absentees to be spread upon the Journal.

The Committee resumed its sitting.

The Chairman. The gentleman from Virginia [Mr. POFF] is recognized for 20 minutes.

Mr. PELLY. Mr. Chairman, will the gentleman yield?

Mr. POFF. I yield.

Mr. PELLY. Mr. Chairman, I ask unanimous consent to extend my remarks following those of the gentleman from Virginia.

The CHAIRMAN. Is there objection to the request of the gentleman from Washington?

There was no objection.

Mr. POFF. Mr. Chairman, may I say first of all that I was not the one who caused the roll to be called.

Mr. Chairman, a simple understanding of the jury-trial amendment which will be offered later requires a simple explanation of the injunction and contempt process. An injunction is nothing more or less than a court order requiring the performance of some act or restraining the performance of some act. Violation of such an order is considered contemptuous of the dignity and authority of the judge, and "contempt proceedings" is the process whereby obedience to the court's order is enforced by threat of punishment or the court's wounded dignity is redeemed by actual imposition of punishment.

In civil contempt proceedings where the injunction is employed primarily for the benefit of one of the injured civil litigants—as in a domestic nonsupport case—a jury trial is not a matter of right, although the judge in his discretion may empanel a jury to act in an advisory capacity in the determination of questions of fact. Neither is a jury trial a matter of right in a criminal contempt proceeding when the contemptuous acts are committed in the presence of the court or so near thereto as to interfere directly with the administration of justice.

This is an oversimplified explanation of the general abstract rules and regulations of the injunction and contempt process as it relates to the jury trial as a matter of right. Now let us examine the Federal statute dealing with the subject. Paraphrasing that statute—section 3691 of title 18 of the United States Code—any person charged with contemptuous acts in violation of a Federal court injunction is entitled as a matter of right to a trial by jury if those acts also constitute a violation of the criminal laws of the Federal Government or of the State in which they were committed. The bill under debate authorizes the use of an injunction to restrain the commission or omission of an act which would violate a civil right. The violation of virtually every civil right is also a crime, either under a State law or a Federal law. That being true, under the statute cited, any person charged with a contemptuous act in violation of such an injunction would be entitled to a jury trial upon request.

However—and this is the crux of the problem—this statute contains an exception to the general rule. If the United States is a party to the litigation out of which the injunction arose, then the person charged with contempt is not entitled to a jury trial, even though the contemptuous acts with which he is charged are also criminal under a Federal or State statute. The bill under debate expressly makes the United States a party litigant in every civil-rights injunction proceeding. The amendment which will be offered will make an exception to the exception; it would guarantee a jury trial even though the United States is a party litigant.

The injunction historically has been recognized by students of jurisprudence as an extraordinary legal process. By the literary composition of the injunctive order, the judge translates into his own verbiage his own subjective interpretation of the substantive law. In the process, his own motives, his own convictions, his own predilections, and yes, even his own human prejudice and bias must necessarily creep, perhaps unnoticed and unintended by him, into the body of his order. In effect, he writes a new law governing the case at bar. A violation of the judge's order is an affront to his personal dignity. Accordingly, a judge sitting without a jury in a contempt proceeding is at once the lawmaker, the accuser, the injured party, the judge of the law and the arbiter of the facts, all rolled into one. The consolidation of such a vast amount of powers in one individual, however fair and infallible he may be, constitutes a serious threat to personal liberty. For these reasons, the legislatures of history have authorized the use of the injunctive process only with the most painful reluctance and conscientious jurists have used it only sparingly.

I regret to say that some of our modern-day jurists have not been so conscientious in this regard. How a Federal judge can employ the injunctive power to circumvent and repudiate sacred constitutional liberties was dramatized recently in the case of McSwain et al. against County Board of Education of Anderson County which arose in the United States District Court for the Eastern District of Tennessee. In the language of the court's injunction, the accused who were specifically named and "others whose names are not known" were "enjoined and prohibited from further hindering, obstructing, or anywise interfering with the carrying out of the aforesaid order of this court, or from picketing Clinton High School, either by words or acts or otherwise." Although it is plain from this language that the injunction violated the constitutional guaranties of freedom of peaceful assembly, freedom of speech, and possibly freedom of the press, still the injunction when issued and signed by the judge became the law of the case. Violation of that injunction would be contemptuous, the penalty for which would be a fine or imprisonment or both, and after the United States became a party to the litigation, those cited for contempt—which might include any person in the entire eastern district of Tennessee, regardless of whether he was a party to the suit or whether he had knowledge of the injunction—would be denied the right of a trial by a jury of their peers and be compelled to throw themselves on the mercy of the very judge who had issued the injunction.

Those of us who support the jury trial amendment to this bill are, of course, concerned about the abuse of the injunc-

tion and the denial of jury trials in civil rights contempt proceedings. But our fears are not confined to that. We are afraid that this may be used as a precedent to extend the injunction doctrine to other areas of Federal jurisprudence. The Constitution is quite explicit and unequivocal concerning jury trials in criminal cases. In one instance it says, "The trial of all crimes, except in case of impeachment, shall be by jury," and in another, "In all criminal prosecutions, the accused shall enjoy the right to a speedy and public trial, by an impartial jury." The Constitution further guarantees the accused the right "to be informed of the nature and cause of the accusation," the right "to be confronted with the witnesses against him" and the right of a presentment or indictment by a grand jury. In spite of these constitutional guaranties, it might be possible with the use of the injunctior and contempt process, to prosecute, convict, and punish one who has violated a Federal criminal statute without benefit of an indictment or a jury trial. Under sections 111 and 1114 of title 18 of the code, any person who assaults or kills a Federal law enforcement official during the performance of his official duty may be tried in a Federal court and if convicted confined in a Federal penitentiary. Under the law as now written, a person accused under this statute would be entitled to a jury trial. Suppose, however, that Congress should authorize the Attorney General on behalf of the United States to obtain an injunction similar to the one authorized in this bill when he had "reasonable cause to believe that any person is about to" assault or kill a Federal law-enforcement official? If, after the injunction was signed, that person should actually commit the assault, he could be dragged immediately without indictment, before the judge, and since the United States would be a party to the suit, the judge could proceed to try him without a jury, pronounce judgment upon him and punish him by imposing the maximum statutory penalty. This may ineeded be an extreme example and only a remote possibility, but it is nonetheless a possibility and one which serves to illustrate the more proximate dangers along the road upon which we inescapably set forth when we authorize in the civil-rights field the injunction and contempt process without the guaranty of a jury trial.

The demand for a jury trial in injunction and contempt proceedings is not something new. In 1895, in the case of *Debs* v. *United States* (158 U. S. 564), the Supreme Court held certain offenses against property, even though penalized by criminal statutes, could also be enjoined and punished as contempt by the judge without a jury. This decision led to widespread abuse in the use of injunctions in labor disputes. Organized labor revolted against this denial of jury trials and loudly condemned what was called Government by injunction. In 1914 the Congress in the Clayton Act reversed the Debs decision and partly corrected the problem by authorizing jury trials in labor injunction cases except when the United States was a party to the suit. In 1932, Congress completed the job by enacting the Norris-LaGuardia Act which repealed the exception and authorized jury trials even when the United States was a party to the suit. Although I am sure it will be argued by the gentleman from New York [Mr. CELLER], the chief exponent of the civil rights bill and the chief opponent of the jury-trial amendment, that the Wagner Act of 1935 repealed the jury-trial guaranty of the Norris-La Guardia Act, the fact remains that the law as codified in 1948—title 18, United States Code, section 3692—reads as follows:

> In all cases of contempt arising under the laws of the United States governing the issuance of injunctions or restraining orders in any case involving or growing out of a labor dispute, the accused shall enjoy the right to a speedy and public trial by an impartial jury of the State and district wherein the contempt shall have been committed.

Mr. HOFFMAN. Mr. Chairman, I note there are only about 50 Republicans on the floor, and I should like the Chair to count. I make the point of order that a quorum is not present.

Mr. CELLER. Mr. Chairman, I move the Committee do now rise.

The CHAIRMAN. The gentleman from New York has made a preferential motion that the Committee do now rise. The question is on the motion.

The motion was rejected.

The CHAIRMAN. Does the gentleman from Michigan insist on his point of order?

Mr. HOFFMAN. I do, Mr. Chairman. I want the Republicans to hear this.

The CHAIRMAN. The Chair will count. [After counting.] 122 Members are present; a quorum.

The gentleman from Virginia [Mr. POFF] will proceed.

Mr. POFF. This law is a great safeguard to the rights and liberties of the workingman who happens to find himself on the wrong end of a Federal labor injunction. It assures him that no Federal judge, angry, offended, and therefore biased on account of disobedience to his personal decree, can fine him or imprison him without a jury trial, even when the United States is a party to the suit. It assures him that a group of citizens drawn from his own community will stand between him and the arbitrary power of a single individual—an individual who would not have charged him with contempt had he not already considered him guilty. The workingman recognizes the jury as the balance wheel in the scales of justice, and woe betide the man who would try to deprive him of it. In principle, is there any difference between labor injunctions and civil-rights injunctions? Should the State and local officals who may be the victims of civil-rights injunctions be entitled to any less protection than labor leaders?

It is, I think, extremely significant that the only argument made against the jury-trial amendment is that southern juries will be reluctant to convict in civil-rights contempt proceedings. In the first place, such an argument presupposes that every man accused of contempt must be guilty and should be punished. For my part, I prefer the time-tested principle that every man is presumed innocent until found guilty. In the second place, such an argument is a mass indictment of the integrity of the entire southern populace of this country. What could be more reprehensible or more irresponsible than a charge that a whole people would be faithless to a solemn juror's oath? But assuming that juries, weighing all of the facts involved, would be slow to convict, is it not better from the standpoint of liberty that the jury system be preserved, even if 10 guilty men go free while 1 innocent man is convicted? No system for the administration of justice has yet proved itself perfect, and liberty suffers from every imperfection. But of one thing we can be sure, this Government cannot guarantee liberty for all so long as it denies the safeguard of liberty to a single one of its citizens, and there is no safeguard more perfect, more sacred than the right of trial by jury.

Mr. PELLY. Mr. Chairman, I am in strong support of H. R. 6127, the Eisenhower administration bill for the further securing and protecting of the civil rights of persons within the jurisdiction of the United States. Having myself introduced similar legislation I think the situation is that while this is a watered-down bill it has to do with the right of the voting franchise, and as such where there are other evils which need curing, freedom of the ballot box will itself in time be a means of eliminating objectionable conditions for which there is no provision made in this measure. This legislation covers the basic and most important issue of civil rights, and because the bill is not all-inclusive, to make it thus more palatable to more Members, I am hopeful it will have wider support, and in accordance with the wishes of President Eisenhower and both political party platforms be passed by both Houses of Congress.

Opponents of civil rights we learn are going to offer an amendment, in order to kill the effect of the bill, providing for jury trial in contempt cases arising out of Government litigation of civil rights. Naturally any American citizen who hears of an attempt to curb the right of jury trial will resist such action to the utmost. However, this bill does not substitute the injunctive process for trial by jury.

Actually such an amendment is a device to nullify the law. Instead of taking away any right, the bill gives the Federal court the power of vindicating its dignity. Thus if a judge orders a county official to register certain legal voters, and the official does not comply, then under this act the judge could hold the official in contempt without a trial by jury. Such a civil contempt adjudication after the disobedience of final orders and decrees would be reviewable in a higher court of law, so there is protection of the county official. In the past no right of jury has been provided a defendant in civil contempt proceedings where the United States is a party. So it seems to me, after listening to much debate, that the proposed amendment is without justification and is really intended to emasculate the legislation.

Therefore I urge passage of H. R. 6127 without any crippling amendments. As President Eisenhower said earlier this week in his press conference, putting a jury trial between a court order and the enforcement of that order is welcoming anarchy. The best legal argument I have heard supports the President's statement. I shall vote against any such amendment and vote for the bill as originally reported after full and careful hearings by the Judiciary Committee.

Mr. CELLER. Mr. Chairman, I yield 2 minutes to the gentleman from Virginia [Mr. SMITH].

Mr. SMITH of Virginia. Mr. Chairman, I would like to make a very brief statement. We have had two quorum calls this afternoon. I do not want anyone to be under the misapprehension that there will be any effort to conduct any sort of filibuster during the consideration of this bill. But it seems that there were so many Members who were most anxious to get this bill to the floor, and as soon as we got it to the floor and commenced to dissect this creature everybody left. I do think that out of respect to this cause which so many of you are so vigorously espousing that you at least ought to have minds sufficiently open to come here and listen to the argument. I do not see how anyone with an open mind who listened to the last three speeches made here this afternoon by the gentleman from Maryland [Mr. HYDE] the gentleman from Louisiana, [Mr. WILLIS] and the distinguished gentleman from my own State of Virginia [Mr. POFF]—as I say, I do not see how anyone with an open mind who listened to those arguments could do otherwise than correct this bill and see to it that when it does go from this House it will be in proper form.

I simply rise for the purpose of saying to the House that while we have no intention of filibustering on this bill, we shall insist that at least a quorum remain on the floor at all times during the discussion of this measure. If we have to make quorum calls, we will be very sorry to do so because we want this time that we have for general debate, but there is no point in our debating this measure before empty benches.

Mr. HOFFMAN. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Virginia. I yield.

Mr. HOFFMAN. The point of order that a quorum was not present was because this bill and the amendment calling for trial by jury both strike at the foundation of our system of administering justice. All afternoon you have on your side a quorum present, but on this side comparatively few of those supporting the bill have been on the floor to listen to the arguments of those who oppose it. We feel that we are entitled to at least an opportunity to present our arguments to you. Apparently a quorum is present at the moment but it is my purpose to make a point of no quorum every time you gentlemen on that side walk out and so make it possible for me to force a call of the House in order to insure the attendance of the proponents of the bill.

The gentleman from Virginia [Mr. POFF] is making an able, logical, convincing argument opposing the bill and our colleagues should be advised that he is addressing the Committee.

Mr. CELLER. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly, the Committee rose, and the Speaker having resumed the chair, Mr. FORAND, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee having had under consideration the bill (H. R. 6127) to provide means of further securing and protecting the civil rights of persons within the jurisdiction of the United States, had come to no resolution thereon.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

To Mr. PROUTY (at the request of Mr. MARTIN), indefinitely, on account of illness in family.

To Mr. CHAMBERLAIN, for June 7 and 8, 1957, on account of necessity to be in Michigan's Sixth Congressional District on said dates on official business.

SPECIAL ORDER GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mrs. ROGERS of Massachusetts, for 5 minutes, on Monday next.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mr. BOLAND and to include extraneous matter.

Mr. FOGARTY.

Mr. BROOKS of Louisiana in four instances and to include extraneous matter.

Mr. MATTHEWS.

Mr. EVINS in three instances and to include extraneous matter.

Mr. MILLER of California and to include extraneous matter.

Mr. STAUFFER and to include a citation by the President of the United States to ex-President Hoover, and his reply.

Mr. MILLER of Nebraska and to include an open letter addressed to him and his reply.

Mr. TRIMBLE and include a speech.

Mr. WILLIS to revise and extend the remarks made in the Committee of the Whole and include a letter.

Mr. FLOOD (at the request of Mr. EDMONDSON) and to include extraneous matter.

Mr. BREEDING (at the request of Mr. EDMONDSON) in two instances and to include extraneous matter.

SENATE BILLS AND CONCURRENT RESOLUTION REFERRED

Bills and a concurrent resolution of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 434. An act to provide for improved methods of stating budget estimates and estimates for deficiency and supplemental appropriations; to the Committee on Government Operations.

S. 695. An act providing for the revision and printing of a compilation of Federal laws relating to the regulation of carriers subject to the Interstate Commerce Act; to the Committee on Interstate and Foreign Commerce.

S. 806. An act to authorize the Administrator of General Services to quitclaim all interest of the United States in and to a certain parcel of land in Indiana to the board of trustees for the Vincennes University, Vincennes, Ind.; to the Committee on Government Operations.

S. 1027. An act to authorize the Secretary of Commerce to prescribe seals for bureaus and offices of the Department of Commerce, and for other purposes; to the Committee on Interstate and Foreign Commerce.

S. 1366. An act to amend the act entitled "An act to authorize the construction, protection, operation, and maintenance of public airports in the Territory of Alaska," as amended; to the Committee on Interstate and Foreign Commerce.

S. 1791. An act to further amend the Reorganization Act of 1949, as amended, so that such act will apply to reorganization plans transmitted to the Congress at any time before June 1, 1959; to the Committee on Government Operations.

S. 1941. An act to authorize the payment by the Bureau of Public Roads of transportation and subsistence costs to temporary employees on direct Federal highway projects; to the Committee on Public Works.

S. Con. Res. 30. Concurrent resolution to print a compilation of studies and reports on the foreign-aid program; to the Committee on House Administration.

ENROLLED BILLS SIGNED

Mr. BURLESON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H. R. 790. An act to amend the Legislative Appropriation Act, 1955, with reference to official office expenses of Members of Congress;

H. R. 2493. An act to authorize the Secretary of the Interior to permit the construction of a bridge and road across Chincoteague National Wildlife Refuge, and for other purposes;

H. R. 4136. An act to extend the period within which Export-Import Bank of Washington may make loans;

H. R. 5110. An act to amend the Federal Property and Administrative Services Act of 1949, as amended, and for other purposes; and

H. R. 7234. An act to fix the responsibilities of certifying officers and disbursing officer of the Library of Congress.

BILLS PRESENTED TO THE PRESIDENT

Mr. BURLESON, from the Committee on House Administration, reported that that committee did on the following dates present to the President, for his approval, bills of the House of the following titles:

On May 30, 1957:

H. R. 6871. An act making appropriations for the Departments of State and Justice,

the Judiciary, and related agencies for the fiscal year ending June 30, 1958, and for other purposes.

On June 6, 1957:

H. R. 53. An act to consolidate into one act, and to simplify and make more uniform, the laws administered by the Veterans' Administration relating to compensation, pension, hospitalization, and burial benefits, and to consolidate into one act the laws pertaining to the administration of the laws administered by the Veterans' Administration;

H. R. 790. An act to amend the Legislative Appropriation Act, 1955, with reference to official office expenses of Members of Congress;

H. R. 2493. An act to authorize the Secretary of the Interior to permit the construction of a bridge and road across Chincoteague National Wildlife Refuge, and for other purposes;

H. R. 4136. An act to extend the period within which Export-Import Bank of Washington may make loans;

H. R. 5110. An act to amend the Federal Property and Administrative Services Act of 1949, as amended, and for other purposes; and

H. R. 7234. An act to fix the responsibilities of certifying officers and disbursing officer of the Library of Congress.

ADJOURNMENT

Mr. EDMONDSON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 39 minutes p. m.) the House adjourned until tomorrow, Friday, June 7, 1957, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

926. A letter from the Secretary of State, transmitting the 17th Semiannual Report on the International Educational Exchange Program covering the period January 1 through June 30, 1956, pursuant to Public Law 402, 80th Congress; to the Committee on Foreign Affairs.

927. A letter from the Chief Commissioner, Indian Claims Commission, transmitting a report that proceedings have been finally concluded with respect to the following claim: *The McGahey Band of Choctaw Indians, Descendants of Alexander F. McGahey, Sussana Graham and John B. Stewart, Petitioners* v. *The United States of America, Defendant* (docket No. 201), pursuant to the Indian Claims Commission Act of August 13, 1946; to the Committee on Interior and Insular Affairs.

928. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, United States Army, dated April 23, 1957, submitting a report, together with accompanying papers and illustrations, on a review of reports on Mahoning River Basin, Ohio, West Branch Reservoir, requested by a resolution of the Committee on Public Works, House of Representatives, adopted March 10, 1955 (H. Doc. No. 191); to the Committee on Public Works and ordered to be printed with two illustrations.

929. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated May 20, 1957, submitting a report, together with accompanying papers and illustrations, on an interim report on Monroe Reservoir, Salt Creek, White River Basin, Ind., requested by resolutions of the Committee on Public Works, House of Representatives and United States Senate, adopted April 20, 1948, and July 30, 1954, respectively (H. Doc. No. 192); to the Committee on Public Works and ordered to be printed with two illustrations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. MADDEN: Committee on Rules. Resolution 274. Resolution for the consideration of H. R. 6974, a bill to extend the Agricultural Trade Development and Assistance Act of 1954, and for other purposes; without amendment (Rept. No. 538). Referred to the House Calendar.

Mr. DURHAM: Joint Committee on Atomic Energy. H. R. 6978. A bill to amend Public Law 31, 84th Congress, 1st session, to increase the authorization for appropriation to the Atomic Energy Commission for the construction of a modern office building in or near the District of Columbia to serve as its principal office; without amendment (Rept. No. 539). Referred to the Committee of the Whole House on the State of the Union.

Mrs. PFOST: Committee on Post Office and Civil Service. H. R. 3048. A bill relating to the charging of interest on deposits to the credit of the civil service retirement and disability fund; with amendment (Rept. No. 540). Referred to the Committee of the Whole House on the State of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. LANE: Committee on the Judiciary. H. R. 5183. A bill to confer jurisdiction on the Court of Claims to hear, determine, and render judgment upon a certain claim of the Padbloc Co., Inc., and Harry G. Lankford, of Wichita, Kans.; without amendment (Rept. No. 537). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BARRETT:

H. R. 7950. A bill to assist cities and States by amending section 5136 of the Revised Statutes, as amended, with respect to the authority of national banks to underwrite and deal in securities issued by State and local governments, and for other purposes; to the Committee on Banking and Currency.

By Mr. BOWLER:

H. R. 7951. A bill to amend the public assistance provisions of the Social Security Act to eliminate certain inequities and restrictions and permit a more effective distribution of Federal funds; to the Committee on Ways and Means.

By Mr. BREEDING:

H. R. 7952. A bill to amend the wheat marketing quota provisions of the Agricultural Adjustment Act of 1938, as amended; to the Committee on Agriculture.

By Mr. COOLEY:

H. R. 7953. A bill to facilitate and simplify the work of the Forest Service, and for other purposes; to the Committee on Agriculture.

By Mr. COOPER:

H. R. 7954. A bill relating to the exemption of furlough travel by service personnel from the tax on the transportation of persons; to the Committee on Ways and Means.

By Mr. REED:

H. R. 7955. A bill relating to the exemption of furlough travel by service personnel from the tax on the transportation of persons; to the Committee on Ways and Means.

By Mr. GATHINGS:

H. R. 7956. A bill to authorize transfer under certain conditions of 1957 acreage allotments; to the Committee on Agriculture.

By Mr. HEALEY:

H. R. 7957. A bill to amend section 207 of the Legislative Reorganization Act of 1946, to provide that the Boards for the Correction of Military or Naval Records shall give consideration to satisfactory evidence relating to good character and conduct in civilian life after discharge or dismissal in determining whether or not to correct certain discharges and dismissals, and for other purposes; to the Committee on Armed Services.

By Mr. MILLS:

H. R. 7958. A bill to authorize transfer under certain conditions of 1957 acreage allotments; to the Committee on Agriculture.

By Mr. MONTOYA:

H. R. 7959. A bill to exclude from gross income for Federal income-tax purposes amounts received as reimbursement for certain moving expenses; to the Committee on Ways and Means.

By Mr. OSTERTAG:

H. R. 7960. A bill to provide for the registration and reporting of employee welfare and pension benefit plans, and for other purposes; to the Committee on Education and Labor.

By Mr. SCHWENGEL:

H. R. 7961. A bill to adjust the compensation of officers and employees of the United States, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. SIMPSON of Pennsylvania:

H. R. 7962. A bill relating to the applicability of section 164 (d) of the Internal Revenue Code of 1954 to taxes on real property sold before the date of the enactment of such code pursuant to a contract of sale entered into before January 1, 1954; to the Committee on Ways and Means.

By Mr. SPENCE:

H. R. 7963. A bill to amend the Small Business Act of 1953, as amended; to the Committee on Banking and Currency.

By Mr. THORNBERRY:

H. R. 7964. A bill to remove the limitation on the use of certain real property heretofore conveyed to the city of Austin, Tex., by the United States; to the Committee on Government Operations.

By Mr. WALTER:

H. R. 7965. A bill for the relief of certain relatives of United States citizens and lawfully resident aliens; to the Committee on the Judiciary.

By Mr. WATTS:

H. R. 7966. A bill to amend Public Law 654, 84th Congress, in order to provide an expanded conservation program for wildlife through maximum use of Commodity Credit Corporation surplus feed grains; to the Committee on Banking and Currency.

By Mr. HYDE:

H. R. 7967. A bill to effectuate the intent of the Congress as expressed in section 1, paragraph (k) of Public Law 846, 77th Congress, approved December 24, 1942, by adding to the list of the institutions named in said paragraph the name of the American Association for the Advancement of Science, an institution similar to the institutions so named; to the Committee on the District of Columbia.

H. R. 7968. A bill to effectuate the intent of the Congress as expressed in section 1, paragraph (k) of Public Law 846, 77th Congress, approved December 24, 1942, by adding to the list of the institutions named in said paragraph the name of the American Psychological Association, an institution similar to

the institutions so named; to the Committee on the District of Columbia.

By Mr. REES of Kansas:

H. R. 7969. A bill to provide for the construction of the Cheney division, Wichita Federal reclamation project, Kansas, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. ALBERT:

H. R. 7970. A bill to authorize transfer under certain conditions of 1957 acreage allotments; to the Committee on Agriculture.

By Mr. CUNNINGHAM of Iowa:

H. R. 7971. A bill making the 14th day of June in every year, a legal holiday; to the Committee on the Judiciary.

By Mr. FORRESTER:

H. R. 7972. A bill to provide for the conveyance to the city of Warner Robins, Ga., of certain lands located in such city; to the Committee on Armed Services.

By Mr. REES of Kansas:

H. R. 7973. A bill to provide for disabled veteran employees of the Government additional credits for service-connected disabilities for purposes of retention in reductions in force; to the Committee on Post Office and Civil Service.

By Mr. TOLLEFSON:

H. R. 7974. A bill to amend the North Pacific Fisheries Act of 1954; to the Committee on Merchant Marine and Fisheries.

By Mr. WHARTON:

H. J. Res. 349. Joint resolution providing for the revision of the Status of Forces Agreement and certain other treaties and international agreements, or the withdrawal of the United States from such treaties and agreements, so that foreign countries will not have criminal jurisdiction over American Armed Forces personnel stationed within their boundaries; to the Committee on Foreign Affairs.

By Mr. MERROW:

H. J. Res. 350. Joint resolution proposing an amendment to the Constitution of the United States relative to disapproval of items in general appropriation bills; to the Committee on the Judiciary.

By Mr. NIMTZ:

H. J. Res. 351. Joint resolution to establish a Lincoln Sesquicentennial Commission; to the Committee on the Judiciary.

By Mr. PATTERSON:

H. Con. Res. 180. Concurrent resolution expressing the sense of the Congress that the Atomic Energy Commission should establish an experimental reactor in the State of Connecticut; to the Joint Committee on Atomic Energy.

By Mr. COOLEY:

H. Res. 275. Resolution amending House Resolution 157, 85th Congress; to the Committee on Rules.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

By the SPEAKER: Memorial of the Legislature of the State of Oregon, memorializing the President and the Congress of the United States to pass all necessary legislation to finance and carry out the homesteading of the lands in the Klamath Drainage District, etc.; to the Committee on Interior and Insular Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. AYRES:

H. R. 7975. A bill for the relief of Mrs. Helene White; to the Committee on the Judiciary.

By Mr. BROWNSON:

H. R. 7976. A bill for the relief of Maria Eugenia Gonzales Watson; to the Committee on the Judiciary.

By Mr. FOUNTAIN:

H. R. 7977. A bill for the relief of Mable Jernigan Bell; to the Committee on the Judiciary.

By Mr. HESS:

H. R. 7978. A bill for the relief of Lance Stevens; to the Committee on the Judiciary.

By Mr. MULTER:

H. R. 7979. A bill for the relief of Guglielmo DiMaggio; to the Committee on the Judiciary.

By Mr. RABAUT:

H. R. 7980. A bill for the relief of Joseph Daniel Murphy; to the Committee on the Judiciary.

By Mr. RAY:

H. R. 7981. A bill for the relief of Bela Bernat; to the Committee on the Judiciary.

By Mr. ROBESON of Virginia:

H. R. 7982. A bill for the relief of George L. Waltrip, Carroll E. Brizendine, R. E. Skillman, and William Rowe; to the Committee on the Judiciary.

By Mr. ROGERS of Colorado:

H. R. 7983. A bill for the relief of Eugenia Papantonakis; to the Committee on the Judiciary.

By Mr. SHELLEY:

H. R. 7984. A bill for the relief of Mrs. Timothy Chu (Chu Liu Chok Mui); to the Committee on the Judiciary.

By Mr. SHEPPARD:

H. R. 7985. A bill for the relief of Builders Corporation of America, Herlong-Sierra Homes, Inc., and Landis Building & Investment Co.; to the Committee on the Judiciary.

By Mr. TEAGUE of California:

H. R. 7986. A bill for the relief of Kengo Murakami; to the Committee on the Judiciary.

By Mr. WHARTON:

H. R. 7987. A bill for the relief of Maria Giannalia; to the Committee on the Judiciary.

By Mr. McCORMACK:

H. J. Res. 352. Joint resolution to authorize the Secretary of Commerce to sell a certain war-built cargo vessel, and for other purposes; to the Committee on Merchant Marine and Fisheries.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

264. By Mr. CRETELLA: Resolution of Connecticut Federation of Chapters, National Association of Retired Civil Employees, Meriden, Conn.; to the Committee on Post Office and Civil Service.

265. Also, resolution of Connecticut Federation of Chapters, National Association of Retired Civil Employees, in convention assembled, Meriden, Conn.; to the Committee on Post Office and Civil Service.

266. By Mr. MORGAN: Petition of Mrs. David W. Hughes and 86 other residents of Washington County, Pa., favoring the enactment of legislation which would prohibit the transportation of alcoholic beverage advertising in interstate commerce and its broadcasting over the air; to the Committee on Interstate and Foreign Commerce.

267. By the SPEAKER: Petition of Frank McCann, master, Chehalem Center Grange No. 780, Newberg, Oreg., petitioning consideration of their resolution with reference to requesting favorable action on legislation to authorize a high dam at Hells Canyon; to the Committee on Interior and Insular Affairs.

268. Also, petition of Mrs. Mildred F. Garlow, Deer Clan mother of Seneca Nation, Allegheny and Cattaraugus Reserves, Lewiston, N. Y., petitioning consideration of their resolution relative to the anxiety caused by the proposed construction of the Allegheny Reservoir project, in the form of Kinzua Dam, at Kinzua, Pa., on the Allegheny River, which flows through their lands; to the Committee on Public Works.

EXTENSIONS OF REMARKS

Greetings From the President

EXTENSION OF REMARKS

OF

HON. OVERTON BROOKS

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 6, 1957

Mr. BROOKS of Louisiana. Mr. Speaker, as a high point in the course of the 44th annual convention of the National Rivers and Harbors Congress, the President of the United States sent a short letter of greetings to the convention. The letter was personally brought by the Honorable Jack Z. Anderson, of the White House staff, and personally read by him to the convention. It is certainly timely, and was well received by the hundreds of delegates who crowded the main dining room of the Mayflower Hotel for this occasion.

The letter follows:

THE WHITE HOUSE,
Washington, May 16, 1957.

The Honorable OVERTON BROOKS,
Member of Congress, President, National Rivers and Harbors Congress,
Washington, D. C.

DEAR OVERTON: It is a pleasure to send greetings to the members of the National Rivers and Harbors Congress assembled in their 44th national convention.

The importance of your objectives cannot be overestimated. With the continuing growth of our country, every effort must be directed toward the wise use and orderly development of the Nation's water resources. And, as each year passes, it becomes more apparent that sound programs can be assured only through broad participation by the public on every level of interest, Federal, State and regional, local communities and private individuals. All of these must be coordinated through comprehensive long-range planning and the acceptance of just financial responsibility.

The recent floods following the drought in the Southwestern States are a forceful illustration of the need to avoid inadequate, piecemeal, single-phase planning of our water resources.

Progress is being made on actions recommended by the report of the Cabinet Advisory Committee on Water Resources

Policy which I sent to the Congress last year. That report contained a working arrangement within which all the levels of Government, and other public and private interests, could join in developing our water resources. With your support and the united efforts of all groups working together in this vital matter. I am sure we can achieve a sound and equitable water-resources program for the good of our land now and for all future generations.

Sincerely,

DWIGHT D. EISENHOWER.

Installment Sales Credit

EXTENSION OF REMARKS
OF
HON. J. GLENN BEALL
OF MARYLAND
IN THE SENATE OF THE UNITED STATES
Thursday, June 6, 1957

Mr. BEALL. Mr. President, the National Automobile Dealers Association recently paid tribute to one of the Nation's outstanding sales finance institutions which, I am exceptionally pleased to say, has its home office in the great Free State of Maryland. The recipient of the National Automobile Dealers Association's honors was the Commercial Credit Co., which on last May 31 observed the 45th anniversary of its founding. Coincidental with this memorable occasion was the 10 millionth financing of a motor vehicle by Commercial Credit. In recognition of these events I ask unanimous consent to have printed in the CONGRESSIONAL RECORD a statement on behalf of myself and my colleague from Maryland [Mr. BUTLER].

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

INSTALLMENT SALES CREDIT

Installment sales credit has been a large factor in the growth of the American economy during the last two generations. In recognition of the accomplishments which this section of American business has made I wish to commend those who contributed toward its development.

One of the institutions which played a major part in the growth and development of installment sales credit was founded on May 31, 1912, by Alexander E. Duncan, an industrious and foresighted young man from the State of Kentucky, who knew that American business was ready to expand with great growth. To assist in bringing about this development a new kind of financing was necessary. Accordingly he founded Commercial Credit Co. in Baltimore, Md., with a total invested capital of $300,000. This beginning marked a new era in financing manufacturers and wholesalers which was to demonstrate its utility to the American economy so that today this financing plan has broadened its services and its applications to the point where it is now internationally accepted and represents billions of dollars in advances.

Until 1916 this company confined its business to this commercial financing. However, in that year it expanded its operations and became one of the first companies to finance the retail purchase of an automobile for a customer. In 1922 Commercial Credit acquired the majority of the capital stock of Continental Guaranty Corp., of New York, formerly Guaranty Securities Corp., the granddaddy of all the automobile finance companies.

Acquisition of this company broadened Commercial Credit Co.'s operations to where it became national in scope. Commercial Credit was now handling both the retail and wholesale financing of new cars for the motor dealers throughout the United States and Canada. The manufacturers of household appliances, machinery and equipment, having studied the merchandising success of this installment plan, requested from Commercial Credit Co. and received, a similar program to finance the distribution and sale of such articles through distributors and dealers.

Commercial Credit Co. grew rapidly and in 1929 its business had skyrocketed to almost 50 times the amount of business done in its first year. But even during the depression years that followed the company sought to expand its facilities to better service American industry. In 1933 it acquired one of the best known and oldest of the factoring houses, Textile Banking Co., Inc., of New York. In 1935, it acquired a second factoring company, Edmund Wright Ginsberg Corporation of New York.

In 1936 the company purchased American Credit Indemnity Company of New York thereby broadening the services it could offer industry through the issuance of credit insurance to protect manufacturers and wholesalers against losses on open accounts.

From the beginning of installment sales of automobiles it had been the custom of the industry to require that cars be insured against the hazards of fire and theft and, as traffic hazards increased, also against damage from collision. Commercial Credit Co. experienced endless difficulties maintaining a mutually satisfactory connection with independent insurance companies in connection with the protection of and service to its customers. The company came to the conclusion that only by ownership of the insurance company could continuous and satisfactory service be rendered. Accordingly, in 1939, the company ventured further into the insurance field by creating Calvert Fire Insurance Co. to write physical damage insurance on automobiles and other articles usually sold on the timepayment basis. In 1946, it further broadened the insurance facilities it offered by creating American Health Insurance Co. to write group health and accident insurance.

During 1941 the gross volume of receivables acquired by this company for the first time amounted to over a billion dollars. Certainly an indication of its service to American industry and the American consumer.

The war years that followed thrust upon the company new problems. First, how could a finance company make a contribution to the war effort? Second, how could it employ its available resources so that when victory was achieved the company could resume its role as one of the Nation's great financing houses, prepared once more to contribute its strength to the resumption of our way of life. The management, therefore, prepared a program looking to the purchase of manufacturing companies where its capital could increase their productivity and thus it acquired a number of manufacturing companies which produced bombs, shells, pyrotechnics, gun mounts and special purpose machinery. This was an extraordinary departure for a finance company, but the fact is that these manufacturing companies made a notable contribution to America's productive efforts during the war.

Today Commercial Credit Co. is one of the largest sales financing institutions in the world with capital and surplus in excess of $200 million and a broad financing program that serves all elements of our national economy. Today the company and its subsidiaries employ more than 13,000 employees in over 400 offices and plants throughout North America.

Commercial Credit Co. now has over $1,400 million in total resources and it has paid out to its preferred and common stock holders an excess of $220 million in dividends. The annual volume of its finance subsidiaries exceeds $3 billion, net sales of its manufacturing affiliates are in excess of $100 million, and the earned premiums of its insurance subsidiaries exceed $30 million.

The National Automobile Dealers Association in recognition of the 45th anniversary of the founding of Commercial Credit Co. directed the following statement to E. C. Wareheim, chairman of the board:

"In expressing congratulations to Commercial Credit Co. upon occasion of its 45th anniversary as a sales finance institution, the National Automobile Dealers Association pays sincere tribute to the important contribution made to the retail automobile industry and to the car buying public by finance companies.

"Probably no single factor has been so vital to the mass production and sale of automobiles as has been the development of installment credit as it is made available to purchasers of automobiles. Commercial Credit Co.'s important role in automobile financing is pointed up dramatically at this time by its financing of the 10 millionth motor vehicle.

"On behalf of franchised new car dealers, through whom your sales financing service is carried on exclusively, National Automobile Dealers Association extends to Commercial Credit Co. its best wishes for continued growth and progress."

I feel that these remarks are most appropriate because they briefly summarize the contribution which this organization has made to the betterment of the American way of life.

Dedication of the New Eberhard Faber Pencil Co. Plant at Wilkes-Barre

EXTENSION OF REMARKS
OF
HON. DANIEL J. FLOOD
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 6, 1957

Mr. FLOOD. Mr. Speaker, I rise to call attention briefly to a subject that is constantly in the thinking of all Members of the Congress.

My reference is broadly to the industrial development of our respective States and, in turn, to their respective areas.

A gracious Heaven has richly endowed this land of ours with endless bounty. There is within our borders an abundance of natural resources for satisfying all of man's ever-growing wants. These blessings have attracted to us from less-favored lands the most vigorous and most enterprising, who have here found the opportunities they needed to achieve fulfillment and complete personal dignity.

Adapting their natural talents and skills to the new land, they have been largely instrumental in building an awe-inspiring American industry, to which no goal seems impossible and most goals seem relatively simple.

We cannot yet be too proud. We have built only with what a benevolent God has given us, and much remains to be built before maximum opportunity is available to all.

But we can take pride in this: That in those areas where Nature has withheld some of her favor, we have not been frustrated by a lack of natural resources. The Nation has forged a great and efficient system of distribution which has freed many industries from the paralyzing necessity of proximity to its sources of supply. Industry has thus become more flexible and can give more attention to other factors.

The abundance of these advantages offered by the Commonwealth of Pennsylvania is pointed up by a symbolic event that will occur there on Wednesday, June 19, 1957. On that day, on a mountaintop overlooking the city of Wilkes-Barre, one of the Nation's oldest yet most enterprising industries is dedicating its new factory. For both that industry, the Eberhard Faber Pencil Co., and for the area, the event opens also a new era.

It is no paradox that the Nation's oldest manufacturer of quality writing instruments is the creator of the world's newest and most advanced facility for such manufacture.

The spirit of enterprise and progress is a young spirit and is kept always green by an unflagging faith in the future of this Nation. For 108 years this spirit has been kept brightly burnished by the descendants of the first Eberhard Faber. They have always chosen as their associates men of like vision and youthful spirit.

Nor is it strange that they selected the Wilkes-Barre area for their principal factory and world headquarters. In this area repose the skills and the talents which Eberhard Faber requires above all else to sustain its enterprise and to broaden further its world markets.

From ships that have crossed oceans, from remote forests, and from farflung mines come the raw materials that are blended and welded by men into the writing tools they must have for the earliest expression of their ideas and for the communication of these ideas to others. Indeed, graphite, which men use to lubricate their wonderful machines, is here enclosed within a simple pencil to serve an even more important purpose, that of lubricating the flow of thought from man to man, from nation to nation.

From Wilkes-Barre, which now becomes truly the pencil capital of the world, these basic implements will move speedily out on glistening rails, over white concrete highways, and along the fast-flowing streams of the air above, to all corners of the globe.

For here, all these efficient means of communication are at hand.

It should be instructive to all other parts of this Nation which can accommodate industry, and which require it to sustain and develop the standard of living of their citizens, that the massive decision to relocate in Wilkes-Barre did not occur to Eberhard Faber spontaneously.

It was enterprise and zeal and abundant faith and local pride of a very practical kind that led to the decision. Working together, the Wilkes-Barre Chamber of Commerce, the Wilkes-Barre Industrial Fund, and the Committee of One Hundred, later given unstinting aid by the Pennsylvania Industrial Development Commission, took the initiative.

For Eberhard Faber, the removal means not only an opportunity to acquire newer and more modern production facilities. It means also new room for future growth. To the locality mainly affected, it means more jobs, better jobs, the use of its people at their highest skills, and thus greater prosperity and happiness.

There is another lesson here for industry-starved areas of our country. In their desperate efforts to attract industries, local sponsors sometimes lose sight of the stability of an industry in prospect. It must be sound in structure and in management, however small it may also be. Its primary advantage to the area must be that it will create employment, but this employment should bring solid and lasting benefits to those who take it.

The character of management should therefore be weighed carefully, lest a new industry bring with it more chaos than benefit.

In the arrival of the Eberhard Faber Pencil Co., the Wilkes-Barre area has taken a clear, long step forward in its progress. In making the move, the community-conscious Eberhard Faber people have shown American industry that no business is limited by rigid frontiers.

They have shown that expansion and progress are up to men, and that men of sagacity and vision can effectively control their own destinies, subject only to the will of their Creator.

Indeed, American communities and American industry can learn much from this happy wedding of Eberhard Faber and Wilkes-Barre. From this union will come gladness to the community, to industry, and to the Nation itself.

The All-American Family for Florida

EXTENSION OF REMARKS
OF
HON. D. R. (BILLY) MATTHEWS
OF FLORIDA
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 6, 1957

Mr. MATTHEWS. Mr. Speaker, in the Eighth Congressional District of Florida there is a family of whom I am very proud. I refer to Mr. and Mrs. Stacey Quincey, of Route 1, Trenton, Fla., and their 3 children, James, 21; Horace, 16; and Kathy, 5. I am certainly not alone in my high opinion of this outstanding family, because the Quinceys have recently been named All-American Florida Family, and then tied for third place in the nationwide All-American Family Search. Stacey Quincey is the kind of farmer who is the backbone of my Congressional district. He raises corn, peanuts, and watermelons. He and Mrs. Quincey are hard-working, Christian people who typify the finest in American citizenship, and they have raised their children in the same traditions and ideals which they possess.

The oldest child, James, recently left the University of Florida for one semester in order to discharge his duties as a national vice president of the Future Farmers of America. James has achieved national recognition through his FFA work, and is one of the finest, most personable young men that I know. His younger brother, Horace, is coming along in the same path and is already a leader at Trenton High School. The little girl, Kathy, like her mother, is beginning to contribute to the family those priceless feminine qualities and touches which make American family life so meaningful and gracious. I have been well acquainted with this wonderful family for a number of years, and I am sure my pride and happiness almost equaled theirs when the good tidings of their selection became known. As we all know, the family is the foundation unit of our American democracy and is the place where our boys and girls receive the love, training, and encouragement which enables them to grow and progress into fine American citizens. The Quincey family is representative of all the attractive families who can be found on the farms and in the small towns of my district and throughout rural America. They were chosen by a national selection board composed of editors of the Book of Knowledge and members of the national staff of the Boys' Clubs of America, conductors of the All-American Family Search, together with members of the national advisory committee of civic and service leaders and educators from each State. I feel humbly grateful to have people like this living in my district whom I can represent in the National Government. It is with a great deal of pride and pleasure that I can call this family to your attention.

Tax Subsidies to the Private Utility Companies

EXTENSION OF REMARKS
OF
HON. JOE L. EVINS
OF TENNESSEE
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 6, 1957

Mr. EVINS. Mr. Speaker, several days ago I addressed the House on the subject of the TVA and in the course of my remarks I mentioned the tax amortization certificates private utilities had received and the tax relief and subsidy they have thereby enjoyed. Several members have spoken to me concerning the need for additional information on the subsidies enjoyed by private utilities in their States. Having obtained a list of subsidy certificates, interest free loans and other benefits to private electric companies, I ask unanimous consent to have reproduced these tables of grants and favoritism in the CONGRESSIONAL RECORD.

These tables were obtained from the Power Facts Handbook prepared by Paul Nelson and Clay Cockran and published by the National Rural Electric Cooperative Association. The following com-

ments may increase the value of those tables.

A tax certificate permits the recipient to amortize his capital investment in 5 years instead of the much longer period provided by conventional practice. The actual life of power projects is normally considered to range from 25 to 50 years. On a $2 million powerplant construction—with a 50-percent or $1 million tax certificate grant—the company would be permitted to depreciate $200,000 a year instead of $20,000 each year under normal procedure. Assuming that the company was already in the 52-percent bracket—as most of them would be—the tax saving, as compared to what it would have had to pay if it had followed the 50-year depreciation pattern, would amount to $93,600 per year. Over the 5-year period the total saving would be $468,000. So that during the 5 years the company enjoyed rapid amortization it would pay a total of $468,000 less in taxes than under normal depreciation procedures—the private utility company also would have the benefit of using the funds represented by the tax saving and therefore the total tax relief amounts to an interest-free loan from the Government.

The first of the following tables presents the picture for the 48 States; the second for most major power companies in the United States. The first column gives the amount of tax certificates obtained, the second the amount of tax relief these certificates have or will yield or, to put it another way, the interest-free loan they have thereby received; and the final table gives the total subsidy from these grants.

I certainly agree with Senator BYRD who said in a report on these rapid amortization scandals that they clearly and obviously represent a subsidy to the private utilities—a subsidy that should be discontinued.

It is easy to see how these beneficiaries of clear and measurable dollar and cents subsidies can spend millions of dollars in magazine and newspaper advertisements trying to give the impression that public-power projects like the TVA, Bonneville Power Administration, the REA co-ops, and others, enjoy what the private electric companies call subsidies—they should know. I might point out also that the next time we see one of these propaganda ads asking "Where do your taxes go?" that these tables will provide one very clear and incontrovertible answer—to subsidies, in the form of fast tax writeoffs, interest-free loans, and favoritism to the private utilities.

The tables follow:

TABLE I.—*Estimated value of accelerated depreciation certificates, interest-free loans, and other subsidy benefits to private electric companies from June 9, 1951, through July 11, 1956*

[Application under the electric power goal was suspended on Dec. 3, 1953, reopened in April 1955 and closed again on Jan. 1, 1956]

State	Amount certified for accelerated depreciation	Amount of interest-free loan	Total subsidy up to 33⅓ years at 6 percent	State	Amount certified for accelerated depreciation	Amount of interest-free loan	Total subsidy up to 33⅓ years at 6 percent
Alabama	$52, 539, 226	$23, 222, 337	$78, 808, 839	New Hampshire	$33, 146, 000	$14, 650, 532	$49, 719, 000

Senator Martin Speaks on Flood Control

EXTENSION OF REMARKS
OF
HON. OVERTON BROOKS
OF LOUISIANA
IN THE HOUSE OF REPRESENTATIVES

Thursday, June 6, 1957

Mr. BROOKS of Louisiana. Mr. Speaker, under leave to extend my remarks, I present an address delivered by the Honorable EDWARD MARTIN, United States Senator from Pennsylvania, before the fifth annual convention of the National Rivers and Harbors Congress held in Washington, D. C., on Friday, May 17, 1957:

ADDRESS OF UNITED STATES SENATOR EDWARD MARTIN, OF PENNSYLVANIA, AT THE 44TH NATIONAL CONVENTION OF THE NATIONAL RIVERS AND HARBORS CONGRESS AT WASHINGTON, D. C., FRIDAY MORNING, MAY 17, 1957

Mr. Chairman and my fellow Americans, I am highly honored by your invitation to address this important meeting.

Your organization is outstanding in its devotion to a great and patriotic purpose. With each passing year the objectives to which you are dedicated grow increasingly important.

The economic well-being of our country, the expansion of our industrial production, the growth of our commerce, the prosperity of our people and the defensive strength of our Nation are becoming more and more dependent upon the development of our water resources.

This covers a broad area and I cannot praise too highly the distinguished public service which your organization has contributed in the national interest.

The subject assigned to me for discussion today is the River and Harbor Flood Control Act of 1957. But first I would like to make some observations of a more general nature relative to the situation in our country today.

We are in a period when spending by Government has become a matter of deep concern to a large part of our population. Never before in my experience has the average American been more seriously alarmed over the high cost of government and the heavy burden of taxes.

In every section of the country there has developed a demand for economy, for reduced spending and for lower taxes.

That, my fellow Americans, is a good sign. It reflects a growing and more widespread interest in the affairs of government. It is good for the United States when more and more people question the wisdom and the safety of expenditures that take one-third of the earnings of everyone who works for a living. That applies to the taxes imposed by the three levels of government—Federal, State, and local.

It is good for the United States when the people see cause for worry in a budget which is 17 percent greater than the combined spending of 32 other countries, including all the important nations of the world except Russia.

Those of you who are familiar with my record in public life know that I have always been on the side of economy in government. I can say, without meaning to be boastful, that I have always fought against waste and extravagance at all levels of government. I have always believed that the sound principles of business efficiency and economy should be applied to the conduct of governmental affairs.

As a member of the Senate Public Works Committee and as a former chairman of that committee, I can tell you that sound business principles, taking into account all the economic and engineering factors, have been applied to every navigation project and every flood-control project that has come before us for authorization.

We have looked upon these projects as investments in the future of the United States—investments that have paid big dividends in the past and will continue to do so in the future.

Every American is a stockholder in our ocean ports and in our great inland waterways. Year by year they pay generous dividends by providing low cost water transportation for commerce and industry, bringing prosperity to countless cities and towns, building up great centers of production and expanding opportunities for gainful employment for our working men and women.

Therefore we are on solid ground when we maintain that a constructive national program that expands the usefulness of our rivers and harbors and brings real and lasting benefits to our country can never be called a waste of public funds.

On the contrary, such expenditures are sound, prudent investments in a great national asset, contributing in a large measure to our economy in peacetime and to our defensive strength in time of national emergency.

In the same way the flood-control program undertaken by the Federal Government has more than justified its cost. In the prevention of property damage it is paying off at the rate of more than $3 for every $1 invested. And that does not include the saving of lives and the security established for homes and farms in areas formerly endangered by destructive floods.

One of the most beneficial developments in connection with flood control has been the increasing emphasis on related purposes, such as hydroelectric power, conservation of water for municipal, agricultural, and industrial uses, the abatement of stream pollution, recreation and sanitary facilities.

As you are well aware, the River and Harbor-Flood Control Act of 1957 is before Congress today because the bill passed by the 84th Congress was vetoed by the President.

The President did not minimize the importance of the legislation. In his veto message, he said—and I quote:

"I believe the periodic enactment of river and harbor and flood-control legislation is an important step in the formulation of a sound Federal program for the wise development of the Nation's water resources."

In his message, the President referred to 32 projects involving about $530 million to which the Budget Bureau had found reason to object.

The bill in its present form, as approved by the Senate Public Works Committee without a dissenting vote, is essentially the same bill that was passed by the 84th Congress. Most of the projects to which exception has been taken have been reviewed on the basis of recommendations submitted to Congress by the Corps of Engineers. As stated in the report on the bill, it includes those projects which the committee considered fully justified for authorization at the present time.

A substantial majority in the Senate agreed with that view and passed the bill by a vote of 42 to 22, after rejecting two proposed amendments. One amendment sought to give the President authority to postpone $375 million of its total authorization. The other would have recommitted the bill with instructions to reduce the authorizations by not less than $350 million.

This is a good bill. It should be enacted into law without delay in order to expedite the beginning of work on urgently needed projects. But I am unable to tell you whether the Budget Bureau experts will give their approval.

That brings up a matter which should be given serious thought and careful attention. It has to do with a fundamental principle of our system of government which places exclusive control of the Federal purse within the jurisdiction of the legislative branch.

Many are wondering whether the executive branch, in the exercise of those functions assigned to the Bureau of the Budget, should be permitted to override the will of Congress.

Let me give you one example in which I am very much interested because it has great strategic importance from the standpoint of the national economy and national defense. I refer to the project for deepening the channel in the upper Delaware River. This was authorized by Congress in 1954 after thorough debate. The authorization calls for a 40-foot channel depth from Philadelphia to Trenton but the Bureau of the Budget continues to define the improvement as an "interim 35-foot channel," even though it has been clearly established that a substantial saving could be achieved by completing the improvement to 40 feet in one operation.

I hope the day will never come when Congress will weaken its legislative responsibility by surrendering any part of its powers granted by the Constitution, to the Budget Bureau or any other agency of the executive branch.

You men here know that after authorization it is necessary to go before the Appropriations Committee for funds with which to carry out the approved project. This gives an opportunity for further congressional study, so that each proposal, no matter how meritorious, is placed under strict scrutiny in relation to the whole national picture. I maintain that is a proper and exclusive legislative function and that the decisions of the Budget Bureau should never be considered as binding on the Congress of the United States.

The national program for the improvement of our rivers and harbors has been a Federal responsibility since the beginning of our Nation. As early as 1827 President John Adams in his message to Congress, referring to appropriations for waterway and other internal improvements said they may be considered, and I quote, "as treasures laid from the contributions of the present age for the benefit of posterity."

In more recent times Herbert Hoover, then Secretary of Commerce, speaking in 1927 about prudence in expenditures for the modernization of the Mississippi River system said, and I quote:

"Upon this point, we can do no better than quote the most successful statesman in economy in our national history—President Coolidge—who in his message to Congress said in referring to these very projects:

" 'Expenditure of this character is compatible with economy. It is in the nature of capital investment.' "

Again, at Louisville, on October 29, 1929, upon completion of the Ohio River project, President Hoover said:

"As a general and broad policy I favor modernizing every part of our waterways which will show economic justification in aid of our farmers and industries. * * *

"A nation makes no loss by devotion of some of its current income to the improvement of its estate. That is an obligation we owe to our children and our grandchildren. I do not measure the future of America in terms of our lifetime. God had truly blessed us with great resources. It is our duty to make them available to our people."

Fifteen-Acre Wheat Farmer

EXTENSION OF REMARKS
OF
HON. J. FLOYD BREEDING
OF KANSAS
IN THE HOUSE OF REPRESENTATIVES

Thursday, June 6, 1957

Mr. BREEDING. Mr. Speaker, in the interests of the wheat producers of the Fifth District of Kansas I am today introducing legislation to repeal the wheat marketing quota provisions of the Agricultural Adjustment Act of 1938, as it affects the 15-acre wheat farmer and the 200-bushel exemption: paragraph (7) of Public Law 74, 77th Congress—United States Code, title 7, section 1340 (7)—and section 335 (d) of the Agricultural Adjustment Act of 1938, as amended—United States Code, title 7, section 1335 (d)—effective beginning with the 1958 crop of wheat.

To anyone familiar with the critical situation facing the areas dependent on a wheat economy it would be apparent that the number of 15-acre wheat farmers is spreading in ever-increasing numbers over the commercial and noncommercial wheat-producing areas of our country. It is my sincere belief that unless there is some adequate controls placed, and soon, to prevent the 15-acre wheat growers from increasing in numbers they will cause untold economic hardship in many areas.

Protection must be provided the one-crop producers of our Nation's agriculture, especially when there is proven evidence that the area is unable to support itself with any other crop.

My district, which is one of the larger commercial wheat producing districts of the United States, would be pleased to find new means of supporting our economy. We would like to have new industries in southwestern Kansas. Thoughtful people in my State are hard at work on these matters.

As further evidence of our efforts to help ourselves the Kansas Legislature recently passed the Kansas Wheat Act providing a seven-man Kansas Wheat Commission. The Kansas Wheat Commission will collect a levy of 2 mills per bushel for the purpose of conducting a campaign for development, education and publicity for uses of wheat and the finding of new markets for wheat and wheat products.

We have been hard hit with drought. While the recent rains will be of untold help to this year's crops we will still be faced with the unrestricted competition of the 15-acre wheat farmer.

The Department of Agriculture recently furnished me a figure of 1,026,424 15-acre wheat farmers in the commercial wheat-growing areas of the United States. Add to this the unknown number of 15-acre wheat farmers in the noncommercial wheatgrowing States and you will see the staggering numbers of wheat farmers producing in competition with the highly controlled commercial wheat farmer.

As rapidly as the 15-acre wheat farmers are increasing in number it will be only a short time before total domestic consumption needs will be supplied by the wheat produced on the 15-acre farms. With our present modern methods of production and marketing, together with the fact that every State in the Union does grow wheat, it presents an evergrowing threat to the economy of my district, limited as it is to a wheat producing country by the nature of its geographical location and climatic conditions.

Citation to Former President Herbert Hoover

EXTENSION OF REMARKS
OF
HON. S. WALTER STAUFFER
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES

Thursday, June 6, 1957

Mr. STAUFFER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following remarks by the President in conjunction with his presentation of a citation to former President Herbert Hoover for distinguished civilian service to the citizens

of the United States at the luncheon given by the Citizens Committee for the Hoover Report at the Shoreham Hotel, Washington, D. C., February 4, 1957:

THE WHITE HOUSE.

President Hoover, Mr. Chairman, and my friends, you see, there was some excuse for my question addressed to the chairman because I had been assigned a very specific and succinct part of this program. But I did feel I wanted to express a few personal sentiments with which I hope most of you can agree.

First, my purpose was to pay a great tribute—as great a tribute as I am capable of delivering—to the youthfulness of our guest of honor, Mr. Hoover.

Someone said that any man is young who retains his optimism. And optimism, I believe, is a capacity for looking toward the future with hope and enthusiasm.

Now our guest of honor has shown his optimism twice. He has headed great commissions determined to deliver to us better service in the Government that we must maintain, and at less cost to ourselves. He remains optimistic, or he would not have devoted so many years of his life to this work.

And in his case, I think, there would be a great deal of excuse—at least at times I feel so—for an opposite conclusion.

He spent many years in public service, and I know something of some of the frustrations and difficulties he had during at least 4 years of that service.

He knows what it means to attempt to install new methods, new procedures, in a great hierarchy, in a great bureaucracy.

Now, I would not have any of you think that your public servants in the civil service and in other areas are not good people. Indeed they are. Some of them are extraordinarily intelligent and capable. But they are a very large group that has been accustomed to operate according to certain procedures—certain methods. We do it ourselves, in our daily lives. We become creatures of habit.

I won't venture to remark about the ladies. But I would bet any man here puts the same foot into his trousers first every morning.

In all our daily lives you can find that we fall into habits. Take the one of eating. How many people are in this room, I wonder, whose doctors have not asked them to keep their weight down, but who go on indulging themselves?

The same way in government. We become used to these procedures and practices, and they involve these millions of people. I declare, if you could provide for the Government, through the Bureau of the Budget, a new accounting system, with the utmost expedition and efficiency, it would certainly take you many months before you could reach the last echelon of government. And why not? They will plead: Why, we have blank forms printed for the next 3 years. We will have to retrain our clerks. They have every good reason in the world for not doing this hastily.

Our guest of honor has never lost his enthusiasm for better government through all this kind of thing.

I merely wanted to point out, this is an unusual kind of enthusiasm and leadership, from which all of us benefit.

And may I say that every one of the recommendations submitted by the people—by the leaders of the Hoover Commission, have been the subject of earnest study. They have been monitored within the Government by one of our noted businessmen, Mr. Meyer Kestnbaum, in order to get every one of them implemented as rapidly as possible. I am very sorry to admit that that speed has not been sufficient and all we could ask. But it is progress, and it will continue. That I promise this body, which has worked so hard to bring it about.

And now after that, the real purpose of my coming to this platform to speak: I have been privileged to prepare—to get ready for Mr. Hoover a short citation which I shall now read:

CITATION TO FORMER PRESIDENT HERBERT HOOVER FROM PRESIDENT DWIGHT D. EISENHOWER

To Herbert Hoover, statesman and citizen, honored in every field of human endeavor: Science, business, government, education, art, charity, I address the Nation's recognition of a crowning achievement.

To a searching examination of the executive branch of the Government, you have freely applied unparalleled knowledge. Inspired by your concern for the whole truth, disciplined by your unremitting insistence on accuracy, united by your respect for majority opinion, your Commissions have wrought incalculable good.

Through your efforts, ours will be a stronger country. In so adding strength to the American Republic, you have added strength to the Free World.

We are grateful.

DWIGHT D. EISENHOWER.

FEBRUARY 4, 1957.

Mr. HOOVER. Mr. President, fellow members of this Citizens Committee, I want only to express my deep emotion and appreciation for the extraordinary honor which the President has just conferred upon me. And I also want to express to him the appreciation which you have for the constant support that he has given to the work of this body of citizens.

And I have the idea that when he has finished this term, he will certainly merit even a greater tribute than that which has come to me.

For he will have, I hope, a successor with an appreciation of a great national man.

Thank you.

Statement of Hon. John E. Fogarty, Member of Congress, Second District of Rhode Island, Before the Committee on Interstate and Foreign Commerce of the United States House of Representatives, on Proposed Amendments to the Natural Gas Act, June 4, 1957

EXTENSION OF REMARKS

OF

HON. JOHN E. FOGARTY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 6, 1957

Mr. FOGARTY. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following statement made by me before the Committee on Interstate and Foreign Commerce of the House of Representatives on proposed amendments to the Natural Gas Act, June 4, 1957:

Mr. Chairman, I appreciate the opportunity of testifying on H. R. 6790 and related bills which have received the earnest consideration of your committee for the past several weeks. While I do not regard myself as an expert on the matter of natural gas, I have followed these hearings with a great deal of interest and wish to commend you and the other members of the committee for the attention which you have given the views of both proponents and opponents of the basic legislation.

As Congressman from the Second District of Rhode Island, I represent thousands of consumers of natural gas who are totally dependent on a source of supply located in areas of the country far removed from them. These people have been appropriately termed "captive consumers" of natural gas. They have no freedom of choice between competitors in this all-important commodity, hence they have no protection against unreasonable price increases in the cost of the basic commodity. This lack of a free market in an item so essential to their everyday needs is a compelling reason for me to view with some alarm the consistent efforts of the profitable and highly organized oil-gas industry to free itself from the regulation intended by the Natural Gas Act of 1938. I say the oil-gas industry for the reason that natural gas as a byproduct of oil exploration is principally controlled by the same small group of powerful oil companies which recently rocked the consuming public from coast to coast with their post-Suez petroleum-product increases. The basic purpose of Federal regulation under the Natural Gas Act is and should be the advancement of the public interest by balancing the self-interest of the owners of producing gas wells with the interest of the more than 21 million American families who have come to depend upon gas for family and household needs. Since the Phillips decision in 1954, however, the Federal Power Commission has scarcely been given the opportunity to carry out this public-interest purpose, and yet this proposed legislation would make that task impossible for the simple reason that it is weighted in favor of the producers.

I am sure you are surfeited with statistics after these many weeks of hearings and I do not propose to burden the record further on that score. Moreover you have had presented to you a careful section-by-section analysis of this bill by both proponents and opponents. For my part, I propose to state my objections in a nontechnical, simple fashion. After a careful examination of H. R. 6790, I am compelled to the conclusion that there has been no demonstrated need for this legislation. I have been unable to learn of one single natural gas producer who has suffered from the appropriate regulation which the Federal Power Commission is authorized to administer under the present provisions of the Natural Gas Act. Financial statistics available on the pages of any of our newspapers have told us during recent months that the oil-gas industry is enjoying its period of highest prosperity. For them the recent 1-cent per gallon price increase in fuel oil and gasoline added to these rising profits and based on a 9-million-barrel-per-day consumption of petroleum products in the United States, it meant more than $1 billion a year out of the pockets of American consumers. Rising costs of natural gas would take additional tolls from the consuming public and add them to the rich profits already enjoyed by an industry which we favor with special tax treatment designed to offset the special risks which are inherent in their operations.

In his veto message of February 1956 returning H. R. 6645, President Eisenhower pointed out the need for any new legislation to include specific language protecting consumers "in their right to fair prices." Mr. Chairman, I am unable to find any such language contained in H. R. 6790. I believe with the President that consumers do have a "right to fair prices" of natural gas and I further believe that the only way to protect that right is through Federal regulation by the Federal Power Commission over prices charged for natural gas delivered to interstate pipeline companies. This bill, in my opinion, would only impede and hamper that needed regulation.

I have been much impressed with the provisions of H. R. 6813, a bill sponsored by Mr. MACDONALD, which in effect steers the middle course on this general subject of regula-

tion of sales of natural gas in interstate commerce. As I understand it, enactment of this bill would remove from Federal regulation approximately 96 percent of the producers who make sales to interstate pipeline companies. However, it would leave subject to regulation those large producers who sell in excess of 90 percent of all the natural gas which is the subject of sale in interstate commerce. After hearing so much about the plight of the small independent gas producer, but never really seeing one who came before any of our committees to tell his story, I would imagine that this proposal would be welcomed by the vast majority of the members of the oil-gas industry. I am reliably advised, however, that to date there has been little enthusiasm shown by the industry itself in support of the Macdonald bill. If this is correct, it only confirms my belief that there has been no demonstrated need for any legislation whatever. But if we must have legislation designed to relieve natural gas producers from threatened Federal regulation, I intend to give serious consideration to full support of this enlightened proposal.

In conclusion, therefore, I respectfully submit that H. R. 6790 is not designed to serve the public interest in that it contains no assurance that consumers of natural gas will be protected in their right to fair prices, but on the other hand, will weight the scales heavily in favor of a monopoly industry which needs to be regulated in this phase of its activity.

Annuities of Civil Service Retirees

EXTENSION OF REMARKS
OF
HON. GEORGE P. MILLER
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 6, 1957

Mr. MILLER of California. Mr. Speaker, I have submitted a statement, which I would like to have extended in the RECORD, to the House Post Office and Civil Service Committee in support of legislation to increase the annuities of retired civil-service workers.

My statement follows:

STATEMENT BY CONGRESSMAN GEORGE P. MILLER TO THE POST OFFICE AND CIVIL SERVICE COMMITTEE IN BEHALF OF H. R. 786, A BILL TO INCREASE ANNUITIES PAYABLE TO CIVIL SERVICE RETIREES

Mr. Chairman, the annuities of the civil service employees who have retired under the provisions of the Civil Service Retirement Act should be immediately increased. Such an increase is long overdue and the House Committee on Post Office and Civil Service and the Congress should act with dispatch and celerity in bringing a bill before the House to effect such an upward adjustment.

If the President exercises his prerogative and vetoes such a measure, as has been rumored, let the responsibility of his action rest with him.

You and I are both aware of the story recently carried on the front pages of newspapers across the Nation, recounting the fact that the cost of living hit a new alltime high for the ninth month in a row. High prices for food, medical expenses, rents, clothing, et cetera, affect each American consumer alike. No one is spared. However, annuitants on a fixed income are the hardest hit when prices soar since their incomes remain static.

If we analyze the Bureau of Labor Statistics reports we find that the costs of food varies seasonally while there has been a progressive increase in such items as rent, utilities, transportation, and medical expenses. Rent has been going up and up since the removal of rent control.

A superficial argument and one, incidentally, without moral foundation, has been made against increasing annuities on the ground that it would be inflationary. Any money coming into the economy is inflationary if you want to be highly technical, I suppose. But is the money we will pay these people any more inflationary than the rise in the cost of gas granted the big utilities? Is it more inflationary than the arbitrary rise in the cost of steel—basic to our economy—or the stock dividends paid by the big corporations out of their recordbreaking high earnings? Is it more inflationary than the continued tight-money policy of the administration? I do not think it is.

Annuitants are caught in a trap. They are victims of the times and their troubles are not of their own making. We are in a position to free them from this entrapment and, as far as I am concerned, we have a moral obligation to do so.

Three-fourths of all retired Federal workers receive less than $150 a month. It is difficult for them to maintain a decent standard of living and, at best, all they can afford are the bare necessities of life.

The money paid to annuitants circulates. It is not impounded where all the people do not enjoy its benefits. They are, by necessity, forced to spend the money they receive. And they spend it at the lowest level of our economy, for food, clothing, medical care, and shelter. It goes to small business and professional men. It is the kind of spending that stimulates small business—the kind of spending we need right now.

The Congress should give serious consideration to changing the formula by which pensions are computed under the Civil Service Retirement Act. Armed services personnel receive retirement pay based on the current salary of the job. In my opinion this is a reasonable solution to the problem.

Pensions received by retired Government workers are presently based on the average annual salary of the highest continuous 5 years of the beneficiaries former employment. In most cases the employee reaches his maximum salary just before he retires so it is his average last 5 years salary that becomes the "multiplier." His years of acceptable service times the "multiplier" is his retirement pay.

The salaries of Government employees have steadily risen over the long years in rough proportion to the higher cost of living. However, this raise has not been a real one but a relative one. So we find that the percentage paid into the retirement fund, a denial of buying power, is relatively the same.

For instance, a letter carrier earning $1,800 15 years ago paid into the fund, on the basis of a 6 percent contribution, $104 a year. A letter carrier today, paid at the median level of $4,000 a year, would contribute to the retirement fund about $250 a year. The benefits paid to the annuitant and to the man in active service when he retires will be in substantially the same proportion.

The $104 that the annuitant denied himself during his working life would have purchased 1,040 loaves of bread at 10 cents a loaf. The $250 paid by today's worker into retirement would purchase about 1,130 loaves of bread at 22 cents a loaf.

So if we interpret the 2 contributions in terms of loaves of bread, we find them in the same relative position to their respective incomes. But under the fallacious theory that we pay fixed annuities, we give no consideration to the fact that the annuitant today can buy only 473 loaves of bread—a decline in purchasing power of over 50 percent.

Congress should give earnest thought to the continuing plight in which retired Government workers find themselves and enact legislation to give them a deserved increase in their annuities which will enable them to live with the dignity that is the inherent right of all Amercans. They paid for their security: It is not a gift. They are not responsible for the galloping cost of living. They served us well. Let us be as generous with them.

Problems of Farmers

EXTENSION OF REMARKS
OF
HON. JAMES E. MURRAY
OF MONTANA
IN THE SENATE OF THE UNITED STATES
Thursday, June 6, 1957

Mr. MURRAY. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD an article entitled "MANSFIELD Says It's Time That Benson Recognized Small Farmers' Dilemma," and an editorial entitled "MANSFIELD Points to Benson's Conflicting Statements," which appeared in the May 31 and June 1, 1957, issues of the Great Falls (Mont.) Tribune.

The editors of the Tribune share the concern of my distinguished colleague and myself over the Eisenhower-Benson farm policy.

They conclude that—

There is serious question whether the farmers or the country can afford many more of Benson's kind of forward steps.

There being no objection, the article and editorial were ordered to be printed in the RECORD, as follows:

[From the Great Falls Tribune of May 31, 1957]

MANSFIELD SAYS IT'S TIME THAT BENSON RECOGNIZED SMALL FARMERS' DILEMMA

Charging the economic welfare of the farmers has been "tossed back and forth like a football," Senator MIKE MANSFIELD said Thursday it is time Secretary Benson recognized the dilemma faced by the small farmer and did something about it beside viewing the situation "through rose-tinted glasses."

MANSFIELD issued the statement Thursday prior to returning to Washington, D. C. He arrived Wednesday to deliver the commencement address at the College of Great Falls graduation ceremonies and was conferred an honorary degree.

Continuing, MANSFIELD said facts and figures indicate "we have a Secretary of Agriculture and a department under his jurisdiction who tell completely different stories.

"Farm prices are 15 percent below the level prevailing when President Eisenhower took office. Farm surpluses are nearly three times as large as they were in January, 1953. The Federal Government spent more on agriculture in the first 4 years of the Eisenhower administration than in the preceding 20 years.

"In February, Secretary Benson indicated that organized labor was to blame for this situation when he said, 'When there is * * * strong demand for industrial products and a tight labor market, "soft" settlements of wage disputes are all too frequently made * * * These increased costs are passed forward to consumers in the form of higher prices, and backward to producers of many raw materials, especially farm products, in the form of lower returns.'

"However, the facts show that the farm family income dropped by $3½ billion between 1952 and 1956, but none of this drop

is accounted for by increases in farm production expenses. These expenses were $300 million less in 1956 than in 1952.

"The Secretary of Agriculture has indicated on a number of occasions that farm surpluses were under control. This is what the departmental figures show: Commodity Credit Corporation losses between 1933 and 1953 were $1.1 billion. CCC losses between July 1, 1953, and January 31, 1957, were $2.9 billion. The total CCC inventory on January 1, 1953, was $1.09 billion. CCC total inventory in February on February 28, 1957, was $5.7 billion.

"The CCC has three times as much corn on hand now as when Secretary Benson took office: 266,711,000 bushels in January 1953, and 967,122,000 bushels in February 1957.

"There were 127,779,000 bushels of wheat in CCC storage in January 1953. In February of this year, there were 798,918,000 bushels of wheat on hand.

"Secretary Benson and I agree that 'The family farm has long held an important place in the economic and social life of our country.' We do disagree about their present status. The secretary says that their relative position has not changed. I disagree; the family farm is disappearing from the American scene. Between 1952 and 1956, the total number of farms in the United States decreased by 460,000. The farm population dropped by over 2,000,000.

"During this 4-year period the farm debt rose $3.3 billion and the farm foreclosure rate doubled. Since 1952, the farm credit interest rates rose 108 percent over the 1947–1949 level.

"In regard to the Department of Agriculture's budget, the secretary says: 'We don't want to increase our department by any number of thousands. We only want to have the people who need to carry out the programs for which we have responsibility.' The department's modest employment increase has amounted to 16,258 persons since 1953 and the budget has risen over $2 billion since 1954."

[From the Great Falls Tribune of June 1, 1957]

MANSFIELD POINTS TO BENSON'S CONFLICTING STATEMENTS

Before returning to Washington Thursday from his speaking engagement in Montana, Senator MIKE MANSFIELD made some pertinent remarks on the dilemma faced by the small farmer. He charges that in the more than 4 years of the Eisenhower-Benson farm administration the economic welfare of the farmers has been "tossed back and forth like a football." He thinks it is time Secretary of Agriculture Benson did something about the situation besides "viewing it through rose-tinted glasses."

MANSFIELD says we have a Secretary of Agriculture and a Department under his jurisdiction who tell completely different stories. He points out Department statistics show farm prices are now 15 percent below the level prevailing when President Eisenhower took office and farm surpluses are nearly three times as large as they were in January 1953.

In February Secretary Benson indicated that organized labor was to blame for the squeeze of the farmer between higher costs and lower market prices. But Department of Agriculture statistics show that between 1952 and 1956 the family farm income in this country dropped by $3½ billion. But none of this drop is accounted for by increases in farm expenses. These expenses were $300 million less in 1956 than in 1952.

About a week ago Secretary Benson said in a U. S. News & World Report interview that we "must quit trying to legislate scarcity." But he adds that farmers have a right to expect Government help "in this period of transition."

In the same interview, Benson reports the total agricultural budget submitted for the coming fiscal year exceeds $5 billion. And he points out that this is an amount equal to nearly half the total net income of all the farmers in the nation. He concedes, however, that "much of this huge budget does not go to the farmer at all."

He says also, "it is becoming increasingly clear that our present complicated legal formulas governing acreage allotments and price controls have failed in their principal purpose—to maintain an adequate farm income."

That series of statements could be supplemented by a lot of others from Secretary Benson. But they all add up to the most expensive Federal farm program we ever had and results distinctly on the deficit side.

Benson says his program was developed after calling on more than 500 people to participate in a study of farm programs.

It can be added that Mr. Benson was pretty choosey about what part of their recommendations he would accept.

Now he says the program is a failure and adds: "It is time for Congress to consider another forward step in farm legislation."

We will agree that it is time to consider a forward step but there is serious question whether the farmers or the country can afford many more of Benson's kind of forward steps.

Freight Absorption

EXTENSION OF REMARKS
OF
HON. WALLACE F. BENNETT
OF UTAH
IN THE SENATE OF THE UNITED STATES
Thursday, June 6, 1957

Mr. BENNETT. Mr. President, those of us who live in the West and Far West are keenly aware of the economic fact that our industry can neither prosper nor survive without the competitive opportunity of selling our manufactured goods in the consuming markets to the East. The right to absorb freight—that is, to meet the competitive lower prices of more favorably located sellers—is indispensable to our right to compete in the Eastern markets.

Necessarily, therefore, sugar-beet farmers in the West have been deeply concerned over the possible impact on freight absorption of pending legislation to restrict the right of sellers to meet lower prices of their competitors.

I have received correspondence from the Executive Secretary of the National Beet Growers Federation, made up of 19 local associations, of sugar-beet farmers in the States of Washington, Oregon, Montana, Idaho, Utah, North Dakota, South Dakota, California, Kansas, Nebraska, and Wyoming. He expresses his deep concern and confusion over the application of S. 11 to freight absorption.

He asks my help in straightening out the conflicting views given him on this subject, and in my effort to do so I welcome any possible assistance. Particularly, I hope that any report of the Committee on the Judiciary will fully explain whether freight absorption is outside the provisions of S. 11 or whether it is not any different than any other price reduction.

I ask unanimous consent to insert in the CONGRESSIONAL RECORD a letter from Richard W. Blake to the chairman of the Judiciary Subcommittee on Antitrust and Monopoly, dated May 16, 1957, and the chairman's letter of April 8, 1957, to Mr. Blake, both of which letters were sent to me by Mr. Blake.

There being no objection, the correspondence was ordered to be printed in the RECORD, as follows:

APRIL 8, 1957.

Mr. RICHARD W. BLAKE,
Executive Secretary, National Beet Growers Federation, Greeley, Colo.

DEAR MR. BLAKE: I am very glad to have the opportunity of giving you my reaction to your statement with regard to S. 11.

I believe that I understand from what you and others have said that freight absorption is essential in selling beet sugar. The hearings on S. 11 have made it clear that freight absorption is but a name for lowering prices in a given area in order to be competitive in that area. Such being the case, S. 11 would effect freight absorption precisely in the same manner as it would any other lowering of price to meet competition, that is to say, in the absence of conspiracy, and when done on an individual basis, such lowering of prices could continue so long as there was not such a discrimination between competing customers as would probably lessen competition or tend to create a monopoly.

I have emphasized the words "between competing customers" because in the campaign conducted by some manufacturing interests it has been stated over and over again that the lower price would have to be made throughout the entire country or among all customers. Such is not the purpose or effect of S. 11.

It seemed to me as I read your statement that your opposition might have stemmed from the misconception of the purpose and effect of the bill which I have tried to correct above.

With kindest regards, I am,
Sincerely,

ESTES KEFAUVER,
Chairman, Antitrust and Monopoly Subcommittee.

MAY 16, 1957.

Hon. ESTES KEFAUVER,
Chairman, Antitrust and Monopoly Subcommittee, Committee on the Judiciary, Senate Office Building, Washington, D. C.

DEAR SENATOR KEFAUVER: I appreciate very much your letter of April 8, 1957, but I must say that it leaves me even more confused about S. 11 than I had been previously.

I assume you have now changed your mind about the application of this legislation to freight absorption. Your letter of April 8 says that freight absorption is but a name for lowering prices in a given area, and presumably S. 11 would affect freight absorption in the same way it affects any other pricing practice. However, during the hearings last year you said several times that freight absorption would not be in any way affected by the enactment of S. 11; see for example, page 7, first paragraph, and page 252 of the 1956 Senate hearings on S. 11.

Our concern is over the propriety of absorbing freight to distant markets in order to meet prices already lawfully available to customers in those markets from more favorably located buyers. You say that this would be lawful under your bill as long as it would not properly lessen competition; but we cannot understand when such a competitive pricing practice would ever lessen competition. It would seem to me that this practice merely permits additional sellers to compete in the market and, when it is done individually in order to meet prices already lawfully available to the buyer, it could never lessen competition. Therefore, I cannot understand what situations your bill is intended to make unlawful

with regard to the competitive practice of freight absorption.

Your letter then underlines for emphasis "between competing customers" and suggests that price discrimination is unlawful only when it is between competing customers. After rereading your bill several times I do not find the phrase "between competing customers" in the bill; and even if it were included I do not see any indication of how we can ever determine when customers in Chicago are in competition with customers in, say, Kansas City.

There are many cases holding price discrimination is unlawful in the absence of injury to competing customers, and as you probably know in the Corn Products case the Commission found that candy manufacturers in Chicago were in competition with candy manufacturers in Kansas City.

Yours very truly,

RICHARD W. BLAKE,
Executive Secretary, National Beet Growers Federation.

Address by Senator John F. Kennedy Honoring the Honorable Herbert Hoover

EXTENSION OF REMARKS
OF
HON. EDWARD P. BOLAND
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 6, 1957

Mr. BOLAND. Mr. Speaker, one of the great misconceptions about the second Hoover Commission is that it undertook its studies with preconceived notions to curtail Government services to many citizens. I would like to call to the attention of my colleagues that Senator JOHN F. KENNEDY, of Massachusetts, who is well know to the Members of this body in which he served from 1947 to 1953, refuted misconceptions about Hoover Commission recommendations in his remarks given at a dinner honoring former President Hoover on February 4, 1957, during the third national reorganization conference, sponsored by the Citizens Committee for the Hoover Report, at the Hotel Shoreham here in Washington. Senator KENNEDY is well qualified to speak on this subject, for he was chairman of the Senate Subcommittee on Reorganization during the 84th Congress and he conducted many hearings on Hoover Commission legislative proposals.

Under leave to extend my remarks in the RECORD, I ask that Senator KENNEDY's speech honoring former President Hoover be included. It follows:

ADDRESS BY SENATOR JOHN F. KENNEDY, HONORING THE HONORABLE HERBERT HOOVER

I deem it a great privilege to be here tonight, not only because of my esteem for the guest of honor, but also because of my sense of gratitude for your invitation. Senators are not always asked to participate in ceremonies lauding economy and budget reductions. On the contrary, some schoolboys believe the Constitution gives the House the power to originate taxes and the Senate the right to originate spending. And Will Rogers always said that "It is not the initial cost of a Senator we have to look out for, it's the upkeep. He may be the deciding vote on an appropriation bill that will cost us more than 100 high-priced men."

One way in which we in public life can assist you who labor long and without notice in the cause of governmental economy and efficiency is to help clear up misconceptions in the public mind which impede your work. There are three popular misconceptions about the work of the second Hoover Commission which I would like to mention tonight.

First is the mistaken belief held by a few cynics that the greatest benefit given the Commission by former President Hoover was the use of his name and reputation. But anyone who makes this assertion doesn't know Herbert Hoover very well. He is totally unlike Senator John Sherman of Ohio over half a century ago, who was famous for two laws, the Sherman silver-purchase law and the Sherman antitrust law, although a contemporary Senator observed, "The first was adopted against his protest, the other he introduced by request. I doubt very much whether he ever read it, or, if he did, whether he ever understood it."

No. Herbert Hoover does not propose measures he has not read, nor approve those he does not understand. At the age of 81, when most men are firmly fixed to their rocking chairs, he accepted without hesitation the challenge offered by President Eisenhower to undertake once again an examination of the executive branch of the Government. And I have it from an unusually reliable source that he was a working chairman, probably the "workingest" chairman any commission or committee ever had. His prodigious efforts were reflected in the preparation of every draft and report, in the harmonizing of men with conflicting attitudes, and in the acceptance of their findings by the public, the Congress and the Administration. The name of Herbert Hoover has truly become synonomous with efficiency and economy in government and I am privileged to join with those gathered here tonight to pay tribute and thanks to you, President Hoover, for your notable achievements in the improvement of the operation of our Government.

Secondly, I want to mention a misconception which has resulted from the adverse comments of some pressure groups and politicians—and some of my best friends are politicians—and that is the notion that the Second Hoover Commission was a biased, reactionary group which reached preconceived conclusions in a slanted, controversial report that would deny services to millions of Americans. This position is best refuted by the facts. During the 84th Congress, a Democratic Congress, it was my privilege to act as chairman of the Senate Reorganization Subcommittee, to conduct hearings on many Hoover Commission legislative proposals and to participate in the Senate's discussion of them. Of the 59 measures relating to the second Hoover commission's recommendations which were referred to the Senate Committee on Government Operations, 36 were favorably acted upon by our subcommittee. After consolidations and approval by the full Committee on Government Operations, 16 bills, incorporating the objectives of these 36 bills on which the subcommittee had acted, passed the Senate, all by unanimous vote; and of those 16, 13 are already law.

Still another Hoover Commission measure I was privileged to cosponsor, with Senator LISTER HILL, far from being a step backward, established our Nation's first great medical library. Still another measure expanded, not reduced, funds for basic research in medicine and other fields. Whatever differences President Hoover and I may have politically or otherwise, this will never prevent us from working together in the interests of better government.

Third and finally is the misconception that must discourage you the most—the notion that since the Hoover Commission has completed its work the job is over. What happened to all those budget savings, taxpayers are going to be asking in a few months. But the job is far from complete, despite the gratifying progress which I reported to you. The legislative process in a democracy is a slow process, and it always will be. For as Winston Churchill once said: "Democracy is the worst form of government—except all those other forms that have been tried from time to time."

However slowly, there is every sign that we will continue to move ahead. A major piece of unfinished business is the bill which passed the Senate unanimously last year, and which provides that our national budgets be based on the actual expenditures to be incurred by the Federal departments and agencies during the budget year, the cost-type budget. This bill is important not only in terms of the savings it will bring, but even more significantly, I believe, in terms of developing greater cost consciousness on the part of all citizens, employees of the Government and otherwise.

If all of us, in the Congress, in the citizens' organizations and in the general public, can share but a small part of President Hoover's unselfish dedication to this task, regardless of critics and pressure groups and political considerations, then continued progress and achievement are ours. We may say of him whom we honor tonight as Edmund Burke said of Charles James Fox:

"He has put to hazard his ease, his security, his interest, his power, even his * * * popularity. * * * He is traduced and abused. * * * He may live long, he may do much. But here is the summit. He never can exceed what he does this day."

National Rivers and Harbors Congress

EXTENSION OF REMARKS
OF
HON. OVERTON BROOKS
OF LOUISIANA
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 6, 1957

Mr. BROOKS of Louisiana. Mr. Speaker, under leave to extend my remarks I present a report which I, as President of the National Rivers and Harbors Congress, made to the 44th annual convention held in the Mayflower Hotel, Washington, D. C., on May 18, 1957. It is as follows:

REPORT OF THE PRESIDENT, REPRESENTATIVE OVERTON BROOKS, OF LOUISIANA, TO THE 44TH ANNUAL CONVENTION OF THE NATIONAL RIVERS AND HARBORS CONGRESS AT THE MAYFLOWER HOTEL, WASHINGTON, D. C., MAY 18, 1957

Ladies and gentlemen of the convention, it again becomes my duty to make a report concerning the activities of the congress during the year since we last met on May 10–12, 1956, for our 43d national convention. I am happy to report that we have had another fine year marked by progress in every direction toward our goals.

Our 43d annual convention achieved a new high in enthusiasm for conservation of water resources. An outstanding event in the organization's long history of accomplishment, the gathering attracted 358 official delegates from 43 States, Hawaii, Puerto Rico, the District of Columbia, and one foreign country (Colombia, South America). In addition, there were several hundred others in attendance, guests, visitors, and representatives of the press and radio. Again Louisiana led the States in number of delegates, with 41; North Carolina was second with 30; while Ohio and Texas were tied for third place with 22 each.

The projects committee's all-day hearings opened the convention on May 10. The committee received testimony on 41 applications for approval of projects, of which it recommended for endorsement 16, estimated to cost $242,416,998. The committee put 10 projects in class II, meritorious; 6 in class III, expeditious report requested on authorized survey; 7 in class IV, survey recommended; and 2 in class V, not classified.

The resolutions committee, composed of one delegate from each State, dealt with a wide range of subjects as outlined in the agenda for the convention; gave careful consideration to each proposal; made many suggestions; and reached agreement on the committee's report which was further amended from the floor of the convention and adopted unanimously; thereby constituting the policy and program of the Congress for the ensuing year.

One other committee report attracted widespread attention, the report of the Special Committee on the Panama Canal, which devoted 2 years of intensive study to the problem and unanimously recommended construction of a sea level canal.

During the last year we have noted with growing uneasiness certain disquieting developments regarding the Panama Canal Zone. The backwash of the Suez crisis of last year has begun to lap at the shorelines of the Western Hemisphere. There has been a succession of significant events. We hear reports that elements in Panama are beginning to suggest that we share our sovereignty over the Canal Zone with them—despite the exclusive sovereignty granted the United States in perpetuity under the 1903 Treaty with Panama. Simultaneously, Soviet short-wave stations are beaming programs to Central America, demanding that the United States withdraw from the Canal Zone. And, more recently, we hear suggestions by a few misguided Americans urging us to turn over operation of the canal to the United Nations. The idea is that we would thus dramatize our good faith of last year, at the height of the Suez crisis when we suggested that all the world's key waterways be internationalized.

In the light of such developments, your president issued a statement through the National Rivers and Harbors Congress on April 28, warning that "we will have trouble in our own backyard if we fail to exercise the most skilled diplomacy." The NRHC has had a traditional and almost godfatherly interest in the Panama Canal project since its inception.

The United States has no territorial ambitions. At the same time, it has no intention of turning over one of its main assets to the United Nations in exchange for a mere pat on the back. I trust we have not become that softheaded.

Passage by the House of Representatives on May 22, 1956, of the civil works appropriations bill for 1957 was a fitting climax for our 43d national convention. The bill as reported by the House Appropriations Committee on May 21 carried a total of $787,453,000, a cut of only $26,000 in the budget estimates for the Army's civil functions (river and harbor improvement, flood control, shore protection, multipurpose projects, etc.) as contrasted with the reduction of nearly $60 million the committee recommended in these appropriations in the previous year.

When the bill was taken up on the House floor the next day, the chairman of the committee referred to the effort made the preceding year when Vice Chairman Simpson and I called a meeting of our colleagues to discuss the very drastic cuts made by the committee in the budget estimates, and said, in part: "Here we have a bill giving something to everybody. And I voted for it. A year ago we thought we had a very reasonable bill. * * * But the boys held a little caucus over it in the caucus room in the Old House Building. Both sides of the aisle got together and they agreed * * * and they came over here and ran over us like a bunch of wild steers. You knew, 2 or 3 experiences are enough. So I am going to 'jine 'em'—I am going to vote with them today."

Whereupon the House added $460,000 for 2 projects and took out $25,000 for 1, rejected a motion to recommit the bill, and sent it to the Senate. On May 28, 1956, accompanied by Representative PAUL G. ROGERS, of Florida, resolutions committee chairman at our 43d convention, and the executive vice president, William H. Webb, I appeared before the Public Works Appropriations Subcommittee of the Senate. The bill as finally approved carried a total of $856,727,000, an increase of $38,226,000 over the amount recommended by the budget and $65,969,000 more than was allowed by the House of Representatives.

The bill's total of $635,012,500 for the Army engineers' public-works program was the second largest amount ever made available for a single year, being exceeded only by $4,739,690 in the 1950 fiscal year. Construction of 235 individual projects and planning of 98 were provided $446,387,500 and $9,562,000, respectively, these projects being located in 46 States, Alaska, Hawaii, the District of Columbia, and the Virgin Islands. They included 121 continuing projects and 114 new starts and resumptions.

Representative ROGERS, Mr. Webb, and I made our second appearance before the full Committee on Public Works of the House of Representatives and presented our resolutions and projects committee's reports. On July 7, 1956, that committee reported favorably an omnibus flood control and rivers and harbors bill authorizing $80,604,000 for 29 navigation and 7 beach-erosion projects, and $1,263,267,000 for flood control and multiple-purpose projects in 21 river basins throughout the United States and in Alaska. Subsequently, the bill was passed by the Senate after the Public Works Committee of that body had added numerous projects, but it met with a veto by President Eisenhower because it included projects which had not been through all the processes of engineering reports and studies as now prescribed by law.

On June 27, 1956, both House and Senate agreed to a conference report on the bill to strengthen and extend the Water Pollution Control Act and authorize grants of $50 million per year to States, municipalities, etc., for the construction of sewage-treatment works, and the bill was approved by the President on July 9.

Also, on July 5, 1956, the Senate agreed to the House amendments to the bill authorizing $10 million per year for small flood-control projects and increasing to $400,000 the limitation for any individual project, and on July 11 President Eisenhower signed it into law.

Fourteen national directors attended the board meeting immediately after adjournment of our 43d national convention; reelected all national officers; authorized the president to appoint an executive committee of not less than 5 members, in addition to the budget committee; agreed to meet semiannually; and pledged cooperation with the national officers to increase the membership of the congress and thereby its effectiveness.

Efforts by the national headquarters office to increase the number of active, contributing members of the congress have continued throughout the year with marked success. Also, during the latter part of last summer and early fall, our treasurer, William G. Zetzmann, of New Orleans, organized a membership campaign in that city by selecting a small membership committee and corresponding with a number of firms, corporations, organizations, and individuals who it was believed would be interested in affiliating with the Congress and sharing in its work. Mr. Zetzmann will report to you a little later on this morning's program on this fine job which he and his associates in New Orleans did, and as you listen to him, I hope every one here will give consideration to doing a similar job in his own city and community. Only by this means can we expect to enlarge our membership and thereby equip ourselves with the necessary sinews to do the job that more and more is expected of our organization.

Today we detect a marked improvement in the public's attitude toward water development programs. The public seems more favorably disposed toward appropriations and authorizations for flood control and harbor projects.

Formerly, efforts were made to ridicule them out of Congress by using such terms as "pork barrel," "log-rolling," and "boondoggling." It tried to make the public believe that it was somehow wasteful and prodigal to spend money for flood prevention projects. Floods were frequently shrugged off as natural catastrophes. Somehow, it was supposed to be a divine virtue to endure them stoically. Of course, this was a comfortable and contented philosophy as long as the weather remained normal and favorable—and polite.

Within our lifetime it has taken about a half a dozen major catastrophes to bring those who were brain-washed back to their senses. There was the great Mississippi River flood of 1928; the Ohio River floods of 1936 and 1937; and more recently floods in California, the Connecticut Valley and in the Southwest. In addition, there was a series of vicious hurricanes that harassed the eastern seaboard and Gulf of Mexico areas.

Prodded by these catastrophes, we have made a sound beginning on a nationwide flood control program during the last two decades. Today, more than 400 flood control projects have been placed in full or partial operation. We have now accumulated sufficient statistics and experience with these projects to prove beyond a reasonable doubt that they have already justified their existence many times over.

The House Public Works Committee last month published a staff study showing the amount of damages estimated to have been prevented by existing projects. You should have a copy of that report: Costs and Benefits of the Flood Control Program. One table, based on figures supplied by the United States Army engineers, gives flood prevention figures for the 391 Federal projects in full or partial operation as of June 30, 1954. Over an average operational period of 11 years these 391 structures saved $7.3 billion. This is already twice the total amount spent for their construction. Assuming an economic life of 50 years, these projects will ultimately provide annual benefits of more than 3 times the annual charge for everything—amortization, interest, maintenance, and operation. These dollar-and-cent benefits do not take into account all the lives that otherwise would have been lost. Nor do they reflect such secondary satisfactions as wearing dry shoes, having dry basements, and keeping the mud off the living room carpet.

The National Rivers and Harbors Congress has just compiled similar figures showing flood savings during the past 12 months. In that period, the Nation has experienced floods in five areas: The lower Mississippi; the Ohio River Valley of Kentucky, Tennessee, Virginia, and West Virginia; the Tennessee River Valley; the Pacific Northwest; and more recently in the Texas-Louisiana area. Our survey, based on official figures, shows that existing Federal projects have prevented damages of from $230 to $280 million during the last year. (In my judgment, these figures are on the conservative side.) These savings represent more than one-third of the $635 million requested in

the pending budget for projects all over the country during the next fiscal year.

Congressional committees are now holding hearings on flood control and harbor bills. Many of you have made appearances. In the light of proven savings, as shown by the figures I have just cited, we can make an affirmative presentation. The Nation's water development program has entered the payoff period. We should take advantage of this fact by emphasizing all the more the benefits that are accruing each year through the prevention of floods.

With this sort of approach I am confident that we will find due consideration given to our case on Capitol Hill. In its commendable efforts to economize, I do not believe that Congress will penalize the flood and harbor program, because the program is now making such an impressive showing of tangible savings. These demonstrated savings represent economy in the true and wisest sense of the word.

At our last year's convention it developed that there was considerable interest in the study programs which are underway in various Government agencies dealing with the conservation, development, and use of our national water and land resources. Consequently, in an effort to assemble the data concerning these programs I addressed a questionnaire comprising 18 topics to the heads of 39 Federal agencies concerned with various phases of water and soil resource development and control. The more important replies when received were included in an extension of my remarks in the CONGRESSIONAL RECORD, and widespread distribution was given to this report.

The questionnaire, which was answered by 40 Federal agencies, revealed how many facets of the water problem have interested the Government. Research and experimental programs are going on in the fields of hurricane and tornado reporting, artificial rainmaking, conversion of salt water, long-range weather forecasting, nuclear fallout, industrial water supply and the reuse of water, stream pollution, atomic power as a new source of energy, atomic-propelled merchant ships, weather observations in the Arctic and Antarctic, and the declining water level.

Many of these programs are in the laboratory or pilot plant stage, but sufficient funds should be appropriated to continue and expand them. They are already contributing much toward the success of the older Federal water programs—flood control and harbor improvement, power development, and irrigation and reclamation. There is no way of telling when one of these obscure experimental programs will produce some revolutionary result that will alter our whole approach toward the important water problem.

On June 30, 1956, a simultaneous meeting of the executive and budget committees was held in Washington, attended by all of the members. The budget committee approved a budget for the year ending June 30, 1957, which was ratified by the executive committee, based on anticipated income of approximately $30,000. This was approximately the gross receipts for the calendar year 1956, which has heretofore been the fiscal year of the Congress, so we see that we still have to increase our efforts to reach the goal of $50,000 fixed by our board of directors as our annual budget.

On March 28 of this year a dinner meeting was held in the National Press Club in Washington, to which were invited the officers, directors, and members of the Rivers and Harbors Committee of the Washington Board of Trade. This meeting was attended by about 40 persons and indicated a very real and definite interest in our program on the part of the business people in the Nation's Capital. Following this meeting, Mr. Graydon F. Smart, of Shreveport, La., at my request, spent a week calling upon prospective members in the District of Columbia, and the indications are that our membership roster will be increased by a goodly number of local firms and corporations. Eventually we hope to expand this membership campaign to other areas throughout the United States, with the assistance and cooperation of our national and regional directors and State vice presidents.

A liberal platform plank on river and harbor development was submitted to the resolutions committees of the Democratic and Republican National Conventions; in the latter case, by the splendid cooperation of the Honorable Herbert G. West of the Inland Empire Waterways Association, who journeyed to San Francisco at his own expense and presented our proposed platform plank in person to the public works subcommittee of the Republican National Convention's resolutions committee. Both platforms adopted by the national conventions of the major political parties last August, and the campaign pledges subsequently made, promised vigorous action on this program. The year 1957, therefore, it has been said, should be "the year of fulfillment" in our long campaign for adequate control of the destructive floodwaters, and the conservation and development of our water and land resources.

This year, I have appointed two special committees to deal with particular phases of water resource development, and to give us the benefit of their views and recommendations as to the best method to pursue to reach our goals. I refer to the Committee on Irrigation and Reclamation, under the chairmanship of Representative A. L. MILLER, of Nebraska; and the Committee on Water Conservation and Pollution Abatement, chaired by Representative JOHN A. BLATNIK, of Minnesota. I am sure we shall all look forward with keen anticipation to the reports of these two committees this afternoon.

And now, in closing this report on the activities of our congress during the past year, may I express my gratitude to the many hundreds of individuals who have cooperated with us in advancing our program, not the least of whom have been the members of our advisory committees for the respective States and Congressional districts. These outstanding citizens, devoted to the public welfare, have all been recommended by their Senators and Congressmen as being able, ready, and willing to work with us, and we have been most fortunate to have had their assistance in carrying on our activities. We shall look forward to a continuance of their efforts, and in return, we pledge the best endeavors of our national headquarters office, as well as our regional and State offices, to carrying forward this great program for the sound and orderly development of our national water and land resources.

Communism

EXTENSION OF REMARKS

OF

HON. J. GLENN BEALL

OF MARYLAND

IN THE SENATE OF THE UNITED STATES

Thursday, June 6, 1957

Mr. BEALL. Mr. President, last Saturday, at a banquet of the Maryland Forty and Eight, I had the honor of delivering an address on the subject of communism. Among those in attendance were Chef de Chemin de Fer Chester Naumowicz, of Silver Spring, Maryland's first national president of the Forty and Eight; Charles W. Ardery, national secretary; and many patriots from all areas of the great Free State of Maryland. I ask unanimous consent that my remarks on that occasion be printed in the CONGRESSIONAL RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

SPEECH DELIVERED BY UNITED STATES SENATOR J. GLENN BEALL, OF MARYLAND, AT BANQUET OF LA SOCIETE DES QUARANTE HOMMES ET HUIT CHEVAUX, LE GRANDE VOITURE DE MARYLAND, ON JUNE 1, 1957, IN THE SOUTHERN HOTEL, BALTIMORE

Although I am a charter member of the American Legion post in my hometown of Frostburg, I never had the honor of belonging to the legion's famous Forty and Eight.

I am, however, a member of another body in which forty and eight is a rather magical number.

The other group to which I refer is the United States Senate, where 48 Senators, plus the Vice President, can give political control to a party.

I might mention, in passing, that leaders of both parties have been known to settle for a forty and eight combination quite similar to the one your fine organization commemorates, that is, 40 men, who ordinarily would vote in accordance with their party's philosophy, and 8 others, who occasionally might act like mules or jackasses.

I shall now drop this particular subject before some of you try to classify your speaker.

Whenever the newspapers write about the Forty and Eight they describe it as the legion's fun-loving organization.

Never permit yourselves to lose that description.

As Joseph Addison, the English poet and essayist, once said:

"If we consider the frequent reliefs we receive from laughter, and how often it breaks the gloom which is apt to depress the mind, one would take care not to grow too wise for so great a pleasure of life."

On the other hand, the members of the Forty and Eight and all of their legionnaire associates have another essential attribute, the ability to recognize when not to laugh.

This has been demonstrated time and again, especially in your determined and continuing fight against communism.

I consider it a privilege to be able to discuss that issue with you this evening.

As all of us know, democracy found a home in America when a group of men and women decided that they wanted to be free individuals instead of unquestioning subjects of a domineering mother country.

Today, however, there is a false belief in many quarters that we must accept all philosophies in order to preserve the spirit of freedom we have fostered.

Nothing could be further from the truth.

If democracies are to preserve their health, they cannot permit the growth of systems dedicated to their destruction any more than healthy bodies can be allowed to have cancer spread through them.

That is why we in this country must never yield to the false propaganda that our four freedoms must embrace all doctrines, including communism.

Other nations have failed to see that communism, like a disease, destroys the very area in which it is allowed to thrive.

Some of those areas have died because of their mistake.

Others are desperately ill.

Despite this, there are still persons who refuse to believe that communism is a threat in this country.

Perhaps these people failed to read a report on the matter which a Senate subcommittee released about 18 months ago.

In their report, the Senate investigators said:

"Those who declare that the Communist Party is no menace because its membership

and voting strength constitute only a fraction of a percent of the total membership and voting strength of major political parties, are deluding themselves and others."

Here's the reason why, and again I quote:

"A party member or sympathizer may be an official of a labor union with thousands of members which can tie up a given community or industry.

"He may be an unpublicized Government official who prepares memorandums on policy affecting the entire Nation.

"He may be an atomic scientist with access to highly secret information vital to our security.

"He may be a writer, a preacher, or a radio commentator with a vast audience.

"He may be an actor or the descendant of some well-known family or the leader of a community organization.

"In each case the individual's influence radiates to ever-widening circles with an effect similar to that of a stone thrown into a pool."

That, in the words of men who have studied the issue closely, is why communism is a menace.

It is well to remember these points, and it is also extremely important to keep in mind that the Communist threat is not always pointed at the atomic-energy installation in Oak Ridge or at some testing grounds in the West.

In 1951, for instance, the Federal Bureau of Investigation estimated that Maryland alone had 250 Communists and our neighboring State to the north had 1,441.

But that was 6 years ago, and the Senate report from which I quoted is now a year and a half old.

What, then, about the present—now—today?

When the members of the House Un-American Activities Committee began their recent hearings in Baltimore I contacted Federal Bureau of Investigation Director J. Edgar Hoover to ask about the current situation.

Mr. Hoover stated, as he previously had done before a Congressional committee, that there were 17,360 Communists in our country at the beginning of this year.

That is about 14,000 less than there were in 1951, but in the remaining group are the ones which Mr. Hoover described as the hard core.

These Communists, he emphasized, are as cruel and as merciless as their Russian masters.

Our problem, therefore, is twofold.

In the first place, we must decide what to do about the individuals who are accused of being Communists but who refuse to answer questions about their alleged connections with the party.

We must also determine how we can best continue our fight against subversion under today's laws.

Let us consider those points one at a time.

Less than a month ago, just several blocks from where we are now assembled, 22 persons invoked the first and fifth amendments in refusing to answer questions about their reported Communist activities.

One of them—a man accused of being the head of the Maryland-District of Columbia region of the Communist Party—was the same fellow who was one of my bitterest critics when I was in the House of Representatives and who later was sent to a Federal jail for violation of the Smith Anti-Communist Act.

I mention the fact that this man did everything he could to defeat me in order to show how an individual's personal feelings—in this case mine—can become involved in a matter such as this.

That is one reason why, despite our hatred of communism, despite our desire to protect our own free land, we must be extra careful not to allow ourselves to join a sort of "mental lynch mob" against those who employed the first and fifth amendments in their testimony.

Admittedly, this is an extremely delicate issue and the distinctions within it are quite narrow.

Therefore, before we proceed further, let us review the law and our philosophy of government.

First, we must remember that every person is presumed to be innocent until proven guilty.

Second, the Constitution specifically provides that a person is not obliged to testify against himself.

Third, there is no law which makes it a crime merely to be a member of the Communist Party in this country.

And finally, the courts are still testing laws passed to make it illegal for a person to participate in Communist activities if he has full knowledge of the aims of the organization.

Now, what does all of this mean?

It means, in the case of the persons named as Communists during the recent hearings, that these individuals are, at most, only suspected of something which itself might or might not be illegal.

The allegations have not been proven.

The illegality of their reported acts has not been established in the courts.

I am stressing—perhaps overstressing—these points because, in our constant fight against the menace of subversion, we must never inflict unintentional wounds on the philosophy of government we are trying so zealously to protect.

On the other hand, what should we do about men and women who use the first and fifth amendments to refuse comment on their alleged Communist connections?

We must, of course, try to find out what is behind the refusal of those individuals to cooperate in legitimate investigations, and I can assure you that this is being done most effectively by numerous experts of your Government and the patriotic citizens with whom they are working.

Then, however, we are faced with the dilemma which arises from our personal and business contacts with those who, in effect, have hidden behind the Constitution.

In most cases this becomes a matter of individual decision, and I would like to tell you how I, personally, feel.

Granted that it is the right of any person to protect himself from questions about his Communist connections by invoking the fifth amendment, it is also my right to hold such individuals in the utmost contempt, and I do so.

Yes, in keeping with the philosophy which underlies our democratic processes, it is our duty to respect the right which every man has to make certain decisions, even though those decisions might have originated within the walls of the Kremlin.

We are not obliged, however, to respect the decisions themselves or the persons who make them.

As I mentioned previously, the distinction is quite delicate, but on it rests the future of our form of government.

Before I change the subject, I would like to take this opportunity to commend publicly those employers who have taken direct action, which they sincerely felt to be justified, and have suspended those persons on their payroll who refused to cooperate with legitimate investigations affecting the security of our country.

Now, for a few minutes, I would like to discuss our day-by-day efforts to head off the ever continuing threat of Communist infiltration.

I know full well that most persons feel that their lives on farms or in factories or in offices will never cross the paths of subversives.

That is exactly the attitude that the Communists want.

Then they can move in and work under the protective cover of public indifference.

Frequently, in such cases, their camouflage is built around the very idea I just mentioned, the false belief of many persons that they have far more chance of meeting a man from Mars than a Communist.

Preying on such mistaken attitudes, the men who would overthrow our democracy masquerade as respectable citizens and distribute their false philosophy through various front organizations.

Suppose, for a minute, that a well-dressed man with an honest smile circulated through your neighborhood seeking signatures for a petition being circulated by the Maryland Committee for Peace.

Or suppose a motherly individual requested the support of you and your neighbors for the Methodist Federation for Social Action.

What would be the result?

Some persons, I'd be willing to bet, would go along with the petitioners as readily as they would with a March of Dimes drive.

But those are just two of the many groups that a Senate subcommittee has listed as Communist-front organizations.

The Maryland Committee for Peace might have had a noble-sounding title, but the peace it sought was a Soviet-brand servitude.

Likewise, the Methodist Federation for Social Action had nothing to do with any religion, and particularly nothing to do with any of the fine churches of Maryland.

Its only connection with a religion, if that word can be used at this time, was its link with the godless creed that has been promoted by the rulers of the Soviet.

Nevertheless, good, sincere Americans, believing that Communist infiltration is conducted strictly on a cloak-and-dagger basis within the secret agencies of the Government, added their endorsements to both groups.

Our task, therefore, becomes clear.

We must maintain a strict, unrelenting vigilance.

We must guard against the men who pledge allegiance to our flag with their right hands while stealing the secrets of our security with their left.

Remember, the wall of defense installations which protects our shores cannot protect us from such conspirators.

They work within the walls.

Our most advanced weapons are ineffectual in these cases, for the enemy is looking over our shoulders as we prepare to fire.

I repeat, therefore, that our major defense is vigilance.

More than that, though, we must step up our offensive in the fight.

One of our Nation's greatest troubles today, I think, is that we are beginning to develop a listless attitude toward good old-fashioned patriotism.

Don't be ashamed of your feelings.

Wave the flag.

Sing the national anthem.

I know it seems unnecessary to say these things to Legionnaires, but I would rather repeat them too often than take a chance on missing one individual who might profit by my remarks.

Now, in closing, I would like to express my personal thanks to you fellow Marylanders, who, as good Americans and good Legionnaires, have been doing so much to guard the strength of our Nation.

Keep up the excellent work.

Wilbur D. Mills

EXTENSION OF REMARKS
OF

HON. JAMES W. TRIMBLE

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 6, 1957

Mr. TRIMBLE. Mr. Speaker, one of the outstanding men of the Congress is our colleague from Arkansas, WILBUR MILLS. We of the Arkansas delegation are proud of him and are grateful for the many things which he has done for us through the years. He is always going about doing good.

Lately an honor has come to him which adds to our pride and adds also to his imposing record of service. On June 1, the University of Arkansas conferred upon him its honorary degree of doctor of laws, an honor well deserved.

At the same time, he delivered the commencement address to the graduating class. Those who heard that address tell me it was enthusiastically received by everyone and was an inspiration to the young graduates. I am delighted to insert that address in the RECORD as part of my remarks.

The address follows:

COMMENCEMENT ADDRESS BY WILBUR D. MILLS, UNIVERSITY OF ARKANSAS, JUNE 1, 1957

Friends, I am deeply grateful for having been invited to participate in these exercises today. The American calendar is crowded with observances, but academic commencement ceremonies, I think, best express the continual beginning which is the basic ingredient of life. It is epitomized in the graduating class, the instrument for transmitting our cultural heritage to the future, enriched and strengthened. To be asked to assume an active role on this occasion, therefore, is indeed a privilege of which I always shall be proud.

I have alluded to our cultural heritage. It is, of course, a concept of tremendous dimensions, but I want to offer some brief remarks about just a few of its aspects which events in recent years have cast into critical focus.

This Nation has achieved its greatness through the spirit of its people. It is a spirit of the quest, the seeking out of opportunities and challenges. Opportunities and challenges do not exist as objective conditions of life anywhere in the world. They are created, sometimes out of of material circumstances, sometimes out of spiritual and cultural demands by a people for whom challenge and opportunity are synonymous descriptions of a basic attitude toward their surroundings. It is the spirit of a people who are vigorous and vital, who live instead of merely exist their allotted time. It is the spirit which makes progress possible and inevitable.

It is, however, a spirit which must be carefully nurtured. Paradoxically, the more effective this spirit in providing the Nation with material and cultural riches, the greater the threat to its perpetuation. Self-satisfaction may replace self-confidence, contentment may replace venturesomeness, smugness over past achievements may replace the drive for further accomplishments. The community may grow fat and lazy, short of wind, and hard of artery. Organic weakness, when finally recognized, may lead to fear which either paralyzes or panics and, in any case, hastens breakdown. The therapy required to restore good health may become increasingly rigorous, and may, therefore, be too long postponed. The spirit may expire and with it the greatness it had produced.

Are we now so threatened? In material terms, the progress which both reflects and depends upon our striving has in recent years been impressive indeed. Since the end of World War II, our annual production of goods and services to meet material demands has increased by well over $100 billion, in real terms. Over the period, gross additions to our private capital stock amount to the fabulous total of $591 billion, in 1956 prices. Similarly measured, we have consumed almost $2½ trillion of goods and services while our Governments—Federal, State, and local—have added $350 billion in products.

As reflections of our material achievements there are other measures which may be even more impressive. The physical aspects of our daily lives have drastically changed in recent years. Our foods are grown, processed, and delivered into our hands with the use of machines, techniques, and processes which did not exist when those receiving their diplomas here today first began their schooling. Our clothes have changed similarly. Our automobiles would have been regarded as designers' and engineers' fancies less than half a generation ago. Our homes, offices, factories, and stores are built and equipped along markedly different lines from a few years ago. We accept with equanimity the production of complicated commodities without the immediate agency of human hands. Man today can cross this continent in 3½ hours and we can be sure that tomorrow he will do it in 2½ hours. We are soon to explore space as confidently as 20 years ago we explored the stratosphere. Our progress with things is rushing us headlong into transforming the very face of the world.

There are grounds, therefore, for confidence that in its materialistic manifestations, the quest for challenge and opportunity is receiving abundant encouragement. Indeed, according to some evidence the very process of seeking new ways to satisfy wants is, in itself, becoming an automatic or a built-in feature of our economic life.

There is, however, another side of the question—whether we may have as much confidence in our advancement as human beings. Our world is full of pessimists—those who believe that every silver lining must have its cloud. They are loud and long in their assertions that our concern with and achievements in advancing our material well-being in fact are escape outlets for energies which, had we not become intellectually and culturally timorous, we would apply in improving human beings instead of machines. They contend that we devote ourselves to the superficial lest we be faced with the realization that we are early 20th century people fast becoming antediluvian in a 21st century physical environment.

I would not minimize the importance of our material achievements. I have no faith in the romantic notion that truth and beauty can be cultivated in surroundings of economic retrogression. Nor would I suggest that our spiritual and intellectual resources are so limited that we cannot find and meet challenges for improving simultaneously our cultural and material circumstances.

Our native State affords a magnificent illustration of this contention. We are, I believe, experiencing a great drive forward in many fields of human endeavor. Between 1950 and 1955, for example, wage and salary disbursements to Arkansas employees in farming have increased almost 8 percent, in contrast with the national average which experienced a decline. Wage and salary payments in Arkansas in mining and manufacturing have increased at a faster rate since 1950 than the average for the economy as a whole. Total civilian income arising from production in mining and manufacturing also increased more rapidly in Arkansas than in the Nation as a whole.

This university has taken an active role in the State's advance. It has assumed leadership in exploring and making known our regional attractions. It has brought under fresh and careful scrutiny the strength and weaknesses in our political, social, and economic institutions, and pointed the way to better fitting them to the demands of our people.

It has led a renaissance in our arts and sciences. Its own programs for meeting the educational requirements of our youth have grown and developed at a rate and in a manner that has served to focus increasing attention on the impressive potentialities of our community.

Recent experience in Arkansas, therefore, demonstrates that balanced growth in material, cultural, and intellectual resources is feasible and eminently desirable.

Looking at the broader community of the Nation as a whole, however, the scene is not so encouraging. We have learned to wage the ultimate in war, but we apparently have not been able to find the boldness and daring needed to achieve a meaningful peace. We thrash over the problems of sharing our material progress with the underdeveloped nations of the world, but when these problems, in one small part of the world, become really difficult we seek to resolve them not with insight, nor with understanding, nor with new concepts, but with dollars. We observe fundamental changes occurring in the structure of our economy and instead of finding in this situation a challenge and an opportunity to achieve real progress, too often we cloak our minds in dogmatic assertions that this price support program is superior to that one. Too often we react to movements for profound changes in life by engaging in the "Yes; you will"—"No; I won't" disputation of small boys.

I think we must, therefore, be concerned with evidence of an increasing hesitancy to explore the universe of ideas. I do not know its source. It has been suggested that the war years, following hard on a decade of depression, so whetted our appetites for things that we have been compelled to devote an unduly large proportion of our resources to the satisfaction of such wants. It is also claimed that we have been made fearful of intellectual innovation by the unhappy consequences in Eastern Europe and in China of its radical extremes. Some argue that intellectual and cultural inertia are the consequences of prolonged prosperity, draw dismal comparisons with prior eras from antiquity up through the 1920's, and conclude that catastrophe is required to reinvigorate our spirit.

It is impossible to evaluate such explanations. But regardless of the extent to which we have allowed our progress in the humanities to lag behind our technological achievements and regardless of the causes, the means for overcoming this deficit are here before us today. They are this great educational enterprise and its products. It is up to them and similar institutions throughout the Nation to refocus the attention of us all on the really great opportunity of our time—the orientation of man and his society to circumstances of growing material abundance. They must renew our intellectual capital stock. They must restore the dwindling eminence of achievements in the arts and in pure science. They must prove anew the worth and great rewards in striving for new ideas and fresh concepts about man's proper relationship to his fellows and to his physical and cultural environment.

The applied sciences and technologies have compressed space and time and shown us, in physical terms, a single world community. It now remains for other intellectual disciplines to show us how man may realize the advantages of one world.

This, I believe, is the proper outlet for our restless spirit. Whether we exploit it adequately, I think, will have much to do with whether our greatness as a national community is perpetuated and extended or whether future generations know us as a race of tinkerers and gadgeteers.

I have emphasized the desirability of progress and change. In doing so, I do not intend thereby to dismiss the established and the old. Our inheritance can hardly be discarded without our becoming impoverished. It is the foundation upon which we must build. But we must continually examine this foundation to be sure it is properly reinforced so it may be preserved for the future.

I have set out, I know, the notion of restiveness and of striving as a way of life that is inherently good and indeed necessary. Yet, all of us appreciate that ultimately we are seeking tranquillity. The paradox is more seeming than real. As we recognize the sources and consequences of our striving, this understanding provides us the strength and confidence upon which peace—both within and external to ourselves—truly rests. We must be careful to avoid confusing resignation, indifference, or fatigue with tranquillity. We cannot accept tranquilizers as a substitute.

I have expressed my hope that this generation, whom we honor here today, will improve our perspective and extend our horizons. We give into their charge our quest for challenge and opportunity upon which our future depends. We ask them to improve the balance in our cultural, intellectual, spiritual, and material achievements. Finally, we convey to them our very best wishes—that they will live all the years of their lives.

Thank you.

Statehood For Alaska

EXTENSION OF REMARKS
OF

HON. A. L. MILLER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 6, 1957

Mr. MILLER of Nebraska. Mr. Speaker, under leave to extend my remarks in the CONGRESSIONAL RECORD, I include herewith the text of an advertisement printed in the June 4 edition of the Washington Daily News over the signature of the Daily Alaska Empire, a newspaper published in Juneau, Alaska.

Publication of this advertisement as an open letter to me adds one more chapter in the long drawn out controversy over statehood for Alaska. I have asked publication in the RECORD for the reason all of us in Congress are highly interested in the Alaska problem. The statehood bill has been reported out of committee and I assume it will soon come to the floor.

The Empire advertisement levels some specific charges at me and some general charges at the Congress.

In reading this open letter and my answer into the RECORD, it is for the purpose of clarifying the atmosphere. The text charges me with the reversal of position on statehood for Alaska and on a suggested 20-year income-tax moratorium for the Territory. This is not true.

In the long story of the battle for admission of Alaska I have been in favor of statehood. However, I have asked to probe every possible angle to get the full truth of the possibilities of the Territory and the desires of the citizens.

The open letter signed by the Daily Alaska Empire follows:

Congressman A. L. MILLER,
House Office Building,
Washington, D. C.

DEAR CONGRESSMAN MILLER: Monday we printed your complete reversal to your earlier statements.

The reversal stated you would not vote for a 20-year tax moratorium for Alaska.

In your statements of a few weeks ago which we published on page 1 of the Daily Alaska Empire, you informed us you didn't believe the allegation made in Congress that all people of Alaska were for immediate statehood. Therefore, you were going to ask that a poll be made which would express the wishes of the Alaskan people.

Earlier you suggested that it was possible to have a 20-year tax moratorium so industry could grow. You also stated that if statehood was granted to Alaska, undoubtedly the 15,000 Federal employees in Alaska would lose their 25-percent, tax-free bonus, now given all Federal employees because of the high cost of living.

Every constitutional authority points out that under statehood no Federal employee or member of the armed services can receive this 25-percent bonus.

It was you who started this whole investigation. You reported back to all newspapers in Alaska and all radio stations in Alaska that the people in Alaska were more than 2½ to 1 against statehood at this time. Now, you come along and try to blast the hopes of these honest Alaskan people, repudiating the findings of your own survey which came from more than 50 towns in Alaska.

None of this is to question your honesty or your integrity. We believe all Senators and Congressmen are by far the highest type of citizens that we have in the United States. At the same time, we realize a few will play politics for what is called political expediency.

For the information of all Members of Congress, the people of Alaska were never given a right to vote except on a loaded question. All of us are for statehood. But, the real questions are: When do we want statehood; How much will it cost; When can we afford it; and Under what conditions? These questions have never been presented to the 50,000 taxpayers in Alaska.

We now pay the United States Treasury $44,500,000 according to a statement to Congress by Hon. Fred Seaton, Secretary of the Interior. This places Alaska 42d on a per capita basis of average income against the other States. But with the cost of living here, 25 to 60 percent above the other States, the average income of the people in Alaska would actually be below the sharecroppers of Georgia, South Carolina, and Mississippi.

During 1956 the United States Department of Commerce reports that Alaska received or spent an approximate $500 million divided as follows: $8 million from farming; $34 million from forest products; $78 million from fish; $24 million from mining. Eight million dollars of this amount was merely sand and gravel. But the big figure was Federal spending of $355 million. This gives you some idea that an area over twice the size of Texas and more than one-fifth the size of the United States, doesn't have any substantial income except Government spending. This $355 million did not include all of the Government doles and subsidies for Alaska.

Actually, over half the people of Alaska are connected directly or indirectly with the Armed Forces. They are here for about 3 years. Previous to the second war, only 40,000 people lived in Alaska other than the natives. The reason I separate the natives is because a great deal of the money spent in Alaska is on basis of assistance to the natives. Aside from this, some of our most outstanding and distinguished citizens in Alaska are Indian and Eskimo people.

Congress is not only going to vote on what is good for Alaska but they are going to vote on what is good for the United States.

Figures show that the Federal spending in Alaska is actually $10 against $1 paid to the Federal Government by the taxpayers of Alaska.

The 48 States are subsidizing Alaska on a basis of $10 to $1.

Our suggestion to the Congressmen and Senators is that they approach this problem on a realistic basis—what is good for the United States is good for Alaska.

The suggestion is that Alaska's economy be changed from a Federal subsidized economy of a 10-to-1 deficit basis to an economy which will attract the development of the natural resources of Alaska. Then Alaska will help support the Treasury of the United States rather than deplete it, as is now the case.

The people of Alaska are not looking for something for nothing. They realize immediate statehood will eliminate $30 million cost-of-living bonus from the Federal employees and members of the armed services.

A per capita cost of government basis for Alaska under statehood shows that the States of Washington or Oregon, using their cost of government figures, would cost the taxpayers of Alaska $60 million additional to operate as a State. This would break 90 percent of the people of Alaska.

A 20-year tax moratorium would merely be a means to the end. Industry could be built, and at the earliest possible moment Alaska would become a State. With industry built up, this 10-to-1 deficit spending for Alaska out of the pockets of the other States would come to an end, with the development of our natural resources.

We would then pay into the Treasury of the United States a probable $400 million a year rather than $44½ million. The people of Alaska do not want to do anything less than share equal responsibility to the greatest Government in the world. We consider paying taxes a privilege.

All Western States were built on grants or subsidies. All railroads were built on subsidies, the airlines, steampship lines; in fact, all of the big airplane manufacturers not only were built on subsidies and grants, but continue to look to the Government for subsidies and grants. We in Alaska merely want to approach this problem from a realistic basis.

The most outstanding men in Congress continue to stand up and be counted in that it would be possible to develop Alaska's natural resources and develop industry on the basis of a 20-year-tax moratorium.

This letter is intended also for these honorable gentlemen of Congress who stood fast and voted against immediate statehood, the Honorable JAMES A. HALEY, the Honorable JOHN R. PILLION, the Honorable WALTER ROGERS, the Honorable J. T. RUTHERFORD, the Honorable GEORGE A. SHUFORD, and the Honorable J. ERNEST WHARTON.

We want to call your attention to the recent action of the Alaska Department of the American Legion, which last week in territorial convention at Skagway eliminated the word immediate from an official resolution urging statehood for Alaska.

Most Congressmen and Senators realize that of the 33 strategic metals necessary to national defense and security of our Nation, all but 3 are in abundance in Alaska. But they cannot be developed because of the 25 to 60 percent higher cost to do business in Alaska than in any other area of the United States. For example: The largest metropolitan newspaper to come to Alaska is the Seattle Post Intelligencer. It costs $1.71 a week to buy the Post Intelligencer in Juneau. Farther north and west, the price is even higher, more than $2 per week. This gives you a thumbnail idea of costs and why only $16 million in minerals were mined in Alaska last year.

The defense of our Nation depends on an abundance of these strategic metals. One of the most necessary metals used for guided missiles and aircraft is titanium. This we have in abundance, also cobalt, nickel, and many other metals. These are in short supply elsewhere and are awaiting a realistic approach so they can be profitably mined.

A tax moratorium is merely a means of allowing private industry to come in and develop this country rather than having the Congressmen and Senators appropriating $10 of Federal money to spend in Alaska against receiving $1 back.

We are sure the voters in Nebraska are interested in a realistic correction of this Republican spending or Democratic spending, whichever you want to call it.

You charge that the Democrats in Congress are the ones who are delaying statehood. We wonder if both the Democrats and Republicans in Congress who are delaying statehood are not the real heroes who are actually trying to work this problem out on a realistic basis of what is good for not only Alaska but what is good for the other 48 States.

Actually, the records show in Congress that most of the Republicans and Democrats are opposed to statehood at this time. Some have suggested that an election be held on an honest basis, not on a loaded question, so the true feelings of the Alaskan people can be expressed.

Let us assure you, your survey or poll of the Alaskan people, you admitted, showed that over two and a half to one were opposed to statehood at this time. This represents the real feelings of all people in Alaska, and an election will verify it.

Your survey has at least opened the eyes of the Alaskan people. So, you have certainly contributed a great deal to this cause of truth, honesty, and integrity. In no way will your attempt to scuttle the will of the people, keep these Alaskan voters from being heard if given the opportunity to express themselves on immediate statehood for Alaska.

We challenge any one to come forward with a survey showing what statehood will cost. These facts have been kept from the public by a small group of greedy politicians who have been afraid to let the people know the truth.

The hearing in Congress about statehood should look into the money paid the Tennessee plan members without authority of law.

With sincere thanks and appreciation to you.

THE DAILY ALASKA EMPIRE.

My reply to the publisher of the Alaska Empire follows:

JUNE 6, 1957.

Mr. WILLIAM PRESCOTT ALLEN,
Daily Alaska Empire,
Juneau, Alaska.

DEAR MR. ALLEN: This is in reply to the open letter you published as an advertisement in the June 4 edition of the Washington Daily News.

I would like to take sharp exception to some of the statements embodied in the open letter. You charge, among other things, that I reversed my stand on statehood for Alaska; that I reversed my stand on a 20-year income tax moratorium for Alaska; that I am scuttling the will of the people, and that my actions have been a matter of political expedience.

Please permit me to take up these charges one by one.

In Alaska, I have been called both a friend and foe of statehood. As a matter of fact and a matter of record, I have long favored statehood for the Territory and since my first visit there have had a strong personal interest in the welfare of your people.

During the most recent committee hearings on the subject, I endeavored to make my position crystal clear. I said I continued to favor statehood and would probably again support such legislation but that I wanted to learn more of the thinking of the people at the grassroots. I said I would endeavor to find, through a variety of efforts, if the people of Alaska are ready. I believe I have found the answer.

My desire was to be completely fair with the people of Alaska, both those for immediate statehood and those against. I pointed both to the attractions of statehood and the hardships of statehood. I pointed out the high cost of living in Alaska might discourage new population and new industry. I pointed out that the extra pay for Federal employees would probably be forfeited. I pointed out special grants which are given to Territories would be lost to the new State, as Alaska then would be on an equal footing with the rest of the States. I also pointed to certain advantages of statehood.

The early testimony at the hearings seemed too conclusive, too pat. I could not conceive that practically all the people of Alaska were demanding statehood. It did not seem reasonable. In the case of my own State of Nebraska, there was bitter controversy over statehood in the middle of the past century and when an election was held, the margin in favor of statehood was very small, in fact, it was an even 100 votes.

Therefore it seemed to me there might be a question of loaded testimony. I conducted an unofficial poll, without expense to the Government and made possible by the fine newspapers and radio stations of Alaska. As you know, I asked this question, "Do you favor immediate statehood for Alaska?"

I received 1,916 replies to that question, with no duplication so far as I know. Many Alaskans wrote interesting and informative letters explaining why they were for or against immediate statehood. There were 522 votes in favor, 1,394 against. I conducted this poll to obtain information. At no time did I ever say the results of the poll would govern my vote.

Although opponents of immediate statehood led by a substantial margin, the poll was only one of several elements taken into consideration in determining the way I would vote. No unofficial poll can be accurately conclusive and, as you know, this poll did not cover all of Alaska.

In addition, there was some argument up there against the poll. It was both praised and condemned. Some called it political; some called it malicious. It was neither. It was a simple effort to learn the thinking of the people of Alaska and I deeply appreciate the replies, the fine letters, the sound reasoning, and the great public service rendered by the newspapers and radio stations.

I repeat, the poll was only one of the factors. One of the considerations was the reasoning of people in the United States. Each year I send out a questionnaire to my home State of Nebraska, covering some of the vital problems of the day. This year I asked my constituents, as 1 of 10 questions, if they favored Alaska statehood. The latest tabulation shows 80.7 percent in favor.

Another factor, of course, was the evidence presented in the hearings and my own study of Alaskan history and ambitions. Another vital factor was the approval of some of the amendments I suggested, including doubling the acreage originally planned for the new State, bringing it up to 182 million acres; repeal of the Jones Act on foreign shipping so Alaska ports would be treated the same as those in the States, and taking out the Tennessee plan of election of officials which I feel is unconstitutional. These changes made a better bill, adding more potential for Alaska to grow and prosper.

The move for an overall vote in Alaska on the specific statehood question was defeated, much to my regret. After taking into consideration all the various factors, I became convinced the Territory is ready to become a valuable member of the team of States.

In your letter you state the records show in Congress that most of the Republicans and Democrats are opposed to statehood at this time. Since no vote has been taken during this session, I am at a loss to know on what factors you base this conclusion. Personally I will wait until the ballots are counted.

Your second charge deals with a so-called reversal of stand on a 20-year income tax moratorium. I was a bit amazed when I began to receive scores of letters asking the moratorium, many saying they understood I approved such legislation. I am sure some of you folks in Alaska jumped to conclusions not based on fact. I have never endorsed an income-tax moratorium. I have many times called the plan not feasible.

I have said time after time that I will gladly consider any plan of action for Alaska. I was and am willing to listen to any suggestions for any Territory or for any State, but the fact I will listen does not mean I will endorse or vote for any plan suggested. I have said that I was willing to listen to any arguments for a plan to give tax advantages that might induce new industry and business to come to Alaska. I further suggested if the proponents of such plans were interested, they should write to their Delegate in the Congress, Mr. BARTLETT, but I repeat my earlier statement, "I could no more vote for an income-tax moratorium for Alaska than I could for one for my home State of Nebraska."

Now the charge of political expediency. It is far from the truth. I get no votes in Alaska. Mine come from the good people of the Fourth District of Nebraska. While statehood for Alaska is a matter of interest in my State, it is not a matter of controversy. The issue will gain no votes, lose no votes, for me in Nebraska. My activities in connection with Alaska are solely as a Member of the Congress of the United States, with a desire to serve the States and Territories to the best of my ability.

The Empire charges me with scuttling the will of the people. The charge is not true. Neither you, sir, nor any man on the face of the earth knows the will of the Alaskan people as of this moment. Neither my poll nor the last plebiscite nor the Tennessee plan election gave a a true and complete picture of the will of the people as a whole. Each represented a small segment of the total potential vote.

Apparently you would be governed by the result of my poll. I am appreciative of that. You charge the Tennessee plan election to be illegal. That is a matter for your people to care for in the Territory.

I want to assure you that I gave the hearings on statehood a great deal of time and study. That study was not confined to the hearings but extended many, many hours beyond. From my study I reached my conclusion.

Under separate cover I am forwarding to you a copy of the hearings on Alaska statehood. I believe you will find my trend of thought clearly outlined, with no endorsement of an income-tax moratorium.

I have always looked upon Alaska as a great Territory which could become a great State. I believe it will.

Sincerely yours,

A. L. MILLER,
Member of Congress,
Fourth District, Nebraska.

The Contribution of Weekly Newspapers to Rural Communities

EXTENSION OF REMARKS
OF

HON. J. FLOYD BREEDING

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 6, 1957

Mr. BREEDING. Mr. Speaker, millions of Americans in rural communities, in addition to receiving a daily metropolitan newspaper, find in their weekly newspaper a true source of local pride and information. The editor of the weekly newspaper and of farm publications is a respected member of community life. He has the recognized responsibility to use his considered judgment in interpreting both national, State, and local news to his subscribers. In a sense, he presents the conscience of the community.

At this time, I should like to pay tribute to this venerable form of newspaper tradition, which, in essence, constituted the very basis on which our present worldwide system of mass communications media is founded; in particular, I should like to recognize and commend the 68 weekly newspapers of the Fifth Congressional District of the State of Kansas: Anthony Republican, Argonia Argosy, Bushton News, Jacksonian, Conway Springs Star, Clark County Clipper, Belle Plaine News, Caldwell Messenger, Claflin Clarion, Cunningham Clipper, Attica Independent, Bucklin Banner, Chase Index, Western Star, Dighton Herald, Elghart Tri-State News, Ellinwood Leader, Hardtner Press, Haviland Journal, Hutchinson Record, Jetmore Republican, Kingman Journal, Rush County News, Lewis Press, Macksville Enterprise, Mineola Record, Mulvane News, Fowler News, Harper Advocate, Hoisington Dispatch, Johnson Pioneer, Kinsley Mercury, Lakin Independent, Meade-Globe Press, Montezuma Press, Ness County News, Great Bend Herald-Press, Kiowa County Signal, Haven Journal, Hugoton-Hermes, Leader-Courier, Kiowa News, Leoti Standard, Little River Monitor, Barber County Index, Mullinville News, Nickerson Argosy, Oxford Register, St. John News, South Haven New Era, Sterling Kansas Bulletin, Syracuse Journal, Ulysses News, Plains Journal, Protection Post, Sawyer News, Spearville News, Sublette Monitor, Greeley County Republican, Pretty Prairie Times, St. John Capital, News Chronicle, Stafford Courier, Sylvia Press, Turon Press, Wellington Monitor-Press, High Plains Journal, the Central Kansas Farm Journal.

On several occasions I have had the pleasure of inserting in the CONGRESSIONAL RECORD editorials from various weekly newspapers in my district. Today I would again like to insert several excellent well-informed weekly editorials which have come to my attention. I compliment their style, associate myself with their content, and ask, Mr. Speaker, that at this time they be incorporated in the RECORD.

From the April 3 issue of the Wellington Monitor Press:

WASHINGTON SNAPSHOTS—KEEP WRITING URGED

Demands from the voters for trimming the $71.8 billion budget—looking toward a tax cut—continue to pour in both to Congress and to the White House.

Members of Congress say the volume of mail is unprecedented—that it is generally spontaneous—that it reveals a surprising depth of feeling on the part of voters.

Already this demand for economy in government has borne fruit—the House of Representatives has made some cuts in appropriation bills.

OPPORTUNITY TO CUT

A new appropriation bill will appear either in the House or Senate each week; so there will be opportunity for additional cuts.

Economy leaders' advice to voters is: Keep writing the White House and Members of Congress urging reduction of the budget.

Meanwhile, President Eisenhower and Budget Director Brundage say they will seek to save money.

While defending his budget as a reflection of desires of the people, Mr. Eisenhower ordered an investigation to determine whether the rate of spending can be slowed down.

From the May 30, 1957, issue of the Mullinville News:

THE FARMER AND HIS HIRED MAN

Farmers who hire agricultural labor in 1957 should be aware of two changes in the social-security law which affect both the farmer and the hired man. First, the tax rate has increased from 2 to 2¼ percent of cash wages paid to be deducted from the employee's wages, and the employer's share is also increased so that he will owe 4½ percent instead of 4 percent as in previous years. The total tax is now 4½ percent instead of 4 percent.

Second, the hired man's wages are covered, if they amount to (a) $150 or more from one employer during the calendar year regardless of the length of time worked; or (b) if the man worked for the same employer on 20 or more different days his wages are subject to social-security tax regardless of the amount of wages.

For example, if a high-school boy worked on a farm on 20 or more days but earned only $140 his wages would be covered because he worked on 20 different days. On the other hand, if a man worked less than 20 days and earned $145 his wages would not be covered because he did not work for the one employer 20 days and his wages did not amount to $150. This is effective on wages beginning on January 1, 1957.

From the May 30, 1957, issue of the Rush County News:

HERE WE GO AGAIN

Watch out for another summit conference. The global scene-shifters, at home and abroad, are peparing for it. Russia frankly wants it, as Premier Bulganin revealed in a Soviet-Mongolian friendship speech in the Kremlin. That means every trick and every pressure will be used to include Red China.

President Eisenhower sees the Russians growing more serious in their attitude toward disarmament. Secretary of State Dulles suggested that we might begin the President's aerial inspection plan by flying over Siberia while the Reds fly over Alaska and northern Canada. Since such a plan would render our three radar warning lines in the north completely useless, we presume Mr. Dulles would have the Russians cross their hearts they won't drop any bombs without letting us know in advance.

There would be plenty to talk about, such as atoms for everybody at United States expense, trade with Red China, whether to fill in the Suez Canal, perhaps even the Korean truce. And as Bulganin says, "• • • experience has shown that such contacts are useful." Furthermore, since Geneva, we know to whom.

MAKES YOU THE JUDGE

We feel no compulsion to review Alger Hiss' book, In the Court of Public Opinion, beyond observing that its author emerged from the Federal Country Club at Lewisburg, Pa., with the standard attitude of the hardened convict—utter, complete innocence.

More newsworthy is the tempest among the booksellers stirred up by patriot Lyle Munson. He runs a service called the Bookmailer, which is sending a free copy of Whittaker Chambers' Witness to each buyer of the Hiss book ($5), and pays the postage on both. This, he says, is to provide a balanced court of public opinion. But it has also caused book dealers to demand free copies of Witness from Hiss' publisher, Alfred Knopf.

Only Munson, Box 101, Murray Hill Station, New York, N. Y., is this much of a hero.

From the Ulysses News published May 30, 1957:

SCANNING THE NEWS

President Eisenhower, according to word from the White House, got his dander up, and decided to make a fight to preserve his budget of $78.1 billion, the biggest budget in the country's history. The President, at the start of his campaign found himself in an almost untenable position. Even his chief of the Government's fiscal policy, Secretary Humphrey, has declared the budget could be cut considerably, and should be. When Members of the Congress, in a spirit of cooperation, sent a formal request to the President asking him wherein cuts could be made in the budget without endangering security or the President's programs, Mr. Eisenhower, rather superciliously sent back word that was not his job, but the job of the Congress. Had the President then and there, sent back a second budget message, saying that at the time the budget was presented at the beginning of this Congress, it appeared the money would be needed, but that after some consideration, he believed it could be cut, and had pointed out where, there is every likelihood the Congress would have gone along with him.

Now, with his program of legislation endangered, he found it too late to compromise and considered an all-out fight to retain his budget requests. Even his friends of the business community, members of the United States Chamber of Commerce, and the National Association of Manufacturers are demanding huge chunks be sliced out of the budget. But even these demands do not get at the real fat which could help the taxpayers. They cite cuts in foreign aid, farm supports, social services, aid to education, even school lunches. But the chamber of commerce and the manufacturers have not mentioned such fiscal matters as the hard-money policy of tight credit and high interest which added $1.2 billion to the budget for national debt interest; nor the 27½ percent oil depletion tax allowance which costs the United States Treasury some $750 million a year; nor the billions in rapid

tax writeoffs in 5 years instead of 20; nor the lease-purchase program which is costing the Government about double to own public buildings than it did when the Government built them itself on bid contracts; nor the policy of letting private industry do jobs which the Government has been doing itself.

Under this policy the Government has been divesting itself of many services which it has been doing itself for years, and turning these jobs over to private industry. When Government officials complained it cost them more money, Mr. Brundage ruled: "The decision to continue or discontinue an activity as being in the public interest should not depend primarily upon whether the product or service can be produced cheaper by the Government. As a general guide our policy is that apparent cost or savings should not be the deciding factor where adequate competition exists."

Of course it's anybody's guess, but the best informed people in Washington predict the budget will wind up with a cut of up to $4 billion, even though it might be that some of the top flighters might be hurt, like for instance, Secretary Charles Wilson, who says all this hue and cry for budget cuts by his friends, "Gives me a pain."

From the May 30, 1957, issue of the Nickerson Argosy:

The Bureau of the Budget is an important adjunct of the executive department of the Government today. As originally set up, the Bureau was intended by the Congress to assist the legislative department to keep track of the expenditures of the various departments by holding them in line under the law setting up the budget system.

As it works out, however, how the Budget Bureau operates largely depends upon who is running the department, and as it is being operated today, there are reasons to suspect that the various departments are being shown how much they can spend under the appropriations of Congress, rather than how much they can save the taxpayers.

A case in point is the Atomic Energy Commission. This important agency has spent some $15 billion dollars of the taxpayers' money in the development of atomic weapons, and is now at the head of the civilian and peaceful development of atomic energy for industry, medicine, and agriculture. The Chairman of the Commission, Adm. Lewis L. Strauss, is, to say the least, a man of strong convictions. Many call him arbitrary. He wears two hats, in that he is at once the chairman of a regulative and licensing agency of the Government, and at the same time, official adviser to the President on atomic energy. Since the weapons divisions of this agency is under direct command of the President and the Department of Defense, it cannot operate in the traditional manner as an independent agency of the Government engaged in civilian licensing and regulation, such as the Federal Communications Commission.

Chairman CLARENCE CANNON, of the House Appropriations Committee, says that in almost every expenditure it has made in the civilian applications of atomic energy the Commission has violated the Atomic Energy Act of 1954 and the intent of Congress. Speaking on this point Chairman CANNON said:

"The Commission's method of defeating the statutory direction has been to arbitrarily divide the various atomic electric power programs into two fiscal categories." With the approval of the Budget Bureau, the Commission sets up part of its electric power programs as "operating expense" which under the act does not have to be specifically authorized by the Joint Committee on Atomic Energy. The rest of the same project it sets up under plant acquisition and construction, which must be authorized by the committee.

"The result has been," Chairman CANNON said, "that for fiscal years 1956, 1957, and 1958 the amount appropriated and requested for the civilian power reactor program totals $236.8 million, of which only $40 million was authorized under authorizing legislation reported out by the Joint Committee and approved by the Congress. Thus it is readily seen that less than 20 percent of this program was authorized and more than 80 percent of this indivisible program was not specifically authorized."

CANNON pointed out that although the Atomic Energy Act contains a specific "no subsidy clause," on the construction of one reactor alone, the Commission in bonus prices for plutonium, waivers of fuel costs and other services had contracted with the private company to pay the company cash subsidies of $58,050,000.

In addition, Mr. Speaker, I have had the extreme pleasure of having had printed an article penned by myself in one of Kansas' finest pictorial periodicals, the Dodge City Pictorial, edited and published by Mr. Rolland Jacquart. With your permission, Mr. Speaker, I now express my commendation and appreciation to Mr. Jacquart, and submit the article referred to above for incorporation in the RECORD:

OUR HOME

Southwest Kansas has been my home for nearly 29 years. Mrs. Breeding and I moved to Rolla, Kans., with our two sons, Charles and Ralph, in August 1928. Southwest Kansas was a new country then and great portions of it were still in grass. It wasn't long after we started farming and ranching that we discovered the great productivity of this land. It seemed that the soil had everything in it that a plant desired and as long as we received plenty of rainfall we could grow abundant crops. Then the bad years of the thirties struck us, and everyone knows what that did to our country.

Many of us had the determination to stick it out, knowing the richness of the soil and that if rainfall ever came the land would again be productive. Along with many of our neighbors, Mrs. Breeding and I and our two sons weathered out the bad times in Morton County. We did everything possible to earn a few dollars in order to provide for our bare necessities. At that time we owned no portion of any acres in western Kansas. It seemed at times that it would be impossible for us to stay another year. However, the years rolled on, and beginning in 1939 and until 1949, the rains came and the snows came and our country was like a garden spot of the world. It was the reward for many long years of drought and suffering for those of us who had persevered. When the country came back we were there to come back with it because of our faith in this land—the country was good to us.

Now this country is again faced with a sad picture—drought, hard times, tight money, acreage controls of wheat and below-parity prices. The future doesn't appear too bright. Rainfall will correct a lot of these problems and the ever-increasing population of our Nation will certainly help. My advice to the younger people living in southwestern Kansas today is to stick it out somehow because eventually, as it has done before again and again, the country will come back. The land will return to its former abundance and your efforts will not be in vain. Many people say to me, "Why doesn't the Government take over the land, put it all back to grass, and force the people to leave." They don't seem to realize that this country, where we have raised our children and grandchildren and built our churches and our schools and our community life is a part of us. Indeed, to many of us this is the greatest spot in all the world, and we have no intention whatsoever of leaving it now or at anytime in the future.

I am fully aware of the fact that wheat and milo and livestock are our principal sources of income, and we will do everything we possibly can to help improve conditions and the general welfare of our High Plains area.

Irrigation now coming into this great area has all the possibilities of making this country the most productive of all. We are presently doing some research on a program to bring the water in from the Great Lakes or from the many rivers in Canada down through the High Plains area. This water will irrigate perhaps 20 million acres. At present many areas are getting underground water but eventually that may play out, so let's do some tall thinking. It may cost $10 billion to complete this program. In years to come we may need more food. It is something to think about. Southwestern Kansas will never be far away from us because that is our home and the people who live there are our finest friends.

The Case of a Strong Military Reserve

EXTENSION OF REMARKS
OF
HON. OVERTON BROOKS
OF LOUISIANA
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 6, 1957

Mr. BROOKS of Louisiana. Mr. Speaker, last week the House passed the defense appropriation bill for 1958. I had more than a passing interest in one of the provisions of the bill—providing funds for the Army Reserve.

The committee had recommended $197 million for this purpose, as contrasted to the Department's request for $207 million. However, the committee later offered a floor amendment providing that $10 million of the unobligated balance of the appropriation "Reserve personnel, Army, 1957" would remain available until 1958 and should be merged with the appropriation for the Army Reserve in the Appropriation Act of 1958.

I was pleased to support this amendment and it passed with a minimum of debate, because over a period of years the Congress has sought to build a strong Reserve force and at no time has the Congress failed to provide funds toward this objective.

Following discussions I had on the floor regarding the Reserve obligation, I found that some Members believed that the Army had summarily lowered the Reserve obligation in order to make some of its Reserve programs more attractive. Although it might not have been intended, the committee report seemed to lend credence to this belief.

I think I should set the record straight on this matter and, for those who may not be fully informed, I will try to briefly explain the total military obligation assumed by every young man upon entering military service, together with the resulting ready and standby obligations.

I believe I can best make myself understood if I go back to the enactment of the Armed Forces Reserve Act of 1952.

This act provided, for the first time, new categories of reserves. It established the Ready, Standby and Retired Reserves, and all members of the reserve components now must be in one of these categories.

The Universal Military Training and Service Act had previously provided for a total 8 year military obligation for all persons, below age 26, who were inducted, enlisted or appointed in the Armed Forces.

Therefore, it can be said that whereas the Universal Military Training and Service Act established the military obligation and provided for the active duty phase, the Armed Forces Reserve Act made provisions for the performance of duties in the Reserve after the reservist had been released from active service and while he remained in the Reserve components.

The Armed Forces Reserve Act provided that persons, upon release from active duty, would become members of the Ready Reserve for the balance of their military obligation, unless they elected to participate in accredited reserve training for a period which when added to the time spent in active service totaled five years, and if so they could request transfer to the Standby Reserve for the balance of their military obligation.

Perhaps an example would best serve to illustrate how the obligation could be "worked off" under the provisions of the Armed Forces Reserve Act. If a man was inducted for 2 years he was obligated to remain in the Ready Reserve for an additional 6 years, unless he chose to participate in Reserve training for 3 years. If he did this he could request transfer to the Standby Reserve at the end of 5 years—2 years on active duty plus 3 years active participation in the Reserve—for the remaining 3 years of his total military obligation.

By the same method a person having served 4 years on active duty need only serve 1 year participating with the Ready Reserve before he became eligible to transfer to the Standby Reserve for the remaining 3 years of his total military obligation.

Keeping in mind that the Universal Military Training and Service Act established the total military obligation for each youth at 8 years, it is important that we take special note of one provision of the Armed Forces Reserve Act. I have reference to section 269 (3) (2) of title 10, United States Code, which provides that the Secretary of the military service concerned, with the approval of the Secretary of Defense, may provide for a shorter period of Ready Reserve service for satisfactory participation in an accredited Reserve program.

Now, this simply means that whereas the total military obligation is set by law, and cannot be raised or lowered except by amendment to the law, the Ready Reserve obligation, within the total obligation, may be shortened or lengthened by the Secretary of the military service concerned, with the approval of the Secretary of Defense.

In 1955 the Congress enacted the Reserve Forces Act. This law changed the military Reserve programs in two respects, which are pertinent to this discussion. For the first time it provided two military obligations, the length of each depending on the age of the person when entering military service and the type of program in which he volunteers to serve. Thus, a person under the age of 18½ enlisting in the 6-month training program receives a total 8-year military obligation and, on the other hand, all persons over that age, regardless of the type of program entered, receive a 6-year obligation.

The 6 months training program was first instituted by this act. Prior to this a 2-year enlistment, or induction for 2 years, have been the shortest period of active duty service—disregarding 1-year enlistments authorized by the Selective Service Act of 1948 and implemented for only a short period.

Under the 6 months training program a person under 18½ years of age may enlist for a period of 8 years, 6 months of which will be spent on active duty for training with the remainder of the military obligation spent in the Ready Reserve where active participation is required.

In January of this year the Department of the Army administratively revised its reserve program by reducing the Ready Reserve obligation of the 6 months training volunteer from 7½ years to 3 years, with the remaining 4½ years to be spent in the Standby Reserve. In addition, the 6 months training program was opened to those persons between 18½ and 26 years of age with the Ready Reserve obligation set at 5½ years, which is the remainder of the total military obligation for all youths above 18½.

Mr. Speaker, I have taken this time to explain the background of the total military obligation and its relation to the Ready and Standby obligations because I felt it was necessary that incorrect impressions not be left in the minds of some of the Members.

There may be some differences of opinion on the necessity or advisability of providing a 6 months training program for youths 18½ years of age and over. To my way of thinking the Army has made a wise decision to open this program up for these young men. Today we find the manpower pool growing larger and larger. Statistics will show that many more young men are coming of military age with each year that passes. Since the draft calls are low we cannot escape the inevitable result that many young men will be able to evade the draft if a suitable program is not found in which they will volunteer.

To be sure, we are hopeful that more and more young men below the age of 18½ will volunteer for the 6 months' training program, and for that reason we recommended lowering the Ready Reserve obligation to 3 years in order to encourage them to complete their active military service at an early age, when it would least disrupt their personal lives. However, I felt that the 6 months' training program should also be made available to young men over the age of 18½, not to the exclusion of the draft but in a limited program so that those persons not needed in active service can be made available to the Reserve components, after a period of active duty training.

I have studied and worked with Reserve legislation during the entire 22 years of my service in the Congress and until this year I have never known the time when the Reserves have had so many volunteers. This is the day which we have been waiting for and working toward. Now that the ball is rolling I hope that it can never be said that the Congress impeded its forward progress.
